CHAPTER 100– GENERAL INFORMATION

CHANGE LOG

Replace	Title	Change Date	Effective Date
Sections: 110, 121, 150, 151, 152, 153, 160, 161, 170, 180, 191	Various	12/02/04	01/01/05
Section 140	Manual Updates	12/02/04	01/01/05
Section 153	Other Contact Information	12/02/04	01/01/05
	Medicaid Managed Care	12/02/04	01/01/05
Section 161	General Non-Covered Services	12/02/04	01/01/05

CHAPTER 100– GENERAL INFORMATION

12/2/2004

Sections: 110, 121, 150, 151, 152, 153, 160, 161, 170, 180, 191

Introduction: The terms beneficiary and recipient have been replaced by member throughout the entire manual.

Directions: Replace the pages containing these sections.

Change: Replace current sections with the updated ones.

Section 140

Introduction: The manual update process has undergone some changes. Also the contact phone numbers in this section have changed.

Directions: Replace the page containing this section.

Change: Replace old phone numbers with the new ones.

Section 153

Introduction: Some of the contact phone numbers in this section have changed because of the change in contractors.

Directions: Replace the page containing this section.

Change: Replace old phone numbers with the new ones.

Introduction: Added wording related to PCCM Program.

Directions: Replace the page containing this section.

Change: Add PCCM Program.

Section 161

Introduction: Removed Gastric By-pass from the section since this surgery is now a covered service under certain conditions.

Directions: Replace the page containing this section.

Change: Delete gastric by-pass as a non-covered service.

CHAPTER 100—GENERAL INFORMATION

TABLE OF CONTENTS

TOPIC **PAGE NO.**

CHAPTER 100–GENERAL INFORMATION

100 INTRODUCTION

This chapter provides a general overview of the Medicaid Program and organization of the provider manuals. It includes general information regarding the legal basis of Medicaid in West Virginia (WV), its relationship to other programs (for example, Children with Special Health Care Needs), provider telephone contact information, a general description of covered and non-covered services, its relationship to the Medicare Program, and basic information on reimbursement for out-of-state providers.

110 MEDICAID PROGRAM OVERVIEW

Congress established the Medicaid Program under Title XIX of the Social Security Act of 1965. Title XVIII of the Social Security Act of 1965 created Medicare. Title XIX created the Medicaid Program to provide access to health care for certain low-income individuals and families. Medicaid is funded and administered through a cooperative state-federal partnership. Nationally, the Centers for Medicare & Medicaid Services (CMS), operating within the U.S. Department of Health and Human Services (DHHS), provide federal financial assistance to the states, establishes minimal program requirements, and provides regulatory oversight. Although there are broad federal requirements for Medicaid, states have a wide degree of flexibility to design and administer their programs within federal guidelines. These guidelines are in the Code of Federal Regulations, Title 42, Sub-part C.

The WV Medicaid Program is administered pursuant to regulations promulgated under Title XIX of the Social Security Act, as amended. State administrative authority for the Medicaid Program is provided pursuant to Chapter 9 of the West Virginia Code. The Bureau for Medical Services (BMS) in the Department of Health and Human Resources (DHHR) is the single state agency responsible for administering the Medicaid Program in WV.

The mission of the WV Medicaid Program is to provide access to appropriate health care for Medicaid-eligible individuals. In its administration of the program, BMS strives to assure access to appropriate, medically necessary and quality health care services for all members while maintaining accountability for the use of resources.

BMS establishes eligibility standards for Medicaid providers, determines benefits, sets payment rates, and reimburses providers. BMS also coordinates with other entities in DHHR to develop and implement Medicaid-related programs and services. In particular, BMS contracts with the Office of Families and Children to determine eligibility for Medicaid. BMS monitors and tracks program information related to member eligibility, service utilization, program expenditures, fraud and abuse, and financial management.

BMS maintains the WV Medicaid State Plan and files amendments to the plan with the appropriate regulatory authorities. If BMS identifies the need for major change to the Medicaid State Plan, the Medical Services Fund Advisory Council, appointed by the Commissioner, reviews the change and makes appropriate recommendations to BMS prior to implementation.

120 PURPOSE OF THE MANUAL

WV Medicaid provider manuals contain detailed information about the WV Medicaid Program. The manuals document and communicate current policy requirements applicable to Medicaid-covered services as provided by specific provider types.

The following information is included:

- General and specific provider information
- Service delivery requirements
- Provider participation requirements
- Covered services, exclusions, and limitations
- Reimbursement and billing instructions.

All Medicaid providers, BMS employees and contractors, and other interested parties are encouraged to familiarize themselves with the content of applicable manuals by types of services.

121 ORGANIZATION OF THE MANUAL

The WV Medicaid provider manuals are organized consistently for all providers and services. The following is a listing of the organization and format of each manual:

- **Cover Page** – The cover page identifies the types of services included in the manual.
- **Table of Contents** – The table of contents follows the cover page. Chapter titles, chapter subtopics, and appendices are identified and labeled to facilitate information retrieval.
- **Chapter Titles** – There are a minimum of seven chapters in each manual. The right corner of the page header identifies whether the information contained in the chapter applies to all or specific providers.

The Chapter Titles are:

- Chapter 100 General Information
- Chapter 200 Definitions
- Chapter 300 Provider Participation Requirements
- Chapter 400 Member Eligibility
- Chapter 500s Covered Services, Limitations, and Exclusions
- Chapter 600 Reimbursement Methods
- Chapter 800 General Administration

130 OTHER RESOURCE INFORMATION

The manuals summarize the description and administration of the WV Medicaid Program. BMS makes every attempt to ensure that the information contained in the provider manuals is concise and reliable as of the date of issuance. Compliance with all applicable WV state laws, regulations, and administrative guidelines, as well as applicable federal laws and regulations, is required. Specifically, you must consider the content in this manual, along with applicable federal and state laws and regulations, when determining actions or interpreting guidelines.

140 MANUAL UPDATES

BMS will distribute new, revised, or clarified information, as applicable to all or specific manuals, using the Medicaid Provider Manual Update process. The update notification from BMS will include information related to the manual change and identification of the actual section number(s) to replace or add to the manual by chapter, appendix, or attachment. Updates may be communicated by letter or posted on BMS' website (www.wvdhhr.org/bms).

Retaining, filing, and understanding the WV Medicaid Program Instructions and manual revisions are your responsibility. If any information is not clear or not understood, please call the Medicaid Provider Services at either of these numbers:

- (304) 348-3360
- (888) 483-0793

BMS maintains mailing lists of all providers and other interested parties who receive program instructions. To ensure that you receive all mailings or emails, it is essential that you notify BMS in writing of mail/email addresses or any type of health care or business organizational change. Refer to Chapter 300 for additional information on your responsibility for reporting changes.

150 WRITTEN OR PHONE INQUIRIES

Questions regarding the Medicaid Program including service, coverage, provider participation, member eligibility, prior authorizations, claims inquiries, or billing procedures may be addressed in writing or by telephone. Additional information is available on the DHHR website (www.wvdhhr.org/bms

151 VOICE RESPONSE SYSTEM

WV Medicaid's Voice Response System is an automated Provider Inquiry System. It is a quick and easy way to verify member eligibility and obtain Medicaid accounts-payable information. For the Voice Response System, call 1-888-483-0793.

Information on the Voice Response System is available 24 hours a day, 7 days a week. Your 10-digit Medicaid Provider number is required to access the system. Call and follow the voice prompts to:

- **Obtain recent accounts payable information**

Enter the 10-digit Medicaid provider number and select **Option 1**. The Voice Response System will provide cumulative payment information. This information can assist you in managing your receivables. It provides the amount and date of the reimbursement and the amount of the accounts payable (approved but not released for payment) as of the date of the inquiry. The Voice Response System does not provide specific claim information. For claim specific information, call the Provider services Unit.

- **Verify member eligibility**

Enter the 10-digit Medicaid provider number and select **Option 2**. Enter the member's Medicaid ID number from the Medicaid ID card and follow the prompts. The Voice Response System should be used each time a member requests service.

When the member's ID number is not available, you can follow the voice prompts and use the member's social security number or a combination of the member's last name and date of birth.

Request the Medicaid ID card from the member with each office visit and verify the effective dates, provider restrictions, managed care information, and other insurance information on the member's Medicaid ID card. Obtain the Medicaid Member Number from the ID card (MAID #) and call the Voice Response System to verify eligibility. Members enrolled in the Medicaid Health Maintenance Organization (HMO) program Mountain Health Trust (MHT) have the name and telephone number of the HMO on their ID cards. Members enrolled in the Medicaid Primary Care Case Management (PCCM) Physician Assured Access System (PAAS) managed care programs have their Primary Care Physician's name on their ID cards.

Verification of a member's eligibility does not guarantee payment for the services you provide. The services you provide, in addition to verification of the member's eligibility, must be:

1. Determined to be medically necessary
2. A covered Medicaid service
3. Prior authorized or approved when applicable
4. Referred or approved by the PAAS primary care provider (PCP) or HMO when applicable
5. Billed to the HMO for medical services provided to members enrolled in MHT
6. Properly documented in your office or facility medical records including, but not limited to, items one through four above, as applicable.

Additional information on your responsibility as a participating provider for verifying member eligibility is covered in Chapter 400.

152 CONTACTING PROVIDER SERVICES

BMS ensures that provider services and support services are made available through their fiscal agent organization. To obtain general information or make a general or specific inquiry regarding denied claims, claims status, accounts payable, program coverage, member eligibility, billing procedures, managed care issues, Electronic Data Interchange (EDI) training, or Electronic Funds Transfer (EFT) issues, call:

- (304) 348-3360
- (888) 483-0793

Provider Services Representatives are available Monday - Friday excluding state holidays from 8 a.m. to 5 p.m. Charleston providers should use the local provider services number. Provider Services staff will respond to requests during the call whenever possible. Occasionally, calls may be referred to another state agency for assistance. When the inquiry cannot be answered during the call, the representative will take the request and follow up appropriately at a later time. Consider the complexity of the request when waiting for the response. The response to the inquiry may be in writing or by telephone and may identify that further research and time is necessary to respond to the initial request.

EDI technical support is available to answer your inquiries related to: software issues, transmission difficulties, EDI enrollment procedures, claim format issues, EDI testing procedures, and rejected reports. To obtain technical support on electronic claims, excluding Pharmacy Point-of-Sale (POS), call 1-888-483-0793.

To obtain technical information regarding Medicaid's Pharmacy (POS) Program, call 1-888-483-0801. For technical support on electronic remittance vouchers, call Monday - Friday 8 a.m. to 6 p.m. at 1-888-483-0793. You may also access the EDI provider website, www.edihelpdesk@unisys.com, for additional information.

153 OTHER CONTACTS

Other important telephone numbers available for use by Medicaid providers are listed below:

- **Provider Enrollment**

  For information and requirements regarding participation in the WV Medicaid Program as a provider, contact the Provider Enrollment. Any change to information supplied in your provider enrollment application must be sent to BMS in writing. This includes changes to addresses, group affiliations, specialty services, telephone numbers, tax ID, Medicare provider numbers, etc.

- **Inpatient Admission Approval And Prior Authorization**

  To obtain inpatient hospital pre-certification and prior authorization of services, call 1-800-982-6334.

  This telephone number will connect you with the utilization management services manager for the WV Medicaid Program, including hospital pre-certification and prior authorization of applicable services. (Note: For HMO enrolled members, follow the respective HMO's admission approval and prior authorization requirements.)

  Pre-service review and prior authorization is performed for the following services:

  - General and Acute Inpatient Hospital Services
  - Organ Transplant Services
  - Psychiatric Inpatient Facilities and Psychiatric Residential Treatment Facilities
  - Inpatient Medical Rehabilitation Services
  - Intensive Medical Case Management
  - Home Health Services exceeding calendar year limits
  - Certain Durable Medical Equipment (DME), Orthotics and Prosthetics Services, and Medical Supplies
  - Speech Therapy
  - Physical Therapy and Occupational Therapy exceeding calendar year limits
  - Private Duty Nursing Services
  - Nursing Visits for Home IV Services
  - Outpatient Partial Hospitalization Services
  - Chiropractic Services exceeding calendar year limits
  - Nursing Facility Services
  - Aged and Disabled Waiver Services

- Home-based Community Services
- Certain General Dental Services
- Certain Vision Care Services
- Children with Special Health Care Needs
- Mentally Retarded (MR)/Developmentally Disabled (DD) Waiver Services
- Intermediate Care Facility (ICF)/Mentally Retarded (MR) Services.

In addition, you must obtain prior authorization on members who have exhausted their service limits. All services that require prior authorization are identified in the applicable provider manual that addresses the services.

- **Behavioral Health Services**

  You may obtain prior authorization for behavioral health clinic and rehabilitation services by calling American Psychiatric Systems (APS) Healthcare at 1-800-343-9663.

  Prior authorization of behavioral health services provided by private practitioners is obtained from BMS. All services that require prior authorization are identified.

- **Audits and Settlements**

  To obtain information regarding audits and cost settlements, call:

Hospital	1-304-558-0460
Nursing Facility	1-304-558-0460

  If you need information regarding the payment of audits and cost settlements, call 1-304-558-1700.

- **Pharmacy Help Desk**

  To obtain both procedural and technical information regarding the Prescription Drug Program, call 1-800-847-3859.

- **Rational Drug Therapy Program**

  To obtain procedures, prior authorizations, and information regarding the Prescription Drug Prior Authorization Process, call or fax:

Call	1-800-847-3859
Fax	1-800-531-7787

- **Third Party Liability/Coordination of Benefits(TPL/COB)**

  To ask questions regarding commercial insurance and Medicare applicability to Medicaid member claim reimbursement, call 1-304-558-1700 or visit www.wvrecovery.com.

  Medicaid is always “the payer of last resort.” BMS, in conjunction with its subcontractors, conducts coordination of benefits, third party liability identification, cost avoidance activities, and recovery functions for the WV Medicaid Program, and maintenance of compliance with federal regulations.

- **Medicaid Managed Care**

The BMS contracts with an Enrollment Broker to inform Medicaid members about managed care. The enrollment broker enrolls applicable members in either the HMO or PCCM programs. The HMO and the PCCM (PAAS) programs are known as the Mountain Health Trust (MHT) program.

The enrollment broker assists eligible members in selecting a managed care program and a primary provider of their choice. BMS assists providers who have managed care member assignment issues. For assistance on managed care assignment questions for the MHT Program, call the enrollment broker at 1-800-449-8466.

- **Department of Health and Human Resources (DHHR) Offices**

  To refer a member for Medicaid coverage or obtain information regarding policies related to member eligibility call your local DHHR office. These telephone numbers vary by geographic area. Use your local telephone directory, State Government section, to find the telephone number of the local DHHR office.

- **Medicaid Related Programs**

  The Office of Maternal, Child and Family Health (OMCFH) of the Bureau of Public Health has a toll free telephone number for information about specific health and Medicaid-related programs. To obtain information related to the programs below, call 1-800-642-8522 or 1-800-642-9704.

  - Children Specialty Care (CSC) Program
  - WV Birth to Three Program
  - Women, Infants, and Children Nutrition Program (WIC)
  - Family Planning Program
  - Breast and Cervical Cancer Diagnosis and Treatment Fund
  - Right From the Start Program (RFTS)
  - Ryan White Fund
  - Early & Periodic Screening, Diagnosis, & Treatment (EPSDT) (HealthCheck) Program
  - Children's Dentistry Services.

  These toll free telephone services are available weekdays between 8:30 a.m. and 5:00 p.m. except holidays. The lines are staffed by registered nurses and licensed social workers that serve as the initial service coordinator for children, families, and professionals seeking information on the services offered. They can also offer instructions on how to apply for programs.

- **Medicaid Waivers**

  WV's Medicaid website contains additional information that includes, but is not limited to, information on the BMS organization, Medicaid Program Instructions and policies, Resource Based Relative Value Scale (RBRVS) with specific reimbursement issues, general information related to the Health Insurance Portability and Accountability Act (HIPAA), and specific information related to pharmacy services. You are encouraged to routinely access and view new information posted on the BMS website (www.wvdhhr.org/bms).

The Centers for Medicaid and Medicare Services is also an excellent resource to use in conjunction with the above WV website. The Centers for Medicaid and Medicare Services website is located at www.cms.gov.

160 COVERED SERVICES

The WV Medicaid Program pays for medically-necessary, covered health services, as well as certain waiver services that are provided to eligible members by Medicaid providers. The fact that a provider prescribes, recommends, or approves medical care does not in itself make the care medically necessary or a covered service. The following is a general listing of services covered by the WV Medicaid Program:

- Aged and Disabled Waiver Services
- Behavioral Health Clinic and Rehabilitation Services
- Chiropractic Services
- Dental Services for Children
- Durable Medical Equipment (DME) and Medical Supplies
- Early & Periodic Screening, Diagnosis & Treatment Program (EPSDT) – also known as HealthCheck
- Family Planning Services
- Free Standing Ambulatory Surgery Services
- Home Health Services
- Hospice Care Services
- Intermediate Care Facility Services for the Mentally Retarded (ICF/MR)
- Inpatient Hospital Services, Acute care
- Inpatient Psychiatric Services for individuals under age 21
- Inpatient Rehabilitation Services for individuals under age 21
- Mentally Retarded/Developmentally Disabled Waiver Services (MR/DD)
- Nurse Practitioner Services
- Nurse Midwife Services
- Nursing Facility Services
- Occupational Therapy Services
- Optometry Services
- Orthotic/Prosthetic Services
- Outpatient Hospital Services
- Personal Care Services
- Pharmacy Services
- Physical Therapy Services
- Physician Services
- Podiatrist Services
- Private Duty Nursing Services
- Psychiatric Services
- Psychological Services
- Rural Health Clinic Services and Federally Qualified Health Center Services

- Speech and Hearing Services
- Transportation Services
- Vision Services.

Certain services are covered only for specific categories of eligible members. All covered Medicaid services, both traditional and special services, must be medically necessary, may be limited in scope, i.e., specific number of units of services, and may be subject to prior authorization.

BMS contracts with West Virginia Medical Institute (WVMI) for the review and approval of all hospital inpatient services for Medicaid members. However, physicians, acute care hospitals, rehab hospitals for members under age 21 only, and psychiatric hospitals for members under 21 only, must obtain prior authorization before admission of the patient. For documented emergencies, the patient may be admitted, but the request for prior authorization must be made to WVMI within 24 hours or the first working day after admission.

Refer to appropriate the applicable provider manual for specific provider policy and billing instructions for each of these covered services.

161 GENERAL NON-COVERED SERVICES

The WV Medicaid Program does not cover certain services and items regardless of medical necessity.

Some examples are identified below:

- Acupuncture
- Artificial insemination, in vitro fertilization, infertility services, or sterilization reversal
- Autopsy
- Christian Science services
- Cosmetic surgery services
- Dental services for members 21 years of age and over (except for treatment of fractures of mandible and maxilla and biopsy), removal of cysts and tumors, and emergency extractions
- Drugs for weight gain or loss, hair growth, fertility, cosmetic use, and those considered investigational or unproven
- Duplicate services
- Equipment or supplies which are primarily for patient comfort and/or family or caretaker convenience (Note: One mobility item is covered in a five-year period.)
- Experimental or investigational/research services or drugs
- Inpatient psychiatric services for individuals between 22 and 65 years of age, except acute care admissions
- Optometry services for individuals over age 21, except the first pair of glasses after cataract surgery
- Personal comfort and convenience items or services, whether on an inpatient or outpatient basis, such as television, telephone, barber or beauty service, guest services, and similar incidental services and supplies, even when prescribed by a physician
- Radial Keratotomy; Lasik surgery

- Services rendered outside the scope of a provider's license
- Sterilization for individuals under age 21
- Transsexual surgery
- Fees for missed appointments*
- Fees to copy medical records
- Weight loss programs or drugs for weight loss
- Services rendered by students as part of their clinical or academic training.

* Enrolled providers cannot bill Medicaid members for missed appointments.

The above list is illustrative only. It should not be construed as a complete or exhaustive list of excluded items or services.

Refer to Chapter 400 for additional information on member responsibilities for payment, and appicable provider manuals for specific covered and non-covered services.

The “WV Works” Program covers dental and optometry services for certain eligible adult Medicaid members. Please note: Not all Medicaid-eligible members are eligible for enrollment in the “WV Works” Program. Contact the local DHHR office for questions regarding specific benefits and possible coverage for patients.

170 RELATIONSHIP TO MEDICARE

Medicaid covers medically necessary health services furnished to individuals who meet specific income, resource, and eligibility standards. Medicare is a federal program that offers health insurance coverage to individuals 65 years of age or older, to those who have received social security disability benefits for 24 consecutive months, to those who have end-stage renal disease, to those on advanced life support, and to other eligible individuals, as specified by other provisions of the Social Security Act.

WV Medicaid covers the applicable co-insurance and deductible amounts, not to exceed Medicaid’s allowable payment, for services covered by Medicare Parts A and B for all eligible Medicaid members who are also entitled to Medicare benefits. The Medicaid Program may also provide payment for services not covered by Medicare.

A member with both Medicare and Medicaid coverage is identified as “dual eligible.” Medicaid reimburses secondary to Medicare. If a Medicare Supplemental policy exists in addition to Medicare and Medicaid coverage, Medicaid is the third-party payer subsequent to Medicare and Medicare Supplemental payments. Medicaid is always the payer of last resort.

Refer to Chapter 300 for more specific provider information on the Medicare program and its relationship to WV Medicaid, including Medicare provider numbers as part of your Medicaid participation responsibilities.

For information related to claim submission procedures for services rendered to a “dual eligible” member, refer to Chapter 300.

180 OUT-OF-STATE SERVICES

Non-emergency, out-of-state services provided to WV Medicaid members routinely require prior authorization from the BMS Out-of-State Unit, Bureau for Medical Services. For HMO members, follow the respective HMO prior-authorization requirements. If applicable, contact BMS at 1-304-558-1700.

The following are exceptions to this policy:

1. Services provided by WV Medicaid-enrolled border providers
2. Services provided by out-of-state providers who are enrolled as in-state providers
3. Services for WV Medicaid-eligible children who have been placed in foster homes outside WV.

A physician practicing in WV, who determines it necessary to refer a Medicaid member out-of-state for outpatient physician services should submit a request to the BMS Out-of-State Unit. Information that must be provided in the request is as follows:

1. Reason for the out-of-state referral
2. Patient's diagnosis
3. Expected treatment
4. Whether or not treatment is available within WV (services available within the state are not covered outside the state)
5. Other pertinent information.

Payment to out-of-state physicians is made at the same reimbursement rate as payment to in-state physicians. Under Federal law, the Medicaid Program prohibits balance billing by all providers, regardless of location. All out-of-state providers' claims for providing non-emergency medical services will deny unless:

1. The provider is enrolled as a "border" provider
2. The provider is enrolled as an "in-state" provider
3. The services have been prior authorized.

Emergency out-of-state Medicaid-covered services are eligible for Medicaid reimbursement. The documentation provided with the claim must clearly indicate that an emergency situation existed. The emergency room patient record must be submitted with the claim.

Refer to Chapter 300 for additional information regarding out-of-state providers.

190 FRAUD AND ABUSE

Fraud is defined as an intentional deception or misrepresentation made by a person with the knowledge that the deception could result in some unauthorized benefit to either the person or another. In particular, any provider that acts intentionally and with knowledge to deceive or misrepresent information used in Medicaid administrative processes, and the deception or misrepresentation results in some unauthorized benefit to him/her or another, commits fraud. It also includes any act that constitutes fraud under applicable federal or WV state law.

Abuse is defined as provider practices that are inconsistent with sound fiscal business or medical practices and result in an unnecessary cost to the Medicaid Program. It also includes reimbursement for services that are not medically necessary or that fail to meet professionally recognized standards for health care. In particular, any provider that acts in a repetitive manner to cause unnecessary costs for the Medicaid Program is considered abusive of the Medicaid Program.

Examples of activities that constitute fraudulent practices or abuse of the Medicaid Program are identified in Chapter 800, General Administration. A person is subject to prosecution by federal and state authorities when any actions identified during the Medicaid administrative process is determined to be fraudulent or abusive.

It is recommended that 42 U.S.C. §1320a-7a, 42 U.S.C. §1320a-7B, and 42 U.S.C. §1320 a-7 be reviewed by appropriate provider office staff. These codes contain information related to fines and exclusions that can be imposed upon persons and/or entities convicted of submitting false or fraudulent claims to federal or state medical programs.

191 CONFIDENTIALITY

Information you obtain from BMS or any other DHHR bureau regarding Medicaid members' eligibility, health history, health care services, or any other personal information, is to remain strictly confidential and shall not be disclosed for any purpose other than those directly concerned with Medicaid administrative requirements.

CHAPTER 200—DEFINITIONS

TABLE OF CONTENTS

TOPIC **PAGE NO.**

CHAPTER 200–DEFINITIONS

200 INTRODUCTION

This chapter contains separate lists of acronyms and definitions that are frequently used in the administration of the West Virginia Medicaid Program. The acronyms and definitions are in alphabetical order.

In certain circumstances, more specific definitions will be found in other chapters of this manual. It is suggested that chapters regarding the types of services being utilized also be referenced (e.g., Chapter 501, Aged and Disabled Waiver Services) in addition to the definitions below.

210 – ACRONYMS

ADA – American Dental Association
ADG – Ambulatory Diagnostic Group
ADL – Activities of Daily Living
ADW – Home and Community Based Waiver for the Aged and Disabled
AFDC – Aid to Families with Dependent Children. Now referred to as TANF.
ALC – Alternate Level of Care
ALS – Advanced Life Support
AMA – American Medical Association
ANA – American Nurses Association
ANSI – American National Standards Institute
AWP – Average Wholesale Price for a drug
BLS – Basic Life Support "or" Basic Living Skills
BMS – (West Virginia) Bureau for Medical Services
BoSS – (West Virginia) Bureau of Senior Services
CAHPS – Consumer Assessment of Health Plans Survey
CC – Complication or Comorbid Condition Code
CDC – Centers for Disease Control and Prevention
CF – Conversion Factor
CFR – Code of Federal Regulations
CLIA – Clinical Laboratory Improvement Act
CM – Case Manager
CMA – Case Management Agency
CMS – Centers for Medicare and Medicaid Services (HCFA prior to July 1, 2001)
COB – Coordination of Benefits
CPT – Physician's Current Procedural Terminology
CRNA – Certified Registered Nurse Anesthetist
CSHCN – Children with Special Health Care Needs
DD – Developmentally Disabled
DHHR – (West Virginia) Department of Health & Human Resources
DHHS – (US) Department of Health & Human Services
DMERC – Durable Medical Equipment Regional Carrier
DOB – Date of Birth
DOS – Date of Service
DRG – Diagnosis Related Group

DSM – To be determined at a later date - Place Holder
DSS – Decision Support System
DUR – Drug Utilization Review
DX – Diagnosis
EAC – Estimated Acquisition Cost
EDI – Electronic Data Interchange
EDP – Electronic Data Processing
EFT – Electronic Funds Transfer
E/M – Evaluation & Management
EMC – Electronic Media Claims
EMS – Emergency Medical Services
EOB – Explanation of Benefits
EOM – End of Month
EOMB – Explanation of Medical Benefits
EPSDT – Early and Periodic Screening, Diagnosis and Treatment
EQRO – External Quality Review Organization
F&A – Fraud and Abuse
FA – Fiscal Agent
FFP – Federal Financial Participation
FFS – Fee for Service
FFY – Federal Fiscal Year
FI – Fiscal Intermediary
FIFO – First In/First Out
FMAP – Federal Medical Assistance Percentage
FQHC – Federally Qualified Health Center
FPL – Federal Poverty Level
HCBS – Home and Community Based Services
HCFA – (U.S.) Health Care Financing Administration (renamed CMS effective July 1, 2001)
HCPCS – HCFA Common Procedure Coding System
HEDIS – Health Employer Data and Information Set
HHA – Home Health Agency
HHS – (U.S. Department of) Health & Human Services (also DHHS)
HIO – Health Insuring Organization
HIPAA – Health Insurance Portability & Accountability Act of 1996
HM – Homemaker
HMA – Homemaker Agency
HMO – Health Maintenance Organization
HM RN – Homemaker Registered Nurse
ICD – International Classification of Diseases
ICF – Intermediate Care Facility
ICF/MR – Intermediate Care Facility for Persons with Mental Retardation
ID – Identification
IG – Implementation Guide
ISO – International Standards Organization
IT – Information Technology
JCAHO– Joint Commission on Accreditation of Health Care Organization
LOC – Level of Care

LTC – Long Term Care
LTCF – Long Term Care Facility
MAC – Maximum Allowable Cost
MADC – Medical Adult Day Care
MARS – Management Administration Reporting Subsystem
MCO – Managed Care Organization
MDS – Minimum Data Set
MFCU – Medical Fraud Control Unit
MMIS – Medicaid Management Information System
MR/DD – Mentally Retarded/Developmentally Disabled
MSIS – Medicaid Statistical Information System
NABP – National Association of Boards of Pharmacy
NCPDP – National Council of Prescription Drug Programs
NCQA – National Committee for Quality Assurance
NDC – National Drug Code
NF – Nursing Facility
NH – Nursing Home
NPI – National Provider Identifier
NUBC – National Uniform Billing Committee
NUCC – National Uniform Claim Committee
OCR – (U.S.) Office of Civil Rights
OEMS – Office of Emergency Medical Services
OHFLAC – (West Virginia) Office of Health Facility Licensure and Certification
OMCH – (West Virginia) Office of Maternal & Child Health
OSURS – Office of Surveillance and Utilization Review Subsystem
OTC – Over the Counter (Drugs)
PA – Prior Authorization or Prior Approval
PAAS – The Physician Assured Access System
PAHP – Prepaid Ambulatory Health Plan
PASARR – Preadmission Screening and Annual Resident Review
PCCM – Primary Care Case Management
PCP – Primary Care Physician (or Provider or Practitioner)
PHI – Protected Health Information
PIHP – Prepaid Inpatient Health Plan
POC – Plan of Care
POS – Point of Sale
PPS – Prospective Payment System
PRO – Peer Review Organization
PSC – Public Service Commission
QI – Qualified Individual
QIO - Quality Improvement Organization
QMB – Qualified Medicare Beneficiary
QMRP - Qualified Mental Retardation Professional
RA – Remittance Advice
RBRVS – Resource Based Relative Value Scale
RBRVU – Resource Based Relative Value Unit
RHC – Rural Health Clinic

RN – Registered Nurse
RTP – Return to Provider (or Plan)
RUG – Resource Utilization Group
RVS – Relative Value Scale
RVU – Relative Value Unit
SCHIP – State Children's Health Insurance Plan
SCP – Service Coordination Plan
SFY – State Fiscal Year
SLIMB – Specified Low Income Medicare Beneficiary
SMPMT – Specialized Multi-Patient Medical Transport Provider
SMPV – Specialized Multi-Passenger Van Provider
SNF – Skilled Nursing Facility
SSA – Social Security Administration
SSI – Supplemental Security Income
SSN – Social Security Number
SUR – Surveillance and Utilization Review (SUR)
TANF – Temporary Assistance for Needy Families
TOB – Type of Bill
TPA – Third Party Administrator
TPL – Third Party Liability
UB – Uniform Bill
UB-92 – Uniform Bill Form 92
UPIN – Unique Physician Identification Number "or" Uniform Provider Identification Number
UMWA – United Mine Workers of America – Union of coal miners
UR – Utilization Review
WIC – Women, Infants and Children Program
WVDHHR – West Virginia Department of Health and Human Resources

250 - DEFINITIONS

Abuse of Program – Improper fiscal or medical practices that may result in unnecessary costs to the West Virginia Medicaid Program or the provision of medically unnecessary or inappropriate services.

Active or Curative Care – Any medically necessary care or treatment meant to ameliorate or cure illness or injury.

Activities of Daily Living (ADL) – Activities that a person ordinarily performs during the ordinary course of a day, such as mobility, personal hygiene, bathing, dressing, sleeping, eating, and skills required for community living. A person's ability to perform these activities is indicative of his or her physical ability to function independently.

Activities of Daily Living Rating Scale – A numerical score used to determine the level of care needs of a beneficiary in performing activities of daily living.

Acute Care – Services available to all Medicaid eligible beneficiaries including, but not limited to, services such as pharmacy, X-ray, laboratory, physician visits, and other services defined in the Medicaid State Plan and approved by the Centers for Medicare and Medicaid Services (CMS).

Advance Directive (Health Care) – Written ahead of time, a health care advance directive is a written document that indicates how an individual wants medical decisions made if he or she loses the ability to make decisions for himself or herself. A health care advance directive may include a Living Will and a Durable Power of Attorney for health care.

Advanced Life Support (ALS) – A sophisticated level of out-of-hospital emergency medical care provided to patients being transported by an ambulance to a hospital.

ALS service is appropriate when the patient manifests symptoms that the absence of immediate medical attention could result in serious harm to the patient.

ALS services include administration of intravenous fluids and the administration of medications by intravenous, endotracheal, intramuscular, subcutaneous, sublingual, inhalation or oral routes, and insertion of endotracheal tube or other advanced airway adjunct device. (Also reference Chapter 524, Transportation Services.)

Aged/Disabled Home and Community-Based Services Waiver (ADW) - West Virginia's home and community-based services waiver program for aged and disabled individuals, administered by the Bureau for Medical Services of the Department of Health and Human Resources in collaboration with the Bureau of Senior Services pursuant to a Medicaid waiver option approved by the Center for Medicare and Medicaid Services (CMS). The Aged/Disabled Waiver Program is a long-term care alternative, which enables individuals to remain at or return home rather than receiving nursing facility (NF) care. The Aged/Disabled Waiver Program provides eligible individuals with a range of services comparable to those services provided in a nursing facility. The Aged/Disabled Waiver Program provides services in homes and local communities instead of a nursing facility. The Aged/Disabled Waiver Program includes case management, homemaker, and adult day care services.

Air Ambulance – An aircraft used for air ambulance operations.

Air Ambulance Transportation – Transport of a patient whose medical condition requires transportation by air ambulance as certified by a physician.

Allied Health Professional – An individual trained to perform services in the care of patients other than a physician or registered nurse; includes a variety of therapy technicians (e.g., pulmonary, radiology technicians, physical therapists, etc.).

Allowable Charge – The maximum amount that West Virginia Medicaid will pay for a covered service.

Ambulance – A vehicle designed, equipped, and appropriately staffed to transport patients to the nearest medical facility that can provide the needed medical care. As classified in West Virginia Health Legislative Rules §64 CSR 48 and §64 CSR 29:

- Class B – Basic Life Support
- Class C – Advanced Life Support
- Class D – Critical Care Transport
- Class E – Aeromedical (Fixed and Rotary Wing)
- Class F – Specialized Multi-Patient Medical Transport Vehicle

Ambulatory Patient – An individual who can move from place to place and exit a building without any means of assistance**.**

Ambulatory Surgical Center (ASC) – A licensed health care setting that provides outpatient surgery not requiring a stay over 24 hours.

American Dental Association (ADA) – A professional organization for dentists whose mission is commitment to the public's oral health, ethics, science, and professional advancement and leading a unified profession through initiatives in advocacy, education, research, and the development of standards. The ADA maintains a hardcopy dental claim form and the associated claim submission specifications, and also maintains the Current Dental Terminology (CDT) medical code set. The ADA and the Dental Content Committee (DeCC), which it hosts, have formal consultative roles under HIPAA.

American Medical Association (AMA) – A professional organization for physicians whose mission is the development and promotion of standards in medical practice, research, and education; strong advocacy agenda on behalf of patients and physicians; and the commitment to providing timely information on matters important to the health of America. The AMA is the secretariat of the NUCC, which has a formal consultative role under HIPAA. The AMA also maintains the Current Procedural Terminology (CPT) medical code set.

Appropriate Medical Facility – A medical facility is any hospital, medical clinic, physician's office, or other similar facility, licensed or certified by the appropriate State agency, at which medical care and treatment is available. An appropriate medical facility is one whose personnel and equipment are approved to provide medically necessary services to Medicaid patients either on an outpatient or inpatient basis.

Assessment – Use of clinical, functional, demographic, and other information to determine a person's physical, mental, and personal care needs and the most appropriate setting in which to meet those needs and develop a plan of care.

Attending Physician – Physician providing the major portion of care or having primary responsibility for care of the beneficiary.

Authorization of Payment – The transmittal of written notification by the WV Department of Health and Human Resources indicating that an individual has met the financial and medical requirements for Medicaid reimbursement.

Authorized Representative – An individual who has been authorized under West Virginia State law to authorize the termination of medical care or to elect or revoke the election of hospice on behalf of a terminally ill individual who is mentally or physically incapacitated.

Balance Bill – Charges made to the patient for the difference charged for a service and the amount paid by a health insurance plan or other third party. A limit may be imposed on the amount that a provider may balance bill the patient.

Basic Life Support (BLS) – A basic level of out-of-hospital and interfacility emergency medical services provided when a patient requires BLS services or continual medical supervision in those instances when services are determined to be medically necessary in an emergency transport. An emergency transport is one that is provided after the sudden onset of a medical condition manifesting itself by acute symptoms of sufficient severity such that the absence of immediate medical attention could reasonably be expected to result in:

- Placing the patient's health in serious jeopardy
- Impairment to bodily functions

- Serious dysfunction to any bodily organ or part.

Bed Confined – Individuals who are unable to tolerate any activity out of bed. In order to be considered "bed confined," all of the following criteria must be met:

- The beneficiary is unable to get up from bed without assistance
- The beneficiary is unable to ambulate
- The beneficiary is unable to set in a chair or wheelchair.

Benefits – Services, procedures, and items covered by the West Virginia Medicaid Program or other third party health insurers.

Beneficiary (aka enrollee, client, or recipient) – An individual who is eligible to receive or is receiving benefits from Medicaid.

Board and Care Home – A type of group living arrangement designed to meet the needs of people who cannot live on their own and need help with chore services, homemaking, and other personal care needs.

Board Certified – Formal recognition to a physician that has special training in a certain area of medicine and has passed an advanced examination in that area of medicine. Both primary care doctors and specialists may be board certified.

Breast and Cervical Cancer Early Detection Program – On October 24, 2000, the Breast and Cervical Cancer Prevention and Treatment Act of 2000 (Public Law 106-354) was signed into law. This Act, which has an effective date of October 1, 2000, gives states the option to provide medical assistance through Medicaid to eligible women who were screened through the Centers for Disease Control and Prevention's (CDC) National Breast and Cervical Cancer Early Detection Program (NBCCEDP) and found to have breast or cervical cancer, including pre-cancerous conditions.

Bureau for Medical Services (BMS and sometimes referred to as "Bureau") – The single state agency within the West Virginia Department of Health and Human Resources (DHHR) that administers the Medicaid Program mandated under Chapter 9 of the West Virginia Code and Title XIX of the Social Security Act.

Bureau of Senior Services (BoSS) – The Bureau for Medical Services contracts with the Bureau of Senior Services for the day-to-day operation of the Aged and Disabled Home and Community Based Waiver Services program.

Capitation Payment – A payment made periodically to a contractor on behalf of each person enrolled under a contract for the provision of medical services. The payment is made regardless of whether or not the particular person receives services during the period covered by the payment.

Care Management Fee – A per-member, monthly payment to a provider that covers coordination of a member's health care, such as appropriate referral to consultants, specialists, ancillary provider and services. Care management is intended to ensure continuity of services and accessibility to overcome fragmented services and the misutilization of facilities and resources. It also attempts to match the appropriate intensity of services with the patient's needs over time.

Case Management – A method of coordinating, linking, advocating, and monitoring services for clients to reach goals developed by the beneficiary and the case management agency, other providers, family members, guardians, or legal representatives. Effective case management promotes access to care, containment of escalating costs, enhancement of quality products and services, identification or creation of viable alternative care plans, and patient awareness regarding self-determination and empowerment.

Case Management Agency (CMA) – A privately operated profit or nonprofit organization/agency licensed to do business in West Virginia, having a provider agreement with BMS and enrolled as a provider of case management services.

Case Manager (CM) – Person who arranges for beneficiaries to obtain medically necessary and appropriate services in a coordinated, cost-effective manner.

Case Mix Index – A numerical indicator of the medical needs of the patients a provider treats. The higher the index, the greater the need and cost of caring for the patients.

Categorically Needy – Low income aged, blind, or disabled individuals, low income women and their children, and certain other persons who are *[required by Federal law to be covered by a State's Medicaid Program]* eligible for Medicaid services and meet financial eligibility requirements.

Certification (Laboratory) – Approval of a laboratory facility to receive reimbursement from the Medicaid Program for specific clinical laboratory examination. Such approval is a condition of participation and is granted by the regulating agency (West Virginia Department of Health, Office of Laboratory Services) when a laboratory facility is in compliance with Medicaid regulations.

Certification (Radiology) – Approval of an independent radiology facility to receive reimbursement from the Medicaid Program for specific clinical radiological examination. Such approval is a condition of participation and is granted by the regulating agency (West Virginia Department of Health, Office of Environmental Health Services) when a radiology facility is in compliance with Medicaid regulations.

Certified Medicaid Provider – All transportation entities which have a current Medicaid Provider Number, including aeromedical and ground transport services, which receive reimbursement from the Bureau for Medical Services.

Certified Registered Nurse Anesthetist (CRNA) – A registered nurse who is trained and licensed to administer anesthesia.

CHAMPUS – The Civilian Health and Medical Program of Uniformed Services provides health insurance for active and retired military personnel and their dependents.

Children with Special Health Care Needs (CSHCN) – formerly Handicapped Children's Program - A program for remedial services to medically needy and Medicaid children age 0 to 21 years which is administered by the Department of Human Services under Title V of the Social Security Act.

Claim – An invoice for the health services provided to a patient.

Claimant – A person who requests a hearing under the West Virginia Department of Health and Human Resources Fair Hearing process.

Class I Laboratory – A clinical laboratory independent of a Medicare-approved hospital that is certified for participation in Medicare as an independent laboratory.

Class II Laboratory – A clinical laboratory maintained by one or more physicians for performing diagnostic tests for their own patients provided:

- The laboratory is not held out to other physicians as available to perform diagnostic tests
- The laboratory does not accept more than 100 specimens on referral from other physicians in any one year in any of the following five categories:
  - Microbiology ad Serology
  - Clinical Chemistry
  - Immunohematology
  - Hematology
  - Pathology
  - Radiobioassay.

Client (aka beneficiary, recipient, or enrollee) – An individual who is eligible to receive or is receiving benefits from Medicaid.

Client Grievance Procedure – The process by which clients are afforded an opportunity to express dissatisfaction with services provided by the Medicaid Program.

Clinic – A legal entity licensed to provide medical services. Group practices and similar arrangement with Medicaid payment to individual members are not considered clinics.

Clinical Laboratory – A facility for the microbiological, cytological, chemical, hematological, radiobioassay, cytological, immunohematological, pathological or other examination of materials derived from the human body, for the purpose of providing information for the diagnosis, prevention, of treatment of any disease of assessment of a medical condition.

Clinic Services – Federally defined as those preventive, diagnostic, therapeutic, rehabilitative, or palliative items or services provided to outpatients under the direction of the physician. These services must be furnished by a facility that is not part of a hospital, but is organized and operated to provide medical care to outpatients. Clinic Services must be provided at the clinic, the only exception being services provided to the homeless. (Also refer to Chapter 502, Behavioral Health Clinic Services.)

CMS 64 – A statement of expenditures for the Medicaid program that the Bureau for Medical Services must submit to CMS 30 days after the end of each quarter. The report is an accounting statement of actual Medicaid expenditures for which West Virginia is entitled to receive Federal funding under for the quarter.

CMS 416 – The annual Early and Periodic Screening, Diagnosis and Treatment (EPSDT) report that the Bureau for Medical Services must provide to CMS. The information is used to assess the effectiveness of State EPSDT programs in providing child health screening services.

CMS 1500 — Claim form to bill for most outpatient services that West Virginia Medicaid covers. Formerly HCFA-1500.

Cognitive Impairment – A breakdown in a person's mental state that may affect their moods, fears, anxieties, and ability to think clearly.

Coinsurance. - The portion of the allowed amount payable for a service that is paid by the patient.

Common Carrier – Such services as public railways, buses, cabs, airlines, and other public transportation may be reimbursed at rates approved by the West Virginia Public Service Commission (PSC) or other applicable State or Federal regulatory agency. Transport via common carrier must be preauthorized by the appropriate county Department of Health & Human Resources (DHHR) staff and reimbursed through local DHHR offices.

Communication System – A provider agency for a Medicaid home and community based waiver program having an emergency call down system that is available 24 hours a day, 7 days a week for both the client and any other provider agency to contact in case of an emergency.

Comprehensive Primary Health Care Services – The ongoing responsibility of directly providing preventive and primary health care (including diagnosis and/or treatment and health education) to an enrollee and, as necessary, referring the enrollee to another provider for diagnosis and/or treatment.

Comprehensive Risk Contract – A risk contract that covers comprehensive services, to include, inpatient hospital services and any of the following services, or any three or more of the following services:

- Outpatient hospital services
- Rural health clinic services
- FQHC services
- Other laboratory and x-ray services
- Nursing facility services
- Early and Periodic Screening, Diagnostic, and Treatment (EPSDT) services
- Family planning services
- Physician services
- Home health services
- Prescribed drugs
- Other services.

Consultation – Referral to a provider for professional advice or services.

Consumer Directed Case Management – Aged and Disabled Waiver program service that gives a client the ability to direct his/her own case management activities personally or through a representative, without reimbursement.

Contractor – An entity that performs specific tasks for the Department under contractual arrangements.

Coordination – Bringing together relevant parties to plan, arrange, implement, and monitor service provisions to beneficiaries.

Co-Payment – A cost sharing amount which is the liability of the beneficiary for the medical services received.

Cost-Based Payment Method – A system of payment for health care whereby reimbursement is based on a percentage of cost.

Cost-Based Reimbursement – A method of payment for health care whereby reimbursement is based on the reasonable and allowable cost a provider incurs in rendering patient care.

Cost Outlier – A patient whose medical care costs extraordinarily more than the care provided to a typical patient with similar medical problems.

Covered Services – Services and supplies for which Medicaid reimbursement is available.

Covered Surgical Procedure – Those surgical and other medical procedures which may safely be performed in the ambulatory surgical center setting and which the ASC is authorized by Federal and State law and regulation to perform.

Crossover Claims – Claims for which Medicare and Medicaid may be responsible for payment for services provided to a client eligible for benefits under both programs.

Current Procedural Terminology (CPT) – A clinical coding system developed and maintained by the American Medical Association and mandated by the Centers for Medicare and Medicaid Services for use in billing Medicare and Medicaid for physician services.

Date of Service – Actual date or number of days that services were received by a client during a month.

Deductible – The amount that an individual must pay before health insurance is liable for some portion of the amount a provider bills for a service. The deductible is ordinarily a flat amount for a year.

Department – The term often used to refer to the West Virginia Department of Health and Human Resources.

Department of Health and Human Services (DHHS) – The organizational unit of the federal government responsible for administration of the provisions of the Social Security Act as amended.

Diagnosis (DX) – Identification of a condition or disease.

Diagnosis Related Group (DRG) – A classification system that groups hospital inpatients according to their diagnoses, surgical procedures, age, and other criteria.

Direct Care Provider – Individual with a special relationship to the client who under normal circumstances would be considered as an informal support.

Dispensing Ophthalmologist – An Ophthalmologist who, in addition to performing the professional services, also dispenses eye appliances.

Disproportionate Share Hospitals – Hospitals that provide care to a large number of Medicare, Medicaid, and low-income patients. Medicaid makes additional payments to these hospitals for the cost of these patients. The Bureau for Medical Services determines whether a hospital meets the criteria to be considered a “disproportionate share hospital” and calculates the additional payment, subject to Federal minimum standards.

Documentation – Process of recording all observations and events in writing and maintaining records or files and reporting information to entities having a right and need to know.

Drug Rebate – Created by the Omnibus Budget Reconciliation Act (OBRA) of 1990, the Medicaid Drug Rebate Program requires a drug manufacturer to enter into and have in effect a

national rebate agreement with the Secretary of the Department of Health and Human Services for States to receive federal funding for outpatient drugs dispensed to Medicaid patients. The drug rebate program is administered by CMS' Center for Medicaid and State Operations (CMSO). This law was amended by the Veterans Health Care Act of 1992 which also requires a drug manufacturer to enter into discount pricing agreements with the Department of Veterans Affairs and with covered entities funded by the Public Health Service in order to have its drugs covered by Medicaid.

Drug Utilization Review (DUR) – Drug Utilization Review in the Medicaid program consists of the monitoring of: 1) clinically appropriate prescribing of outpatient drugs, 2) clinically appropriate dispensing of outpatient drugs, 3) drug usage review, evaluation, and intervention, and 4) medical quality assurance.

Dual Eligible – Medicaid beneficiaries who are also eligible for health benefits under Medicare or other public-sponsored health programs.

Durable Medical Equipment – Items, articles, or devices that are prescribed by a physician, primarily and customarily used to serve a medical purpose; generally not useful to a person in the absence of disease, illness, or injury; capable of withstanding repeated use; are durable and nonexpendable (e.g., hospital bed, wheelchair, walker and suction equipment).

Durable Medical Equipment Regional Carrier (DMERC) – A private company that contracts with Medicare to pay claims for durable medical equipment.

Early and Periodic Screening, Diagnosis and Treatment (EPSDT) Program – A comprehensive and preventative child health program for Medicaid eligible individuals under the age of 21. EPSDT includes periodic screening, vision, dental, and hearing services. Periodic schedules for screening, vision, and hearing services must be provided at intervals that meet reasonable standards of medical practice.

Economic Status – Information about a person's income and other related financial resources used to determine Medicaid eligibility.

Electronic Media Claims (EMC) – Claims that are submitted by tape or other electronic forms of communication in lieu of paper claims.

Eligible Hospital – A hospital certified as a provider of hospital services by the Office of Health Facility Licensure and Certification (OHFLAC), the provisions of Title XVII of the Social Security Act, or certified as an out-of-state provider by the Bureau for Medical Services.

Eligible Medicaid Patient – An individual with a valid identification card receiving financial and/or medical assistance from DHHR and children in foster care under Department supervision.

Eligible Person – A person eligible for West Virginia Medicaid according to Title XIX regulations and who has been determined financially eligible by the local office of the Department of Health and Human Resources.

Emergency Medical Services (EMS) – All services which are set forth in West Virginia Code §16-4-C, "The Emergency Medical Services Act of 1996" and those services included in and made part of the emergency medical services plan of the Department of Health and Human Resources including, but not limited to, responding to the medical needs of an individual to prevent the loss of life or aggravation of illness or injury. EMS Rules §64 CSR 48.

Emergency Medical Services Agency – Any authority, person, corporation, partnership, or other entity, public or private, which is licensed by the Office of Emergency Medical Services to provide emergency medical services in West Virginia.

Emergency Medical Services (Ambulance) Certification – The Office of Emergency Medical Services (OEMS) is the certifying agency for emergency medical services (EMS) agencies and has authority over patient transportation through its licensure process. The Bureau for Medical Services of the Department of Health and Human Resources (Medicaid) has the authority to enroll licensed providers for submission of claims for reimbursement.

Emergency Medical Services (Air Ambulance) Provider – Any authority, person, corporation, partnership, or other entity, public or private, which owns or operates a licensed emergency medical services agency providing emergency medical service in this state. Certification of eligibility is issued by the Department of Health and Human Resources and the Office of Emergency Medical Services for the purpose of providing medical treatment and transportation services to Medicaid patients in the State of West Virginia. WV Code §16-4-C; EMS Rules §64 CSR 48.

Emergency Medical Services Provider – Any authority, person, corporation partnership, or other entity, public or private, which owns or operates a licensed emergency medical services agency providing emergency medical service in this state. Certification of eligibility is issued by the Department of Health and Human Resources and the Office of Emergency Medical Services for the purpose of providing medical treatment and transportation services to Medicaid patients in the State of West Virginia. WV Code §16-4-C; EMS Rules §64 CSR 48.

Emergency Medical Services Vehicle (EMS vehicle) – Emergency Medical Services (EMS) transportation vehicles including ambulances, air ambulances and non-medical transportation vehicle as described within EMS Rules §64 CSR 48.

Emergency Medical Technician – **Basic (EMT-B)** – An individual certified by the Office of Emergency Medical Services (OEMS) to render emergency medical services as defined in the scope of practice and authorized pursuant to West Virginia State Code §16-4C and West Virginia Health Legislative Rules §64 CSR 48.

Emergency Medical Technician – **Paramedic (EMT-P)** – An individual certified by the Office of Emergency Medical Services (OEMS) to render emergency medical services as defined in the scope of practice and authorized pursuant to West Virginia State Code §16-4C and West Virginia Health Legislative Rules §64 CSR 48.

Emergency Transport – Transport of a patient with a sudden onset of a medical condition manifesting itself by acute symptoms of sufficient severity such that the absence of immediate medical attention could reasonably be expected to result in:

- Placing the beneficiary's health in serious jeopardy
- Impairment to bodily functions
- Serious dysfunction to any bodily organ or part.

Enrollee (aka beneficiary, or client) – An individual who is eligible to receive or is receiving benefits from Medicaid.

Evaluation – An initial and ongoing process to determine service requirements and the effectiveness of plans of care.

Explanation of Benefits (EOB) – A statement mailed once per month to selected clients to allow them to confirm the services they received.

External Quality Review Organization (EQRO) – A private entity that systematically reviews the quality of care provided to Medicaid patients often through medical record reviews.

Federal Financial Participation (FFP) – The proportion of West Virginia Medicaid payments that is the Federal Government's financial responsibility.

Federally Qualified Health Center (FQHC) – An entity that has entered into an agreement with the Centers for Medicare and Medicaid Services to meet Medicare program requirements under 42 CFR 405.2434, and:

- Is receiving a grant under section 329, 330, or 340 of the Public Health Service Act, or is receiving funding from such a grant under a contract with the beneficiary of such a grant and meets the requirements to receive a grant under section 329, 330, or 340 of the Public Health Service Act
- Based on the recommendation of the Public Health Service, is determined by Centers for Medicare and Medicaid Services to meet the requirements for receiving such a grant
- Was treated by Centers for Medicare and Medicaid Services, for purposes of part B, as a comprehensive federally funded health center (FFHC) as of January 1, 1990

OR

Is an outpatient health program or facility operated by a tribe or tribal organizations under the Indian Self-Determination Act or by an Urban Indian organization receiving funds under title V of the Indian Health Care Improvement Act.

Federally Qualified HMO – A Health Maintenance Organization (HMO) that the Centers for Medicare and Medicaid Services has determined is a qualified HMO under Section 1310(d) of the Public Health Service Act.

Federal Medical Assistance Percentage (FMAP) – The percentage of a State's Medicaid payments that is the financial responsibility of the Federal government.

Fee Schedules – A list of fees or rates for specific inpatient or outpatient services, identified by Diagnosis Related Groups (DRG), Resource-Based Relative Value System (RBRVS), Healthcare Common Procedural Coding System (HCPCS) code, or other coding systems.

Financial Eligibility – The determination of whether the level of a person's income, assets, and categorical standards established by the Department of Health and Human Resources qualifies the applicant for public assistance or Medicaid benefits.

Fixed Winged Aircraft – The fixed wing air ambulance (airplane) services are deemed appropriate when the beneficiary's medical condition is such that transport by ground ambulance is not appropriate. Transport by fixed wing may be necessary because the beneficiary's condition requires rapid transport to a treatment facility, and either great distances or other obstacles preclude such rapid delivery to the nearest appropriate facility. The fixed wing aircraft shall be designed, constructed, or modified; equipped, maintained, appropriately staffed, and operated for the transportation of patients as provided and classified in West Virginia Health Legislative Rules §64 CSR 48.

Fraud – An intentional deception or misrepresentation made by a person or organization with knowledge that the deception could result in an unauthorized benefit to himself or some other individual. It includes any act that is defined as deliberate and intentional under applicable Federal or State laws.

Freedom of Choice – The guaranteed right of a beneficiary to select a provider of their choice.

Full Time Equivalent (FTE) – Forty hours of service per week delivered by one or more individual providers.

Generic Drugs – A generic drug is identical, or bioequivalent to a brand name drug in dosage form, safety, strength, route of administration, quality, performance, characteristics and intended use. Although generic drugs are chemically identical to their branded counterparts, they are typically sold at substantial discounts from the branded price.

Goals – Statement of outcome with specific tasks and objectives to achieve those outcomes. Goals are set to ensure that effective services are being provided to the client.

Grievance – The process by which clients are afforded an opportunity to express dissatisfaction with services received by a provider.

Group Practice – A group of persons licensed to practice medicine in the State, who as their principal professional activity, and as a group responsibility, engage or undertake to engage in the coordinated practice of their professions, primarily in one or more group practice facilities, and who in the connection share common overhead expenses if and to the extent such expenses are paid by members of the group, medical and other records, and substantial portions of the equipment and the professional, technical, and administrative staffs.

Health Care Financing Administration (HCFA) – Formerly the Federal Agency that administered the Medicare and the Medicaid Programs. HCFA has been replaced with the Centers for Medicare and Medicaid Service (CMS) effective July 1, 2001.

Health Care Financing Administration Common Procedure Coding System. **(HCPCS)** – A three level coding system used to report medical services, procedures, and items. Level 1 consists of codes from the Current Procedure Terminology, fourth edition (CPT-4), which are used to report physician services. Level II codes apply nationally to non-physician services and supplies and equipment. Level III codes are for services, procedures, or supplies for which no national codes exist.

Health Care Professional – A physician or any of the following: podiatrist, optometrist, chiropractor, psychologist, dentist, physician assistant, physical or occupational therapist, therapist assistant, speech-language pathologist, audiologist, registered or practical nurse (including nurse practitioner, clinical nurse specialist, certified registered nurse anesthetist, and certified nurse midwife), licensed certified social worker, registered respiratory therapist, and certified respiratory therapy technician.

Health Check (EPSDT) Program – The program, operated for the Medicaid Program through the Office of Maternal and Child Health, to ensure the Medicaid eligible children, ages 0 through 20 years, receive a comprehensive range of preventive and primary health care services. Health Check has an outreach component with regional staff who provide technical assistance, computer generated schedules, follow-up for missed appointments, assistance with

transportation for eligible children, and other functions which support preventive and primary health care services.

Health Employer Data and Information Set (HEDIS) – A set of standard performance measures that provides information about the quality of care that a health plan provides. HEDIS measures include quality of care, access, cost, and other measures to compare managed care plans.

Health Insurance Portability and Accountability Act (HIPAA) – A Federal law that allows persons to qualify for comparable health insurance when they change jobs. This law also establishes standards for the electronic exchange and use of health care data to safeguard the privacy and security of an individual's personal health information.

Health Insuring Organization (HIO) – A county-operated entity that, in exchange for capitation payments, covers services for beneficiaries:

- Through payments to, or arrangements with, providers
- Under a comprehensive risk contract with the State
- Meets the following criteria
  - First became operational prior to January 1, 1986
  - Is described in Section 9517(e)(3) of the Omnibus Budget Reconciliation Act of 1985 (as amended by Section 4734 of the Omnibus Budget Reconciliation Act of 1990).

Home – The beneficiary's place of residence which includes a boarding home or home for the aged. Home does not include a hospital, skilled nursing facility, intermediate care facility, or intermediate care facility for the mentally retarded.

Home and Community Based Waiver for the Aged and Disabled (ADW) – Also known as the DHHR Medicaid Waiver Program for the Aged and Disabled, or simply the ADW Program.

Home Health Aides – Persons specially trained to assist sick, disabled, infirm, or frail persons at home when no family member is fully able to assume this responsibility. These aides are supervised by health professionals, and provided as part of a continuing medical care plan.

Home Health Care – Health care provided in the home to clients as an alternative to institutional care. The most common types of home care are skilled nursing services, speech, physical, and occupational therapy.

Homemaker – A care provider who provides in-home services to an eligible beneficiary of the program.

Homemaker Agency (HMA) – The agency responsible for assuring appropriate training of the homemaker, placing the homemaker in a client's home, and monitoring the client care and homemaker performance.

Homemaker Services – Direct care and support services that are necessary in order to enable an individual/client to remain at home rather than enter a nursing facility, or to enable an individual to return home from a nursing facility. Homemaker services in the ADW Program include assistance with personal hygiene, nutritional support, and environment maintenance.

Hospice – A public agency or private organization or subdivision of either of these that is primarily engaged in providing care to terminally ill individuals. A Hospice must meet the conditions specified in Title 42 of the Code of Federal Regulations (CFR) 418.50 to 418.100.

Individual – A person applying for Medicaid, or anyone referred to in a general way to connote the norm in health care delivery or standards.

Informal – Volunteer provider or family member who is not reimbursed for services.

Inpatient – A patient who has been admitted to a hospital or long-term care facility on the recommendation of a physician and is receiving room, board, and professional services in the institution on a continuous, 24-hour-a-day basis.

Intermediate Care Facility (ICF) – A long-term care institution which meets licensing requirements according to State law, and/or is certified by Office of Health Facility Licensure and Certification (OHFLAC) to provide, on a regular basis, health related care and services to individuals who do not require the degree of care and treatment which a hospital or nursing facility is designed to provide, but who, because of their mental or physical condition, require care and services which can be made available only through institutional facilities.

Intermediate Care Facility for the Mentally Retarded (ICF/MR) – A facility certified by the West Virginia Department of Health and Human Resource's Office of Health Facility Licensure and Certification as meeting federal certification regulations as an Intermediate Care Facility for the Mentally Retarded or those with related conditions. These facilities must address the total needs of the resident including physical, intellectual, social, emotional, habilitation and provide "active treatment."

Intake – The process of interviewing a person to gather the necessary information to aid the client in obtaining the services available through the Aged and Disabled Waiver Program or a nursing facility.

Level of Care (LOC) – The number of homemaker hours of service for which a client is eligible, as determined by set criteria using the PAS-2000

Level of Care Requirements – The Bureau's requirement for payment on behalf of a beneficiary if that beneficiary were residing in a Bureau enrolled medical assistance institution.

Locality – The area surrounding the institution from which individuals are expected to come for medical services.

Managed Care Organization (MCO) – An entity that has, or is seeking to qualify for, a comprehensive risk contract under the following:

A Federally qualified HMO that meets the advance directive requirements of subpart I of part 489 of the Federal Register definition of a Federally Qualified HMO.

Any public or private entity that meets the advance directive requirements and is determined to also meet the following conditions:

Makes the services it provides to its Medicaid enrollees as accessible (in terms of timeliness, amount, duration, and scope) as those services are to other Medicaid beneficiaries within the area serviced by the entity.

Meets the solvency standards of Section 438.1176.

Mandatory Medicaid Benefits – Specific types of basic health services that a State must provide to categorically needy beneficiaries in order to have a valid Medicaid program. Some of the basic services are hospital inpatient and outpatient services, physician services, nursing facility services for individuals aged 21 years or older, home health care for persons eligible for nursing facility services, family planning services and supplies, laboratory and x-ray services, and pediatric and family nurse practitioner services.

Maximum Allowable Cost (for prescription drugs) (MAC) – Upper limits which may be established by the Federal government or the Federal Department of Health and Human Services.

Medicaid (aka Title XIX, Title 19) – A joint Federal and State program that pays for much or all of the health care services provided to eligible persons with low incomes and limited resources. Medicaid Programs are administered by the States with Federal guidelines and vary from state to state.

Medicaid State Plan – A comprehensive written agreement between the Bureau for Medical Services (BMS) and the Centers for Medicare & Medicaid Services (CMS) that includes eligibility requirements for clients and identifies the scope of medical services for which Federal reimbursement is made.

Medical Adult Day Care (MADC) – Is designed to be an alternative to institutional services, by providing participants with routine health and maintenance care combined with daily structured and supportive activities in a congregate daytime setting. MADCs are responsible for providing routine health and maintenance care combined with daily structured and supportive activities in a congregate daytime setting.

Medical Eligibility – The decision by the Bureau for Medical Services or its agent that the health care status and treatment requirements as prescribed by a medical practitioner substantiates the level of care and criteria for Medicaid benefits.

Medical Identification Card – An identification card issued monthly to each patient or family unit designed to give the provider of medical services the beneficiary identification information for billing purpose.

Medicaid Management Information System (MMIS) – Electronic information system designed and mandated by the Federal government to administer the West Virginia Medicaid Program in a manner that is consistent with all Federal requirements.

Medicaid Statistical Information System (MSIS) – An electronic file that a State submits quarterly to CMS providing specified data elements for the persons covered by Medicaid and paid claims for medical services. The purpose of MSIS is to collect, manage, and disseminate information about beneficiaries and the utilization of and payments for services.

Medical Patient – Any individual who is incapacitated due to injury, illness, disease or mental condition and requires continual medical supervision during transportation to or from an appropriate medical facility or any person who is a beneficiary of the services provided by emergency medical services***.***

Medical/Social Worker/Social Services – A service provided by a person who has at least a bachelor's degree from a school accredited or approved by the Council on Social Work Education and is licensed as a Social Worker.

Medically Appropriate – An effective service that can be provided, taking into consideration the particular circumstances of the beneficiary and the relative cost of any alternative services, which could be used for the same purpose, that is, the most economical service that meets the beneficiary's health needs.

Medically Necessary – Services or supplies that are proper and needed to diagnose or treat a medical condition.

Medically Needy – An individual whose income and resources exceed the levels for assistance established under a State or Federal plan, but whose income and resources are not enough to meet the costs of his/her health and medical services.

Medicare – The 1965 Amendments to the Social Security Act added a new Title (XVIII) Health Insurance for the Aged. Title XVIII, popularly known as Medicare, established a broad program of health insurance for the elderly and certain disabled individuals which is Federally administered through fiscal agents.

Medicare/Medicaid Patient – An individual eligible for Medicare; i.e., 65 years of age or older and certain disabled individuals also receiving medical or financial assistance from the Department of Human Services.

Member – An individual who is enrolled in a managed care plan.

Mental Status – Intellectual functioning, cognitive abilities and emotional status of the client.

Mobile Nonambulatory Patient – An individual that is able to move from place to place, and self exit a building, with the use of a device such as a walker, crutches, or a wheelchair.

MR/DD Waiver Program – The Waiver Program for Mentally Retarded and Developmentally Disabled persons.

MR/DD Waiver Program Services – Services provided under the MR/DD Waiver Program which include Service Coordination, Extended Physician Services (annual medical evaluation), Day Habilitation including Qualified Mental Retardation Professional (QMRP) services, Prevocational Training, Supported employment, Residential Habilitation, Transportation and Respite Care.

Multiple Patients – Transportation of more than one patient at a time is only reimbursable in an emergency transport and should only be used when no other ambulances are available for transport, i.e., mass casualty incident. If transporting more than one patient, the agency can only bill mileage once. It is not permissible to bill mileage for each patient that is being transported in the same ambulance at the same time. This does not include the following transport services which are designed for transporting multiple passengers at the same time:

- Specialized Multi-Patient Medical Transport (SMPMT)
- Specialized Multi-Passenger Van Provider (SMPV)
- Common Carrier Services.

Neuropsychological Evaluation – Full battery of tests used to develop a diagnosis. The evaluation is the sum of all the testing and diagnostic interview sessions. The components of the neuropsychological evaluation are: patient history; assessment of perceptual motor function; language functions; attention, member, learning, intellectual process, and level; and emotional, behavioral, and personality functioning. The evaluation must be accomplished by means of

appropriate psychological procedures administered by a qualified neuropsychologist. Appropriate psychological procedures include, but are not limited to, Wechsler Adult Intelligence Scale, the Wide Range Achievement Test, the Wechsler Memory Scale, the Luria Nebraska Neuropsychological Battery, and the Halstead-Reitan Neuropsychological Battery.

Non-Emergency Transport – Non-emergency services may be scheduled or unscheduled trips that do not meet the criteria for emergency regardless of the origin or destination. Trips for hospital discharge, to and from ESRD facilities for dialysis, to and from other outpatient facilities for chemotherapy, radiation therapy, or other diagnostic services are considered non-emergency services.

For non-emergency services the beneficiary must be bed confined at the time of the ambulance service is provided. The term "bed confined" is not synonymous with "bed rest" or "non-ambulatory." Bed confined is one factor to be considered but is not the sole criterion to determine medical necessity.

Bed confined requires all of the following criteria to be met:

- The beneficiary is unable to get up from bed without assistance
- The beneficiary is unable to ambulate
- The beneficiary is unable to sit in a chair or wheelchair.

Nonrisk Contract – A contract under which the contractor –

- Is not at financial risk for changes in utilization or for costs incurred under the contract that do not exceed the upper payment limits specified in Section 447.362
- May be reimbursed by the State at the end of the contract period on the basis of the incurred costs, subject to the specified limits.

Nursing Facility (NF) – A nursing home or a distinct part of another facility licensed by the West Virginia Department of Health & Human Resources Office of Health Facility Licensure and Certification as meeting Federal and State licensure and certification regulations. A health facility that provides, on a regular basis, services to individuals who do not require the degree of care and treatment that a hospital is designed to provide but who require nursing and/or restorative services.

Nursing Facility Services – Services provided for individuals who need the professional judgment of skilled nursing or rehabilitation personnel and/or medical therapy and sterile techniques on a continuous basis.

Observation – Process in which an individual notes a client's condition, progress, behaviors, and environment.

Office of Emergency Medical Services (OEMS) – The division within the Department of Health and Human Resources responsible for assuring Emergency Medical Services (EMS) agencies and personnel are in compliance with West Virginia State Code §16-4C and West Virginia Health Legislative Rules §64 CSR 48 and §64 CSR 29 which includes licensure, certification, and annual inspections of EMS vehicles.

Office of Family Support – The Office in the Bureau for Children and Families in the West Virginia Department of Health & Human Resources that determines an individual's financial eligibility for Medicaid and other services.

Office of Health Facility Licensure and Certification (OHFLAC) – The office designated by the West Virginia Department of Health and Human Resources to determine whether facilities comply with Federal and State licensure and State certification standards.

Office of Surveillance and Utilization Review (OSUR) – The office within the West Virginia Department of Health & Human Resources that detects and examines any unusual patterns of payments and unnecessary or inappropriate utilization of care and services covered under the Medicaid Program. Activities of this Office may involve a multi-disciplinary approach in coordination with other Department offices and contractors.

Olmstead Act – In July 1999, the Supreme Court issued the Olmstead v. L. C. decision. The Court's decision in that case clearly challenges Federal, state, and local governments to develop more opportunities for individuals with disabilities through more accessible systems of cost-effective, community-based services. The Olmstead decision interpreted Title II of the Americans with Disabilities Act (ADA) and its implementing regulation, requiring States to administer their services, programs, and activities "in the most integrated setting appropriate to the needs of qualified individuals with disabilities."

Outpatient – A patient who is evaluated or treated at a hospital emergency department, medical clinic, diagnostic center, or other appropriate medical facility who is not receiving room, board, and professional services on a 24-hour-a-day basis.

Outpatient Hospital Service – Preventive, therapeutic, or palliative items or services furnished by or under the direction of a physician to an outpatient.

Outpatient Medical Benefits – Specific types of services that a State may include in its Medicaid Program and have part of the costs absorbed by the Federal government. Some of the most frequently covered optional services are clinic services; nursing facility services for beneficiaries under age 21, intermediate care facility/mentally retarded services, optometrist services and eyeglasses, prescribed drugs, and dental services.

Over-Utilization – Excessive use of the Medicaid Program by any provider or beneficiary.

Palliative Care – Any treatment which controls pain, manages symptoms, enhances comfort, and improves the quality of life.

Part A – The portion of the Medicare Program that covers hospital inpatient care, inpatient care in skilled nursing facilities, home health care, and hospice care.

Part B – Medicare Supplementary Medical Insurance. The part of the Medicare Program that covers physician services, hospital outpatient care, home health care, durable medical equipment, and certain other outpatient services.

Participating Common Carrier/Individual Volunteer Providers – A provider of non-medical, non-ambulance transportation of Medicaid beneficiaries. Such services may include; public railways, buses, cabs, airlines; or other firms, corporations, and entities who are certified pursuant to the regulations as established by the Public Service Commission and DHHR; and individual volunteers; all as defined herein.

Participating Ground Ambulance Provider – A provider of ground medical transportation services that has been granted certification, as defined herein, by the Office of Emergency Medical Services (OEMS) and Department of Health & Human Resources (DHHR) for the provision of medical transportation of Medicaid patients and who elects to participate in and

seeks reimbursement from DHHR Bureau for Medical Services, pursuant to the regulations herein.

Levels of ground medical transportation includes Advanced Life Support (ALS), Basic Life Support (BLS), Ambulance Medical Transport (AMT), and Specialized Multi-Patient Medical Transport Provider (SMPMT) as defined herein.

Participating Providers – Hospitals, nursing facilities, home health agencies and practitioners who are enrolled in the Medicaid Program to provide covered services to Medicaid beneficiaries.

PAS-2000 – Pre-Admission Screening form; comprehensive medical evaluation used to determine medical eligibility in the ADW Program.

Patient Management Services – Responsibility for management of the assigned enrollee's health care through direct service provision, arrangement by referral and/or approval of PAAS, including medical services and maintenance of a unified medical record.

Patient Transportation – Movement or transfer of a patient from one location to another by an approved and designated ambulance. EMS Rules §64 CSR 48.

Peer Review Organization (PRO) – Federally designed program charged with the responsibility of utilization and quality review of the necessary medical care provided Medicaid and Medicare patients.

Per Diem – A daily rate of reimbursement for services provided in a facility setting on an inpatient basis.

Physical Environment – Condition of the client's home and how well it meets the client's needs.

Physical Health – General physical condition and mental status of an individual and services which will improve or maintain a beneficiary's health.

Physical Therapy – Services prescribed by a physician and provided by or under the direct supervision of a "qualified physical therapist." A qualified physical therapist is a graduate of a program of physical therapy approved by the American Physical Therapy Association and the Council on Medical Education of the American Medical Association and is licensed or registered in the state.

Plan of Care (POC) – An agreement between the client and case management which identifies a client's problem goals and services to be provided by the ADW Program.

Preauthorization (Prior Approval) – Authorized in advance of the service as a condition for payment.

Prepaid Ambulatory Health Plan (PAHP) – An entity that:

- Provides medical service to enrollees under contract with the State agency, and on the basis of prepaid capitation payments, or other payment arrangements that do not use State plan payment rates,
- Does not provide or arrange for, and is not otherwise responsible for the provision of any inpatient hospital or institutional services for its enrollees
- Does not have a comprehensive risk contract.

Prepaid Inpatient Health Plan (PIHP) – An entity that:

- Provides medical services to enrollees under contract with the State agency, and on the basis of prepaid capitation payments, or other payment arrangements that do not use State plan payment rates
- Provides, arranges for, or otherwise has responsibility for the provision of any inpatient hospital or institutional services for its enrollees
- Does not have a comprehensive risk contract.

Primary Care – The ongoing responsibility of directly providing routine medical care (including diagnosis and/or treatment and health education) to an enrollee and, as necessary, referring the enrollee to another provider for diagnosis and/or treatment.

Primary Care Case Management (PCCM) – A system under which a PCCM contracts with the state to furnish case management services (which include the location, coordination, and monitoring of primary health care services) to Medicaid beneficiaries.

Primary Care Case Manager (PCCM) – A physician, a physician group practice, or an entity that employs or arranges with physicians to furnish primary care case management services or, at State option, any of the following:

- A physician assistant
- A nurse practitioner
- A certified nurse-midwife.

Primary Care Practitioner or Clinic – A Medicaid participating provider of routine care for health promotion and maintenance. A primary care practitioner may be a practicing general or family physician, pediatrician, internist, gynecologist, general surgeon, certified adult or pediatric nurse practitioner, or physician's assistant.

Prior Authorization (PA) – Prior approval necessary for specified services to be delivered for an eligible client by a specified provider before services can be performed, billed, and payment made. A utilization review method used to control certain services which are limited in amount, duration, or scope.

Prior Authorization for Extended Hours – Request for approval of additional services in excess of the client's approved Level of Care.

Prior Authorization Request – Where not otherwise deemed in this manual, a prior-authorization request shall consist of a written request from the case management agency (prior to arranging for services to be delivered) that identifies the requested services. The client's name, Medicaid number, the condition to be treated, a description of requested treatment, anticipation length of treatment, anticipation cost, and a working prognosis must be included in the request.

Private Vehicle Transportation by Individuals – Individuals are permitted to transport Medicaid patients in private autos. Payments are processed by staff in the West Virginia Department of Health & Human Resources county offices and reimbursements made through the non-medical, non-ambulance Transportation Program.

Procedure Code – A code used to identify a medical service or procedure performed by a provider and billed to Medicaid on the CMS-1500 claim form.

Proficiency Testing – A method of quality control that periodically sends specimens to a laboratory for analysis and comparison with the findings for the original test.

Prospective Payment System (PPS) – A method that pays hospitals and nursing facilities a fixed amount to provide inpatient care to Medicaid beneficiaries. The amount is determined before services are provided. The amount for hospital inpatient care is for the entire stay; for nursing facility care, the amount is for one day of care.

Provider Number – A unique 10-digit number assigned by the Bureau for Medical Services to identify each provider of services and which identifies the service provider on the CMS-1500 claim form. The number is essential for billing purposes.

Psychological Services – The evaluation and therapy services provided by an independently practicing licensed psychologist.

Psychologist Under Supervision for Licensure – An individual who:

- Is an unlicensed psychologist with a documented, completed degree in psychology at the level of a Ph.D., Psy.D., Ed.D., M.A., or M.S.
- Has met the requirements of, and is formally enrolled in, the West Virginia Board of Examiners of Psychologists Supervision Program
- Is working towards licensure
- Is employed by and receives two hours of supervision per 40 hours of employment from a Medicaid enrolled psychologist.

Quality Improvement Project – A program designed to improve quality, which includes collection of baseline measures with development and implementation of appropriate interventions, followed by re-measurement.

Reassessment, Reevaluation – An update and review of the client's case to determine the appropriateness of the individualized Service Coordination Plan and Plan of Care.

Referral – The process of sending a patient from one practitioner to another for health care services. The Physician Assured Access System requires that the designated Primary Care Provider authorize a referral for coverage of specialty services.

Regional Office Review – The Centers for Medicare and Medicaid Services Regional Office must review and approve all Managed Care Organization, Prepaid Inpatient Health Plan (PIHP), and Prepaid Ambulatory Health Plan (PAHP) contracts, including those risk and nonrisk contracts.

Registered Nurse (RN) – A person who is professionally licensed by the State of West Virginia as a Registered Nurse.

Reported Charge – Total amount submitted for reimbursement on a claim form by a provider of services.

Residence – The beneficiary's full-time residence, but does not include a hospital, nursing facility, intermediate care facility or any other residential setting in which nursing services are

already available. Personal care services cannot be provided in a hospital, nursing facility, or Intermediate Care Facility.

Risk Adjustment – The dollar amount that is added to or subtracted from a payment rate because the person's health status is below or above the average.

Risk Contract – A contract under which the contractor:

- Assumes risk for the cost of the services covered under the contract
- Incurs a gain or loss depending on the cost of furnishing the services covered by the contract.

Resource Based Relative Value Scale (RBRVS) – A list of relative value unites (or weights) assigned to different types of physician services. The units indicate the cost of and amount paid for one service compared to the cost of and amount paid for the average services. A weight of 2.20 for a service means that the service is 200 percent as costly as the average services. If the average service cost is $30, the specific service would cost $66 = $30x2.20.

Resource Utilization Groups (RUG) – A system that is used to classify nursing home patients in groups based on their medical needs and functional and behavioral characteristics. Information from the Minimum Data Set is used to assign patients to these groups.

Retroactive Medicaid Eligibility – Medicaid eligibility in which a person was determined to be eligible for a period of time prior to the day on which the applicant's financial eligibility was entered into the Medicaid Management Information System (MMIS) for payment.

Rotary Wing Aircraft – The rotary wing air ambulance (helicopter) services are deemed appropriate when the beneficiary's medical condition is such that transport by ground ambulance is not appropriate. Transport by fixed wing may be necessary because the beneficiary's condition requires rapid transport to a treatment facility, and either great distances or other obstacles preclude such rapid delivery to the nearest appropriate facility. The fixed wing aircraft shall be designed, constructed or modified; equipped, maintained, appropriately staffed, and operated for the transportation of patients as provided and classified in West Virginia Health Legislative Rules §64 CSR 48.

Rural Health Clinic (RHC) – Authorized by Section 1102 of the Social Security Act, September 19, 1978, established a class of providers known as Rural Health Clinics which were to be located in designated medical shortage areas, employing nurse practitioners and/or physician assistants under the supervision by physicians, reimbursed on cost-related basis per patient encountered at a rate determined by Medicare physical intermediaries.

Rural Health Clinic Services – Services furnished by a physician within the scope of practice of his/her profession under state law, and services furnished by a physician assistant, nurse practitioner, nurse midwife, or other specialized nurse under the supervision of a physician. Such services may be furnished in the rural health clinic location or away from the clinic by one of the above mentioned practitioners who has an agreement with the clinic that the practitioner will be paid by it for such services.

Service Coordination Plan (SCP) – An agreement between the client and case management agency which identifies client needs, goals, outcomes, and services to be provided by the Aged and Disabled Waiver.

Service Provider – Any individual or agency who coordinates or provides identified program services to individual clients.

Session – The time period used in a psychotherapy service or evaluation service and limited to increments of 20 minutes up to one and one-half hour, depending on the service modality and procedure code.

Single State Agency – The agency designated by the West Virginia Legislature to administer a particular State program. The Bureau for Medical Services is the single state agency that administers the West Virginia Medicaid Program.

Slot Allocation Methodology – A method to equitably distribute waiver allocations.

Specified Low-Income Medicare Beneficiaries (SLIMBs) – Medicare beneficiaries with resources at or below twice the standard allowed under the SSI program and income exceeding the QMB level but less than 120 percent of the Federal Poverty Level. The Medicaid Program pays their monthly Medicare Part B premiums.

Specialized Multi-Patient Medical Transport Provider (SMPMT) – A non-emergency transport service provided by an EMS agency licensed to provide this service by the Office of Emergency Medical Services (OEMS). This service is provided to beneficiaries who are ambulatory and/or mobile nonambulatory with a medical history, but have no apparent immediate need for any level of medical services while being transported to and from scheduled medical appointments. Vehicles and staff must comply with the rules and requirements set forth in West Virginia Health Legislative Rule §64 CSR 29.

Specialized Multi-Patient Medical Transport Vehicle – A vehicle owned and operated by a licensed emergency medical services agency used to provide transportation to ambulatory patients with a medical history but who have no apparent immediate need for any level of medical supervision while being transported to and from scheduled medical appointments.

Specialized Multi-Passenger Van Provider (SMPV) – An organization or entity which operates specialized multi-passenger vans equipped to transport ambulatory and/or mobile nonambulatory patients as described in the medical necessity attachment. SMPV vehicles and personnel shall meet the requirements set forth by these regulations. These vehicles and personnel are to provide safe, sanitary, and comfortable transportation to and from scheduled medical appointments and cannot be utilized for the transportation of Advanced Life Support or Basic Life Support medical patients. This category of transportation provider submits claims directly to the Medicaid Program.

Specialized Multi-Passenger Van Provider (SMPV) Certification – Certification of eligibility issued by the West Virginia Department of Health & Human Resources, Bureau for Medical Services, and the Office of Emergency Service or the Public Service Commission and any other federal governing agency or departments of the State of West Virginia to any individual, firm, corporation, association, county, municipality or other legal entity for the purposes of providing non-ambulance transportation services to eligible Medicaid beneficiaries in the State of West Virginia.

Spend Down – The process by which a person whose income is too high to qualify for Medicaid spends the excess amount on health care and subsequently may qualify for Medicaid benefits.

State Agency – The Bureau for Medical Services is the agency under the provision of Title XIX of the Social Security Act to administer the West Virginia Title XIX Medicaid Program.

State-Only Health Programs – Health benefits that the State provides to eligible persons that is funded entirely from State revenues—that is, the Federal government does not share in the cost of the program, as it does for Medicaid.

State Plan – A comprehensive written agreement between the state agency administering the Medicaid Program and the Centers for Medicare and Medicaid Services, which includes client eligibility requirements and identifies the scope of medical care for which reimbursement is available.

Supplemental Security Income (SSI) – A federal program that provides financial assistance to eligible aged, blind, and disabled persons.

Targeted Case Management Services – The services covered by the West Virginia Medicaid Program to provide targeted case management to Medicaid eligible individuals with mental illness, development disabilities, and substance abuse, pursuant to the case management option available to States under Public Law 99-272, the Consolidated Omnibus Budget Reconciliation Act of 1985 (COBRA).

Terminally Ill – A medical prognosis, by a physician, has determined that an individual's life expectancy is 6 months or less if the illness runs its normal course.

Third Party – Any entity (including other government programs or insurance program) that is or may be liable for payment of all or part of the medical cost for injury, disease, or disability of a client of Medicaid services. Medicaid is always the payer of last resort.

Third Party Liability (TPL) – Financial resources available to the beneficiary to cover costs for medical care. The third party may be private health insurance, Medicare or Medicaid, or retiree health benefits.

Title XIX – The section of the Social Security Act that authorizes the Medicaid Program.

Title XVIII – The section of the Social Security Act that authorizes the Medicare Program.

Unduplicated Recipient/Beneficiary Count – The number of different persons who receive at least one service during a stated time period. Each person is counted once, regardless of the number of services received.

Unit – A standard measure of services provided to an eligible client.

Usual, Reasonable and Customary Charge – Amount providers charge the general public for services or supplies.

Waiver Program for Mentally Retarded and Developmentally Disabled Persons or MR/DD Waiver Program – West Virginia's home and community-based services program for individuals who have mental retardation and or developmental disabilities, administered by the Bureau for Medical Services of the Department of Health and Human Resources in collaboration with the Office of Behavioral Health Services pursuant to a Medicaid waiver option approved by the Center for Medicare and Medicaid Services. The MR/DD Waiver Program is a health care coverage program that reimburses for services to instruct/train, support, and assist individuals who have mental retardation and/or related conditions to achieve the highest level of independence and self-sufficiency possible in their lives. The MR/DD Waiver Program serves individuals who are eligible to receive services in an Intermediate Care Facility for Individuals

with Mental Retardation and Related Conditions (ICF/MR). The MR/DD Waiver Program provides services in homes and local communities instead of ICF/MRs.

West Virginia Department of Health and Human Resources (DHHR) – Cabinet-level department responsible for the administration of health and human services programs in West Virginia.

WVDHHR Title XIX Medicaid Waiver Program for the Aged and Disabled –The Aged and Disabled Home and Community–Based Services Waiver as defined in Chapter 501, Aged & Disabled Waiver Services.

X-Ray Technologist – Operations of equipment is by practitioner or by an x-ray technologist, under his/her direct supervision. An x-ray technologist is defined as an individual licensed under State law to make medical x-rays.

Section 320.9

Introduction: This manual addition provides a single location for identifying all cost report due dates and the filing address for those reports. In addition, it clearly instructs the providers regarding the extension, exemption, and Medicaid cost report late filing penalty policies.

Old Policy: 320.9 MEDICAID COST REPORT SUBMISSIONS AND FILING DEADLINES

Providers listed below are required to timely file their WV Medicaid cost reports for Title XIX services. A timely filed report for providers that are required to submit an annual cost report must be received in accordance with the "Cost Report Due Date" outlined in the chart below, or at the end of an approved extension. Cost reports are considered to be timely filed when received on or before the applicable due date at the following address:

WVDHHR - Office of Accountability & Management Reporting

ATTN: Division of Audit & Rate Setting

1900 Kanawha Blvd., East

State Capitol Complex

Building 3, Room 550

Charleston, WV 25305

New Policy: 320.9 MEDICAID COST REPORT SUBMISSIONS AND FILING DEADLINES

Providers listed below are required to timely file their WV Medicaid cost reports for Title XIX services. A timely filed report for providers that are required to submit an annual cost report must be received in accordance with the "Cost Report Due Date" outlined in the chart below, or at the end of an approved extension. Cost reports are considered to be timely filed when received on or before the applicable due date at the following address:

Cost Report & Settlement Coordinator

WV Department of Health & Human Resources

Office of Accountability and Management Reporting

One Davis Square, Suite 304

Charleston, WV 25301

March 1, 2007

Section 320.9

Introduction: The error contained in the cost report due date for Intermediate Care Facilities for the Mentally Retarded and Long Term Care Facilities has been corrected to reflect 60 days after

the end of the annual reporting period for ICF/MR and 60 days after the end of the 6 month reporting period for LTC instead of the last day of the second month following the 6 month reporting period previously listed.

Directions: Replace the pages containing these sections.

Change: Replace current sections with the updated ones.

Old Policy: ICF/MR and LTC facilities cost reports were indicated as due on the last day of the second month after the end of the six month reporting period.

New Policy: ICF/MR facilities cost reports are due sixty days after the end of the annual reporting period and LTC facilities are due sixty days after the end of each six month reporting period.

Section 320.9

Introduction: This manual addition provides a single location for identifying all cost report due dates and the filing address for those reports. In addition, it clearly instructs the providers regarding the extension, exemption, and Medicaid cost report late filing penalty policies.

Old Policy: Not applicable.

New Policy: 320.9 MEDICAID COST REPORT SUBMISSIONS AND FILING DEADLINES

Providers listed below are required to timely file their WV Medicaid cost reports for Title XIX services. A timely filed report for providers that are required to submit an annual cost report must be received in accordance with the "Cost Report Due Date" outlined in the chart below, or at the end of an approved extension. Cost reports are considered to be timely filed when received on or before the applicable due date at the following address:

WVDHHR - Office of Accountability & Management Reporting

ATTN: Division of Audit & Rate Setting

1900 Kanawha Blvd., East

State Capitol Complex

Building 3, Room 550

Charleston, WV 25305

Facility Type	Cost Report Format	Cost Report Due Date	Cost-Based Settlement
Acute Care Hospital (Hospital Portion and Non-cost settled distinct parts)	CMS-2552-96	Last day of the fifth month after the provider's FYE	No
Acute Care Hospital-Distinct Part(s) Subject to Cost Settlement	CMS-2552-96	Last day of the fifth month after the provider's FYE	Yes
Critical Access Hospital	CMS-2552-96	Last day of the fifth month after the provider's FYE	Yes
Federally Qualified Health Center	CMS-222-92	Last day of the fifth month after the provider's FYE	Yes
Rural Health Clinic	CMS-222-92	Last day of the fifth month after the provider's FYE	Yes
Intermediate Care Facilities for the Mentally Retarded	Financial and Statistical Report for ICF/MR (FASR-ICF/MR)	Last day of the second month after end of six month reporting period.	Settlements may occur upon audit or discovery of errors/omissions in FASR-ICF/MR
Long Term Care Facilities	Financial and Statistical Report for Nursing Homes (FASR-NH)	Last day of the second month after end of six month reporting period.	Settlements may occur upon audit or discovery of errors/omissions in FASR-NH

Residential Child Care - Children's Residential Services	Financial and Statistical Report for Residential Child Care Providers	Last day of the second month after end of six month reporting period	No
Inpatient Psych Facility-Acute Psych Under 21	CMS-2552-96	Last day of the fifth month after the provider's FYE	Yes
Inpatient Psychiatric Residential Treatment Facilities	CMS-2552-96	Last day of the fifth month after the provider's FYE	Yes

WVDHHR will accept the CMS 2552-96 and CMS 222-92 (Medicare) forms for Medicaid cost reporting purposes, however the cost report submitted must include an original signature on the settlement page and a statement certifying the cost report is intended to satisfy the Title XIX Medicaid cost reporting requirement.

The provider's election to electronically file the cost report with the Medicare intermediary does not negate the requirement to file a hard copy cost report as outlined above. WVDHHR will honor an extension granted by Medicare for Medicaid cost report filing purposes, however the provider must forward to the Office of Accountability and Management Reporting (at the above address) a copy of the Medicare granted extension prior to the original submission deadline.

Section 320.10

Old Policy: Not applicable

New Policy: 320.10 Cost Report Extensions

A. Provider may request an extension of up to thirty (30) days beyond the cost report due date for extenuating circumstances. A provider must submit a written request to the Office of Accountability and Management Reporting (OAMR) prior to the cost report due date. The request must include an explanation of the extenuating circumstances and a proposed new date for submission of the cost report to OAMR. If approved, the provider will be notified in writing of the new cost report due date. If rejected, the provider's cost report due date will remain the originally assigned date.

B. The Medicare program may issue extensions in filing cost reports due to various administrative causes. Generally, these extensions are issued as blanket extensions to

specified groups of providers due to software issues or late program changes. In instances where a provider files both with Medicare and with WV Medicaid, OAMR will extend the cost report due date to agree with the Medicare approved extension. A provider must notify OAMR of the Medicare extension.

C. Providers may file an extension request due to extenuating circumstances any time prior to the cost report deadline for filing. Each request will be evaluated by OAMR. The acceptance or rejection of the request will be based upon whether the late preparation of the report had been caused by circumstances within or outside of the provider's control. If the late filing is due to circumstances within the provider's control, the request will be denied.

Section 320.11

Old Policy: Not Applicable

New Policy: 320.11 Cost Report Exemptions

Low utilization exemptions requirements:

A. Providers that have low WV Medicaid utilization may qualify for an exemption in filing their annual WV Medicaid cost report. Providers that render services to five or less WV Medicaid recipients during the provider's fiscal year may request an exemption in filing their annual cost report. A provider that meets the low utilization criterion must file a written request for the exemption directly to the OAMR prior to the cost report's due date. If the request for and exemption is approved by OAMR, the provider will be notified in writing.

B. Providers that have no WV Medicaid utilization during their fiscal year must provide a written statement to OAMR confirming that fact prior to the cost report due date. Providers that meet the no utilization criterion will not be required to file an annual report with the WV Medicaid program.

C. The OAMR reserves the right approve or reject a provider's request for an exemption regardless of compliance with exemption criteria and require a complete and acceptable cost report.

Section 320.12

Old Policy: Not applicable.

New Policy: Cost Report Late Filing Penalties

Failure to file a cost report timely, or failure to file a cost report, may result in suspension of future payments, assessment of interest on program overpayment, or termination from the Medicaid program.

The OAMR will notify providers, by certified mail return receipt requested, whose cost reports are not received by the cost report due date. The notification will advise the provider that their cost report is now delinquent, as well as advise them of the consequences of continued delinquency.

A provider who fails to submit their delinquent cost report within thirty (30) days following the cost report due date will have their interim payments suspended beginning on the thirty-first day of delinquency. This action results in withholding of future payments pending receipt of the provider's cost report. Payments will be reinstated after an acceptable cost report is filed with OAMR. In addition to the full suspension of payments herein described, Nursing Homes and Intermediate Care Facilities / Mentally Retarded will be subject to a ten percent (10%) reduction in reimbursement in accordance the WV State Medicaid Plan. This penalty will be assessed for each day that the cost report is delinquent. Where continued delinquency occurs with regards to submission of the required cost report, a termination action will be initiated in accordance with Medicaid guidelines, Section 310.7.

Sections 310, 320, 330, 340, 350

Introduction: The terms beneficiary and recipient have been replaced by member throughout the entire manual.

Directions: Replace the pages containing these sections.

Change: Replace current sections with the updated ones.

Sections 310, 340, 360

Introduction: The phone numbers and addresses of the Medicaid contracted claims agent has changed.

Directions: Replace the pages containing these sections.

Change: Replace old phone numbers and addresses with the new ones.

Sections 310.2

Introduction: Added location of PAAS agreement on the BMS website. Deleted and replaced paragraph 5.

Directions: Replace the page containing this section.

Change: Replace current section with the updated one.

Sections 310.5

Introduction: Added a sentence to first paragraph.

Directions: Replace the page containing this section.

Change: Replace current section with the updated one.

Sections 320.4

Introduction: Added language clarifying that Medicaid is to be payer of last resort.

Directions: Replace the page containing this section.

Change: Replace current section with the updated one.

Sections 320.5

Introduction: Added language clarifying guidelines for signature and documentation of electronic records.

Directions: Replace the page containing this section.

Change: Replace current section with the updated one.

Sections 320.6

Introduction: Deleted “At a minimum,” in the first paragraph and “Furthermore” in the second paragraph.

Directions: Replace the page containing this section.

Change: Replace current section with the updated one.

Section 340

Introduction: Deleted “or a reversal of a voided claim” at end of second paragraph.

Directions: Replace the page containing this section.

Change: Replace current section with the updated one.

Section 340.6

Introduction: Changed second sentence to “The time limit is 24 months from the date of service to adjust original clean claims.”

Directions: Replace the page containing this section.

Change: Replace current section with the updated one.

CHAPTER 300—PROVIDER PARTICIPATION REQUIREMENTS

TABLE OF CONTENTS

TOPIC **PAGE NO.**

CHAPTER 300–PROVIDER PARTICIPATION REQUIREMENTS

300 INTRODUCTION

Chapter 300 presents an overview of the minimum requirements that health care providers must meet to enroll in and be reimbursed by the West Virginia (WV) Medicaid Program. Certain requirements apply to all providers. Requirements discussed in applicable provider manuals only apply to specific provider types.

310 ENROLLMENT PROCESS

To enroll in the WV Medicaid Program, a health care provider must meet all the requirements established by the Bureau for Medical Services (BMS). Providers may enroll as inpatient or outpatient facilities, agencies, pharmacies, suppliers, dealers, individual practitioners, or groups. All group practices must comply with WV law applicable to group and corporate practice.

The Provider Enrollment Unit is responsible for enrolling qualified providers into the WV Medicaid Program. This unit determines whether the applicant is eligible to participate in the program based on information that the applicant submits.

If a provider wants to participate in the Physician Assured Access System (PAAS) Program as a PAAS Provider, the provider must complete and sign a separate agreement after enrolling in the traditional WV Medicaid Program.

310.1 ENROLLMENT PACKET

Health care providers who are currently licensed, certified, accredited, or registered under WV law, or under another state's law where their practice is located, may participate in the WV Medicaid Program. Health care providers who wish to participate can request an enrollment packet by contacting the Provider Enrollment Unit at: 1-304-348-3360 for out of state and Charleston, WV providers and 1-888-483-0793 for in-state and border providers.

The packet contains the following items:

- Cover letter with instructions for completing the application process
- Provider Enrollment Application
- Form W-9
- Electronic Remittance Voucher Download Authorization
- Electronic Claims Submission Agreement
- Program Instruction on mandatory electronic funds transfer policy
- Direct Deposit Authorization form.

The applicant must complete, sign, and return all applicable forms. Proof of current licensure, certification, accreditation or registration according to WV Medicaid provider enrollment criteria also must be submitted. The applicant must also indicate whether his/her license or other accreditation has been revoked or suspended in another state.

By signing the enrollment form, the applicant agrees to comply with all applicable laws, regulations, and policies of the WV Medicaid Program. This includes Title XIX of the Social

Security Act, the Code of Federal Regulations, the WV State Medicaid Plan, and all applicable state and federal laws, standards, guidelines, and program instructions.

Provision of false information during the application process will result in denial of participation, and the case will be referred to the appropriate legal authority.

310.2 IDENTIFICATION NUMBERS

A health care provider must have a Medicaid provider identification number in order to bill for services rendered to Medicaid members. The provider may also have a group practice Medicaid number and a managed care provider number. The provider may have more than one Medicaid number, depending on the types of services rendered. The provider also may have a Medicare identification number, as well as a Drug Enforcement Agency (DEA) and National Association of the Board of Pharmacies (NABP) number.

Medicaid Number. An applicant who is accepted into the Medicaid Program is assigned a unique 10-digit Medicaid provider identification number. The Provider Enrollment Unit notifies the applicant of his/her number. Medicaid payment will not be made if the provider's Medicaid number does not appear in the appropriate space on claims submitted for payment.

A practitioner who enrolls as a member of a group practice receives a unique Medicaid provider identification number. This number must be used with the group's Medicaid number when billing for services provided to Medicaid members.

For group practices, claims are processed using both the individual and group practice Medicaid provider identification number. Inaccurate or missing numbers will result in payment errors or delays. Also, there are provisions and procedures to differentiate between the "treating" provider number and the "pay to" provider number.

Pharmacy providers must submit their National Council for Prescription Drug Programs (NCPDP) number (formerly NABP number) when billing for prescriptions dispensed to Medicaid members. The 10-digit Medicaid provider number is to be used to bill Durable Medical Equipment (DME).

Medicare Number. A Medicare provider must have his/her Medicare provider number(s) on file with the WV Medicaid Program. Medicare numbers also must be reported on Medicaid enrollment application forms. This will help expedite prompt and accurate payment for services rendered to Medicaid members who are also eligible for Medicare benefits. For these "dual eligible" members, Medicare is the primary payer and Medicaid is the secondary payer, as explained in Section 340.1 below.

Additionally, to ensure accurate claims processing, providers must notify the Provider Enrollment Unit in writing of any change to their Medicare provider number or any Medicare number received subsequent to Medicaid enrollment. Erroneous or missing Medicare numbers may result in denials and inaccurate or delayed Medicaid payments.

Managed Care. Health Maintenance Organizations (HMOs) that participate in MHT are responsible for contracting and credentialing their participating providers. HMOs establish standards for providers that participate in their networks. HMO standards must meet or may exceed those for traditional Medicaid fee-for-service providers. If a provider wants to become a

participating provider with an HMO in Mountain Health Trust (MHT), the provider must contact the HMO directly.

The Office of Medicaid Managed Care, PAAS Program, is responsible for the enrollment of Primary Care Providers (PCPs) who wish to participate in the PAAS Program. All applicants must currently be WV participating Medicaid providers. Under contractual arrangements with BMS, outside vendors may assist with PCP recruitment and enrollment. More information about becoming a PAAS provider can be obtained by calling 1-888-483-0793. The PAAS agreement can be obtained from the website at http://www.wvdhhr.org/bms/oManagedCare/bms_ManCare-main.asp.

310.3 STATE LICENSURE

A health care provider must maintain a valid state license/certification number from either WV or another state where the provider practices. In addition, the health care provider may have to satisfy other credentialing requirements to continue participating in the WV Medicaid Program.

The provider's current license/certification must be on file at all times with the BMS Provider Enrollment Unit. It is the responsibility of the provider to ensure that licensing or certification information is kept current. BMS does not issue reminders or warnings.

The provider must mail or fax to the Provider Enrollment Unit a copy of any renewed license or other credential before the current credential expires. The fax number is 304-348-3380.

A provider's participation in the WV Medicaid Program may be suspended if the Provider Enrollment Unit cannot verify the current status of the provider's credentials.

310.4 REPORT NEW INFORMATION

The information that a provider submits at enrollment may change as time passes. Participating providers must notify the Provider Enrollment Unit immediately of changes related to any of the following items:

- Provider name
- Provider payment and mailing address
- Change in banking information (direct deposit)
- Provider office telephone number
- Provider legal status or practice name
- License or certification status
- Medicare provider identification number
- Practice ownership, including mergers, acquisitions, or consolidations
- Tax identification number
- Other pertinent information.

The notification must be sent in writing to the following address and must contain the provider's Medicaid provider identification number and original signature:

Unisys
P. O. Box 625
Charleston, WV 25322

Notification by fax or telephone is not acceptable. BMS requires the provider's original signature on the notification. Failure to notify the Provider Enrollment Unit may result in denied or delayed Medicaid payments, as well as important mailings and other correspondence being sent to incorrect addresses or business names.

310.5 CHANGE IN PRACTICE OWNERSHIP

A change in practice ownership automatically cancels the selling provider's enrollment in the WV Medicaid Program. The new provider must obtain an enrollment number to participate in the WV Medicaid Program. In addition, should the prior owner start a new practice independently or form a group, a new enrollment request must be completed. A new National Council for Prescription Drug Programs (NCPDP) number is required when there is a change in pharmacy ownership.

For income tax purposes, the Provider Enrollment Unit must be notified at least 30 days in advance about ownership changes that affect the provider's tax identification number. Early notice will help avoid payment delays, denials, and 1099 errors.

310.6 ENROLLMENT MAY BE DENIED

An applicant may be denied enrollment in the WV Medicaid Program if the following circumstances exist:

- The applicant previously failed to correct deficiencies in the operation of a business or enterprise subsequent to receiving written notice of the deficiencies from a state or federal licensing or auditing agency;
- One or more factors exist that directly impair the applicant's ability to render quality health care to Medicaid members, including actions by persons employed by or affiliated with the provider;
- The applicant's health care practitioner license was suspended or revoked in another state;
- The applicant's Medicaid provider identification number was suspended in another state;
- The applicant has been convicted of fraud related to billing for health care service;
- The applicant has been barred from participation in any federal health program.

An applicant may reapply for participation at any time after the cause for the denial is remedied satisfactorily.

310.7 VOLUNTARY AND INVOLUNTARY WITHDRAWAL

A provider's participation in the WV Medicaid Program may be discontinued voluntarily or involuntarily.

Voluntary Withdrawal. Health care providers may voluntarily discontinue Medicaid enrollment by mailing a signed letter to the Provider Enrollment Unit. A PAAS health care provider must give at least 60-days notice before terminating his or her participation and, where possible, assist in the reassignment of patients to other PAAS providers. In all cases, the letter of disenrollment must include the provider's Medicaid number and specify a termination date. The letter must possess the provider's original signature.

In the case of an emergency that renders the provider unable to continue as a Medicaid participant, BMS must be notified as soon as possible. The notice should include a brief explanation of the reason for disenrollment and must be signed by the provider or the provider's legal representative.

Involuntary Withdrawal. BMS may terminate a provider's enrollment in the WV Medicaid Program for one or more of the following reasons:

- Breaches of the provider agreement
- Demonstrated inability to perform under the terms of the provider agreement
- Failure to comply with applicable state and federal laws
- Loss of license or certification
- Failure to comply with WV Medicaid's regulations and policies, as well as those of the DHHS
- Involuntary termination of Medicare participation and enrollment
- Medicaid inactivity for 2 consecutive years.

320 REQUIREMENTS AND RESPONSIBILITIES

Health care providers who participate in the WV Medicaid Program must sign a "provider participation agreement" indicating that they will comply fully with the standards and rules established by the Department of Health and Human Services (DHHS), as well as all applicable state and federal laws and regulations governing the services rendered to Medicaid members.

BMS will issue a provider manual to all newly-enrolled providers, and will make the manual available at www.wvdhhr.org/bms. Participating providers are responsible for thoroughly familiarizing themselves with the manual's contents. If the provider is part of a large organization, several key members or directors need to have a working knowledge of the manual.

320.1 DISCRIMINATION PROHIBITED

Health care providers must comply with all applicable sections of Title VI of the Civil Rights Act of 1964, as amended by the Age Discrimination Act of 1975, the Americans with Disabilities Act of 1990, and the Rehabilitation Act of 1973. This means that a provider who participates in the WV Medicaid Program may not discriminate in the provision of Medicaid benefits based on the member's race, color, national origin, creed, gender, religion, political ideas, marital status, age, or disability.

320.2 ACCEPT NEW PATIENT AS MEDICAID OR PRIVATE-PAY

The provider may accept a new member as all-Medicaid or all-private pay. The provider may not accept the member as a Medicaid patient for some covered services and as a private-pay patient for other covered services. In other words, selective participation is not permitted. Additionally, a provider may not impose, bill, or collect any fees in advance of services from the member, and monies collected after Medicaid payment is received, including co-payments due from other carriers must be returned to the member. Similarly, providers may not void claims and then subsequently bill members for services.

If a provider accepts the member as a Medicaid patient, the provider must bill WV Medicaid for covered services and must accept the Medicaid reimbursement amount as full payment. No

charge may be billed to a Medicaid member for a covered service unless a co-payment is applicable by regulation. However, the provider may bill the member for services not covered by the WV Medicaid Program if the parties agree in writing to this payment arrangement before such services are rendered.

To bill the member, the provider must inform or provide notice to the member prior to rendering services and obtain the member's signature when (1) the WV Medicaid Program does not cover the service, (2) the patient is being accepted as private-pay, not Medicaid, and (3) the member may be financially liable for the amount the provider charges for the service. The notice should be signed and dated by the provider and the member, and a copy given to the member. This procedure may help avoid problems that could arise concerning payment for medical bills.

If the member does not inform the provider of his/her Medicaid coverage status until after a service is rendered, the provider is not obligated to bill Medicaid for the service. Should the provider choose to bill Medicaid, the provider must return to the member any prior payments and forego any remaining balance after Medicaid payment is received.

Providers who treat Medicaid managed care members without appropriate authorization may bill members for services rendered if the member is informed prior to receiving the service that he/she is financially liable for the provider's charges. If appropriate authorization is received prior to rendering services, the above information in subtopic 320.2 applies. If a member is a member of an HMO, the rules of the HMO also apply.

320.3 OBTAIN PRIOR AUTHORIZATION

Various in-state and out-of-state services (for example, but not limited to, hospital inpatient care, nursing facility services, etc.) covered by the WV Medicaid Program must be approved in advance before payment can be made. Pre-service review and prior authorization may be required to initiate treatment or extend treatment beyond the amount, scope, or duration that is routinely allowed or was originally approved.

It is the responsibility of the provider of the service to secure prior approval before rendering the service. In addition, WV Medicaid does not guarantee reimbursement based solely on the issuance of a Prior Authorization number. Eligibility on the date of service, as well as claim submission information and documentation, is also considered in the claim adjudication process.

Several entities are responsible for performing medical necessity reviews, depending mainly on the service to be provided and the place of service. Information about the authorizing entity, and policies and procedures for obtaining prior authorization for particular types of services, is identified in applicable provider manuals.

Requests for prior authorization may be mailed or faxed. With the exception of a pharmacy, requests must be made on the provider's letterhead or the prescribed form. The request must include at least the following information:

- Provider name
- Provider identification number
- Member name and address
- Member WV Medicaid ID number

- Member diagnoses codes and prognosis
- Prescribed treatment, including applicable procedure codes
- Date treatment to begin and items to be furnished
- Duration of treatment
- Other information needed to make a determination.

The provider must submit written documentation demonstrating the medical necessity and appropriateness of the proposed treatment. Prior authorization should be requested sufficiently in advance (e.g., 10 days) so the decision can be reached and mailed to the provider before treatment is rendered. Approval of the request is based on medical necessity and appropriateness of treatment, and may specify the amount to be paid. The approval does not guarantee the patient's Medicaid eligibility for the authorized time period for the provision of service.

When prior authorization is obtained prior to receipt of documentation, payment will only be made subsequent to receipt of all required documentation by WV Medical Institute.

Chapter 100 and Chapter 800 contain additional general information about preadmission review and prior authorization. Applicable provider manuals identify services that require prior authorization by provider type.

320.4 BILL OTHER PAYERS FIRST

Before submitting a claim to the WV Medicaid Program, a health care provider must ask the Medicaid member whether he/she has Medicare or other health insurance coverage, pending litigation, or any other source of payment for services. The provider should also inquire about coverage related to an accident or benefits from the Workers' Compensation Division. The provider is responsible for billing all other third parties before billing the WV Medicaid Program. Medicaid is the payer of last resort. Providers that are denied payment from other payers must exhaust their administrative remedies with said payers prior to billing Medicaid. Providers must retain documentation that support their pursuit of administrative remedies and provide the documentation to Medicaid upon request.

When Medicare is the primary payer and Medicaid is the secondary or tertiary payer, claims must be submitted to Medicaid within one year of the Medicare pay date.

320.5 DOCUMENT AND RETAIN RECORDS

Health care providers must maintain complete, accurate, and legible records that substantiate fully the type, nature, scope, and medical necessity of the services that the member receives. All services billed to Medicaid must be medically necessary and patients' files must document and explain the medical necessity of the billed services. As circumstances permit, there must be an entry for each health care service with the date of service, a description of the service, a plan of care and treatment, information that substantiates the level of service billed, and the provider's signature. PAAS providers, as well as providers participating in Early Periodic Screening Diagnosis & Treatment (HealthCheck) (EPSDT) or other programs, must meet additional record-keeping requirements, as outlined in the PAAS agreement.

Appropriate information should be entered by the provider or countersigned by the provider in the medical record. The date of service must be the same as the date for which Medicaid is

billed. Results of diagnostic tests billed by the provider must be in the medical record. All records must be signed and dated.

The Bureau for Medical Services current interpretive guidelines for signature and documentation of electronic records were adopted from the Department of Health and Human Services (DHHS), Centers for Medicare & Medicaid Services (CMS), Program Memorandum Intermediaries, Transmittal A-03-021, "Rural Health Clinics/Federally Qualified Health Centers Guidelines for Signature and Documentation of Medical Records."

The electronic medical records and signature guidelines follow:

- Only employees designated by the provider's agency may make entries in the member's record. All entries in the member's record must be dated and authenticated, and a method established to identify the author. The identification may include written signatures, computer keys, Private/Public Key Infrastructure (PKIs), rubber stamps, or other codes.
- When rubber stamps, computer codes, etc. are used, a signed statement should be completed by the agency's employee that the chosen method is under the sole control of the person using it.
    - A list of written signatures, computer codes, or other codes that can be verified.
    - All adequate safeguards must be maintained to protect against improper or unauthorized use of a rubber stamp, computer key, or other codes for electronic signatures.
    - Sanctions must be in place for improper or unauthorized use of a rubber stamp, computer key, or other code types of signatures.
- The section of the electronic record documenting the service provided must be authenticated by the employee who provided the described service. If a counter signature is required by the agency, a policy must be developed by the agency stating the rules and regulations.
- There must be a specific action by the author to indicate that the entry is verified and accurate. Systems requiring an authentication process include:
    - Computerized systems that require the agency's employee to review the document on-line and indicate that it has been approved by entering a unique computer code capable of verification.
    - A system in which the agency's employee signs off against a list of entries that must be verified in the member's records.
    - A mail system that sends transcripts to the agency's employee for review. The agency's employee signs and returns a postcard identifying and verifying the accuracy of the record.
- A system of auto-authentication that authenticates a report before the transcription process is not consistent with the stated requirements. There must be a method to determine an agency's employee did, in fact, authenticate the document after it was transcribed from telephonic or other types of recording systems.
- Any authentication method for electronic and stamped signatures must meet the following basic requirements:
    - Unique to the person using it
    - Capable of verification
    - Under the sole control of the person using it, and

- Linked to the data in such a manner that if the data is changed, the signature is invalidated.

The provider must retain the member's medical records for at least five years after the date of service. Any record that is disputed or under investigation must be maintained until the issue is resolved.

The provider must make all records and documentation available upon request to the BMS, the DHHS, the Medicaid Fraud Control Unit, or any other authorized governmental entity consistent with state and federal laws, regulations, and policies. A provider may not charge BMS for any costs incurred to furnish any requested records or supporting documentation.

320.6 PROTECT MEMBER PRIVACY

Health care providers must safeguard the member's privacy and confidentiality, as required by all applicable state and federal laws. The use and disclosure of individually identifiable information must be consistent with the HIPAA. PAAS providers must also comply with all confidentiality requirements outlined in the PAAS agreement.

As HIPAA permits, a participating provider does not have to obtain a member's consent or authorization for BMS or its business associates to release sensitive information about the member for purposes of health care operations or the payment of claims. At the time the member applies for Medicaid eligibility, he/she signs an authorization to release medical records to BMS or its designee.

320.8 DISCLOSE INFORMATION

Health care providers must comply with all disclosure requirements in 42 Code of Federal Regulations Part 455, subpart B, such as those concerning practice ownership and control, business transactions, and persons convicted of fraud or other crimes. A provider also must disclose fully to BMS information about the services furnished to individual Medicaid members, as circumstances may warrant.

320.9 MEDICAID COST REPORT SUBMISSIONS AND FILING DEADLINES

Providers listed below are required to timely file their WV Medicaid cost reports for Title XIX services. A timely filed report for providers that are required to submit an annual cost report must be received in accordance with the "Cost Report Due Date" outlined in the chart below, or at the end of an approved extension. Cost reports are considered to be timely filed when received on or before the applicable due date at the following address:

Cost Report & Settlement Coordinator

WV Department of Health & Human Resources

Office of Accountability and Management Reporting

One Davis Square, Suite 304

Charleston, WV 25301

Facility Type	Cost Report Format	Cost Report Due Date	Cost-Based Settlement
Acute Care Hospital (Hospital Portion and Non-cost settled distinct parts)	CMS-2552-96	Last day of the fifth month after the provider's FYE	No
Acute Care Hospital-Distinct Part(s) Subject to Cost Settlement	CMS-2552-96	Last day of the fifth month after the provider's FYE	Yes
Critical Access Hospital	CMS-2552-96	Last day of the fifth month after the provider's FYE	Yes
Federally Qualified Health Center	CMS-222-92	Last day of the fifth month after the provider's FYE	Yes
Rural Health Clinic	CMS-222-92	Last day of the fifth month after the provider's FYE	Yes
Intermediate Care Facilities for the Mentally Retarded	Financial and Statistical Report for ICF/MR (FASR-ICF/MR)	60 days after end of annual reporting period.	Settlements may occur upon audit or discovery of errors/omissions in FASR-ICF/MR
Long Term Care Facilities	Financial and Statistical Report for Nursing Homes (FASR-NH)	60 days after end of six month reporting period.	Settlements may occur upon audit or discovery of errors/omissions in FASR-NH

Residential Child Care - Children's Residential Services	Financial and Statistical Report for Residential Child Care Providers	Last day of the second month after end of six month reporting period	No
Inpatient Psych Facility-Acute Psych Under 21	CMS-2552-96	Last day of the fifth month after the provider's FYE	Yes
Inpatient Psychiatric Residential Treatment Facilities	CMS-2552-96	Last day of the fifth month after the provider's FYE	Yes

WVDHHR will accept the CMS 2552-96 and CMS 222-92 (Medicare) forms for Medicaid cost reporting purposes, however the cost report submitted must include an original signature on the settlement page and a statement certifying the cost report is intended to satisfy the Title XIX Medicaid cost reporting requirement.

The provider's election to electronically file the cost report with the Medicare intermediary does not negate the requirement to file a hard copy cost report as outlined above. WVDHHR will honor an extension granted by Medicare for Medicaid cost report filing purposes, however the provider must forward to the Office of Accountability and Management Reporting (at the above address) a copy of the Medicare granted extension prior to the original submission deadline.

320.10 Cost Report Extensions

A Provider may request an extension of up to thirty (30) days beyond the cost report due date for extenuating circumstances. A provider must submit a written request to the Office of Accountability and Management Reporting (OAMR) prior to the cost report due date. The request must include an explanation of the extenuating circumstances and a proposed new date for submission of the cost report to OAMR. If approved, the provider will be notified in writing of the new cost report due date. If rejected, the provider's cost report due date will remain the originally assigned date.

B. The Medicare program may issue extensions in filing cost reports due to various administrative causes. Generally, these extensions are issued as blanket extensions to specified groups of providers due to software issues or late program changes. In instances where a provider files both with Medicare and with WV Medicaid, OAMR will extend the cost report due date to agree with the Medicare approved extension. A provider must notify OAMR of the Medicare extension.

C. Providers may file an extension request due to extenuating circumstances any time prior to the cost report deadline for filing. Each request will be evaluated by OAMR. The acceptance or rejection of the request will be based upon whether the late preparation of the report had been caused by circumstances within or outside of the provider's control. If the late filing is due to circumstances within the provider's control, the request will be denied.

320.11 Cost Report Exemptions

Low utilization exemptions requirements:

D. Providers that have low WV Medicaid utilization may qualify for an exemption in filing their annual WV Medicaid cost report. Providers that render services to five or less WV Medicaid recipients during the provider's fiscal year may request an exemption in filing their annual cost report. A provider that meets the low utilization criterion must file a written request for the exemption directly to the OAMR prior to the cost report's due date. If the request for and exemption is approved by OAMR, the provider will be notified in writing.

E. Providers that have no WV Medicaid utilization during their fiscal year must provide a written statement to OAMR confirming that fact prior to the cost report due date. Providers that meet the no utilization criterion will not be required to file an annual report with the WV Medicaid program.

F. The OAMR reserves the right approve or reject a provider's request for an exemption regardless of compliance with exemption criteria and require a complete and acceptable cost report.

320.12 Cost Report Late Filing Penalties

Failure to file a cost report timely, or failure to file a cost report, may result in suspension of future payments, assessment of interest on program overpayment, or termination from the Medicaid program.

The OAMR will notify providers, by certified mail return receipt requested, whose cost reports are not received by the cost report due date. The notification will advise the provider that their cost report is now delinquent, as well as advise them of the consequences of continued delinquency.

A provider who fails to submit their delinquent cost report within thirty (30) days following the cost report due date will have their interim payments suspended beginning on the thirty-first day of delinquency. This action results in withholding of future payments pending receipt of the provider's cost report. Payments will be reinstated after an acceptable cost report is filed with OAMR. In addition to the full suspension of payments herein described, Nursing Homes and Intermediate Care Facilities / Mentally Retarded will be subject to a ten percent (10%) reduction in reimbursement in accordance the WV State Medicaid Plan. This penalty will be assessed for each day that the cost report is delinquent. Where continued delinquency occurs with regards to submission of the required cost report, a termination action will be initiated in accordance with Medicaid guidelines, Section 310.7.

330 OUT-OF-STATE SERVICES

The WV Medicaid Program may pay for covered services furnished by out-of-state providers when (1) medically necessary services are not available in WV or (2) WV members are traveling outside the State and need emergency medical treatment, (3) services have been approved by the BMS Out-of-State Unit or designated contractor, and (4) services are rendered by a border provider. For payment purposes, out-of-state providers must be licensed or certified to practice in their respective states and must be enrolled in the WV Medicaid Program.

330.1 EMERGENCY CARE

WV Medicaid will consider for reimbursement all emergency health care services that out-of-state providers furnish to WV Medicaid members. The circumstances must be documented clearly as a medical emergency, and the services must be medically necessary. The provider must maintain complete documentation in the emergency room records and submit the information with the claim for reimbursement to both justify and document the emergency.

Emergency out-of-state outpatient services need not be prior authorized to be considered for reimbursement from the WV Medicaid Program. However, the bill for the service must clearly indicate that an emergency existed, and the emergency room records must be submitted with the bill directly to the BMS Out-of-State Unit.

If the emergency results in an inpatient admission, the hospital is required to obtain authorization from WV Medical Institute within 24 hours of admission.

330.2 NON-EMERGENCY CARE

Unless the service is prior authorized, WV Medicaid usually does not reimburse for non-emergency health care services that out-of-state providers furnish to WV Medicaid members.

Non-emergency, non-border services that out-of-state providers furnish to WV Medicaid members must be prior authorized for reimbursement from WV Medicaid. To be prior authorized, the service must not be available in WV. The WV referring physician, working with the Out-of-State Unit and the non-border, out-of-state provider, must arrange for the service. The referring provider is responsible for obtaining prior authorization for the service.

All out-of-state hospital inpatient services require preadmission review and prior approval. Pre-service review can be initiated by calling 1-800-982-6334.

This includes acute care hospitals, as well as rehabilitation hospitals and psychiatric facilities for Medicaid members under age 21 years. For documented emergencies, the member may be admitted without prior approval, but the request for authorization and documentation sent must be submitted within 24 hours of admission.

All non-emergency outpatient services provided by non-border, out-of-state providers require prior approval by the BMS Out-of-State Unit, which can be reached at 1-304-558-1700.

Requests for approval must be faxed using the provider's letterhead. The request must indicate whether the service is available in WV and explain why the service should be provided out-of-state. The fax number is 1-304-558-1776.

Chapter 600 explains BMS policies governing billing and reimbursement for Medicaid-covered services furnished by out-of-state providers.

340 BILLING PROCEDURES

To be reimbursed for services rendered to Medicaid members, health care providers must file claims on the proper forms. Claims must be completed accurately with all required information and signed by the provider or an authorized representative. The amount billed must represent the provider's usual and customary charge for the service. A separate claim is required for each member that receives a covered service. Providers must submit the original claim form and retain a copy for their records.

Paper claims that are returned should be corrected and resubmitted promptly, as should any claim with a denied line item. Claims paid based on erroneous information (e.g., incorrect procedure code or units of service) require the submission of a replacement, an adjustment claim.

340.1 PAYER OF LAST RESORT

Medicaid members may have third-party coverage of health expenses, such as Medicare, employment-related coverage, Medicare supplemental, private health insurance, long-term care insurance, automobile insurance, court judgments, or benefits from the Workers' Compensation Division. For members with multiple plan coverage, coordination of benefits is the process that involves determining the order in which insurers are billed for a given service.

As required by law, Medicaid is the "payer of last resort," meaning that other third parties must be billed before Medicaid can be billed for the service. In other words, the other party is the primary payer and Medicaid is the secondary or perhaps tertiary payer. All resources must be exhausted before Medicaid can consider payment. In addition, no Medicaid payment is made for services associated with a medical condition covered by benefits from the Workers' Compensation Division. When the Ryan White Fund is available to a Medicaid member, the Fund will act as the payer of last resort.

WV Medicaid cannot be billed for services that a member receives but the provider makes available at no charge to other individuals or groups.

Some WV Medicaid members who are age 65 or older, are disabled, or have End Stage Renal Disease also qualify for Medicare benefits. Medicare is therefore the primary payer for services covered by both Medicare and Medicaid. In such instances, WV Medicaid pays the Medicare deductible and coinsurance amount up to the Medicaid allowable amount.

If another third party is billed for a service and the one-year filing deadline for Medicaid billing is almost exhausted, the provider should bill Medicaid immediately, even though the third party has not furnished the provider with information about payment. The claim should be billed on paper, along with a note explaining the situation. A copy of all relevant documentation also must be attached to the claim when submitted to Medicaid. Even if Medicaid denies the claim, the submission will give the provider another year to file a claim with Medicaid while the primary payer processes the claim.

Third party information may appear on the member's Medicaid card. This information is subject to change and should be verified with the member at the time of service. The Third Party

Liability (TPL) Unit should be notified if other coverage has changed or been terminated. The TPL Unit can be reached at 1-304-558-1700.

340.2 INSTRUCTIONS AND PROCEDURES

A copy of WV Medicaid's billing instructions can be obtained by accessing www.wvdhhr.org/bms and clicking on the heading Special Topics, then clicking on MMIS, and then on Billing Instructions, go to the section Electronic Billing. Alternately, upon request, the Provider Relations Unit will mail an initial paper copy of the instructions at no cost and will help answer questions about proper Medicaid billing methods. BMS does not provide claim forms. The Provider Relations Unit can be reached at:

1-304-348-3360	Charleston Area
1-888-483-0793	In-State toll free
1-304-348-3360	Out-of-State

The instructions provide all necessary information to submit WV Medicaid health care claims electronically. The Electronic Data Interchange (EDI) help desk is available to answer questions about electronic health care claims and set up electronic billing for the provider. The EDI help desk can be reached at 1-888-483-0793.

For pharmacy electronic claims submission assistance, call 1-800-365-4944.

340.3 ELECTRONIC CLAIM SUBMISSIONS

Health care providers may submit paper claims or submit claims electronically. Paper submissions have declined noticeably because electronic submissions provide the following advantages:

- Faster adjudication
- Fewer claims denied for keying errors
- Improved cash flow
- Claims can be transmitted 24 hours a day, 7 days a week
- Reduced claims preparation and mailing costs
- Free software, support, and training
- Technical support, Monday - Friday, 8 a.m. to 6 p.m.

WV Medicaid and its fiscal agent support electronic submissions. Additional information is available from the EDI help desk at 1-888-483-0793.

340.4 ELECTRONIC REMITTANCE VOUCHER (ERV)

ERVs are available to health care providers in print image or American National Standards Institute (ANSI) format. ERVs alleviate delays that providers might otherwise experience in receiving paper Medicaid remittance vouchers. They are placed on a Bulletin Board System the first day after a weekend cycle and are available 24 hours a day, 7 days a week. ERVs remain posted for 30 days. Entry into the system requires a valid provider or group number and password. Participating providers may enroll for ERVs by completing the appropriate authorization form, which can be obtained by calling 1-888-483-0793.

340.5 ELECTRONIC FUNDS TRANSFER (EFT)

The WV Auditor's Office requires that claims for reimbursement be paid through EFT. EFT allows for direct deposit into providers' bank accounts. Electronic funds transfer expedites payments by reducing the time required to mail and cash paper checks.

A provider may enroll for EFT by completing the Direct Deposit Authorization form and mailing it to the address on the form, or fax to 1-304-348-3380.

A copy of the form can be obtained by telephoning the Provider Relations Unit at:

1-304-348-3360	Charleston Area
1-888-483-0793	In-State toll free
1-304-348-3360	Out-of-State

Assistance with EFT-related issues is available from the Provider Enrollment Unit at 1-304-348-3360.

340.6 CLAIM SUBMISSION TIMELINES

Claims for Medicaid payment must be submitted no later than 12 months after the date of service. The time limit is 24 months from the date of service to adjust original clean claims. A copy of the original claim remittance must accompany resubmission of a denied claim. Generally, claims submitted past the required time frame are denied. If there are special circumstances for the late submission, the provider may submit a written request to BMS to reconsider the claim. The request must be accompanied by documentation that explains the reasons for the late submission. Additional information is in Section 340.1 above.

Also, for consideration for payment, claims for members with backdated Medicaid cards, or with special circumstances (e.g., reversal of a third-party payment), may be submitted on paper with supporting documentation to the Provider Relations Unit at:

1-304-348-3360	Charleston Area
1-888-483-0793	In-State toll free
1-304-348-3360	Out-of-State

350 REIMBURSEMENT

Reimbursement for diagnosing and treating Medicaid members requires health care providers to comply with all applicable state and federal laws, regulations, guidelines, and program instructions. All services billed to WV Medicaid must be medically necessary and the patient's medical records must contain the appropriate documentation.

WV Medicaid does not pay for any service rendered by a provider who is not enrolled with the Medicaid Program on the day the service is furnished, except for medically necessary, documented emergencies. All reimbursable services must be consistent with the WV Medicaid benefit package and rendered according to all applicable state and federal laws and regulations.

The Medicaid payment amount depends on the type and level of service provided. The proper filing of the claim and applicable documentation affects a claim's processing time. Medicaid payment is made to the provider of the service or to a group practice for practitioners enrolled in a group. There are exceptions, however. Specifically, Medicaid payments may be made to:

- A practitioner's employer, if the practitioner is required as a condition of employment to turn over his/her fees to the employer

- The facility where the service is rendered, if the practitioner has a signed contract that requires the facility to submit the claim, or if required by Medicaid policy.

Additionally, a provider may designate that payment be sent to a government agency.

360 SUPPORT SERVICES

BMS makes available various services to support and facilitate a provider's participation in the WV Medicaid Program. Four such services are summarized under the following headings:

- Medicaid Forms
- Education Seminars
- Technical Assistance
- Newsletter.

Some support services are provided directly by BMS; others are furnished by vendors under contractual arrangements with BMS.

360.1 MEDICAID FORMS

Some WV Medicaid forms are available as attachments to applicable provider manual. Providers also may order forms directly from the Provider Relations Unit by calling 1-304-348-3360, or by downloading them from www.wvdhhr.org/bms. BMS does not provide or supply copies of claim forms.

360.2 EDUCATION SEMINARS

BMS conducts annual seminars that are designed specifically to address policy updates, program changes, and provider concerns. The seminars, which are a cooperative effort of the BMS and its fiscal agent, are presented in multiple geographical locations throughout the State. An open forum is conducted to answer questions raised by attendees. Seminars and their geographic locations are announced on the banner page of the remittance voucher. In addition, BMS and its fiscal agent participate in seminars conducted by other public agencies and provider groups.

360.3 TECHNICAL ASSISTANCE

BMS representatives may be made available to visit the provider's office to help resolve issues that cannot be remedied via telephone contact with the Provider Relations Unit, which can be reached at:

1-304-348-3360	Charleston Area
1-888-483-0793	In-State toll free
1-304-348-3360	Out-of-State

While not routine, representatives from providers' offices may meet with BMS or Provider Relations to resolve complex issues that may be too difficult to explain by telephone.

360.4 NEWSLETTER

As circumstances warrant, newsletters are mailed to Medicaid providers. The newsletters inform providers of recent developments, discuss billing and coding issues, and clarify medical coverage and payment policies.

All active Medicaid providers receive Medicaid newsletters, which are sent to the provider's correspondence address on file with BMS.

Newsletters are also posted at www.wvdhhr.org/bms.

CHAPTER 400–MEMBER ELIGIBILITY

CHANGE LOG

Replace	Title	Change Date	Effective Date

January 1, 2005

Sections 400, 420, 430, 440, 450, 460, 470, 480

Introduction: The terms beneficiary and recipient have been replaced by member throughout the entire manual.

Directions: Replace the pages containing these sections.

Change: Replace current sections with the updated ones.

Section 430

Introduction: Added "Mountain Health Trust Program" to heading, removed "Temporary Assistance for Needy Families" as an eligibility category for Managed Care since there are no longer TANF cash assistance recipients who automatically receive Medicaid.

Directions: Replace the page containing this section.

Change: Replace current section with the update.

Section 430.2

Introduction: Deleted "Mountain Health Trust (MHT)" from heading, added "Mountain Health Trust Program" at beginning of first paragraph, added "dental" to third bullet, added a bullet "Transplant services", and changed last paragraph in section.

Directions: Replace the page containing this section.

Change: Replace current section with the update.

Section 430.3

Introduction: Deleted "and PAAS" in the first paragraph.

Directions: Replace the page containing this section.

Change: Replace current section with the update.

Section 450

Introduction: Specified that the first waiver program described is the Aged and Disabled Waiver Program. For further clarification in the MR/DD section, the statement "for members who require ICF/MR level of care" was added, replaced "require" with "qualify for" in the second paragraph.

Directions: Replace the page containing this section.

Change: Replace current section with the update.

Section 470.2

Introduction: Added a bullet, "Payment or required co-pays, if applicable".

Directions: Replace the page containing this section.

Change: Replace current section with the update.

Section 470.3

Introduction: Fees for missed appointments added to list for which members can not be billed.

Directions: Replace the page containing this section.

Change: Replace current section with the update.

CHAPTER 400—MEMBER ELIGIBILITY

TABLE OF CONTENTS

TOPIC **PAGE NO.**

CHAPTER 400–MEMBER ELIGIBILITY

400 INTRODUCTION

Medicaid pays for medical care for individuals who may not be able to afford other health care. Services are provided based on federal guidelines relating to individual or family income, assets, and health care needs. Individuals receiving Supplemental Security Income (SSI) automatically qualify for Medicaid. The Department of Health and Human Resources (DHHR) determines Medicaid eligibility through its local administrative offices. Individuals who wish to apply for medical assistance are referred to the office located in their county of residence. "Covered periods" for eligibility are indicated on the Medicaid identification card for each specific Medicaid member.

FOR VERIFICATION OF MEMBER ELIGIBILITY AND MANAGED CARE COVERAGE, PROVIDERS MAY UTILIZE THE MEDICAID VOICE RESPONSE SYSTEM AT 1-888-483-0793.

410 COVERAGE GROUPS AND CATEGORIES

The following are the primary categories of Medicaid coverage:

- Coverage Groups for Children and Their Caretakers
- Coverage Groups for Aged, Blind or Disabled Individuals or Married Couples
- Coverage Groups for Pregnant Women
- Coverage for Children Only
- Special Medicaid Coverage.

420 DUAL-ELIGIBLE MEMBERS

Members eligible for both Medicare and Medicaid are called dual-eligible members. Medicare is the primary payer for Medicare/Medicaid members. Medicare, a federal health insurance program for the aged and disabled, covers certain hospital, Part A, and medical benefits, Part B, for eligible members. Claims for Medicare/Medicaid members are filed with the Medicare Fiscal Intermediary or carrier on the appropriate Social Security Administration (SSA) claim form prior to billing Medicaid.

Some Medicare carriers cross claims over directly to Medicaid without a paper submission. If this is being done, do NOT bill on paper unless Medicare has denied the claim. There are instances in which Medicare claims are electronically forwarded to Medicaid for payment, but are not successful, because the provider's Medicare number is not on file with Medicaid. If this is the case, please contact Unisys Provider Services so the Medicaid provider files can be properly updated with the additional Medicare provider number(s).

430 MEDICAID MANAGED CARE – MOUNTAIN HEALTH TRUST PROGRAM

Managed care is a health system in which a network of health care providers agree to coordinate and provide health care to a population. This program is offered as an alternative to the traditional fee-for-service (FFS) Medicaid Program. Medicaid's Health Maintenance Organization (HMO) Program focuses on preventive health care, member education and outreach, and a guaranteed cost (premium) for the contracted services regardless of use.

WV Medicaid uses two different managed care models: the HMO model and the primary care management FFS model.

Managed care enrollment is mandatory for Medicaid members in certain eligibility categories; certain pregnant women, and children are required to enroll in managed care. The choices of managed care programs vary by geographical area. The two West Virginia (WV) Medicaid managed care programs are described below.

430.1 PHYSICIAN ASSURED ACCESS SYSTEM (PAAS) PROGRAM

PAAS is WV Medicaid's Primary Care Case Management (PCCM) Managed Care Program. The program is designed to enhance access to medical care and coordinate health care needs and services. Managing costs and ensuring quality care are both important factors of the program. The program encourages newly-eligible members to select a Primary Care Provider (PCP) that will be responsible for providing and coordinating their health care needs. Members who do not select a PCP are assigned one by the enrollment broker. By assigning PCP responsibility, the Bureau achieves desired levels of access, quality, cost savings, continuity of care, and member satisfaction. Participating providers accept the responsibility of directing all aspects of primary and preventive care. The PAAS Program allows the PCP to refer the member to another qualified provider if medically necessary.

Each provider participating in the PAAS Program is an active WV Medicaid provider with special enrollment in the PAAS Program. An enrollment broker is responsible for member enrollment. Members who do not respond to the enrollment efforts of the broker are assigned a primary care provider.

430.2 HEALTH MAINTENANCE ORGANIZATION (HMO) PROGRAM

Mountain Health Trust Program (MHT) began in 1996 as a managed care program that contracts with HMOs. The HMOs receive a monthly capitation payment from BMS for each member enrolled, based on an average projection of medical expenses for a typical member category and/or by age/sex.

HMO enrollment may be mandatory for eligible individuals, depending upon the county of residence. The Medicaid HMO Program focuses on preventive health care, member education and outreach.

MHT HMOs are responsible for providing directly, or under arrangements, the following covered services:

- Primary preventive services
- Acute care services
- Inpatient and outpatient medical/dental care services
- Emergency dental services
- Vision services
- Hearing services
- Durable medical equipment services
- Transplant services

Some services normally covered by Medicaid are excluded from MHT. Those enrolled in managed care may obtain excluded services through the traditional FFS Medicaid Program. The following are excluded services:

- Behavioral health services
- Pharmacy services
- Nursing facility services
- Non-emergency medical transportation services
- Children's preventive and restorative dental services.

MHT is available on a county-by-county basis within WV. In counties considered urban, where two or more MCOs will be available, and enrollment will be mandatory for managed care eligibles. In rural counties where only one HMO is available, the member will be provided a choice of providers within the MCO network. To identify the program (s) available in each county in WV, please utilize the website at http://www.wvdhhr.org/bms/county_map/county_map.html.

430.3 ENROLLMENT BROKER

The Bureau contracts with an enrollment broker to manage member enrollment. The enrollment broker performs county-specific outreach education and enrollment services to assist potential managed care members in their program choices and in the selection of a Managed Care Organization (MCO) or PCP. The enrollment broker provides coordination and information related to available PCPs in the MHT Programs. Field staff in targeted counties performs managed care education and enrollment functions.

The enrollment broker may be contacted at 1-800-449-8466.

430.4 FREEDOM OF CHOICE

Members have full freedom of choice of a participating medical service provider. Members covered by an HMO must use the HMO's provider network for full coverage. Choice also may be restricted with other waiver services.

440 EXPLANATION OF THE MEDICAID MEMBER ID CARD

Eligible members receive identification cards monthly. **Payment is made only for** medically necessary covered services rendered to eligible members; therefore, it is important that the provider carefully check the Medicaid identification card each time a service is rendered. It is also recommended that the voice response system be used each time to verify eligibility and managed care coverage (1-888-483-0793). Medicaid members who are members of an HMO also have eligibility cards issued by the HMO.

Those individuals participating within the Children with Special Health Care Needs Program are assigned an 11-digit identification number by that Program. The Children with Special Health Care Needs number begins with "99", and the last two digits are "01". These individuals may or may not also have a Medicaid identification card.

440.1 INDIVIDUALS WITHOUT MEDICAID IDENTIFICATION CARDS

Any person requesting services without a Medicaid identification card should be advised that he/she is financially liable for all services received until eligibility is verified. The member is responsible for furnishing his/her identification card to the provider. If the card is lost, eligibility may be verified through the Medicaid Voice Response System at 1-888-483-0793. Managed Care identification cards are only replaced on regularly scheduled issuance dates.

450 HOME AND COMMUNITY BASED WAIVERS

Aged and Disabled Waiver – Medicaid members who require a nursing home level of care, but who are able to access the care at home, may receive services such as case management, homemaker services, and adult day care. These services are considered an extension of Medicaid services for the aged and disabled. Current enrolled Medicaid members may seek enrollment in this waiver by completing an assessment form.

Mentally Retarded/Developmentally Disabled (MR/DD) Waiver – The MR/DD coverage group pays for health care and social needs of Medicaid members with mental retardation and developmental disabilities in the community setting rather than an ICF/MR facility or institution for members who qualify for ICF/MR level of care. Services in this program include: case management, adult companion care, comprehensive day and residential habilitation, in-home extended nursing care, respite care, and environmental adaptations or modifications to meet medical needs, such as ramp access to home.

460 SPECIAL PROGRAMS

The following programs exist within the framework of the Medicaid Program.

460.1 CHILDREN WITH SPECIAL HEALTH CARE NEEDS (CSHCN)

This program arranges for statewide direct care providers to deliver clinic and non-clinic services to children with special health care needs using physicians, staff nurses, social workers, and administrative support staff.

Potential members become eligible after completion and approval of a Specialty Care Intake Form (SCIF). Completion may be initiated by referral from a hospital, any health care professional, DHHR office, or any other private or public health-related entity.

Children who are eligible for this service also may be eligible for managed care coverage. If the member is a managed care member, the provider network must be used for services. Services not approved by the HMO may not be billed over the eligibility card; only those carved-out services defined previously may be billed over the eligibility card. Please follow the specific rules and regulations of the HMO when coordinating services.

460.2 EARLY & PERIODIC SCREENING, DIAGNOSIS, & TREATMENT (EPSDT)

HealthCheck is the EPSDT program for WV Medicaid. The purpose of the program is to ensure all covered children receive needed medical and dental services before health problems develop and become chronic, or irreversible damage occurs. The importance of preventive health services and early detection and treatment of diseases in children is emphasized in this program.

HealthCheck is applicable to all Medicaid members under 21 years of age. Medicaid-eligible children receive regularly scheduled health checkups or screens by enrolled providers under contract with the DHHR or a WV Medicaid-participating HMO. Providers must make application and receive approval from DHHR to conduct and receive Medicaid reimbursement for EPSDT screens. Screening providers must follow periodicity requirements that dictate age components of the screens and minimum frequency with which the screens should take place.

460.3 BIRTH TO THREE SERVICES

This program arranges for access to early intervention therapies for infants and toddlers that have developmental delays, or present significant risks for developmental delays. The program operates from the Office of Maternal Child and Family Health (OMCFH) within the Bureau for Public Health, DHHR. OMCFH provides services for education and training of family members, caregivers, and educators to develop a team to manage and correct the developmental delays of the children. This program is for children from birth to age three. The focus of the program is on the early identification and therapeutic management of speech, physical, or occupational delays of children.

460.4 VACCINES FOR CHILDREN

This program operates in conjunction with the Department of Health, Vaccines for Children Program (VFC) to provide specific vaccines to Medicaid-eligible children. This program provides vaccines to adults on a limited basis.

The vaccines for this program are purchased by the federal government and are made available to the states by the Centers for Disease Control and Prevention (CDC) within DHHS. The West Virginia DHHR, Bureau for Public Health, operates the program. Providers are required to register as participants in the VFC program and are furnished the covered vaccines at no cost.

470 MEMBER RIGHTS AND RESPONSIBILITIES

There are certain rights and responsibilities applicable to Medicaid members. They are described below.

470.1 MEMBER RIGHTS

Members are free to choose a participating medical service provider. This applies to all members as long as they do not have a restricted Medicaid card or are not enrolled in a managed care program.

Members enrolled in Medicaid managed care are free to choose a PCP from among those participating in the plan. Referral procedures must be followed in managed care programs. The contracted enrollment broker for BMS assures neutrality and member freedom of choice.

470.2 MEMBER RESPONSIBILITIES

The responsibilities of Medicaid members include, but are not limited to, the following:

- Notify providers promptly of changes in Medicaid coverage
- Notify providers of any other insurance coverage, such as Medicare or private health insurance

-
- Present a valid Medicaid identification card at each visit
- Notify providers of any change in Medicaid or other insurance coverage
- Forward money or denials received from other insurance payers to their Medicaid providers
- Inform their local DHHR office of any changes in address, income, etc.
- Payment or required co-pays, if applicable

470.3 MEMBER LIABILITY

Provider claims filed with the WV Medicaid Program are filed on an assignment basis. Therefore, a provider must accept Medicaid payment as payment in full for covered services. A claim is considered paid in full even when the actual Medicaid payment is zero dollars if the Medicaid payment has been reduced to zero due to payments from Medicare or private insurance.

Refer to Chapter 800 for information on Medicaid Cost Avoidance Requirements, including TPL/COB.

Providers are prohibited from imposing any additional charges on the member above the Medicaid allowable reimbursement amount. This does not include Medicaid co-payments if applicable.

Medicaid members must not be billed, or otherwise held responsible for:

Payments denied for provider error. For example:
- Claims filed more than one year after date of service
- Wrongful billing or missing information

Also:
- Billings denied because provider did not:
  - Follow procedures
  - Get approval from Medicaid or the managed care provider
  - Notify member before the service is provided that it is not covered by Medicaid
- Charges left after payments by insurance or Medicaid are made.
- Fees for missed appointments

Providers must follow the guidelines and procedures set forth by the WV Medicaid Program in relation to billing practices and the member's responsibility for charges.

470.4 MEMBER'S RESPONSIBILITY FOR CERTAIN CHARGES

Medicaid members, if given prior notice may be billed for:

1. Services received after Medicaid benefits are exhausted
2. Services not medically necessary elected by the member
3. Services not approved by the managed care provider (except for medical emergencies)

4. Convenience items not required for medical care
5. Services rendered when the member is not eligible
6. Prior to services being rendered by a provider, the provider informs or gives notice to the member that he/she will not bill Medicaid
7. Services provided when the member refuses to use other available insurance.

It is the responsibility of the member to follow all guidelines set forth by the Medicaid Program in connection with eligibility and payment of services rendered by providers.

470.5 SUBROGATION

If medical assistance is paid, or will be paid, to a provider of medical care on behalf of a member because of any sickness, injury, disease, or disability, and another person is legally liable for such expenses, either pursuant to contract, negligence, or otherwise, the DHHR shall have a right to recover full reimbursement from any award or settlement for medical assistance from any other person, or from the member of such assistance, if he/she has been reimbursed by the other person. The DHHR shall be legally assigned the rights of the member against the person so liable, but only to the extent of the reasonable value of the medical assistance paid and attributable to the sickness, injury, disease, or disability for which the member has received damages.

480 MEMBER FAIR HEARINGS AND APPEALS

WV Medicaid members can take advantage of the WV DHHR Fair Hearings process. Requests for a Fair Hearing must be submitted in writing to:

West Virginia DHHR	or	Bureau for Medical Services
c/o MMIS Contractor		Appeals Section
P.O. Box 2002		Room 251
Charleston, WV 25327-2002		350 Capitol Street
Consumer Review Unit		Charleston, WV 25301-3706

HMO enrollees have additional avenues of appeal concerning adverse decisions made within their HMOs and should call their respective customer service centers. The enrollment broker, who can be reached at 1-800-449-8466, also documents telephone calls involving complaints and appeals that concern managed care issues. The enrollment broker will forward them to the appropriate entity for evaluation.

Refer to Chapter 800 for details regarding Member Appeals.

July 1, 2012

Introduction: Section 501.3, Provider Certification

Old Policy: Only a provider agency certified by BoSS can serve as an ADW provider. A Certification Application must be completed and submitted to:

The Bureau of Senior Services
1900 Kanawha Blvd East
Charleston, WV 25305

An agency may provide both Case Management and Personal Assistance/Homemaker Services provided they maintain:

A. A separate certification and provider number for each service;
B. Separate staffing, for example, an agency Registered Nurse may not provide both Personal Assistance/Homemaker RN and Case Management Services for the same member; and,
C. Separate member files must be maintained for Case Management and Personal Assistance/Homemaker Services.

Conflicts of interest and self-referral are prohibited.

To be certified as an ADW provider, applicants must meet and maintain the following requirements:

A. A business license issued by the State of West Virginia.
B. A federal tax identification number (FEIN).
C. A competency based curriculum for required training areas for Personal Assistance/Homemaker direct care staff. (Refer to *Chapter 501.3.5* and its subparts)
D. An organizational chart
E. A list of the Board of Directors (if applicable)
F. A list of all agency staff, which includes their qualifications. (Refer to *Chapter 501.3.6* and its subparts)
G. A Quality Management Plan that is consistent with the Centers for Medicare & Medicaid's (CMS) quality framework and assurances. (Refer to http://www.hcbs.org/files/28/1377/QFramework.pdf).
H. A physical office that meets the criteria outlined in *Chapter 501.3.1*.
I. Written policies and procedures for processing member grievances.
J. Written policies and procedures for processing member and staff complaints.
K. Written policies and procedures for member transfers.
L. Written policies and procedures for the discontinuation of member services.

M. Written policies and procedures to avoid conflict of interest (if agency is providing both Case Management and Personal Assistance/Homemaker Services).
N. Office space that allows for member confidentiality.
O. An Agency Emergency Plan (for members and office operations).

Agencies will be reviewed by BoSS within six months of initial agency certification, and annually thereafter. (Refer to *Chapter 501.3.4*).

More information regarding provider participation requirements in Medicaid services can be found in *Common Chapter 300, Provider Participation Requirements*.

New Policy: Only a provider agency certified by BoSS can serve as an ADW provider. A Certification Application must be completed and submitted to:

The Bureau of Senior Services
1900 Kanawha Blvd East
Charleston, WV 25305

An agency may provide both Case Management and Personal Assistance/Homemaker Services provided they maintain:

A. A separate certification and provider number for each service;
B. Separate staffing, for example, an agency Registered Nurse may not provide both Personal Assistance/Homemaker RN and Case Management Services for the same member; and,
C. Separate member files must be maintained for Case Management and Personal Assistance/Homemaker Services.

Conflicts of interest and self-referral are prohibited.

To be certified as an ADW provider, applicants must meet and maintain the following requirements:

A. A business license issued by the State of West Virginia.
B. A federal tax identification number (FEIN).
   A competency based curriculum for required training areas for Personal Assistance/Homemaker direct care staff. (Refer to *Chapter 501.3.5* and its subparts)
C. An organizational chart
D. A list of the Board of Directors (if applicable)
E. A list of all agency staff, which includes their qualifications. (Refer to *Chapter 501.3.6* and its subparts)
F. A Quality Management Plan that is consistent with the Centers for Medicare & Medicaid's (CMS) quality framework and assurances. (Refer to http://www.hcbs.org/files/28/1377/QFramework.pdf).

G. A physical office that meets the criteria outlined in *Chapter 501.3.1*.
H. Written policies and procedures for processing member grievances.
I. Written policies and procedures for processing member and staff complaints.
J. Written policies and procedures for member transfers.
K. Written policies and procedures for the discontinuation of member services.
L. Written policies and procedures to avoid conflict of interest (if agency is providing both Case Management and Personal Assistance/Homemaker Services).
M. Office space that allows for member confidentiality.
N. An Agency Emergency Plan (for members and office operations).

Agencies will be reviewed by BoSS within 6 months of providing services to an ADW member and annually thereafter. (Refer to Chapter 501.3.4).

More information regarding provider participation requirements in Medicaid services can be found in *Common Chapter 300, Provider Participation Requirements*.

Directions: Replace Section 501.3

Introduction: **Section 501.3.3, Record Requirements – Member Record**

Old Policy: **Member records**:

A. The provider must keep a file on each Medicaid member.
B. Member files must contain all original documentation for services provided to the member by the provider responsible for development of the document (for example the Case Management agency should have the original Service Plan and the Personal Assistance/Homemaker agency should have the original Plan of Care) including the Pre-Admission Screening (PAS), the complete Member Assessment, Contact Notes, RN Plan of Care, Personal Assistance/Homemaker Worksheets, Member Enrollment Confirmation, etc.
C. Original documentation on each member must be kept by the Medicaid provider for five years or three years after audits, with any and all exceptions having been declared resolved by BMS, in the designated office that represents the county where services were provided.

New Policy: **Member records**:

A. The provider must keep a file on each Medicaid member.
B. Member files must contain all original/required documentation for services provided to the member by the provider responsible for development of the document including the Service Plan, Pre-Admission Screening

(PAS), the complete Member Assessment, Contact Notes, RN Plan of Care, Personal Assistance/Homemaker Worksheets, Member Enrollment Confirmation, etc.

C. Original documentation on each member must be kept by the Medicaid provider for 5 years or 3 years after audits, with any and all exceptions having been declared resolved by BMS, in the designated office that represents the county where services were provided.

Directions: Replace Section 501.3.3

Introduction: Section 501.3.4, Provider Certification Reviews

Old Policy: Providers are required to submit designated evidence to BoSS every 12 months to document continuing compliance with all Certification requirements as specified under *Chapter 501.3* and all of its subparts. This evidence must be attested to by an appropriate official of the provider agency (e.g., Executive Director or Board Chair). If appropriate documentation is not provided within 30 days, a Provisional Certification will apply. Providers who receive a Provisional Certification will be required to have an onsite review by BoSS prior to full re-certification. If deficiencies are found by BoSS during document review, the provider must submit a corrective action plan within 30 days. If an approved corrective action plan and required documentation is not submitted within the required time frame BMS may hold provider claims until an approved corrective action plan is in place. A percentage of providers will be randomly selected annually for an onsite review to validate certification documentation.

Certification reviews will also include a statewide representative sample of member records. BoSS will review member records using the Personal Assistance/Homemaker Monitoring Tool and the Case Management Monitoring Tool. (These tools are available on BoSS' Web site at www.wvseniorservices.gov). The West Virginia Participant Experience Survey (PES) will also be conducted with those members whose charts are selected for review. A proportionate random sample will also be implemented to ensure that at least one member record from each provider site is reviewed.

Targeted onsite certification reviews may also be conducted based on Incident Management Reports and complaint data. In some instances, when member's health and safety are in question, a full review of all records will be conducted.

Completed reports will be made available to the provider agency or PPL within 30 calendar days of the Certification review. Providers must respond to any corrective action within 30 calendar days after receipt of the completed report. Sanctions will be imposed as findings dictate.

New Policy: Providers are required to submit designated evidence to BoSS every 12 months to document continuing compliance with all Certification requirements as specified under *Chapter 501.3* and all of its subparts. This evidence must be attested to by an appropriate official of the provider agency (e.g., Executive Director or Board Chair). *If appropriate documentation is not received by BoSS either prior to or on the established date, a pay hold may be placed on the provider's claims until documentation is received and the provider may be removed from all selection forms. A provisional certification will be issued; however, an on-site visit will be waived if required documentation is received within 30 days. If after 60 days documentation is not received, steps may be taken to execute an emergency transfer of ADW members. If the provider wants to resume/continue service provision, they must submit all required documentation and an on-site continuing certification review will be conducted by BoSS staff.*

BoSS will review all submitted certification documentation and provide a report to BMS. BMS may request payback for certification requirements not met. The provider must remove employees who do not meet requirements from provision of services until certification standards are met and required documentation is approved by BoSS. If the documentation is not received within 30 days of the request, BMS may:

- *Place a payment hold on all future claims until the provider can prove they meet all certification requirements;*
- *Remove the provider from all selection forms; and*
- *Terminate the provider's participation as an ADW provider if all issues are not resolved within 60 calendar days.*

A provider who is terminated from the ADW program for any of the reasons listed above may apply for recertification by contacting BoSS. Recertification includes a mandatory site visit by a BoSS monitor and a 6 month review.

A percentage of providers will be randomly selected annually for an onsite review to validate certification documentation.

Certification reviews will also include a statewide representative sample of member records. BoSS will review member records using the Personal Assistance/Homemaker Monitoring Tool and the Case Management Monitoring Tool. (These tools are available on BoSS' Web site at www.wvseniorservices.gov). The West Virginia Participant Experience Survey (PES) will also be conducted with those members whose charts are selected for review. A proportionate random sample will also be implemented to ensure that at least one member record from each provider site is reviewed.

Targeted onsite certification reviews may also be conducted based on Incident Management Reports and complaint data. In some instances, when member's health and safety are in question, a full review of all records will be conducted.

Completed reports will be made available to the provider agency or PPL within 30 calendar days of the Certification review. Providers have 30 days to respond to draft review findings or to submit a corrective action plan if requested. Sanctions will be imposed as findings dictate.

Directions: Replace Section 501.3.4

Introduction: Section 501.3.5, Staff Requirements

Old Policy: Medicaid prohibits the spouse of an ADW member from providing ADW services for purposes of reimbursement.

Personal Assistance/Homemaker direct care staff and Personal Options direct care staff must be at least 18 years of age and must have the following competency based training before providing services:

A. Cardiopulmonary Resuscitation (CPR) – must be provided by the agency nurse, or a certified trainer from the American Heart Association or American Red Cross.
B. First Aid – may be provided by the agency nurse, a certified trainer or an approved internet provider.
C. Occupational Safety and Health Administration (OSHA) training – must use the current training material provided by OSHA.
D. Personal Assistance/Homemaker Skills – training on assisting members with ADL's – must be provided by the agency RN.
E. Abuse, Neglect and Exploitation - must be provided by the agency nurse, social worker/counselor, a documented specialist in this content area, or an approved internet training provider.
F. HIPAA – training must include agency staff responsibilities regarding securing Protected Health Information - must be provided by the agency nurse, social worker/counselor, a documented specialist in this content area or an approved internet training provider.
G. Direct Care Ethics – training on ethics such as promoting physical and emotional well-being, respect, integrity and responsibility, justice, fairness and equity - must be provided by the agency nurse, social worker/counselor, a documented specialist in this content area, or an approved internet training provider.
H. Member Health and Welfare – training must include emergency plan response, fall prevention, home safety and risk management and training specific to any member special needs - must be provided by the agency nurse.

Prior to using an internet provider for training purposes ADW providers must submit the name, web address, and course name(s) to BoSS for review. BoSS will respond in writing whether this internet training meets the training criteria.

Personal Options members and their direct care employees may access a Resource Consultant for training materials and assistance.

New Policy: Medicaid prohibits the spouse of an ADW member from providing ADW services for purposes of reimbursement.

Personal Assistance/Homemaker direct care staff and Personal Options direct care staff must be at least 18 years of age and must have the following competency based training before providing services:

A. *Cardiopulmonary Resuscitation (CPR) – must be provided by the agency nurse, or a certified trainer from the American Heart Association, American Red Cross, American Health and Safety Institute, or American CPR. Additional CPR courses may be approved by BoSS and can be found at http://www.wvseniorservices.gov/.*
B. First Aid – may be provided by the agency nurse, a certified trainer *or a qualified internet provider.*
C. Occupational Safety and Health Administration (OSHA) training – must use the current training material provided by OSHA.
D. Personal Assistance/Homemaker Skills – training on assisting members with ADL's – must be provided by the agency RN.
E. Abuse, Neglect and Exploitation - must be provided by the agency nurse, social worker/counselor, a documented specialist in this content area, *or a qualified internet training provider.*
F. HIPAA – training must include agency staff responsibilities regarding securing Protected Health Information - must be provided by the agency nurse, social worker/counselor, a documented specialist in this content area *or a qualified internet training provider.*
G. Direct Care Ethics – training on ethics such as promoting physical and emotional well-being, respect, integrity and responsibility, justice, fairness and equity - must be provided by the agency nurse, social worker/counselor, a documented specialist in this content area, *or a qualified internet training provider.*
H. Member Health and Welfare – training must include emergency plan response, fall prevention, home safety and risk management and training specific to any member special needs - must be provided by the agency nurse.

Personal Options members and their direct care employees may access a Resource Consultant for training materials and assistance.

Directions: Replace Section 501.3.5

Introduction: Section 501.3.7, Criminal and Investigation Background Checks

Old Policy: Criminal Investigation Background Checks and Restrictions and Medicaid Exclusion List

At a minimum, a state level criminal investigation background check which includes fingerprints must be conducted by the West Virginia State Police initially and again every three years for all ADW staff including direct-care personnel, case managers, RN's and anyone who has direct access to member(s). If the prospective employee has lived out of state within the last five years, the agency must also conduct a federal background check utilizing fingerprints through the National Crime Information Database (NCID).

Prior to providing any ADW services, the prospective employee or the employee must have initiated the fingerprint check process with the WV State Police. ADW providers **may** do a preliminary check utilizing on-line internet companies and use these results until the fingerprint results are received. An individual who is providing services or is employed by a provider cannot be considered to provide services nor can be employed if ever convicted of:

A. Abduction
B. Any violent felony crime including but not limited to rape, sexual assault, homicide, felonious physical assault or felonious battery
C. Any type of felony battery
D. Child/adult abuse or neglect
E. Crimes which involve the exploitation of a child or an incapacitated adult, including financial exploitation
F. Felony arson
G. Felony or misdemeanor crime against a child or incapacitated adult which causes harm
H. Felony drug related offenses within the last 10 years
I. Felony DUI within the last 10 years
J. Hate crimes
K. Kidnapping
L. Murder/ homicide
M. Neglect or abuse by a caregiver
N. Pornography crimes involving children or incapacitated adults including but not limited to, use of minors in filming sexually explicit conduct, distribution and exhibition of material depicting minors in sexually explicit conduct or sending, distributing, exhibiting, possessing, displaying or transporting material by a parent, guardian or custodian, depicting a child engaged in sexually explicit conduct
O. Purchase or sale of a child
P. Sexual offenses including but not limited to incest, sexual abuse, or indecent exposure

Q. Healthcare fraud
R. Felony forgery

If aware of a recent conviction or change in status, appropriate action must be taken and BMS notified about the change.

The OIG Medicaid Exclusion List must be checked for every agency employee who provides Medicaid services prior to employment and monthly thereafter. Persons on the OIG Medicaid Exclusion List cannot provide Medicaid services. This list can be obtained at http://exclusions.oig.hhs.gov.

All payments for services provided by excluded providers will be recovered by BMS.

New Policy: ***501.3.7 Criminal and Investigation Background Checks***

For the ADW Program the Criminal Investigation Background Check consists of three things:

1. *A fingerprint based criminal history check conducted by the WV State Police contracted entity and, in certain situations, an FBI fingerprint check through the National Crime Information Database (NCID);*
2. *A check of the U.S. Office of Inspector General (OIG) List of Excluded Individuals and Entities (LEIE); and*
3. *A check of the WV DHHR Protective Services Record Check.*

At a minimum, a state level criminal investigation background check which includes fingerprints must be initially conducted by the West Virginia State Police contracted entity and again every three years for all ADW staff including direct-care personnel, case managers, RN's and anyone who has direct access to member(s). If the prospective employee has lived out of state within the last 5 years, the agency must also conduct an FBI I background check utilizing fingerprints through the NCID.

Prior to providing any ADW services, the prospective employee or the employer must have initiated the fingerprint check process with the WV State Police contracted entity. "Initiated" means the prospective employee has had a live fingerprint scan taken at an approved location, or, if submitting hard copies of fingerprints, the day the copies are mailed for processing. ADW providers **may** do a preliminary check utilizing on-line internet companies and use these results until the fingerprint results are received. An individual who is providing services or is employed by a provider cannot be considered to provide services nor can be employed if ever convicted of:

A. Abduction
B. Any violent felony crime including but not limited to rape, sexual assault, homicide, felonious physical assault or felonious battery

C. Any type of felony battery
D. Child/adult abuse or neglect
E. Crimes which involve the exploitation of a child or an incapacitated adult, including financial exploitation
F. Felony arson
G. Felony or misdemeanor crime against a child or incapacitated adult which causes harm
H. Felony drug related offenses within the last 10 years
I. Felony DUI within the last 10 years
J. Hate crimes
K. Kidnapping
L. Murder/ homicide
M. Neglect or abuse by a caregiver
N. Pornography crimes involving children or incapacitated adults including but not limited to, use of minors in filming sexually explicit conduct, distribution and exhibition of material depicting minors in sexually explicit conduct or sending, distributing, exhibiting, possessing, displaying or transporting material by a parent, guardian or custodian, depicting a child engaged in sexually explicit conduct
O. Purchase or sale of a child
P. Sexual offenses including but not limited to incest, sexual abuse, or indecent exposure
Q. Healthcare fraud
R. Felony forgery

Results which include a history of Medicaid fraud or abuse or which may place members at risk of personal health and safety should be taken into consideration prior to employment.

If aware of a recent conviction or change in status, appropriate action must be taken and BMS notified about the change.

The OIG Medicaid Exclusion List must be checked for every agency employee who provides Medicaid services prior to employment and monthly thereafter. Persons on the OIG Medicaid Exclusion List cannot provide Medicaid services. This list can be obtained at http://exclusions.oig.hhs.gov.

All ADW provider agency staff hired after the implementation date of this manual having direct contact with members must have a WVDHHR Protective Services Record Check. These must be initiated (sent to WVDHHR) on each individual upon hire. The Authorization and Release for Protective Services Record Check (BCF-PSRC 6/2005) is the official form available through the DHHR Bureau for Children and Families (BCF), Division of Children and Adult Services or at www.wvdhhr.org/bcf. An individual who has direct contact with a member cannot continue to be employed if the check discloses previous substantiated child or adult maltreatment by the individual. Documentation of

the date that the form is submitted to BCF for processing must be in the Agency Staff's personnel file.

All payments for services provided by excluded providers will be recovered by BMS.

Directions: Replace Section 501.3.7

Introduction: **Section 501.4.1, Incident Management Documentation and Investigation Procedures**

Old Policy: Any incidents involving an ADW member must be entered into the West Virginia Incident Management System (WVIMS) within 24 hours of learning of the incident. The Agency Director, designated RN, or Case Manager will immediately review each incident report. All Critical Incidents must be investigated. As noted in Section *501.4*, all incidents involving abuse, neglect and/or exploitation must be reported to APS but also must be noted in WVIMS.

An Incident Report documenting the outcomes of the investigation must be completed and entered into the WVIMS within 14 calendar days of the incident. Each Incident Report must be printed, reviewed and signed by the Director and placed in an administrative file.

Personal Assistance/Homemaker provider agencies must report to WVIMS monthly the number of hospitalizations which occurred during the month. In addition, providers are to report if there were no incidents.

For Personal Options, PPL must report any incidents in the WVIMS within one business day of learning of the incident. BoSS reviews each incident, investigates and enters outcomes of the investigation within 14 calendar days of the incident.

The WVIMS does not supersede the reporting of incidents to APS. At any time during the course of an investigation should an allegation or concern of abuse or neglect arise, the provider shall immediately notify APS (W.Va. Code §9-6-9a).

An agency is responsible to investigate all incidents, including those reported to APS. If requested by APS, a provider shall delay its own investigation and document such request in the online WVIMS.

New Policy: Any incidents involving an ADW member must be entered into the West Virginia Incident Management System (WVIMS) within 24 hours of learning of the incident. The Agency Director, designated RN, or Case Manager will

immediately review each incident report. All Critical Incidents must be investigated. As noted in Section *501.4*, all incidents involving abuse, neglect and/or exploitation must be reported to APS but also must be noted in WVIMS.

An Incident Report documenting the outcomes of the investigation must be completed and entered into the WVIMS within 14 calendar days of the incident. Each Incident Report must be printed, reviewed and signed by the Director and placed in an administrative file. *Providers are to report monthly if there were no incidents.*

For Personal Options, PPL must report any incidents in the WVIMS within one business day of learning of the incident. BoSS reviews each incident, investigates and enters outcomes of the investigation within 14 calendar days of the incident.

The WVIMS does not supersede the reporting of incidents to APS. At any time during the course of an investigation should an allegation or concern of abuse or neglect arise, the provider shall immediately notify APS (W.Va. Code §9-6-9a).

An agency is responsible to investigate all incidents, including those reported to APS. If requested by APS, a provider shall delay its own investigation and document such request in the online WVIMS.

Directions: Replace Section 501.3.7

Introduction: **Section 501.5.1.2, Initial Medical Evaluation**

Old Policy: Following is an outline of the initial medical evaluation process (as directed in 2005 Cyrus decree):

A. An applicant shall initially apply for the ADW program by having his/her treating physician (M.D. or D.O. only) complete and sign a Medical Necessity Evaluation Request Form. The referring physician, applicant, family member, advocate or other interested party, may submit this form by fax, mail or electronically to APS Healthcare/IRG. APS Healthcare/IRG will not process any Medical Necessity Evaluation Request Form if the physician's signature is more than 60 days old. If the Medical Necessity Evaluation Request form is incomplete, it will be returned to the physician for completion and resubmission, and the applicant will be notified.
B. APS Healthcare/IRG will attempt to contact the applicant (or legal representative) to schedule the assessment, allowing at least two weeks notification. If contact, is made, a notice shall be sent to the individual and/or contact person so noting scheduled home visit date and time.

C. APS Healthcare/IRG will make up to three attempts to contact the applicant. If unable to contact after three attempts, APS Healthcare/IRG will issue a potential referral closure letter to the applicant (or legal representative) and the referring entity. If no contact is made with APS Healthcare/IRG within five business days the referral will be closed. If the applicant chooses to have the evaluation after the referral is closed, a new referral is required.
D. If the Medical Necessity Evaluation Request Form indicates that the applicant has Alzheimer's, multi-infarct, senile dementia, or related condition; or if he/she has a guardian or legal representative, the assessment will not be scheduled without the guardian, or legal representative present to assist the applicant.
E. Nurses shall not render medical diagnoses. In those cases where there is a medical diagnosis question, the decision shall be based on medical evidence presented by appropriate medical professionals.

New Policy: Following is an outline of the initial medical evaluation process (as directed in 2005 Cyrus decree):

A. An applicant shall initially apply for the ADW program by having his/her treating physician (M.D. or D.O. only) complete and sign a Medical Necessity Evaluation Request Form. The referring physician, applicant, family member, advocate or other interested party, may submit this form by fax, mail or electronically to APS Healthcare/IRG. APS Healthcare/IRG will not process any Medical Necessity Evaluation Request Form if the physician's signature is more than 60 days old. If the Medical Necessity Evaluation Request form is incomplete, it will be returned to the physician for completion and resubmission, and the applicant will be notified.
B. APS Healthcare/IRG will attempt to contact the applicant (or legal representative) to schedule the assessment, allowing at least two weeks notification. If contact, is made, a notice shall be sent to the individual and/or contact person so noting scheduled home visit date and time.
C. APS Healthcare/IRG will make up to three attempts to contact the applicant. If unable to contact after 3 attempts, APS Healthcare/IRG will issue a potential referral closure letter to the applicant (or legal representative) and the referring entity. If no contact is made with APS Healthcare/IRG within 5 business days, the referral will be closed. If the applicant chooses to have the evaluation after the referral is closed, a new referral is required.
D. *If the Medical Necessity Evaluation Request Form indicates that the applicant has Alzheimer's, multi-infarct, senile dementia, or related condition; or if he/she has a guardian or legal representative, the assessment will not be scheduled without the guardian, contact person or legal representative present to assist the applicant.*

E. Nurses shall not render medical diagnoses. In those cases where there is a medical diagnosis question, the decision shall be based on medical evidence presented by appropriate medical professionals.

Directions: Replace Sections 501.5.1.2

Introduction: Section 501.5.1.3, Medical Reevaluation

Old Policy: Annual reevaluations for medical eligibility for each ADW member must be conducted. The process is as follows (as directed in 2005 Cyrus decree):

A. A Medical Necessity Evaluation Request Form must be submitted to APS Healthcare/IRG dated and signed by the member (or legal representative). The forms may be faxed to APS Healthcare/IRG but a copy of the original form with the signatures must be maintained in the member's file. The Case Manager, or the member (or legal representative) must check the reevaluation line at the top of the form. A physicians signature is required only if there is a change in, or an additional, diagnosis.
B. The request can be submitted up to 90 calendar days prior to the expiration of the current PAS, and no later than 45 calendar days prior to the expiration of the current PAS. A member's medical eligibility is at risk if the PAS request is submitted less than 45 calendar days before it expires. The expiration of a PAS does not constitute a reason for member appeal.
C. After receiving the reevaluation request, APS Healthcare/IRG will attempt to contact the member (or legal representative) to schedule an assessment, allowing at least two weeks notification.
D. If the Medical Necessity Evaluation Request Form indicates that the applicant has Alzheimer's, multi-infarct, senile dementia, or related condition; or if he/she has a guardian, or legal representative, the assessment will not be scheduled without the guardian, or legal representative present to assist the applicant.
E. If APS Healthcare/IRG makes the contact, a letter is sent to the member (or legal representative), Case Management Agency or PPL, noting the date and time of the assessment.
F. Nurses shall not render medical diagnoses. In those cases where there is a medical diagnosis question, the decision shall be based on medical evidence presented by appropriate medical professionals.
G. If APS Healthcare/IRG is unable to contact the member (or legal representative) within three attempts, a potential closure letter will be sent to the member (or legal representative), the Case Management Agency, or PPL.

H. If no contact is made with APS Healthcare/IRG within five business days of the date of the potential closure letter, APS Healthcare/IRG will send the final denial letter to the member and copy BoSS and the Case Management Agency or PPL. BoSS will close the case.

New Policy: Annual reevaluations for medical eligibility for each ADW member must be conducted. The process is as follows (as directed in 2005 Cyrus decree):

A. A Medical Necessity Evaluation Request Form must be submitted to APS Healthcare/IRG dated and signed by the member (or legal representative). The forms may be faxed to APS Healthcare/IRG but a copy of the original form with the signatures must be maintained in the member's file. The Case Manager, or the member (or legal representative) must check the reevaluation line at the top of the form. A physicians signature is required only if there is a change in, or an additional, diagnosis.
B. The request can be submitted up to 90 calendar days prior to the expiration of the current PAS, and no later than 45 calendar days prior to the expiration of the current PAS. A member's medical eligibility is at risk if the PAS request is submitted less than 45 calendar days before it expires. The expiration of a PAS does not constitute a reason for member appeal.
C. After receiving the reevaluation request, APS Healthcare/IRG will attempt to contact the member (or legal representative) to schedule an assessment, allowing at least 2 weeks notification.
D. If the Medical Necessity Evaluation Request Form indicates that the applicant has Alzheimer's, multi-infarct, senile dementia, or related condition; or if he/she has a guardian, contact person or legal representative, the assessment will not be scheduled without the guardian, contact person or legal representative present to assist the applicant.
E. If APS Healthcare/IRG makes the contact, a letter is sent to the member (or legal representative), Case Management Agency or PPL, noting the date and time of the assessment.
F. Nurses shall not render medical diagnoses. In those cases where there is a medical diagnosis question, the decision shall be based on medical evidence presented by appropriate medical professionals.
G. If APS Healthcare/IRG is unable to contact the member (or legal representative) within three attempts, a potential closure letter will be sent to the member (or legal representative), the Case Management Agency, or PPL.
H. If no contact is made with APS Healthcare/IRG within 5 business days of the date of the potential closure letter, APS Healthcare/IRG will send the final denial letter to the member and copy BoSS and the Case Management Agency or PPL. BoSS will close the case.

Directions: Replace Section 501.5.1.3

Introduction: Section 501.9, Plan of Care Development

Old Policy: The Personal Assistance/Homemaker RN Assessment is used in conjunction with the PAS and the Member Case Management Assessment to develop the member's Plan of Care. The Plan of Care details how Personal Assistance/Homemaker services will be used to meet the direct care needs of the member.

Once the Personal Assistance/Homemaker RN has completed the Initial or Annual Personal Assistance/Homemaker RN Assessment AND has received the Service Plan from the Case Manager, he/she must develop the member's Plan of Care based on identified needs and member preferences within seven (7) calendar days and THEN initiate direct care services within three (3) calendar days.

A copy of all Personal Assistance/Homemaker RN Assessments and member Plans of Care must be provided to the member (or legal representative) and the Case Management Agency. The Personal Assistance/Homemaker Agency must have the original document in the member's file.

New Policy: The Personal Assistance/Homemaker RN Assessment is used in conjunction with the PAS, the Member Case Management Assessment, and the Service Plan to develop the member's Plan of Care. The Plan of Care details how Personal Assistance/Homemaker services will be used to meet the direct care needs of the member.

Once the Personal Assistance/Homemaker RN has completed the Initial or Annual Personal Assistance/Homemaker RN assessment AND has received the Service Plan from the Case Manager, he/she must develop the member's Plan of Care based on identified needs and member preferences and initiate direct care services within 10 calendar days.

A copy of all Personal Assistance/Homemaker RN Assessments and member Plans of Care must be provided to the member (or legal representative) and the Case Management Agency. The Personal Assistance/Homemaker Agency must have the original document in the member's file.

Introduction: Section 501.12.1 Personal Assistance/Homemaker (Direct Care Staff) Code, Unit, Limit and Documentation Requirements

Old Policy: **Procedure Code:** S5130

Service Unit: 15 minutes

Service Limits: Determined by Service Level Criteria and Service Level Limits (Refer to *Sections 501.5.1.1(a and b)*

Prior Authorization Required: Yes

Documentation Requirements: All services provided to a member must be documented on the Personal Assistance/Homemaker Worksheet and maintained within the member's record.

New Policy: **Procedure Code:** S5130

Service Unit: 15 minutes

Service Limits: Determined by Service Level Criteria and Service Level Limits (Refer to *Sections 501.5.1.1(a and b)*

Prior Authorization Required: Yes

Documentation Requirements*: All services provided to a member must be documented on the Plan of Care and maintained within the member's record.*

Directions: Replace Section 501.12.1

Introduction: **Section 501.12.3, Nursing Services Code, Unit, Limit and Documentation Requirements**

Old Policy: **Procedure Code:** T1002

Modifier: UD

Service Unit: 15 minutes

Service Level: 6 units per month

Prior Authorization Required: No

Documentation Requirements: All contacts with, or on behalf of, a member must be documented using the Personal Assistance/Homemaker RN Member Contact Form and maintained within the member's record. The RN Assessment and Plan of Care must be complete.

New Policy: **Procedure Code:** T1002

Modifier: UD

Service Unit: 15 minutes

Service Level: 6 units per month

Prior Authorization Required: No

Documentation Requirements: *All contacts (except for the 6 month and annual visits) with, or on behalf of, a member must be documented using the Personal Assistance/Homemaker RN Member Contact Form and maintained within the member's record. The RN Assessment and Plan of Care must be complete.*

Directions: Replace Section 501.12.3

Introduction: **Section 501.12.3.1, Nursing Responsibilities.**

Old Policy: The RN responsibilities are:

A. If requested by the member (or legal representative) attends the Initial Service Plan meeting.
B. Attend the six (6) month and Annual Service Plan meeting.
C. If requested by the member (or legal representative) attends the member's ADW medical eligibility appointments with APS Healthcare/IRG.
D. If the Case Management Agency develops an Interim Service Plan, the Personal Assistance/Homemaker RN must develop an Interim Plan of Care and initiate homemaker services within three business days. (The Interim Plan of Care can only be used for a maximum of 21 days.)
E. Make a home visit with the member and Personal Assistance/Homemaker within 30 calendar days after Personal Assistance/Homemaker services begin.
F. Complete a Personal Assistance/Homemaker RN Assessment within six (6) months from the date of the Initial or annual Personal Assistance/Homemaker RN Assessment.
G. Based on clinical judgment, complete a Personal Assistance/Homemaker RN Assessment to determine the need for changes in the Plan of Care such as following discharge from an acute care hospital, nursing facility or other residential setting. The RN must notify the Case Manager if additional services or changes in services are needed.

H. Review the Personal Assistance/Homemaker Worksheets to assure services were provided as described in the Plan of Care before submitting billing under code S5130.
I. Review the Personal Assistance/Homemaker Worksheets to assure it has been completed per policy before submitting billing under code S5130.
J. Sign and date all accurately completed Personal Assistance/Homemaker Worksheets.
K. Provide member specific training to Personal Assistance/Homemakers.
L. Complete a home visit with the member to assess any change in needs. Documentation must substantiate the need for the visit using the Personal Assistance/Homemaker RN Member Contact Form.
M. Attend any member Dual Service planning meetings. (Refer to *Section 501.18*)
N. Compile, prepare, and submit material that can be used to assess an ADW member's need for an increase in their Service Level. Service level changes can only be requested for members at Service Level A, B, or C, and only when there is a substantial change in the member's medical condition. In order to determine whether additional hours are warranted, a completed Request for Service Level Change must be submitted to APS Healthcare/IRG. Clinical documentation sufficient to support the request must be submitted, which may include applicable test results from a member's physician or hospital discharge summary. These documents must be on the letterhead of the physician and/or hospital and dated no later than one month prior to, or one month following, the request for an increased Service Level. Information that will not be considered includes any verbal or telephonic statements; or letters from family, neighbors, friends, or Case Management and Personal Assistance/Homemaker staff without attached physician's documentation or discharge summary. The request must be signed by both the Personal Assistance/Homemaker RN and the member (or legal representative). Original signatures are required; i.e., "signature of member on file" is not acceptable. This request may or may not result in a change in the Service Level. Notice of the determination will be sent to the member (or legal representative) and the Personal Assistance/Homemaker Agency, or if a Personal Option member, to PPL. The Personal Assistance/Homemaker Agency must notify the appropriate Case Management Agency of the Service Level determination.

Members who are appealing a denial of medical eligibility will remain at their current Service Level pending a Fair Hearing decision. APS Healthcare/IRG will not review a request for an increased Service Level for such members.

Administrative duties are not billable. These include but are not limited to:

A. Sending copies of any Personal Assistance/Homemaker RN Assessments or Plans of Care to the member (or legal representative) or the Case Management Agency.
B. Notifying the Case Management Agency if a member has been admitted to or discharged from an acute care hospital, nursing home, or other residential facility.
C. Being available to the Personal Assistance/Homemaker (direct care staff) for consultation and assistance at any time when the Personal Assistance/Homemaker (direct care staff) is providing services.
D. Completing and submitting required program reports to BMS, BoSS or APS Healthcare/IRG.
E. Telephone calls.

New Policy: The RN responsibilities are:

A. If requested by the member (or legal representative) attends the Initial Service Plan meeting.
B. Attend the 6 month and Annual Service Plan meeting.
C. If requested by the member (or legal representative) attends the member's ADW medical eligibility appointments with APS Healthcare/IRG.
D. *If the Case Management Agency develops an Interim Service Plan, the Personal Assistance/Homemaker RN must develop an Interim Plan of Care and initiate homemaker services within three business days.*
E. Make a home visit with the member and Personal Assistance/Homemaker within 30 calendar days after Personal Assistance/Homemaker services begin.
F. *Complete a Personal Assistance/Homemaker RN Assessment within 6 months from the date of the Initial or annual Personal Assistance/Homemaker RN Assessment.*
G. Based on clinical judgment, complete a Personal Assistance/Homemaker RN Assessment to determine the need for changes in the Plan of Care such as following discharge from an acute care hospital, nursing facility or other residential setting. The RN must notify the Case Manager if additional services or changes in services are needed.
H. *Review the Plan of Care to assure services were provided as described in the Service Plan before submitting billing under code S5130.*
I. *Review the Plan of Care to assure it has been completed per policy before submitting billing under code S5130.*
J. *Sign and date all accurately completed Plans of Care.*
K. Provide member-specific training to Personal Assistance/Homemakers.
L. Complete a home visit with the member to assess any change in needs. Documentation must substantiate the need for the visit using the Personal Assistance/Homemaker RN Member Contact Form.
M. Attend any member Dual Service planning meetings. (Refer to *Section 501.18*)

N. Compile, prepare, and submit material that can be used to assess an ADW member's need for an increase in their Service Level. Service level changes can only be requested for members at Service Level A, B, or C, and only when there is a substantial change in the member's medical condition. In order to determine whether additional hours are warranted, a completed Request for Service Level Change must be submitted to APS Healthcare/IRG. Clinical documentation sufficient to support the request must be submitted, which may include applicable test results from a member's physician or hospital discharge summary. These documents must be on the letterhead of the physician and/or hospital and dated no later than 1 month prior to, or 1 month following, the request for an increased Service Level. CHAPTER 501–COVERED SERVICES, LIMITATIONS, AND EXCLUSIONS FOR AGED AND DISABLED WAIVER SERVICES
TABLE OF CONTENTS

TOPIC **PAGE NO.**

CHAPTER 501–COVERED SERVICES, LIMITATIONS, AND EXCLUSIONS FOR AGED AND DISABLED WAIVER SERVICES

INTRODUCTION

The West Virginia Medicaid Program is administered pursuant to Title XIX of the Social Security Act and Chapter 9 of West Virginia Code. The Bureau for Medical Services (BMS) in the West Virginia Department of Health and Human Resources (DHHR) is the single State agency responsible for administering the Program. This Program, therefore, must also function within federally defined parameters. Any service, procedure, item, or situation not discussed in the manual must be presumed non-covered.

Medicaid offers a comprehensive scope of medically necessary medical and mental health services. All covered and authorized services must be provided by enrolled providers practicing within the scope of their license, utilizing professionally accepted standards of care, and in accordance with all State and Federal requirements. Enrolled providers are subject to review of services provided to Medicaid members by BMS whether or not the services require prior authorization. All providers of services must maintain current, accurate, legible and completed documentation to justify medical necessity of services provided to each Medicaid member and made available to BMS or its designee upon request.

This chapter sets forth the BMS requirements for the Aged and Disabled Waiver (ADW) Program provided to eligible West Virginia Medicaid members. Requirements for other West Virginia Medicaid services can be found in subsequent chapters of the provider manual.

The policies and procedures set forth herein are promulgated as regulations governing the provision of ADW services by ADW providers in the Medicaid Program administered by the West Virginia DHHR under the provisions of Title XIX of the Social Security Act and Chapter 9 of the Public Welfare Law of West Virginia.

All forms for this program can be found at http://www.dhhr.wv.gov/bms/hcbs/ADW/Pages/ADW.aspx.

501.1 DEFINITIONS

Definitions governing the provision of all West Virginia Medicaid services will apply pursuant to *Common Chapter 200, Acronyms and Definitions*, of the Provider Manual. In addition, the following definitions apply to the requirements for payment of services in the ADW Program described in this chapter.

Abuse: the infliction or threat to inflict bodily injury on or the imprisonment of any child or incapacitated adult.

Activities of Daily Living (ADL): activities that a person ordinarily performs during the ordinary course of a day, such as mobility, personal hygiene, bathing, dressing, eating, and skills required for community living.

APS Healthcare/Innovative Resources Group (IRG) – serves as the Administrative Services Organization for the Aged and Disabled Waiver program which includes conducting the medical evaluations and determining medical eligibility for the program

Bureau of Senior Services (BoSS) – is the state agency which serves as the operating agency for the Aged and Disabled Waiver Program.

Community Integration: the provision of services which allows a person to live and participate in his/her community and the activities it offers to all citizens.

Competency Based Curriculum: a training program which is designed to give participants the skills they need to perform certain tasks and/or activities. The curriculum should have goals, objectives and an evaluation system to demonstrate competency in training areas.

Emergency Plan: a written plan which details who is responsible for what activities in the event of an emergency, whether it is a natural or man-made incident.

Environmental Maintenance: activities such as light housecleaning, making and changing the client's bed, dishwashing, and client's laundry.

Felony: a serious criminal offense punishable by imprisonment in the penitentiary.

Financial Exploitation: illegal or improper use of an elder's or incapacitated adult's resources. Obvious examples of financial exploitation include cashing a person's checks without authorization; forging a person's signature; or misusing or stealing a person's money or possessions. Another example is deceiving a person into signing any contract, will, or other document.

Fiscal Employer/ Agent (FE/A): under Personal Options which receives, disburses, and tracks funds based on participants' approved service plans and budgets; assists participants with completing participant enrollment and worker employment forms; conducts criminal background checks of prospective workers; and verifies workers' information (i.e., social security numbers, citizenship or legal alien verification documentation). The FE/A also prepares and distributes payroll including the withholding, filing, and depositing of federal and state income tax withholding and employment taxes and locality taxes; processes and pays vendor invoices for approved goods and services, as applicable; generates reports for state program agencies, and participants; and may arrange and process payment for workers' compensation and health insurance, when appropriate.

Home and Community Based Services (HCBS): services which enable individuals to remain in the community setting rather than being admitted to a Long Term Care Facility (LTCF).

Informals (Informal Supports): Family, friends, neighbors or anyone who provides a service to a member but is not reimbursed.

Instrumental Activities of Daily Living (IADL): skills necessary to live independently, such as abilities used to shop for groceries, handle finances, perform housekeeping tasks, prepare meals, and take medications.

Legal Representative: a personal representative with legal standing (as by power of attorney, medical power of attorney, guardian, etc.).

Misdemeanor: a less serious criminal offense than a felony which is punishable by a fine or imprisonment in jail.

Molina Medicaid Solutions: the claims processing agent for the West Virginia BMS.

Neglect: "failure to provide the necessities of life to an incapacitated adult" or "the unlawful expenditure or willful dissipation of the funds or other assets owned or paid to or for the benefit of an incapacitated adult" (§9-6-1). Neglect would include the lack of or inadequate medical care by the service provider and inadequate supervision resulting injury or harm to the incapacitated member. Neglect also includes, but is not limited to: a pattern of failure to establish or carry out a member's individualized program plan or treatment plan that results in negative outcome or places the member in serious jeopardy; a pattern of failure to provide adequate nutrition, clothing, or health care; failure to provide a safe environment resulting in negative outcome; and/or failure to maintain sufficient, appropriately trained staff resulting in negative outcome or serious jeopardy. This may also include medication errors and dietary errors resulting in a need for treatment for the member.

Participant-Direction: the member, or his/her representative, have decision-making authority over certain services and take direct responsibility to manage their services with the assistance of a system of available supports. Participant-Direction promotes personal choice and control over the delivery of waiver and state plan services, including who provides the services and how services are provided.

Person-Centered Planning: a process-oriented approach which focuses on the person and his/her needs by putting him/her in charge of defining the direction for his/her lives, not on the systems that may or may not be available.

Public Partnerships, LLC (PPL): serves as the FE/A for participants who choose Personal Options. PPL also provides resource consultants to assist members.

Quality Management Plan: a written document which defines the acceptable level of quality, and describes how the project will ensure this level of quality in its deliverables and work processes.

Remediation: act of correcting an error or a fault.

Representative Sample: a small quantity of a targeted group such as customers, data, people, products, whose characteristics represent (as accurately as possible) the entire batch, lot, population, or universe.

Resource Consultant: assists ADW members who chose Personal Options with the responsibilities of self-direction; developing a plan and budget to meet their needs; providing information and resources to help hire, train and manage employees; developing and maintaining a directory of eligible employees; providing information and resources to help purchase goods and services; connecting with a network of peer supports; helping to complete required paperwork for Personal Options; and helping the member select a representative to assist them, as needed.

Scope of Services: the range of services deemed appropriate and necessary for an individual client. Such services may include but are not limited to prevention, intervention, outreach, information and referral, detoxification, inpatient or outpatient services, extended care, transitional living facilities, etc.

Sexual Abuse: any following act toward an incapacitated adult in which an individual engages in, attempts to engage in, or knowingly procures another person to engage in such act, notwithstanding the fact that the incapacitated individual may have suffered no apparent physical injury as a result of such conduct:

1) Sexual intercourse/intrusion/contact; and
2) Any conduct whereby an individual displays his/her sex organs to an incapacitated adult for the purpose of gratifying the sexual desire of that individual, of the person making such display, or of the incapacitated adult, or for the purpose of affronting or alarming the incapacitated adult.

Sexual Exploitation: when an individual, whether for financial gain or not, persuades, induces, entices, or coerces an incapacitated adult to display his/her sex organs for the sexual gratification of that individual or third person, or to display his/her sex organs under circumstances in which that individual knows such display is likely to be observed by others who would be affronted or alarmed.

501.2 PROGRAM DESCRIPTION

Federal regulations governing Medicaid coverage of home and community-based services under an approved waiver specify that services provided under waiver authority must be targeted to individuals who would otherwise be eligible for placement in a long-term care facility.

The ADW Program is defined as a long-term care alternative which provides services that enable an individual to remain at or return home rather than receive nursing home care. The program provides home and community-based services to West Virginia residents who are eligible to participate in the program. Members must also be at least 18 years of age and choose home and community-based services rather than nursing home placement. The goals and objectives of this program are focused on providing services that are person-centered, that promote choice, independence, participant-direction, respect, and dignity and community integration. All members are offered and have a right to freedom of choice of providers for services. BMS contracts with the Bureau of Senior Services (BoSS) to operate the program.

ADW services (reimbursable by Medicaid) are to be provided exclusively to the member, for necessary activities as listed in the Service Plan, the Plan of Care, or Personal Options Participant-Directed Service Plan. They are not to be provided for the convenience of the household or others. Although informal supports are not mandatory in the ADW Program, the program is designed to provide formal support services to supplement, rather than replace, the member's existing informal support system.

ADW services include Case Management, Personal Assistance/Homemaker Services and Participant-Directed Goods and Services.

Within the ADW program, members may choose from either the Traditional (Agency) Model or the Participant-Directed Model known as Personal Options for service delivery. In the Traditional Model, members receive their services from employees of a certified provider agency. Members have individualized service hours based on their assessed level of need. In Personal Options, members are able to hire, supervise and terminate their own employees. Members are allocated a monthly budget based on their assessed level of need.

501.3 PROVIDER CERTIFICATION

Only a provider agency certified by BoSS can serve as an ADW provider. A Certification Application must be completed and submitted to:

The Bureau of Senior Services
1900 Kanawha Blvd East
Charleston, WV 25305

An agency may provide both Case Management and Personal Assistance/Homemaker Services provided they maintain:

A. A separate certification and provider number for each service;
B. Separate staffing, for example, an agency Registered Nurse may not provide both Personal Assistance/Homemaker RN and Case Management Services for the same member; and,
C. Separate member files must be maintained for Case Management and Personal Assistance/Homemaker Services.

Conflicts of interest and self-referral are prohibited.

To be certified as an ADW provider, applicants must meet and maintain the following requirements:

A. A business license issued by the State of West Virginia.
B. A federal tax identification number (FEIN).
C. A competency based curriculum for required training areas for Personal Assistance/Homemaker direct care staff. (Refer to *Chapter 501.3.5* and its subparts)
D. An organizational chart.
E. A list of the Board of Directors (if applicable).

F. A list of all agency staff, which includes their qualifications. (Refer to *Chapter 501.3.6* and its subparts)
G. A Quality Management Plan that is consistent with the Centers for Medicare & Medicaid's (CMS) quality framework and assurances. (Refer to http://www.hcbs.org/files/28/1377/QFramework.pdf)
H. A physical office that meets the criteria outlined in *Chapter 501.3.1*.
I. Written policies and procedures for processing member grievances.
J. Written policies and procedures for processing member and staff complaints.
K. Written policies and procedures for member transfers.
L. Written policies and procedures for the discontinuation of member services.
M. Written policies and procedures to avoid conflict of interest (if agency is providing both Case Management and Personal Assistance/Homemaker Services).
N. Office space that allows for member confidentiality.
O. An Agency Emergency Plan (for members and office operations).

Agencies will be reviewed by BoSS within 6 months of providing services to an ADW member and annually thereafter. (Refer to *Chapter 501.3.4*).

More information regarding provider participation requirements in Medicaid services can be found in *Common Chapter 300, Provider Participation Requirements*.

501.3.1 Office Criteria

ADW providers must designate and staff at least one physical office location. A post office box or commercial mailbox will not suffice. Each designated office must meet the following criteria:

A. Be located in West Virginia.
B. An agency office site can serve no more than eight contiguous counties. (ADW providers wishing to make changes in the approved counties they serve **must** make the request in writing to BoSS. BoSS will make a determination on the request and inform the provider in writing. No changes in counties served can be made unless approved by BoSS).
C. Meet ADA requirements for physical accessibility. (Refer to 28CFR36, as amended)
D. Be readily identifiable to the public.
E. Maintain a primary telephone that is listed under the name and local address of the business. (Note: Exclusive use of a pager, answering service, a telephone line shared with another business/individual, facsimile machine, cell phone, or answering machine does not constitute a primary business telephone.)
F. Maintain an agency secure (HIPAA compliant) e-mail address for communication with BMS and BoSS.
G. Be open to the public at least 40 hours per week. Observation of state and federal holidays is at the provider's discretion.
H. Contain space for securely maintaining member and personnel records. (Refer to *Common Chapter 800*, *General Administration*, and *Common Chapter 300*, *Provider Participation Requirements*, for more information on maintenance of records).
I. Maintain a 24-hour contact method (Personal Assistance/Homemaker Agencies only).

Following the receipt of a completed Certification Application, BoSS will schedule an onsite review to verify that the applicant meets the certification requirements outlined in *Chapter 501.3*. BoSS will notify Molina, BMS claims agent, upon satisfactory completion of the onsite review. Molina will provide the applicant with an enrollment packet which includes the Provider Agreement. The applicant must return the Provider Agreement, signed by an authorized representative, to BMS. Once this process has been completed, Molina will assign a provider number. A letter informing the agency that it may begin providing and billing for ADW services will be sent to the agency and to BoSS.

Personal Options member employees enter into a simplified provider agreement facilitated and signed by Public Partnerships, LLC (PPL) which acts as the Fiscal Employer/Agent-Resource Consultant, a subagent to the BMS.

When a provider is physically going to move their agency to a new location or open a satellite office, they must notify BoSS **prior** to the move. BoSS will schedule an on-site review of the new location to verify the site meets certification requirements. Medicaid services cannot be provided from an office location that has not been certified by BoSS.

501.3.2 Continuing Certification

Once certified and enrolled as a Medicaid provider, ADW providers must continue to meet the requirements listed in *Chapter 501.3* and its subparts as well as the following:

A. Employ adequate, qualified, and appropriately trained personnel who meet minimum standards for providers of the ADW Program.
B. Provide services based on each member's individual assessed needs, including evenings and weekends.
C. Maintain records that fully document and support the services provided.
D. Furnish information to BMS, or its designee, as requested. (Refer to *Common Chapter 800, General Administration*, and *Common Chapter 300, Provider Participation Requirements*, for more information on maintenance of records).
E. Maintain a current list of members receiving ADW services.
F. Comply with the Incident Management System (Refer to *Chapter 501.4* and its subparts) and maintain an administrative file of Incident Reports.

501.3.3 Record Requirements

Providers must meet the following record requirements:

Member records:

A. The provider must keep a file on each Medicaid member.
B. Member files must contain all original/required documentation for services provided to the member by the provider responsible for development of the document including the Service Plan, Pre-Admission Screening (PAS), the complete Member Assessment, Contact Notes, RN Plan of Care, Personal Assistance/Homemaker Worksheets, Member Enrollment Confirmation, etc.

C. Original documentation on each member must be kept by the Medicaid provider for 5 years or 3 years after audits, with any and all exceptions having been declared resolved by BMS, in the designated office that represents the county where services were provided.

Personnel Records:

A. Original or legible copies of personnel documentation including training records, licensure, confidentiality agreements, criminal investigation background checks (CIB) (Refer to *Chapter 501.3.7*), etc. must be maintained on file by the certified provider.
B. Minimum credentials for professional staff (RN, Social Worker, etc.) must be verified upon hire and thereafter based upon their individual professional license requirements.
C. All documentation on each staff member must be kept by the Medicaid provider in the designated office that represents the county where services were provided.
D. Verification that OIG Medicaid Exclusion List was checked as appropriate for the position.

Certified ADW providers must agree to abide by all applicable federal and state laws, policy manuals, and other documents that govern the ADW program. Providers must also agree to make themselves, Board Members, their staff, and any and all records pertaining to member services available to any audit, desk review, or other service evaluation that ensures compliance with billing regulations and program goals.

501.3.4 Provider Certification Reviews

Providers are required to submit designated evidence to BoSS every 12 months to document continuing compliance with all Certification requirements as specified under *Chapter 501.3* and all of its subparts. This evidence must be attested to by an appropriate official of the provider agency (e.g., Executive Director or Board Chair). If appropriate documentation is not received by BoSS either prior to or on the established date, a pay hold may be placed on the provider's claims until documentation is received and the provider may be removed from all selection forms. A provisional certification will be issued; however, an on-site visit will be waived if required documentation is received within 30 days. If after 60 days documentation is not received, steps may be taken to execute an emergency transfer of ADW members. If the provider wants to resume/continue service provision, they must submit all required documentation and an on-site continuing certification review will be conducted by BoSS staff.

BoSS will review all submitted certification documentation and provide a report to BMS. BMS may request payback for certification requirements not met. The provider must remove employees who do not meet requirements from provision of services until certification standards are met and required documentation is approved by BoSS. If the documentation is not received within 30 days of the request, BMS may:

- Place a payment hold on all future claims until the provider can prove they meet all certification requirements;
- Remove the provider from all selection forms; and

- Terminate the provider's participation as an ADW provider if all issues are not resolved within 60 calendar days.

A provider who is terminated from the ADW program for any of the reasons listed above may apply for recertification by contacting BoSS. Recertification includes a mandatory site visit by a BoSS monitor and a 6 month review.

A percentage of providers will be randomly selected annually for an onsite review to validate certification documentation.

Certification reviews will also include a statewide representative sample of member records. BoSS will review member records using the Personal Assistance/Homemaker Monitoring Tool and the Case Management Monitoring Tool. (These tools are available on BoSS' Web site at www.wvseniorservices.gov). The West Virginia Participant Experience Survey (PES) will also be conducted with those members whose charts are selected for review. A proportionate random sample will also be implemented to ensure that at least one member record from each provider site is reviewed.

Targeted onsite certification reviews may also be conducted based on Incident Management Reports and complaint data. In some instances, when member's health and safety are in question, a full review of all records will be conducted.

Completed reports will be made available to the provider agency or PPL within 30 calendar days of the Certification review. Providers have 30 days to respond to draft review findings or to submit a corrective action plan if requested. Sanctions will be imposed as findings dictate.

501.3.5 Staff Requirements

Medicaid prohibits the spouse of an ADW member from providing ADW services for purposes of reimbursement.

Personal Assistance/Homemaker direct care staff and Personal Options direct care staff must be at least 18 years of age and must have the following competency based training before providing services:

A. Cardiopulmonary Resuscitation (CPR) – must be provided by the agency nurse, or a certified trainer from the American Heart Association, American Red Cross, American Health and Safety Institute, or American CPR. Additional CPR courses may be approved by BoSS and can be found at http://www.wvseniorservices.gov/.

B. First Aid – may be provided by the agency nurse, a certified trainer or a qualified internet provider.

C. Occupational Safety and Health Administration (OSHA) training – must use the current training material provided by OSHA.

D. Personal Assistance/Homemaker Skills – training on assisting members with ADL's – must be provided by the agency RN.

E. Abuse, Neglect and Exploitation - must be provided by the agency nurse, social worker/counselor, a documented specialist in this content area, or a qualified internet training provider.

F. HIPAA – training must include agency staff responsibilities regarding securing Protected Health Information - must be provided by the agency nurse, social worker/counselor, a documented specialist in this content area or a qualified internet training provider.

G. Direct Care Ethics – training on ethics such as promoting physical and emotional well-being, respect, integrity and responsibility, justice, fairness and equity - must be provided by the agency nurse, social worker/counselor, a documented specialist in this content area, or a qualified internet training provider.

H. Member Health and Welfare – training must include emergency plan response, fall prevention, home safety and risk management and training specific to any member special needs - must be provided by the agency nurse.

Personal Options members and their direct care employees may access a Resource Consultant for training materials and assistance.

501.3.5.1 Annual Staff Training

CPR, First Aid, OSHA, Abuse, Neglect, Exploitation and HIPAA training must be kept current.

A. CPR is current as defined by the terms of the certifying agency.

B. First Aid, if provided by the American Heart Association, American Red Cross, or other qualified provider, is current as defined by the terms of that entity if provided by the agency RN, must be renewed within 12 months or less. Training will be determined current in the month it initially occurred. (Example: If First Aid training was conducted May 10, 2010, it will be valid through May 31, 2011.)

C. OSHA, Abuse, Neglect and Exploitation, and HIPAA must be renewed within 12 months or less. Training will be determined current in the month it initially occurred. (See example above.)

In addition, 4 hours of training focusing on enhancing direct care service delivery knowledge and skills must be provided annually. Member specific on-the-job-training can be counted toward this requirement.

501.3.5.2 Training Documentation

Documentation for training conducted by the agency nurse, social worker/counselor, or a documented specialist in the content area must include the training topic, date, beginning time of the training, ending time of the training, location of the training and the signature of the instructor and the trainee or for Personal Options, the member (or legal representative). Training documentation for internet based training must include the person's name, the name of the internet provider and either a certificate or other documentation proving successful completion of the training. A card from the American Heart Association, the American Red Cross or other training entity is acceptable documentation for CPR and First Aid.

501.3.6 Professional Staff Qualifications

Professional Staff qualifications are defined below.

501.3.6.1 Registered Nurse Qualifications

A Personal Assistance/Homemaker Registered Nurse must be employed by a certified Personal Assistance/Homemaker agency and have a current West Virginia Registered Nurse license. Licensure documentation must be maintained in the employee's file. Documentation that covers all of the employee's employment period must be present. (For example – if an employee has been with the agency for 3 years – documentation of licensure must be present for all 3 years.) All documented evidence of staff qualifications such as licenses, transcripts, certificates, signed confidentiality agreements (Refer to *Common Chapter 100, General Information,*) and references shall be maintained on file by the provider. The provider shall have an internal review process to ensure that employees providing ADW services meet the minimum qualifications. The Office of Inspector General (OIG) Medicaid Exclusion List must be checked for every RN employee prior to employment and monthly thereafter. An agency cannot employ an RN on the OIG Medicaid Exclusion List. This list can be obtained at http://exclusions.oig.hhs.gov.

501.3.6.2 Case Manager Qualifications

A Case Manager must be licensed in West Virginia as a Social Worker, Counselor, or Registered Nurse. Licensure documentation must be maintained in the employee's file. Documentation that covers all of the employee's employment period must be present (example: If an employee has been with your agency for 3 years, the documentation of licensure must be present for all 3 years). All documented evidence of staff qualifications such as licenses, transcripts, certificates, signed confidentiality agreements (Refer to *Common Chapter 100, General Information*,), and references shall be maintained on file by the provider. The provider shall have an internal review process to ensure that employees providing ADW services meet the minimum qualifications. The OIG Medicaid Exclusion List must be checked for every case manager employee prior to employment and monthly thereafter. An agency cannot employ a case manager on the OIG Exclusion Exemption List. This list can be obtained at http://exclusions.oig.hhs.gov.

501.3.7 Criminal and Investigation Background Checks

For the ADW Program the Criminal Investigation Background Check consists of three things:

1. A fingerprint based criminal history check conducted by the WV State Police contracted entity and, in certain situations, an FBI fingerprint check through the National Crime Information Database (NCID);
2. A check of the U.S. Office of Inspector General (OIG) List of Excluded Individuals and Entities (LEIE); and
3. A check of the WV DHHR Protective Services Record Check.

At a minimum, a state level criminal investigation background check which includes fingerprints must be initially conducted by the West Virginia State Police contracted entity and again every

three years for all ADW staff including direct-care personnel, case managers, RN's and anyone who has direct access to member(s). If the prospective employee has lived out of state within the last 5 years, the agency must also conduct an FBI I background check utilizing fingerprints through the NCID.

Prior to providing any ADW services, the prospective employee or the employer must have initiated the fingerprint check process with the WV State Police contracted entity. "Initiated" means the prospective employee has had a live fingerprint scan taken at an approved location or, if submitting hard copies of fingerprints, the day the copies are mailed for processing. ADW providers **may** do a preliminary check utilizing on-line internet companies and use these results until the fingerprint results are received. An individual who is providing services or is employed by a provider cannot be considered to provide services nor can be employed if ever convicted of:

A. Abduction
B. Any violent felony crime including but not limited to rape, sexual assault, homicide, felonious physical assault or felonious battery
C. Any type of felony battery
D. Child/adult abuse or neglect
E. Crimes which involve the exploitation of a child or an incapacitated adult, including financial exploitation
F. Felony arson
G. Felony or misdemeanor crime against a child or incapacitated adult which causes harm
H. Felony drug related offenses within the last 10 years
I. Felony DUI within the last 10 years
J. Hate crimes
K. Kidnapping
L. Murder/ homicide
M. Neglect or abuse by a caregiver
N. Pornography crimes involving children or incapacitated adults including but not limited to, use of minors in filming sexually explicit conduct, distribution and exhibition of material depicting minors in sexually explicit conduct or sending, distributing, exhibiting, possessing, displaying or transporting material by a parent, guardian or custodian, depicting a child engaged in sexually explicit conduct
O. Purchase or sale of a child
P. Sexual offenses including but not limited to incest, sexual abuse, or indecent exposure
Q. Healthcare fraud
R. Felony forgery

Results which include a history of Medicaid fraud or abuse or which may place members at risk of personal health and safety should be taken into consideration prior to employment.

If aware of a recent conviction or change in status, appropriate action must be taken and BMS notified about the change.

The OIG Medicaid Exclusion List must be checked for every agency employee who provides Medicaid services prior to employment and monthly thereafter. Persons on the OIG Medicaid Exclusion List cannot provide Medicaid services. This list can be obtained at http://exclusions.oig.hhs.gov.

All ADW provider agency staff hired after the implementation date of this manual having direct contact with members must have a WVDHHR Protective Services Record Check. These must be initiated (sent to WVDHHR) on each individual upon hire. The Authorization and Release for Protective Services Record Check (BCF-PSRC 6/2005) is the official form available through the DHHR Bureau for Children and Families (BCF), Division of Children and Adult Services or at www.wvdhhr.org/bcf. An individual who has direct contact with a member cannot continue to be employed if the check discloses previous substantiated child or adult maltreatment by the individual. Documentation of the date that the form is submitted to BCF for processing must be in the Agency Staff's personnel file.

All payments for services provided by excluded providers will be recovered by BMS.

501.3.8 Voluntary Agency Closure

A provider may terminate participation in the ADW Program with 30 calendar day's written notification of voluntary termination. The written termination notification must be submitted to the BMS claims agent and to BoSS. The provider must provide BoSS with a complete list of all current ADW members that will need to be transferred.

BoSS will provide selection forms to each of the agency's members, along with a cover letter explaining the reason a new selection must be made.

If at all possible, a joint visit with the member will be made by both the agency ceasing participation and the new one selected in order to explain the transfer process. Services must continue to be provided until all transfers are completed by BoSS.

The agency terminating participation must ensure that the transfer of the member is accomplished as safely, orderly and expeditiously as possible.

A Personal Options provider and/or member must notify the PPL when an employee terminates participation as a Personal Options provider.

501.3.9 Involuntary Agency Closure

BMS may administratively terminate a provider from participation in the ADW program for violation of the rules, regulations, or for the conviction of any crime related to health care delivery. If the provider is a corporation, its owners, officers, or employees who have violated said rules and/or regulations or have been convicted of a crime related to health care delivery, may likewise be excluded from further participation in the ADW program. After notice of intention to suspend or terminate enrollment under his/her authority, the provider may request a document/desk review. Refer to Common Chapter 800, General Administration, for more information on this procedure.

501.3.10 Additional Sanctions

If BMS or BoSS receives information that clearly indicates a provider is unable to serve new members due to staffing issues, member health and safety risk, etc., or has a demonstrated inability to meet recertification requirements, BMS may remove the agency from the Provider Selection Forms and from the provider information on the BoSS website until the issue(s) are addressed to the satisfaction of BMS. Health and Safety deficiencies deemed critical may include other sanctions including involuntary agency closure.

501.4 INCIDENT MANAGEMENT OVERVIEW

ADW providers shall have policies and procedures for thoroughly reviewing, investigating, and tracking all incidents involving the risk or potential risk to the health and safety of the members they serve. The provider is responsible for taking appropriate action on both an individual and systemic basis in order to identify potential harms, or to prevent further harm, to the health and safety of all members served. Incidents shall be classified by the provider as one of the following:

- **Anyone** providing services to an ADW member who suspects an incidence of abuse or neglect, as defined in Section 501.1, must report the incident to the local DHHR office in the county where the person who is allegedly abused lives. Reports of abuse and/or neglect may be made anonymously to the county DHHR office or by calling 1-800-372-6513, 7 days a week, 24 hours day. This initial report must then be followed by a written report, submitted to the local Department of Health and Human Resources, within 48 hours following the verbal report. An Adult Protective Services (APS) Worker may be assigned to investigate the suspected or alleged abuse.

- Critical incident are incidents with a high likelihood of producing real or potential harm to the health and welfare of the ADW member. These incidents might include, but are not limited to, the following:
  - Attempted suicide, or suicidal threats or gestures. Suspected and/or observed criminal activity by members themselves, members' families, health care providers, concerned citizens, and public agencies that does not compromise the health or safety of the member.
  - An unusual event such as a fall or injury of unknown origin requiring medical intervention if abuse and neglect is not suspected.
  - A significant interruption of a major utility, such as electricity or heat in the member's residence, but does not compromise the health or safety of the member.
  - Environmental/structural problems with the member's home, including inadequate sanitation or structural damage that does not compromise the health or safety of the member.
  - Fire in the home resulting in relocation or property loss that does not compromise the health or safety of the member.
  - Unsafe physical environment in which the homemaker and/or other agency staff are threatened or abused, and the staff's welfare is in jeopardy.

- Disruption of the delivery of ADW services, due to involvement with law enforcement authorities by the ADW member and/or others residing in the member's home that does not compromise the health or safety of the member.
- Medication errors by a member or his/her family caregiver that do not compromise the health or safety of the member, such as medication taken that was not prescribed or ordered for the member, and failure to follow directions for prescribed medication, including inappropriate dosages, missed doses, or doses administered at the wrong time.
- Disruption of planned services for any reason that does not compromise the health or safety of the member, including failure of member's emergency backup plan.
- Any other incident judged to be significant and potentially having a serious negative impact on the member, but does not compromise the health or safety of the member.
- Any incident attributable to the failure of ADW provider staff to perform his/her responsibilities that compromises the health or safety of the member is considered to be neglect and must be reported to Adult Protective Services (APS).

- Simple incidents are any unusual events occurring to a member that cannot be characterized as a critical incident and does not meet the level of abuse or neglect. Examples of simple incidents include, but are not limited to, the following:
  - Minor injuries of unknown origin with no detectable pattern
  - Dietary errors with minimal or no negative outcome

501.4.1 Incident Management Documentation and Investigation Procedures

Any incidents involving an ADW member must be entered into the West Virginia Incident Management System (WVIMS) within 24 hours of learning of the incident. The Agency Director, designated RN, or Case Manager will immediately review each incident report. All Critical Incidents must be investigated. As noted in Section *501.4*, all incidents involving abuse, neglect and/or exploitation must be reported to APS but also must be noted in WVIMS.

An Incident Report documenting the outcomes of the investigation must be completed and entered into the WVIMS within 14 calendar days of the incident. Each Incident Report must be printed, reviewed and signed by the Director and placed in an administrative file. Providers are to report monthly if there were no incidents.

For Personal Options, PPL must report any incidents in the WVIMS within one business day of learning of the incident. BoSS reviews each incident, investigates and enters outcomes of the investigation within 14 calendar days of the incident.

The WVIMS does not supersede the reporting of incidents to APS. At any time during the course of an investigation should an allegation or concern of abuse or neglect arise, the provider shall immediately notify APS (W.Va. Code §9-6-9a).

An agency is responsible to investigate all incidents, including those reported to APS. If requested by APS, a provider shall delay its own investigation and document such request in the online WVIMS.

501.4.2 Incident Management Tracking and Reporting

Providers must review and analyze incident reports to identify health and safety trends. Identified health and safety concerns and remediation strategies must be incorporated into the agency Quality Management Plan. The Quality Management Plan must be made available to BoSS monitoring staff at the time of the provider monitoring review or upon request.

PPL has a tracking/reporting responsibility defined in their contract with BMS

501.5 MEMBER ELIGIBILITY

Applicants for the ADW Program must meet all of the following criteria to be eligible for the program:

A. Be 18 years of age or older.
B. Be a permanent resident of West Virginia. The individual may be discharged or transferred from a nursing home in any county of the state, or in another state, as long as his/her permanent residence is in West Virginia.
C. Be approved as medically eligible for nursing home level of care.
D. Meet the Medicaid Waiver financial eligibility criteria for the program as determined by the county DHHR office, or the Social Security Administration (SSA), if an active SSI (Supplemental Security Income) recipient.
E. Choose to participate in the ADW Program as an alternative to nursing home care.

Even if an individual is medically and financially eligible, a slot must be available for him/her to participate in the program.

501.5.1 Medical Eligibility

APS Healthcare/IRG is the contracted entity that is responsibility for conducting medical necessity assessments to confirm a person's medical eligibility for waiver services.

The purpose of the medical eligibility review is to ensure the following:

A. New applicants and existing members are medically eligible based on current and accurate evaluations.
B. Each applicant/member determined to be medically eligible for ADW services receives an appropriate Service Level that reflects current/actual medical condition and short- and long-term service needs.
C. The medical eligibility determination process is fair, equitable, and consistently applied throughout the State.

501.5.1.1 Medical Criteria

An individual must have five deficits as described on the Pre-Admission Screening Form (PAS) to qualify medically for the ADW Program. These deficits are derived from a combination of the following assessment elements on the PAS.

Section	Description of Deficits	
#24	Decubitus; Stage 3 or 4	
#25	In the event of an emergency, the individual is c) mentally unable or d) physically unable to vacate a building. a) Independently and b) With Supervision are not considered deficits.	
#26	Functional abilities of individual in the home	
a.	Eating	Level 2 or higher (physical assistance to get nourishment, not preparation)
b.	Bathing	Level 2 or higher (physical assistance or more)
c.	Dressing	Level 2 or higher (physical assistance or more)
d.	Grooming	Level 2 or higher (physical assistance or more)
e. Continence, bowel Continence, f. Bladder		Level 3 or higher; must be incontinent.
g.	Orientation	Level 3 or higher (totally disoriented, comatose).
h.	Transfer	Level 3 or higher (one-person or two-person assistance in the home)
i.	Walking	Level 3 or higher (one-person assistance in the home)
j.	Wheeling	Level 3 or higher (must be Level 3 or 4 on walking in the home to use Level 3 or 4 for wheeling in the home. Do not count outside the home.)
#27	Individual has skilled needs in one or more of these areas: (g) suctioning, (h) tracheostomy, (i) ventilator, (k) parenteral fluids, (l) sterile dressings, or (m) irrigations.	
#28	Individual is not capable of administering his/her own medications.	

501.5.1.1(a) Service Level Criteria

There are four Service Levels for Personal Assistance/Homemaker services. Points will be determined as follows based on the following sections of the PAS:

Section	Description of Points
#23	Medical Conditions/Symptoms – 1 point for each (can have total of 12 points)
#24	Decubitus - 1 point
#25	1 point for b., c., or d.
#26	Functional Abilities: Level 1 - 0 points Level 2 - 1 point for each item **a** through **i**. Level 3 - 2 points for each item **a** through **m** **i** (walking) must be at Level 3 or Level 4 in order to get points for **j** (wheeling)

Section	Description of Points
	Level 4 – 1 point for **a**, 1 point for **e**, 1 point for **f**, 2 points for **g** through **m**
#27	Professional and Technical Care Needs - 1 point for continuous oxygen.
#28	Medication Administration - 1 point for b. or c.
#34	Dementia - 1 point if Alzheimer's or other dementia
#35	Prognosis – 1 point if Terminal

Total number of points possible is 44.

501.5.1.1(b) Service Level Limits

Traditional Service Levels

Level	Points Required	Range of Hours Per Month (for Traditional Members)
A	5-9	0 - 62
B	10-17	63 - 93
C	18-25	94 -124
D	26-44	125 -155

A member does not have to utilize the number of hours specified in their Service Level if their needs are being met through other means, such as informals. (Example: A member who is a Level C may only choose to access Level B hours of service due to informal supports that assist him/her.) This must be documented on the Service Plan and the Case Manager must monitor that all services on the Service Plan, including informal supports, are delivered.
The total number of hours may be used flexibly within the month, but must be justified and documented on the Plan of Care.

Personal Options Service Limits

Personal Options members have a monthly budget based on their Service Level. The Personal Options monthly budget can be used flexibly within the month but must be justified and documented on the approved Participant-Directed Service Plan/Spending Plan.

501.5.1.2 Initial Medical Evaluation

Following is an outline of the initial medical evaluation process (as directed in 2005 Cyrus decree):

A. An applicant shall initially apply for the ADW program by having his/her treating physician (M.D. or D.O. only) complete and sign a Medical Necessity Evaluation Request Form. The referring physician, applicant, family member, advocate or other interested party, may submit this form by fax, mail or electronically to APS Healthcare/IRG. APS Healthcare/IRG will not process any Medical Necessity Evaluation Request Form if the physician's signature is more than 60 days old. If the Medical Necessity Evaluation Request form is incomplete, it will be returned to the physician for completion and resubmission, and the applicant will be notified.
B. APS Healthcare/IRG will attempt to contact the applicant (or legal representative) to schedule the assessment, allowing at least two weeks notification. If contact, is made, a notice shall be sent to the individual and/or contact person so noting scheduled home visit date and time.
C. APS Healthcare/IRG will make up to three attempts to contact the applicant. If unable to contact after 3 attempts, APS Healthcare/IRG will issue a potential referral closure letter to the applicant (or legal representative) and the referring entity. If no contact is made with APS Healthcare/IRG within 5 business days, the referral will be closed. If the applicant chooses to have the evaluation after the referral is closed, a new referral is required.
D. If the Medical Necessity Evaluation Request Form indicates that the applicant has Alzheimer's, multi-infarct, senile dementia, or related condition; or if he/she has a guardian or legal representative, the assessment will not be scheduled without the guardian, contact person or legal representative present to assist the applicant.
E. Nurses shall not render medical diagnoses. In those cases where there is a medical diagnosis question, the decision shall be based on medical evidence presented by appropriate medical professionals.

501.5.1.2(a) Results of Initial Medical Evaluation

A. Approval

If the applicant is determined medically eligible and a slot is available, then a notice of approved medical eligibility, which includes the maximum number of personal assistance/homemaker hours the person may receive and a copy of the PAS, is sent to the applicant (or legal representative) and the referring physician.

Additionally, APS Healthcare/IRG sends a Service Delivery Model Selection Form advising the applicant to choose either Traditional or Personal Options. A Freedom of Choice Case Management Selection Form and a Freedom of Choice Personal Assistance/Homemaker Selection Form are also provided to the applicant (or legal representative), advising him/her to choose a Case Management Agency and a Personal Assistance/Homemaker Agency if he/she choose the Traditional Model. The forms are to be returned to APS Healthcare/IRG once selections are made.

APS Healthcare/IRG will notify both of the agencies selected, and provide them with a copy of the applicant's PAS. The Case Manager must use the Initial Contact Log at this point. It provides the Case Manager with the ability to document their initial contact to assist with financial eligibility (Refer to *Chapter 501.5.2*), Member Enrollment (Refer to Section 501.6)

and the required 7 day contact (Refer to *Chapter 501.7*). If Personal Options has been selected APS Healthcare/IRG will notify BoSS and provide them with a copy of the PAS.

If the applicant is determined medically eligible and a slot is not available, a notice of approved medical eligibility will be sent to the applicant (or legal representative) and the referring entity informing them a slot is not currently available and they will be contacted when one becomes available.

B. Denial

If it is determined that the applicant does not meet medical eligibility, the applicant (or legal representative) and the referring physician will be notified by a Potential Denial letter. This letter will advise the applicant of the reason for the potential denial, listing the areas in which deficiencies were found. A copy of the PAS and ADW policy will also be included with the Potential Denial letter. The applicant will be given 2 weeks to submit supplemental medical information to APS Healthcare/IRG. Information submitted after the 2 week period will not be considered.

If the review of the supplemental information by APS Healthcare/IRG determines the applicant is not medically eligible, the applicant (or legal representative) and the referring physician will be notified by a Final Denial letter. The Final Denial letter will provide the reason for the adverse decision. It will also include the applicable ADW policy manual section(s), a copy of the PAS, supplemental information documentation (if it has been supplied), notice of free legal services, and a Request for Hearing Form to be completed if the applicant wishes to contest the decision.

If the applicant's medical eligibility is denied and the applicant is subsequently found medically eligible after the fair hearing process, the date of eligibility can be no earlier than the date of the hearing decision.

501.5.1.3 Medical Reevaluation

Annual reevaluations for medical eligibility for each ADW member must be conducted. The process is as follows (as directed in 2005 Cyrus decree):

A. A Medical Necessity Evaluation Request Form must be submitted to APS Healthcare/IRG dated and signed by the member (or legal representative). The forms may be faxed to APS Healthcare/IRG but a copy of the original form with the signatures must be maintained in the member's file. The Case Manager, or the member (or legal representative) must check the reevaluation line at the top of the form. A physicians signature is required only if there is a change in, or an additional, diagnosis.
B. The request can be submitted up to 90 calendar days prior to the expiration of the current PAS, and no later than 45 calendar days prior to the expiration of the current PAS. A member's medical eligibility is at risk if the PAS request is submitted less than 45 calendar days before it expires. The expiration of a PAS does not constitute a reason for member appeal.

C. After receiving the reevaluation request, APS Healthcare/IRG will attempt to contact the member (or legal representative) to schedule an assessment, allowing at least 2 weeks notification.
D. If the Medical Necessity Evaluation Request Form indicates that the applicant has Alzheimer's, multi-infarct, senile dementia, or related condition; or if he/she has a guardian, contact person or legal representative, the assessment will not be scheduled without the guardian, contact person or legal representative present to assist the applicant.
E. If APS Healthcare/IRG makes the contact, a letter is sent to the member (or legal representative), Case Management Agency or PPL, noting the date and time of the assessment.
F. Nurses shall not render medical diagnoses. In those cases where there is a medical diagnosis question, the decision shall be based on medical evidence presented by appropriate medical professionals.
G. If APS Healthcare/IRG is unable to contact the member (or legal representative) within three attempts, a potential closure letter will be sent to the member (or legal representative), the Case Management Agency, or PPL.
H. If no contact is made with APS Healthcare/IRG within 5 business days of the date of the potential closure letter, APS Healthcare/IRG will send the final denial letter to the member and copy BoSS and the Case Management Agency or PPL. BoSS will close the case.

501.5.1.3(a) Results Of Medical Reevaluation

A. Approval

If the member meets the medical eligibility criteria, a Notice of Approved Continued Medical Eligibility is sent to the member (or legal representative), the Case Management Agency or PPL, if Personal Options is chosen. For members enrolled in the Traditional Model, this notice includes the approved Service Level and the maximum number of hours of service per month. For members enrolled in Personal Options, this notice includes the approved Service Level and the maximum budget level. All members also receive a notice of free legal services, and a Request for Hearing Form.

The Case Management Agency is responsible for sending the Notice of Approved Continued Medical Eligibility to the Personal Assistant/Homemaker Agency.

B. Denial

If it is determined that the member does not meet medical eligibility, the member (or legal representative), the referring physician, the Case Management Agency, or for Personal Options, PPL, will be notified by a Potential Denial letter. This letter will advise the member of the reason(s) for the potential denial, listing the areas in which deficiencies were found and notice that the medical eligibility standard has not been met. A copy of the PAS and ADW policy will also be included with the Potential Denial Letter. The member will be given 2 weeks to submit supplemental medical information to APS Healthcare/IRG; supplemental information received by APS Healthcare/IRG is given to the reviewing RN. Information submitted after the 2 week period will not be considered.

If the review of the supplemental information by APS Healthcare/IRG determines that there is still no medical eligibility, the member (or legal representative), referring physician, BoSS and the Case Management Agency or PPL will be notified with a Final Denial letter. The Final Denial letter will provide the reason for the adverse decision. It will also include the applicable policy manual section(s), a copy of the PAS, supplemental information documentation (if it has been supplied), notice of free legal services, and a Request for Hearing Form to be completed if the applicant wishes to contest the decision.

If the member elects to appeal any adverse decision, benefits shall continue at the current level only if the appeal is mailed within 13 calendar days of the notice date, and shall continue only until a final decision is rendered by the administrative Hearing Officer. If the hearing decision affirms the denial of medical eligibility ADW services shall be terminated immediately.

Medicaid will not pay for services provided to a medically ineligible member.

501.5.2 Financial Eligibility

The financial eligibility process starts once an applicant is determined to be medically eligible for ADW services and has returned the Service Delivery Model Selection Form to APS Healthcare/IRG. If the applicant selects the Traditional Model they must also return the Freedom of Choice Case Management Selection Form and the Personal Assistance/Homemaker Selection Form to APS Healthcare/IRG.

If the applicant has chosen Traditional Model, the Case Management Agency that has been selected by the applicant will be notified, and a copy of the PAS will be provided. Within 3 business days of receipt of this notification, the Case Manager must make an initial contact by telephone or face-to-face with the applicant. The applicant and/or Case Manager must submit a DHS-2 form to the county DHHR office to determine financial eligibility based on ADW criteria. A copy of the Eligibility Determination page of the PAS must be attached to the DHS-2 form. Financial eligibility cannot be initiated without both documents.

If the applicant has chosen Personal Options, BoSS will mail the applicant a financial packet that includes instructions on how to contact his/her local DHHR office and schedule a financial determination appointment, a copy of page 6 of the PAS, and a Personal Options DHS-2 form.

Factors such as income and assets are taken into consideration when determining eligibility. An applicant/member's gross monthly income may not exceed 300% of the current maximum SSI payment per month for participation in the ADW Program. Some assets of a couple are protected for the spouse who does not need nursing home or home and community based care and these assets are not counted to determine eligibility for the individual who needs care in the home.

The financial eligibility process must be initiated within 60 calendar days from the date the case management agency or the applicant receives the notification of selection letter. Case Managers, or in the case of Personal Options the applicant, must notify BoSS when the financial

eligibility process has been initiated. If the financial eligibility process is not initiated within the 60 calendar days, BoSS will close the referral. If the applicant wants ADW services after the closure, a new Medical Request for Evaluation to APS Healthcare/IRG is required.

ADW services cannot be paid until an applicant's financial eligibility is established and the enrollment process has been completed with BoSS. (Refer to *Chapter 501.6*). If the member has been a member of another waiver program, no services may be charged prior to an applicant's discharge from the other waiver program. The only exception is Case Management which may bill 30 days prior to discharge.

Termination of the Medicaid benefit itself (e.g., the medical card) always requires a 13 calendar day advance notice prior to the first of the month Medicaid stops. Coverage always ends the last day of a month unless otherwise dictated by policy. Examples: 1) Advance notice for termination is dated January 27, Medicaid would end February 28. 2) Advance notice is dated January 16, Medicaid ends January 31. This is true regardless of when ADW services end.

501.6 MEMBER ENROLLMENT

Once an applicant has been found medically and financially eligible, the Case Manager or Personal Options Program Manager must request Member Enrollment from BoSS by completing a Member Enrollment Request Form. BoSS will complete the Member Enrollment and provide a Confirmation Notice to the Case Management Agency and the Personal Assistance/Homemaker agency, or Personal Options Program Manager.

No Medicaid reimbursed ADW services may be provided until the Case Management Agency or the Personal Options Program Manager is in receipt of the Member Confirmation Notice. For monthly reporting purposes (Refer to *Chapter 501.11.4*) agencies are to report members as active the month they receive their Confirmation Notice for that member.

The Case Management Agency is responsible for maintaining a copy of the Member Enrollment Request Form and the Member Enrollment Confirmation Notice in the member file. The Personal Assistance/Homemaker agency is responsible for maintaining a copy of the Member Enrollment Confirmation Notice in the member file.

The Personal Options Program Manager sends the Member Enrollment Confirmation with the complete member referral to PPL. PPL will maintain a file which contains the Member Enrollment Confirmation Notice for Personal Options members.

501.7 MEMBER ASSESSMENT

Assessment is the structured process of interviews which is used to identify the member's abilities, needs, preferences and supports; determine needed services or resources; and provide a sound basis for developing the Service Plan and Plan of Care. A secondary purpose of the assessment is to provide the member a good understanding of the program, services, and expectations. There are 2 components to the Member Assessment: Case Management

and RN Assessment. Whenever possible both of these assessments should be scheduled together.

Once Member Enrollment has been completed with BoSS, the Case Manager and the Personal Assistance/Homemaker RN will schedule a home visit within 7 calendar days to complete the Member Assessment.

The Case Manager and Personal Assistance/Homemaker RN must work together to ensure that the program meets the member's needs. They must communicate and share information/documentation including the Case Management Member Assessment and the Personal Assistance/Homemaker RN Member Assessment. Both providers are to maintain a copy of the entire Member Assessment (Case Management Assessment and Personal Assistance/Homemaker RN Assessment) in the member's record.

The Personal Assistance/Homemaker RN must complete a Personal Assistance/Homemaker RN Assessment at least every 6 months from the date of the Initial Personal Assistance/Homemaker RN Assessment or the Annual Personal Assistance/Homemaker RN Assessment.

The Personal Assistance/Homemaker RN must complete an Annual Personal Assistance/Homemaker RN Assessment. It can be completed no sooner than 60 calendar days before the 1 year anniversary of the current assessment.

A new assessment must be completed when a member's needs change. Changes in a member's needs are to be incorporated into the Service Plan and the Plan of Care. Case Managers are to share any changes in a member's assessment with the Personal Assistance/Homemaker Agency. The Personal Assistance/Homemaker Agency is to share any changes in the member's RN Assessment with the case manager.
A copy of all Member Assessments must be provided to the member (or legal representative).

501.8 SERVICE PLAN DEVELOPMENT

In the Traditional Model, the Case Manager is responsible for development of the person-centered Service Plan in collaboration with the member (or legal representative). Participation in the development of the Initial Service Plan is mandatory for the member (or legal representative) and Case Manager. The member (or legal representative) may choose to have whomever else they wish to participate in the process (Personal Assistance/Homemaker RN, other service providers, informal supports, etc.).

The Service Plan meeting must be scheduled within 7 calendar days of the Case Management Member Assessment.

The Service Plan must detail all services (service type, provider of service, frequency) the member is receiving, including any informal supports that provide assistance (family, friends, etc.) and address all needs identified in the PAS, the Member Assessment (Case Management Member Assessment and the Personal Assistance/Homemaker RN Assessment). The Service

Plan must also address the member's preferences and goals. It is the Case Manager's responsibility to ensure that all assessments are reviewed with the member and considered in the development of the Service Plan.

A copy of all Service Plans must be provided to the member (or legal representative) and the Personal Assistance/Homemaker Agency. The Case Management Agency must have the original document in the member's file.

In Personal Options, the member (or legal representative) is responsible for the development of the Participant-Directed Service Plan. Participation in the development of the Initial Participant-Directed Service Plan, the 6 month Service Plan Update and the Annual Participant-Directed Service Plan is mandatory for the member (or legal representative) and the Resource Consultant. The member (or legal representative) may choose to have whomever else they wish to participate in the process (direct care staff, other service providers, informal supports, etc.)
The member's Service Plan or Personal Options Participant-Directed Service Plan must contain reference to any other service(s) received by the member, regardless of the source of payment. An ADW agency that provides private-pay services to a member must ensure that documentation is maintained separately.

501.8.1 Six-Month and On-Going Service Plan Development

Participation in the 6 month Service Plan and Annual Service Plan development are mandatory for the member (or legal representative), the Case Manager, and the Personal Assistance/Homemaker RN. The member (or legal representative) may choose to have whomever else they wish to participate in the process (direct care staff, family members, other service providers, informal supports, etc.).

501.8.2 Interim Service Plan Development

In order to begin services immediately to address any health and safety concerns, an Interim Service Plan may be developed and implemented upon the completion of Member Enrollment. The Interim Service Plan can be in effect up to 21 calendar days from the date of Member Enrollment Confirmation to allow time for assessments to be completed, the Service Plan meeting to be scheduled and the Service Plan to be developed.

If the Case Management Agency develops an Interim Service Plan, the Personal Assistance/Homemaker RN must develop an Interim Plan of Care and initiate direct care services within 3 business days. (The Interim Plan of Care can only be used for a maximum of 21 days.)

501.9 PLAN OF CARE DEVELOPMENT

The Personal Assistance/Homemaker RN Assessment is used in conjunction with the PAS, the Member Case Management Assessment, and the Service Plan to develop the member's Plan of

Care. The Plan of Care details how Personal Assistance/Homemaker services will be used to meet the direct care needs of the member.

Once the Personal Assistance/Homemaker RN has completed the Initial or Annual Personal Assistance/Homemaker RN assessment AND has received the Service Plan from the Case Manager, he/she must develop the member's Plan of Care based on identified needs and member preferences and initiate direct care services within 10 calendar days.

A copy of all Personal Assistance/Homemaker RN Assessments and member Plans of Care must be provided to the member (or legal representative) and the Case Management Agency. The Personal Assistance/Homemaker Agency must have the original document in the member's file.

501.10 COVERED SERVICES

The following services are available to ADW members if they are deemed necessary and appropriate during the development of their Service Plan and Plan of Care:

A. Case Management (Section 501.11)
B. Personal Assistance/Homemaker Services (501.12)
    a. Direct Care Staff (501.12.1)
    b. RN Assessment (501.12.2)
    c. Nursing Services (501.12.3)
    d. Transportation (501.12.4)
C. Participant-Directed Goods and Services (Personal Options Members Only) (*Chapter 501.13*)

501.11 CASE MANAGEMENT DEFINITION

Case management activities are indirect services that assist the member in obtaining access to needed ADW services, other State Plan services, as well as medical, social, educational and other services, regardless of the funding source. Case management responsibilities also include the development of the member's Service Plan, the ongoing monitoring of the provision of services included in the member's Service Plan, initiating the process to re-evaluate the member's medical eligibility, member health and welfare, and advocacy.

Applicants who chose Personal Options can either assume the responsibilities of the Case Manager or can purchase this service from a certified provider.

Case management includes the coordination of services that are individually planned and arranged for members whose needs may be life-long. The practice of case management helps to avoid duplication and provision of unnecessary services, and to ensure a balance of services. The Case Manager takes an active role in service delivery; although services are not provided directly by the Case Management Agency, the Case Manager serves as an advocate and coordinator of care for the member. This involves collaboration with the ADW member, family

members, friends, informal supports, and health care and social service providers. Case Managers are to:

A. Evaluate social, environmental, service, and support needs of the individual.
B. Develop and write an individualized Service Plan which details all services that are to be provided including both formal and informal (if available) services that will assist the member to achieve optimum function.
C. Coordinate the delivery of care, eliminate fragmentation of services, and assure appropriate use of resources.
D. Proactively identify problems and coordinate services that provide appropriate high quality care to meet the individualized and often complex needs of the member.
E. Provide advocacy on behalf of the member to ensure continuity of services, system flexibility, integrated services, proper utilization of facilities and resources, and accessibility to services.
F. Ensure that a member's (or legal representative) wishes and preferences are reflected in the development of the Service Plan and Plan of Care by working directly with the member (or legal representative) and all service providers.
G. Assure that a member's legal and human rights are protected.

501.11.1 Case Management Code, Unit, Limit and Documentation Requirements

Procedure Code: G9002

Service Unit: All Case Management services provided within 1 month

Service Limit: **1 Unit per month.** Reimbursed at a monthly rate

Prior Authorization Required: No

Documentation Requirements: All contacts with, or on behalf of a member, must be documented within the member's record, including date and time of contact, a description of the contact, and the signature of the Case Manager. At a minimum, the Case Manager or Resource Consultant must make contact with the member (or legal representative) once per month and document the contact on the Case Management Monthly Contact Form or the Resource Consultant Monthly Contact Form. Case Management Agencies may not bill for transportation services.

501.11.2 Case Management Case Loads

Each provider must assure that there is an adequate number of qualified Case Managers for the number of members served. A full-time-equivalent Case Manager can serve no more than 75 active members; however, in situations where a provider has a vacancy due to staff turnover, a higher case load may not be sustained for more than 3 months.

501.11.3 Ongoing Case Management Services

The Case Manager is responsible for follow-up with the member to ensure that services are being provided as described in the Service Plan. Initial contact, via telephone or face-to-face,

must be made within 7 calendar days after direct care services have begun by the Personal Assistance/Homemaker Agency. At a minimum, a monthly telephone contact and a home visit every 6 months must be conducted to ensure services are being provided and to identify any potential issues. Monthly telephone contact must be documented on the Case Management Monthly Contact Form and include detailed information on the status of the member.

If a member (or legal representative) cannot be reached by telephone for the monthly contact, a home visit must be made. At a minimum, the Case Manager must complete a 6 month Case Management Member Assessment and Service Plan. This must be a face-to-face home visit with the member.

Specific activities to assure that needs are being met also include:

A. Assure financial eligibility remains current.
B. Assure the health and welfare of the member.
C. Address changing member needs as reported by the member (or legal representative), Personal Assistance/Homemaker direct care staff and/or RN, or informal support.
D. Address changing needs determined by the monthly member contact.
E. Refer and procure any additional services the member may need that are not services the Personal Assistance/Homemaker Agency can provide.
F. Coordinate with all current service providers to develop the 6 month Service Plan and the Annual Service Plan (or more often as necessary). It is mandatory that the member (or legal representative), the Case Manager and the Personal Assistance/Homemaker Agency RN be present at the 6 month Service Plan meeting and the Annual Service Plan meeting.
G. Provide the Service Plan to all applicable service providers that are providing services to the member (or legal representative).
H. Provide copies of all necessary documents to the Personal Assistance/Homemaker Agency such as Member Enrollment, PAS, Assessments, etc.
I. Annually submit a Medical Necessity Evaluation Request to APS Healthcare/IRG.

501.11.4 Reporting

The Case Management Agency will complete and submit required administrative and program reports as requested by either BMS or BoSS. Monthly reports must be submitted by Case Management agencies to BoSS by the 6th business day of every month.

501.12 PERSONAL ASSISTANCE/HOMEMAKER

Personal Assistance/Homemaker services are defined as long-term direct care and support services that are necessary in order to enable a member to remain at home rather than enter a nursing home, or to enable an individual to return home from a nursing home.

The components of the Personal Assistance/Homemaker Service include Personal Assistance/Homemaker Direct Care Services, RN Assessment, Nursing and Transportation.

More than one Personal Assistance/Homemaker Agency can provide direct care services to a member. The agency the member selected on their Freedom of Choice Personal Assistance/Homemaker Selection Form is the primary agency and is responsible for coordinating services. The Service Plan must indicate which agency is the primary agency. Billable nursing units must be coordinated by the primary agency. There cannot be a duplication of services.

501.12.1 Personal Assistance/Homemaker (Direct Care Staff) Code, Unit, Limit and Documentation Requirements

Procedure Code: S5130

Service Unit: 15 minutes

Service Limits: Determined by Service Level Criteria and Service Level Limits (Refer to *Sections 501.5.1.1(a and b)*

Prior Authorization Required: Yes

Documentation Requirements: All services provided to a member must be documented on the Plan of Care and maintained within the member's record.

501.12.1.1 Personal Assistance/Homemaker (Direct Care Staff) Qualifications and Training

All documented evidence of Personal Assistance/Homemaker direct care staff qualifications such as licenses, transcripts, certificates, CIB checks, signed confidentiality statements and references shall be maintained on file by the provider. The provider must have an internal review process to ensure that Personal Assistance/Homemaker direct care staff providing ADW services meets the minimum qualifications as required by policy (Refer to *Chapter 501.3* and its subparts).

In Personal Options, all documented evidence of staff qualifications such as licenses, transcripts, certificates, signed confidentiality statements, and references shall be maintained on file by PPL.

501.12.1.2 Personal Assistance/Homemaker (Direct Care Staff) Responsibilities

The functions of the Personal Assistance/Homemaker direct care staff include providing direct care services as defined by the member's Plan of Care or the Spending Plan for Personal Options members, recording services and time spent with the member, communicating to the RN any member changes and completing all ADW training requirements.

Personal Assistance/Homemaker direct care staff duties and responsibilities as described in the Plan of Care may include:

A. Assist member with Activities of Daily Living (ADL).
B. Assist member with environmental tasks necessary to maintain the member in the home.

C. Assist member with completion of errands that are essential for the member to remain in the home (IADLs) — Examples: grocery shopping, medical appointments, laundromat, and trips to the pharmacy. The member may accompany the Personal Assistance/Homemaker direct care staff on these errands.
D. Assist member in community activities. Activities provided in the community should be determined by the member and the Case Manager at the Service Plan meeting and are limited to 30 hours per month. (Examples of community activities — visiting friends/relatives, going to a local community activity, etc.) Community activities must be documented on the Plan of Care. Prior authorization of additional units of Personal Assistance/Homemaker services will not be available to provide community activities.
E. Report significant changes in members' condition to the Personal Assistance/Homemaker RN or for Personal Options to PPL. Report any incidents to the Personal Assistance/Homemaker RN or for Personal Options, PPL. (Examples: member falls (whether direct care staff was present or not), bruises (whether direct staff knows origin or not), etc.)
F. Report any environmental hazards to the Personal Assistance/Homemaker RN or for Personal Options to PPL. (Examples: no heat, no water, pest infestation or home structural damage).
G. Prompt for self-administration of medications.
H. Maintain records as instructed by the Personal Assistance/Homemaker RN or PPL.
I. Perform other duties as assigned by Personal Assistance/Homemaker RN within program guidelines.
J. Accurately complete Personal Assistance/Homemaker worksheet and other records as instructed by the Personal Assistance/Homemaker RN or PPL.

Personal Assistance/Homemaker staff cannot perform any service that is considered to be a professional skilled service or any service that is not on the member's Plan of Care or for members enrolled in Personal Options the Participant-Directed Service Plan. Functions/tasks that cannot be performed include, but are not limited to, the following:

A. Care or change of sterile dressings.
B. Colostomy irrigation.
C. Gastric lavage or gavage.
D. Care of tracheostomy tube.
E. Suctioning.
F. Vaginal irrigation.
G. Give injections, including insulin.
H. Administer any medications, prescribed or over-the-counter.
I. Perform catheterizations, apply external (condom type) catheter.
J. Tube feedings of any kind.
K. Make judgments or give advice on medical or nursing questions.
L. Application of heat.

If at any time a Personal Assistance/Homemaker is witnessed to be, or suspected of, performing any prohibited tasks, the Personal Assistance/Homemaker RN or PPL must be notified immediately.

501.12.2 RN Assessment Code, Unit, Limit and Documentation Requirements

Procedure Code: T1001

Modifier: UD

Service Limits: 1 event per calendar year (January - December)

Prior Authorization Required: No

Documentation Requirements: The Personal Assistance/Homemaker RN Initial and Annual Member Assessment and the member Plan of Care

501.12.3 Nursing Services Code, Unit, Limit and Documentation Requirements

Procedure Code: T1002

Modifier: UD

Service Unit: 15 minutes

Service Level: 6 units per month

Prior Authorization Required: No

Documentation Requirements: All contacts (except for the 6 month and annual visits) with, or on behalf of, a member must be documented using the Personal Assistance/Homemaker RN Member Contact Form and maintained within the member's record. The RN Assessment and Plan of Care must be complete.

501.12.3.1 Nursing Responsibilities

The RN responsibilities are:

A. If requested by the member (or legal representative) attends the Initial Service Plan meeting.
B. Attend the 6 month and Annual Service Plan meeting.
C. If requested by the member (or legal representative) attends the member's ADW medical eligibility appointments with APS Healthcare/IRG.
D. If the Case Management Agency develops an Interim Service Plan, the Personal Assistance/Homemaker RN must develop an Interim Plan of Care and initiate homemaker services within three business days.
E. Make a home visit with the member and Personal Assistance/Homemaker within 30 calendar days after Personal Assistance/Homemaker services begin.
F. Complete a Personal Assistance/Homemaker RN Assessment within 6 months from the date of the Initial or annual Personal Assistance/Homemaker RN Assessment.

G. Based on clinical judgment, complete a Personal Assistance/Homemaker RN Assessment to determine the need for changes in the Plan of Care such as following discharge from an acute care hospital, nursing facility or other residential setting. The RN must notify the Case Manager if additional services or changes in services are needed.
H. Review the Plan of Care to assure services were provided as described in the Service Plan before submitting billing under code S5130.
I. Review the Plan of Care to assure it has been completed per policy before submitting billing under code S5130.
J. Sign and date all accurately completed Plans of Care.
K. Provide member-specific training to Personal Assistance/Homemakers.
L. Complete a home visit with the member to assess any change in needs. Documentation must substantiate the need for the visit using the Personal Assistance/Homemaker RN Member Contact Form.
M. Attend any member Dual Service planning meetings. (Refer to *Section 501.18*)
N. Compile, prepare, and submit material that can be used to assess an ADW member's need for an increase in their Service Level. Service level changes can only be requested for members at Service Level A, B, or C, and only when there is a substantial change in the member's medical condition. In order to determine whether additional hours are warranted, a completed Request for Service Level Change must be submitted to APS Healthcare/IRG. Clinical documentation sufficient to support the request must be submitted, which may include applicable test results from a member's physician or hospital discharge summary. These documents must be on the letterhead of the physician and/or hospital and dated no later than 1 month prior to, or 1 month following, the request for an increased Service Level. Information that will not be considered includes any verbal or telephonic statements; or letters from family, neighbors, friends, or Case Management and Personal Assistance/Homemaker staff without attached physician's documentation or discharge summary. The request must be signed by both the Personal Assistance/Homemaker RN and the member (or legal representative). Original signatures are required; i.e., "signature of member on file" is not acceptable. This request may or may not result in a change in the Service Level. Notice of the determination will be sent to the member (or legal representative) and the Personal Assistance/Homemaker Agency, or if a Personal Option member, to PPL. The Personal Assistance/Homemaker Agency must notify the appropriate Case Management Agency of the Service Level determination.

Members who are appealing a denial of medical eligibility will remain at their current Service Level pending a Fair Hearing decision. APS Healthcare/IRG will not review a request for an increased Service Level for such members.

Administrative duties are not billable. These include but are not limited to:

A. Sending copies of any Personal Assistance/Homemaker RN Assessments or Plans of Care to the member (or legal representative) or the Case Management Agency.
B. Notifying the Case Management Agency if a member has been admitted to or discharged from an acute care hospital, nursing home, or other residential facility.

C. Being available to the Personal Assistance/Homemaker (direct care staff) for consultation and assistance at any time when the Personal Assistance/Homemaker (direct care staff) is providing services.
D. Completing and submitting required program reports to BMS, BoSS or APS Healthcare/IRG.
E. Telephone calls.

501.12.4 Transportation

Transportation provides reimbursement for Personal Assistance/Homemaker direct care staff that performs essential errands for or with a member or community activities with a member.

501.12.4.1 Transportation Code, Unit, Limit and Documentation Requirements

Procedure Code: A0160

Service Unit: 1 unit - 1 mile

Service Limit: N/A

Prior Authorization: No

Documentation Requirements: All transportation with, or on behalf of, a member must be included in the Plan of Care and documented on the Plan of Care and include the date, miles driven, travel time, destination, purpose of travel and type of travel (essential errand or community activity).

501.12.4.2 Transportation Services

The member may be transported by the Personal Assistance/Homemaker in order to gain access to services and activities as specified in the Plan of Care. Family, neighbors, friends, or community agencies that can provide this service, without charge, must be utilized first. Mileage can be charged for essential errands [Refer to *Chapter 501.12.1.2(C)*] activities related to the Service Plan and community activities [Refer to *Chapter 501.12.1.2(D)*].

501.13 PARTICIPANT-DIRECTED GOODS AND SERVICES CODE, UNIT, LIMIT AND DOCUMENTATION REQUIREMENTS

Procedure Code: T2028

Service Unit: As specified on Participant-Directed Service Plan

Service Limit: $1000 Annually

Prior Authorization Required: No

Documentation Requirement: Participant Directed Goods and Services receipts and other approved documentation per the PPL contract with BMS must be maintained on file with PPL. Must be in the Participant-Directed Spending Plan.

501.13.1 Participant-Directed Goods and Services

Participant-Directed Goods and Services are equipment, services or supplies not otherwise provided through the Medicaid State Plan that address an identified need in the Participant-Directed Service Plan. The member must budget for their approved good or service within their allocated budget.

The following are non-allowable services, equipment or supplies: gifts for staff/family/friends, payments to someone to serve as a representative, clothing, food and beverages, electronic entertainment equipment, utility payments, swimming pools and spas, costs associated with travel, comforters, linens, drapes, furniture, vehicle expenses including routine maintenance and repairs, insurance and gas money, medications, vitamins, herbal supplements, monthly internet service, yard work, illegal drugs or alcohol, household cleaning supplies, home maintenance and repair, pet care, respite services, spa services, experimental or prohibited treatments, education, personal hygiene, discretionary cash, and any other good or service that does not address an identified need in the Participant-Directed Service Plan, decrease the need for other Medicaid services, and/or increase the person's safety in the home and /or improve and maintain the member's opportunities for full membership in the community.

501.14 MEMBER RIGHTS AND RESPONSIBILITIES

At a minimum, Case Management Agencies or for Personal Options PPL must communicate in writing to each member (or legal representative)

Their right to:

A. Transfer to a different provider agency or to Personal Options.
B. Address dissatisfaction with services through the provider agency's or PPL's grievance procedure.
C. Access the West Virginia DHHR Fair Hearing process.
D. Considerate and respectful care from their provider(s).
E. Take part in decisions about their services.
F. Confidentiality regarding ADW services.
G. Access to all of their files maintained by agency providers.

And their responsibility to:

H. Notify the ADW Personal Assistance/Homemaker Agency or PPL within 24 hours prior to the day services are to be provided if services are not needed.
I. To notify providers or PPL promptly of changes in Medicaid coverage.
J. Comply with the Plan of Care or for Personal Options Members, comply with the Participant Directed Service Plan.
K. Cooperate with all scheduled in-home visits

L. Notify the ADW agencies or PPL of a change in residence or an admission to a hospital, nursing home or other facility.
M. Notify the ADW agencies or PPL of any change of medical status or direct care need.
N. Maintain a safe home environment for the agency or PPL to provide services.
O. Verify services were provided by initialing and signing the Plan of Care.
P. Communicate any problems with services to the provider agency or PPL.
Q. Report any suspected fraud to the provider agency or the Medicaid Fraud Unit at (304)558-1858.
R. Report any incidents of abuse, neglect or exploitation to the provider agency, PPL or the APS hotline at 1-800-352-6513.
S. Report any suspected illegal activity to their local police department or appropriate authority.

501.15 MEMBER GRIEVANCE PROCESS

Members who are dissatisfied with the services they receive from a provider agency have a right to file a grievance. All ADW agencies will have a written member grievance procedure. The APS Healthcare/IRG RN will explain the grievance procedure to all applicants/members at the time of initial application/reevaluation. Applicants/members (or legal representative) will be provided with a Member Grievance Form at that time. Service providers will only afford members a grievance procedure for services that fall under the particular service provider's authority; for example, a Case Management Agency will not conduct a grievance procedure for Personal Assistance/Homemaker Agency activities, nor will a Personal Assistance/Homemaker Agency conduct a grievance procedure for Case Management Agency activities. A member may by-pass the level one grievance if he/she chooses.
The grievance procedure consists of two levels:

A. **Level One: ADW Provider**

An ADW provider has 10 business days from the date they receive a Member Grievance Form to hold a meeting, in person or by telephone. The meeting will be conducted by the agency director or their designee with the member (or legal representative). The agency has 5 days from the date of the meeting to respond in writing to the grievance. If the member is dissatisfied with the agency decision, he/she may request that the grievance be submitted to BoSS for a Level Two review and decision.

B. **Level Two: BoSS**

If an ADW provider is not able to address the grievance in a manner satisfactory to the member and the member requests a Level Two review, BoSS will, within 10 business days of the receipt of the Member Grievance Form, contact the member (or legal representative) and the ADW provider to review the Level One decision. Level Two decisions will be based on Medicaid policy and/or health and safety issues.

501.16 TRANSFER TO DIFFERENT AGENCY OR TO PERSONAL OPTIONS

An ADW member may request a transfer to another agency or to Personal Options at any time. If a member wishes to transfer to a different agency a Member Request to Transfer form must be completed and signed by the member or legal representative. The form may be obtained from the current provider, the new providers, BoSS or other interested parties. Once completed and signed by the member, the form must be submitted to BoSS. BoSS will then coordinate the transfer and set the effective date based on when required transfer documents are received. For case management transfers, the effective date of transfer will be the first date of the next month if the transfer is received by the 17th of the month.

At no time should the transfer take more than 45 calendar days from the date that the member signed transfer request is received at BoSS, unless there is an extended delay caused by the member in returning necessary documents.

Transferring Agency Responsibilities:

A. To continue providing services until BoSS notifies them that the transfer has been completed.
B. If it is a Case Management transfer, to provide the receiving agency, on the day of the transfer, a copy of the current PAS, DHS-2, the Service Plan, a copy of the Member Enrollment Confirmation and any other pertinent documentation.
C. If it is a Personal Assistance/Homemaker transfer, to provide the receiving agency, on the day of the transfer, with a copy of the current PAS, DHS-2, the Plan of Care and any other pertinent documentation.
D. To maintain all original documents for monitoring purposes.

Receiving Agency Responsibilities:

A. If it is a Personal Assistance/Homemaker transfer, a Personal Assistance/Homemaker Member RN assessment must be conducted within 7 business days of the transfer effective date. When a member transfers agencies, the receiving agency Personal Assistance/Homemaker RN cannot bill for an Initial Assessment (billing code T1001, Modifier UD) if one has been completed within the calendar year). They can bill for a Personal Assistance/Homemaker RN Assessment using T1002.
B. Develop the Personal Assistance/Homemaker RN Plan of Care within 7 business days of the transfer effective date.
C. If it is a Case Management transfer, a Case Management Member Assessment must be conducted within 7 business days of the transfer effective date.
D. Develop the Service Plan within 7 business days of the transfer effective date.

The Service Plan and existing Plan of Care from the transferring agency must continue to be implemented until such time that the receiving agency can develop and implement a new plan to prevent a gap in services.

Personal Option transfers are processed by BoSS.

501.16.1 Emergency Transfers

A request to transfer that is considered an emergency, such as when a member suffers abuse, neglect, or harm, will be reviewed by BoSS, and BoSS will take appropriate action. The Case Management Agency, the Personal Assistance/Homemaker Agency that the member is transferring from or the Personal Options member/representative must submit supporting documentation that explains why the member is in emergency status. BoSS will expedite the request as necessary, coordinating with the member and agencies involved.

501.17 DISCONTINUATION OF SERVICES

The following require a Request for Discontinuation of Services Form be submitted and approved BoSS:

A. No services have been provided for 100 continuous days – example, an extended placement in long-term care or rehabilitation facility.
B. Unsafe Environment – an unsafe environment is one in which the personal assistance/homemaker and/or other agency staff are threatened or abused and the staff's welfare is in jeopardy. This may include, but is not limited to, the following circumstances:
    1) The member or other household members repeatedly demonstrate sexually inappropriate behavior; display verbally and/or physically abusive behavior; and/or threaten a personal assistance/homemaker or other agency staff with guns, knives, or other potentially dangerous weapons, including menacing animals.
    2) The member or other household members display an abusive use of alcohol and/or drugs.

Note: When BoSS receives an unsafe closure request, they will attempt to process the request as a transfer. To do so, BoSS will require the member (or legal representative) to sign Consent for Release of Information Form. This will permit all information regarding the unsafe circumstances to be disclosed to other agencies and APS Healthcare/IRG. If another agency is not willing to accept the member due to unsafe circumstances, the case will be closed.

C. The member is persistently non-compliant with the Plan of Care.
D. Member no longer desires services

The Request for Discontinuation of Services Form must be submitted to BoSS. BoSS will review all requests for a discontinuation of services. If it is an appropriate request, and BoSS approves the discontinuation, BoSS will send notification of discontinuation of services to the member (or legal representative) with a copy to the Case Management Agency or F/EA. Fair hearing rights will also be provided except if the member (or legal representative) no longer desires services. The effective date for the discontinuation of services is 13 calendar days after the date of the BoSS notification letter, if the member (or legal representative) does not request a hearing. If it is an unsafe environment services may be discontinued immediately.

All discontinuation of services (closures) must be reported on the Case Management Monthly Report to BoSS.

The following do not require a Request for Discontinuation of Services Form but must be reported on the Case Management Monthly Report:

A. Death
B. Moved Out of State
C. Medically Ineligible
D. Financially Ineligible

501.18 DUAL PROVISION OF ADW AND PERSONAL CARE (PC) SERVICES

Approval of the provision of both ADW and PC services to the same person will be considered if the following criteria are met:

A. Any PC services provided to an active ADW member must be approved by the reviewing agencies (Refer to H below), including the initial 60 hours. The Dual Service Provision Request must be completed.
B. An ADW member must be receiving services at Service Level D. (Otherwise, additional hours of Personal Assistance/Homemaker direct care services may be requested through a Request for Service Level Change.)
C. All policy set forth in *Chapter 517, Personal Care Services*, must be followed. PC policy supersedes ADW policy for this request.
D. There must be a PC RN Plan of Care and a Personal Assistance/Homemaker RN Plan of Care. For Personal Options, there must be a PC RN Plan of Care and a Participant-Directed Service Plan. These plans must be coordinated to ensure that services are not duplicated. PC and Personal Assistance/Homemaker services cannot be provided during the same hours on the same day. A service planning meeting between the Case Manager Personal Assistance/Homemaker RN, and PC RN must be held with the member or the legal representative in the member's residence and documented on the Request for Dual Service Provision. For Personal Options, the meeting must include PPL and the member.
E. There must be a valid ADW PAS and a valid PC Medical Eligibility Assessment (PCMEA) that documents the need for both services.
F. The ADW Case Manager is responsible for the coordination of the two services. For Personal Options, the member is responsible for the coordination of the 2 services.
G. Dual Service Provision Request Forms must be signed by the Case Manager, ADW RN, PC RN and the member (or legal representative). For Personal Options, the Dual Service Provision Request Form must be signed by the member (or legal representative) and the PC RN. Original signatures are required; i.e., "signature of member on file" is not acceptable.
H. All PC providers should submit requests to:

Innovative Resource Group (IRG)
100 Capitol Street
Suite 600
Charleston, WV 25301

I. Documentation submitted must include a copy of the ADW PAS and the PCMEA, ADW PAS and PC RN Plans of Care (for Personal Options the Participant-Directed Service Plan), current RN assessments (if applicable for Personal Options) from both agencies, and any documentation that substantiates the request. Additionally, a narrative describing how services will be utilized and verification that ADW and PC services will not be duplicated must be submitted. Approvals/denials will be based on the documentation submitted, appropriate program policy manuals, PC standards, and professional judgments. The member (or legal representative), PC RN, Personal Assistance/Homemaker RN, Case Manager or PPL will receive notification of denial or approval from the reviewing agency. If the request is denied or the hours approved are less than requested, the notification will include fair hearing information.

J. BMS will conduct post-payment review of these combined services for duplication or inappropriate services. BoSS and BMS will review compliance during the agency monitoring process.

501.19 EXCLUDED SERVICES AND NON-REIMBURSABLE SITUATIONS

Medicaid will only reimburse agencies for ADW services that are defined as required services on the member's Service Plan or Participant-Directed Service Plan (Refer to *Common Chapter 300, Provider Participation Requirements*, for more information about reimbursement.) The following services are not reimbursable:

A. Services provided for other member(s) of the ADW member's household or to anyone who is not an ADW Program member.

B. Services provided by a Case Management Agency or Personal Assistance/Homemaker that are not included in the Service Plan, Plan of Care or Participant-Directed Service Services provided to an individual who is not medically and financially eligible on the date(s) that service is provided.

CHAPTER 502 – COVERED SERVICES, LIMITATIONS, AND EXCLUSIONS FOR BEHAVIORAL HEALTH CLINIC SERVICES

TABLE OF CONTENTS

CHAPTER 502–COVERED SERVICES, LIMITATIONS, AND EXCLUSIONS FOR BEHAVIORAL HEALTH CLINIC SERVICES

INTRODUCTION

The West Virginia Medicaid Program offers a comprehensive scope of medically necessary behavioral health services to diagnose and treat eligible members. Covered and authorized services must be rendered by enrolled providers within the scope of their license and in accordance with all State and Federal regulations. Any service, procedure, item, or situation not discussed in the manual must be presumed non-covered unless informed otherwise, in writing, by the West Virginia Bureau for Medical Services (BMS).

This chapter sets forth BMS's requirements for payment of Behavioral Health Clinic Services provided by Behavioral Health Clinic providers to eligible West Virginia (WV) Medicaid members.

The policies and procedures set forth herein are promulgated as regulations governing the provision of Behavioral Health Clinic Services in the Medicaid Program administered by the West Virginia Department of Health and Human Resources (WVDHHR) under the provisions of Title XIX of the Social Security Act and Chapter 9 of the Public Welfare Law of WV.

The Bureau of Medical Services has a joint goal with Medicaid Enrolled Providers to ensure effective services are provided to Medicaid Members.

Medicaid Enrolled Providers should give priority to children that have been identified as being in the foster care system. To uphold our responsibility to children in foster care, addressing children's needs must begin at entry and by making these foster children a priority especially with the assessment services stated in this manual. Medicaid Enrolled Providers should make a good faith effort to complete assessments in a timely manner as well as work with Bureau for Children and Families (BCF) to ensure that information is shared in a timely manner with BCF, court systems, as well as other entities involved in the care and treatment process of the foster child while conforming to state and federal confidentiality requirements.

All Medicaid Members have the right to freedom of choice when choosing a provider for treatment. A Medicaid Member may receive one type of service from one provider and another type of service from a different provider. Providers that are found to be inhibiting freedom of choice to Medicaid Members are in violation of their provider agreement.

All Medicaid Enrolled Providers should coordinate care if a Medicaid Member has different Medicaid services at different sites with other providers to ensure that quality of care is taking place and that safety is the forefront of the Member's treatment. Appropriate Releases of Information should be signed in order that HIPAA Compliant Coordination of Care takes place.

502.1 DEFINITIONS

Definitions governing the provision of all WV Medicaid services will apply pursuant to *Chapter 200, Definitions of the Provider* Manual. In addition, the following definitions also apply to the requirements for payment of Behavioral Health Clinic Services described in this chapter.

Abuse and Neglect: as defined in **West Virginia Code §49-1-3**

Advanced Alcohol & Drug Counselor (AADC): professional certification as defined by the West Virginia Certification Board of Addiction Prevention Professionals requirements.

Advanced Practice Registered Nurse (APRN): As defined in **West Virginia Code §30-7-1**: A registered nurse who has acquired advanced clinical knowledge and skills preparing him or her to provide direct and indirect care to patients, who has completed a board-approved graduate-level education program and who has passed a board-approved national certification examination. An advanced practice registered nurse shall meet all the requirements set forth by the board by rule for an advance practice registered nurse that shall include, at a minimum, a valid license to practice as a certified registered nurse anesthetist, a certified nurse midwife, a clinical nurse specialist or a certified nurse practitioner.

Alcohol & Drug Counselor (ADC): professional certification as defined by the West Virginia Certification Board of Addiction Prevention Professionals requirements.

Alcohol & Drug Clinical Supervisor (ADC-S): certification as defined by the West Virginia Certification Board of Addiction Prevention Professionals requirements.

Administrative Service Organization (ASO): the contracted agent of BMS

Behavioral Health Clinic Services: services that are federally defined as those that are preventative, diagnostic, therapeutic, or palliative items or services provided to members on an outpatient basis under the direction of a physician. These services must be provided by a facility which is not part of a hospital, but is organized and operated to provide medical care on an outpatient basis. Clinic services must be provided at the clinic with the only exception being services provided to the homeless population.

Behavioral Health Condition: a mental illness, behavioral disorder and/or substance use disorder which necessitates therapeutic and/or supportive treatment.

Coordination of Care: Sharing information between relevant parties to plan, arrange, implement, and monitor provision of services to Medicaid Members.

Critical Juncture: any time there is a significant event or change in the member's life that requires a treatment team meeting. The occurrence constitutes a change in the member's needs that require services, treatment, or interventions to be decreased, increased or changed. The member's needs affected would be related to their behavioral health, physical health, change in setting or crisis.

Designated Legal Representative (DLR): Parent of a minor child, conservator, legal guardian (full or limited), health care surrogate, medical power of attorney, power of attorney, representative payee, or other individual authorized to make certain decisions on behalf of a member and operating within the scope of his/her authority.

External Credentialing: a process by which an individual's external credential is verified to provide Medicaid Clinic Services by the agency's working committee composed of experienced licensed and/or certified staff representative of the appropriate disciplines or practitioners. A provider agency with few clinical staff may designate a credentialing officer.

Freedom of Choice: The guaranteed right of a beneficiary to select a participating provider of their choice.

Homeless: An individual meeting the current federal definition of homelessness as defined in **42 USC § 11302.**

Foster Child: The West Virginia Department of Health and Human Resources defines a foster child as a child receiving 24-hour substitute care while placed away from his or her parents or guardians and for whom the State agency has placement and care responsibility. This includes, but is not limited to, placements in foster family homes, foster homes of relatives, group homes, emergency shelters, residential facilities, child care institutions, and pre-adoptive homes.

Human Services Degree: A Masters' or Bachelors' degree granted by an accredited college or university in one of the following human services fields:

- Psychology
- Criminal Justice
- Nursing
- Sociology
- Social Work
- Counseling/Therapy
- Teacher Education
- Behavioral Health
- Other Degrees approved by the West Virginia Board of Social Work.

(Note: Some services require specific degree as listed in the manual see specific services for detailed information on staff qualification)

Incident: any unusual event occurring to a member that needs to be recorded and investigated for risk management or Quality Improvement purposes.

Intensive Services (IS): A combination of specific services for a targeted population to be used on a frequent basis for a limited period of time. Approval for an IS program and prior authorization for members admitted to an IS program must be obtained by contacting the ASO.

Internal Credentialing: an individual approved to provide Clinic Services by the agency's working committee composed of experienced licensed and/or certified staff representative of the appropriate disciplines or practitioners. A provider agency with few clinical staff may designate a credentialing officer.

Licensed Practical Nurse (LPN): an individual who has completed the licensed practical nurse program from an accredited school and who is licensed by the WV State Board of Examiners for Licensed Practical Nurses.

Licensed Psychologist: a psychologist who has completed the requirements for licensure that have been established by the WV Board of Examiners of Psychologist and is in current good standing with the board.

Office of Health Facility Licensure and Certification (OHFLAC): The office designated by the West Virginia Department of Health and Human Resources to determine whether facilities comply with Federal and State licensure and State certification standards.

Physician: As defined in West Virginia Code Annotated §30-3-10, an individual who has been issued a license to practice medicine in the state of WV by the WV Board of Medicine and is in good standing with the board; or an individual licensed by the WV Board of Osteopathy in accordance with West Virginia Code Annotated 30-14-6.

Physician's Assistant: An individual who meets the credentials described in West Virginia Code Annotated §30-3-16, §30-3-13, §30-3-5. A graduate of an approved program of instruction in primary health care or surgery who has attained a baccalaureate or master's degree, has passed the national certification exam, and is qualified to perform direct patient care services under the supervision of a physician.

Physician Extender: A medical professional including an advanced practice registered nurse or a physician's assistant functioning within his or her legal scope of practice.

Registered Nurse (RN): A person who is professionally licensed by the State of West Virginia as a Registered Nurse and in good standing with the West Virginia Board of Examiners for Registered Professional Nurses.

Supervised Psychologist: an individual who is an unlicensed psychologist with a documented completed degree in psychology at the level of M.A., M.S., Ph.D., Psy.D. or Ed.D. and has met the requirements of, and is formally enrolled in, the WV Board of Examiners of Psychologists Supervision Program.

Telehealth: the use of identified technologies to provide behavioral health services for Medicaid Members by qualified providers. When billing a service that has been utilized through Telehealth, providers must bill the service code with a GT Modifier (**See Telehealth Section).**

502.2 MEMBER ELIGIBILITY

Behavioral Health Clinic Services are available to all Medicaid members with a known or suspected behavioral health disorder. Each member's level of services will be determined when prior authorization for Behavioral Health Clinic Services is requested of the agency authorized by BMS to perform administrative review. The Prior Authorization process is explained in Section 502.26.2 of this manual.

502.3 MEDICAL NECESSITY

All Behavioral Health Clinic Services covered in this chapter are subject to a determination of medical necessity. In the managed care position paper published in 1999 by the State of WV, medical necessity was defined as:

"Services and Supplies that are:

1. appropriate and necessary for the symptoms, diagnosis or treatment of an illness;
2. provided for the diagnosis or direct care of an illness;
3. within the standards of good practice;
4. not primarily for the convenience of the plan member or provider; and
5. the most appropriate level of care that can be safely provided."

Medical Necessity must be demonstrated throughout the provision of services. For these types of services, the following five factors will be included as part of this determination.

- Service is the appropriate level of care
- Diagnosis (as determined by a physician or licensed psychologist)
- Level of functioning
- Evidence of clinical stability
- Available support system

Consideration of these factors in the service planning process must be documented and re-evaluated at regular service plan updates. As stated in section 502.15.1, the provider may perform one assessment per calendar year in order to update medical necessity (See Service Code H0031 for more details). Diagnostic and standardized instruments may be administered at the initial evaluation and as clinically indicated. The results of these measures must be available as part of the clinical record, as part of the documentation of the need for the service, and as justification for the level and type of service provided.

The Bureau for Medical Services requires that providers register and/or prior authorize with the agency designated by the Bureau to perform administrative review for services that are rendered. Prior Authorization does not guarantee payment for services rendered.

502.4 PROVIDER ENROLLMENT

In order to participate in the WV Medicaid Program and receive payment from BMS, providers of Behavioral Health Clinic Services must meet all enrollment criteria as described in Chapter 300.

502.4.1 ENROLLMENT REQUIREMENTS: AGENCY ADMINISTRATION

Each participating provider must develop and maintain a Credentialing Committee composed of senior licensed and/or certified staff representative of the disciplines or practitioners within the agency. This committee is responsible for overseeing and assuring the following activities:

- Development of written criteria for each specific type of service provided. These criteria must identify the required education, licensure, certification, training, and experience necessary for each staff person to perform each type of service. These criteria must be age and disability specific to populations served as well as ensuring that staff has demonstrated competency to provide the services rendered.

- Review all documented evidence of credentials such as university transcripts, copies of professional licenses, certificates or documents relating to the completion of training, letters of reference and supervision, etc. must be reviewed by the committee. Based on this review, the committee must determine which services staff are qualified to provide.

- These reviews and determinations must be completed at initiation of employment, as changes to credentials occur, and as licenses or certifications expire. Documentation of the credentials review must be filed in each staff person's personnel file and available for review.

All documented evidence of staff credentials (including university transcripts/copies of diplomas, copies of professional licenses, and certificates or documents relating to the completion of training) must be maintained in staff personnel records.

Participating providers must develop standards for staff training, supervision, and compliance monitoring in accordance state policy and federal regulations.

502.4.2 ENROLLMENT REQUIREMENTS: STAFF QUALIFICATIONS

Services may be rendered to Medicaid members by physician's assistants under the supervision of a psychiatrist. Services may also be rendered to Medicaid members by an Advanced Practice Registered Nurse as defined below. An Advanced Practice Registered Nurse without a psychiatric certification must function under the direct supervision of a WV Board of Medicine approved supervising physician. An Advanced Practice Registered Nurse with a psychiatric certification may practice without direct supervision by a psychiatrist.

A Physician's Assistant (PA) and/or Advanced Practice Registered Nurse must have a signed collaborative agreement for prescriptive authority with a psychiatrist. The collaborative

agreement must document the professional relationship between the Advanced RN practitioner and the physician. Regulations set forth in WV Code, Chapter 30 – Professions and Occupations, Title 11 Legislative Rule – West Virginia Board of Medicine, and Title 19 Legislative Rules – Board of Examiners for Registered Professional Nurses must be followed. Physician's Assistants and/or Advanced Practice Registered Nurses will be referred to as physician extenders throughout the manual.

Documentation including required licenses, certifications, proof of completion of training, contracts between physicians and physician assistants, collaborative agreements for prescriptive authority, if applicable, between certified nurse practitioners and physicians, proof of psychiatric certification as applicable, and any other materials substantiating an individual's eligibility to perform as a practitioner must be kept on file at the Behavioral Health Facility.

All further Staff Qualifications will be indicated under the service codes. All documentation for staff including college transcripts, certifications, credentials, background checks, trainings should be kept in the staff's personnel file and may be reviewed at any time by BMS or the Bureau's contractors or state/federal auditors**.**

502.5 CRIMINAL BACKGROUND CHECKS

All Clinic provider staff, having direct contact with members must, at a minimum, have results from a state level Fingerprint Based Background Check. This check must be conducted initially and again every 3 years. If the current or prospective employee, within the past 5 years, has lived or worked out of state or currently lives or works out of state, the agency must request an additional federal background check utilizing fingerprints through the West Virginia State Police also upon hire and every 3 years of employment. Providers may do an on-line preliminary name base check and use these results for a period of 3 months while waiting for state and/or federal fingerprint results to be received. Providers may only use on-line companies that check counties in which the applicant has lived and worked within the last 5 years. An individual who is providing services or is employed by an I/DD Waiver provider cannot be considered to provide services nor can be employed or continue to be employed if ever convicted of the following:

- Abduction;
- Any violent felony crime including but not limited to rape, sexual assault, homicide, or felonious battery;
- Child/adult abuse or neglect;
- Crimes which involve the exploitation, including financial exploitation, of a child or an incapacitated adult;
- Any type of felony battery;
- Felony arson;
- Felony or misdemeanor crime against a child or incapacitated adult which causes harm; Felony drug related offenses within the last 10 years;
- Felony DUI within the last 10 years;
- Hate crimes;
- Kidnapping;

- Murder/ homicide;
- Neglect or abuse by a caregiver;
- Pornography crimes involving children or incapacitated adults including but not limited to, use of minors in filming sexual explicit conduct, distribution and exhibition of material depicting minors in sexually explicit conduct or sending, distributing, exhibiting, possessing, displaying or transporting material by a parent, legal representative or custodian, depicting a child engaged in sexually explicit conduct;
- Purchase or sale of a child;
- Sexual offenses including but not limited to incest, sexual abuse, or indecent exposure;
- Healthcare fraud; and
- Felony forgery.

Fingerprint based background check results, other than those listed above, which may place a member at risk of personal health and safety or have evidence of a history of Medicaid fraud or abuse must be considered.

If aware of recent convictions or change in conviction status of an agency staff member providing Clinic services, the Clinic provider will notify the Program Manager for Behavioral Health Services.

The Federal Office of the Inspector General (OIG) List of Excluded Individuals and Entities must be checked by the Clinic provider for every agency staff who provides Medicaid services prior to employment and monthly throughout employment. Persons on the OIG Exclusion List cannot provide Medicaid services. The list can be checked at http://exclusions.oig.hhs.gov/. A form may be printed from this website to verify that the check occurred. Any document that has multiple staff names may be kept in a separate file and made available to staff as needed and during agency audits.

502.6 CLINICAL SUPERVISION

The purpose of clinical supervision is to improve the quality of services for every member while ensuring adherence to WV Medicaid policy, therefore the provider must have a policy for Clinical Supervision including guidelines for the following:

- the responsibilities of the supervisor,
- credentialing requirements of the supervisor, and
- the minimum frequency for which supervision should occur.

Each agency shall have a chart demonstrating clinical chain of command and responsibility. Each agency shall have a documented process for ensuring all staff are aware of their clinical and administrative supervision.

The clinical supervisor should have an equal or higher degree, credential, or clinical experience than those they supervise. If a clinical supervisor is responsible for a Medicaid funded program, the supervisor should be able to demonstrate familiarity with Medicaid requirements and relevant manuals. This applies to all clinic services rendered.

502.7 SERVICE CERTIFICATION REQUIREMENTS

A physician or physician extender must certify the need for Behavioral Health Clinic Coordinated Services by:

- Signing the "Behavior Health Clinic/Rehabilitation Services, Authorization for Services" form within 72 hours of the member's admission to the program for services and prior to the start of treatment. **If an Initial Service Plan is created on day of intake then a 72 hour authorization form is not required. Upon initiation of the Initial Service Plan, the "Behavior Health Clinic/Rehabilitation Services, and Authorization for Services" form is no longer in effect since it is no longer necessary.** This form, which is filled out by the provider initiating/admitting staff, authorizes the provision of all Behavioral Health Clinic Services until the development and initiation of the Initial Service Plan. The initial service plan must include all information that is required on the 72-hour authorization form.

For members receiving *Coordinated Care*, the following is required:

- Development of the Initial Service Plan within seven days of the initial admission and intake
- Development of the Master Service Plan within 30 days of the initial admission and intake
- Review and re-evaluation of the service plan at a minimum every 90 days, or sooner if dictated by the member's needs.

If any Behavioral Health Clinic Services occur outside the time frames of these forms which authorize services, the services provided are not billable.

502.8 METHODS OF VERIFYING BUREAU FOR MEDICAL SERVICES' REQUIREMENTS

Enrollment requirements, as well as provision of services, are subject to review by BMS and/or its contracted agents. BMS' contracted agents may promulgate and update utilization management guidelines that have been reviewed and approved by BMS. These approved guidelines function as policy. Additional information governing the surveillance and utilization control program may be found in *Chapter 800 (A), General Administration*, of the Provider Manual and are subject to review by state and federal auditors.

502.9 CLINIC PROVIDER REVIEWS

The primary means of monitoring the quality of Clinic services is through provider reviews conducted by OHFLAC and the contracted agent as determined by BMS by a defined cycle. The contracted agent performs on-site and desk documentation provider reviews and face-to-face member/legal representative and staff interviews to validate documentation and address CMS quality assurance standards. Targeted on-site Clinic provider reviews and/or desk reviews may be conducted by OHFLAC and/or the Contracted Agent in follow up to Incident

Management Reports, complaint data, Plan of Corrections, etc. Upon completion of each provider review, the Contracted Agent conducts a face-to-face exit summation with staff as chosen by the provider to attend. Following the exit summation, the Contracted Agent will make available to the provider a draft exit report and a Plan of Correction to be completed by the Clinic provider. If potential disallowances are identified, the Clinic provider will have 30 calendar days from receipt of the draft exit report to send comments back to the Contracted Agent. After the 30-day comment period has ended, BMS will review the draft exit report and any comments submitted by the Clinic provider and issue a final report to the Clinic Provider's Executive Director. The final report reflects the provider's overall performance, details of each area reviewed and any disallowance, if applicable, for any inappropriate or undocumented billing of Clinic Services. A cover letter to the Clinic provider's Executive Director will outline the following options to effectuate repayment:

(1) Payment to BMS within 60 days after BMS notifies the provider of the overpayment; or

(2) Placement of a lien by BMS against further payments for Medicaid reimbursements so that recovery is effectuated within 60 days after notification of the overpayment; or

(3) A recovery schedule of up to a 12-month period through monthly payments or the placement of a lien against future payments. If the Clinic provider disagrees with the final report, the Clinic provider may request a document/desk review within 30 days of receipt of the final report pursuant to the procedures in *Common Chapter 800, (A) General Administration* of the West Virginia Medicaid Provider Manual. The Clinic provider must still complete the written repayment arrangement within 30 days of receipt of the Final Report, but scheduled repayments will not begin until after the document/desk review decision. The request for a document/desk review must be in writing, signed and set forth in detail the items in contention.

The letter must be addressed to the following:

Commissioner
Bureau for Medical Services
350 Capitol Street, Room 251
Charleston, WV 25301-3706

If no potential disallowances are identified during the Contracted Agent review, then the Clinic Provider will receive a final letter and a final report from BMS.

Plan of Correction

In addition to the draft exit report sent to the Clinic providers, the Contracted Agent will also send a draft Plan of Correction (POC) electronically. Clinic providers are required to complete the POC and electronically submit a POC to the Contracted Agent for approval within 30 calendar days of receipt of the draft POC from the Contracted Agent. BMS may place a hold on claims if an approved POC is not received by the Contracted Agent within the specified time frame. The POC must include the following:

1.) How the deficient practice for the services cited in the deficiency will be corrected and what system will be put into place to prevent recurrence of the deficient practice;

2.) How the provider will monitor to assure future compliance and who will be responsible for the monitoring;

3.) The date the Plan of Correction will be completed; and

4.) Any provider-specific training requests related to the deficiencies

502.10 TRAINING AND TECHNICAL ASSISTANCE

The Contracted Agent develops and conducts training for Clinic providers and other interested parties as approved by BMS as necessary to improve systemic and provider-specific quality of care and regulatory compliance. Training is available through both face-to-face and web-based venues.

502.11 OTHER ADMINISTRATIVE REQUIREMENTS

- The provider must assure implementation of BMS' policies and procedures pertaining to service planning, documentation, and case record review. Uniform guidelines for case record organization should be used by staff, so similar information will be found in the same place from case record to case record and can be quickly and easily accessed. Copies of completed release of information forms and consent forms must be filed in the case record.
- Records must contain completed member identifying information. The member's individual plan of service must contain service goals and objectives which are derived from a comprehensive member assessment, and must stipulate the planned service activities and how they will assist in goal attainment. Discharge reports must be filed upon case closure.
- Records must be legible.
- Prior to the retrospective review all records requested must be presented to the reviewers completing the retrospective review.
- If requested the providers must provide copies of Medicaid Members records within one business day of the request.
- Provider must facilitate the records access that is requested as well as equipment that may need to be utilized to complete the Comprehensive Retrospective Review Process.
- A point of contact must be provided by the provider throughout the Comprehensive Retrospective Review Process.
- In addition to the documentation requirements described in this chapter, Behavioral Health Clinic Service providers must comply with the documentation and maintenance of records requirements described in Chapter 100, General Information, Chapter 300, Provider Participation, and Chapter 800 (A), General Administration of the Provider Manual.
- Documentation of the services provided in this manual must demonstrate only one staff person's time is billed for any specific activity provided to the member.

502.12 FOCUSED AND COORDINATED CARE SERVICES

The Bureau of Medical Services expects that each member will receive the type and amount of behavioral health service(s) necessary to ameliorate and stabilize the behavioral health disorder(s) defining medical necessity for services. The BMS has established two levels of behavioral health treatment, with similar but somewhat differing credentialing and documentation requirements. Assessment services are not included within either category but are considered necessary to establish medical necessity for a particular service or level of care.

Focused Care: Members receiving focused services have been determined to have a behavioral health disorder which may be addressed through the provision of low frequency (generally a maximum of once per week, ranging as rarely as once each six months) professional treatment services. Services are provided by a behavioral health professional with at minimum a master's degree in a behavioral health service field, excluding Mental Health Assessment by a Non-Physician. The treatment team consists of the professional and the member and/or member's designated legal representative who together establish a treatment strategy which is documented in the member's record. The treatment strategy is a flexible tool guiding treatment which may consist of one or more of the following Medicaid services:

- Medical office services (billed as E/M codes);
- Professional Individual therapy or
- Professional Group therapy
- Assessment and Screening codes

The treatment strategy must relate directly to the behavioral health condition(s) identified as being medically necessary to treat. Documentation of on-going therapeutic and/or medication management contacts must relate directly to the treatment strategy.

Coordinated Care: Members requiring coordinated care are those with severe and/or chronic behavioral health conditions that necessitate a team approach to providing medically necessary care. The treatment is usually provided on a more intensive basis, several times a week if not daily. A full range of individuals may be employed in providing care, ranging from paraprofessionals through psychiatrists. The treatment team consists of the personnel involved in providing the care and includes the member and the member's guardian if any. The member is likely to have a case manager, who is responsible for coordinating and facilitating care.

Documentation consists of a comprehensive service plan. When the member enters the service, an initial plan is developed which dictates care until the interdisciplinary team can meet. An initial plan must be completed within seven days. Those services that are time-limited and of high intensity may require an initial plan immediately upon admission that is then adapted as the member moves through levels of care. Services that are projected to be of unlimited or extended duration are expected to include development of a master service plan within 30 days that describes specific objectives to be achieved during the course of treatment, stated in observable and/or measureable terms. The master service plan must address integration and coordination of various entities and programs providing services to the member. On-going

documentation must reflect the team's ability to communicate issues of concern, member progress and barriers to treatment.

Services falling under Coordinated Care may include but are not limited to the following:

- Assertive Community Treatment
- Professional Individual Therapy
- Professional Group Therapy

- Day Treatment

502.13 TELEHEALTH SERVICES

The West Virginia Bureau for Medical Services encourages providers that have the capability to render services via Telehealth to allow easier access to services for WV Medicaid Members. To utilize Telehealth providers will need to document that the service was rendered under that modality. When filing a claim the Provider will bill the service code with a GT Modifier. Each service in this manual is identified as "Available" or "Not Available" for Telehealth. Some services codes give additional instruction and/or restriction for Telehealth as appropriate.

- Minimum equipment standards are transmission speeds of 256kbps or higher over ISDN (Integrated Services Digital Network) or proprietary network connections including VPNs (Virtual Private Networks), fractional T1, or T1 comparable cable bandwidths. Software that has been developed for the specific use of Telehealth may be used as long as the software is HIPAA Compliant and abides by a federal code pertaining to Telehealth.

- The audio, video, and/or computer telemedicine system used must, at a minimum, have the capability of meeting the procedural definition of the code provided through telemedicine. The telecommunication equipment must be of a quality to complete adequately all necessary components to document the level of service for the CPT or HCPCS codes that are available to be billed. If a peripheral diagnostic scope is required to assess the patient, it must provide adequate resolution or audio quality for decision-making.

- The provider at the distant site is responsible to maintain standards of care within the identified scope of practice.
- All Medicaid conditions and regulations apply to Telehealth services unless otherwise specified in this manual.
- The provider must have an appropriately trained employee of the facility available in the building at all Telehealth contacts with a member. Appropriately trained is defined as trained in systematic de-escalation that involves patient management.
- The health care agency or entity that has the ultimate responsibility for the care of the patient must be licensed in the State of West Virginia and enrolled as a WV Medicaid provider. The practitioner performing services via telemedicine, whether from West Virginia or out of state, must meet the credentialing requirements contained within this manual.
- Telehealth providers must have in place a systematic quality assurance and improvement program relative to Telehealth services that is documented and monitored.
- All providers are required to develop and maintain written documentation of the services provided in the form of progress notes. The notes must meet the same guidelines as those required of an in-person visit or consultation, with the exception that the mode of communication (i.e., Telehealth) must be noted.
- The operator of the Telehealth equipment must be an enrolled provider, a contracted employee, or an employee of the enrolled provider for compliance with confidentiality and quality assurance.
- The practitioner who delivers the service to a participant shall ensure that any written information is provided to the participant in a form and manner which the participant can understand using reasonable accommodations when necessary.
- Participant's consent to receive treatment via telehealth shall be obtained, and may be included in the participant's initial general consent for treatment.
- If the participant (or legal guardian) indicates at any point that he or she wishes to stop using the technology, the service should cease immediately and an alternative method of service provision should be arranged.

  The health care practitioner who has the ultimate responsibility for the care of the patient must first obtain verbal and written consent from the recipient, including as listed below:

  - The right to withdraw at any time.
  - A description of the risks, benefits and consequences of telemedicine
  - Application of all existing confidentiality protections
  - Right of the patient to documentation regarding all transmitted medical information

- Prohibition of dissemination of any patient images or information to other entities without further written consent.

- BMS Manual standards apply to all services available through Telehealth unless otherwise described. Medicaid will reimburse according to the fee schedule for services provided.
- Reimbursement is not available for a telephone conversation, electronic mail message (e-mail), or facsimile transmission (fax) between a Provider and a participant.

502.14 DOCUMENTATION

The WV Bureau for Medical Services recognizes that some providers use an electronic system to create and store documentation while other providers choose to use a hard copy based system. When services require documentation the Bureau will accept both types of documentation. Each service code in this manual describes the required documentation. All requirements must be met no matter the modality of system choice.

502.15 ASSESSMENT SERVICES

Assessment services include evaluative services and standardized testing instruments applied by suitably trained staff credentialed by the internal credentialing policies and procedures of the agency. Assessment services are designed to make determinations concerning the mental, physical and functional status of the member. Those identified as being in the Foster Care system should receive assessment as rapidly as possible.

502.15.1 MENTAL HEALTH ASSESSMENT BY NON-PHYSICIAN

Procedure Code: **H0031**
Service Unit: Event-
Telehealth: Available
Service Limits: Maximum of (four) 4 per year for members with complex behavioral healthcare needs (Coordinated Care) and (two) 2 per year per member with relatively simple behavioral healthcare needs (Focused Care). The provider may request more units if a critical treatment juncture arises, however not until all current authorizations for H0031 are expired/utilized. The provider may request authorization to conduct one global assessment per year to reaffirm medical necessity and the need for continued care/services. Change of payer source does not justify H0031.

Staff Credentials: Staff must have a minimum of a master's degree, bachelor's degree in a field of human services, or a registered nurse. Supervision and oversight by an individual with a minimum of a master's degree is required (See Clinical Supervision). Staff must be properly credentialed by the agency's internal credentialing committee.

Definition: Mental Health Assessment by Non-Physician is an initial or reassessment evaluation to determine the needs, strengths, functioning level(s), mental status and/or social history of a member. This code may also be used for special requests of the West Virginia Department of Health and Human Resources for assessments, reports, and court testimony on adults or children for cases of suspected abuse or neglect. The administration and scoring of functional assessment instruments necessary to determine medical necessity and level of care are included in this service.

Approved Causes For Utilization:

1. Intake/Initial evaluation;
2. Alteration in level of care with the exception of individuals being stepped down related to function of their behavioral Health condition to a lesser level of care.
3. Critical treatment juncture, defined as: The occurrence of an unusual or significant event which has an impact on the process of treatment. A critical treatment juncture will result in a documented meeting between the provider and the member and/or DLR and may cause a revision of the plan of services;
4. Readmission upon occurrence of unusual or significant events that justify the re-initiation of treatment or that have had an impact on the individual's willingness to accept treatment;
   The provider may request authorization to conduct one global assessment per year to reaffirm medical necessity and the need for continued care/services.
5. No one under the age of three (3) will have a H0031 conducted on them. The Medicaid member under the age of the 3 should be referred to the Birth to Three Program.

Documentation:

1. Initial/intake (may include use of standardized screening tools):
   A. Demographic data (name, age, date of birth, etc.);
   B. Presenting problem(s) (must establish medical necessity for evaluation) including a description of frequency, duration, and intensity of presenting symptomatology that warrants admission;
   C. Impact of the current level of functioning (self-report and report of others present at interview), which may include as appropriate a description of activities of daily living, social skills, role functioning, concentration, persistence, and pace; for children, current behavioral and academic functioning;
   D. History of behavioral health and health treatment (recent and remote);
   E. History of any prior suicide/homicide attempts, high risk behaviors, self-injurious behaviors, etc.;
   F. Medical problems and medications currently prescribed;
   G. Social history which may include family history as relevant, description of significant childhood events, arrests, educational background, current family structure, vocational history, financial status, marital history, domestic violence (familial and/or personal), substance abuse (familial and/or personal), military history if any;
   H. Analysis of available social support system at present;
   I. Mental status examination;
   J. Recommended treatment (initial);

K. Diagnostic Impression, (must be approved/signed by licensed clinical professional with diagnostic privileges in scope of practice); and
L. Place of evaluation, date of evaluation, start stop times, signature and credentials of evaluator.
M. Efficacy of and compliance with past treatment. (If past treatment is reported)
N. Past treatment history and medication compliance (If past treatment is reported)

2. Re-assessment:
   A. Date of last comprehensive assessment;
   B. Current demographic data;
   C. Reason for re-assessment, including description of current presenting problems (must document medical necessity for evaluation. If the re-evaluation is a global annual assessment it must be labeled as such).
   D. Changes in situation, behavior, functioning since prior evaluation;
   E. Summary of treatment since prior evaluation including a description of treatment provided over the interval and response to treatment;
   F. Mental status examination;
   G. Suggested amendments in treatment/intervention and/or recommendations for continued treatment or discharge;
   H. Specific rationale for any proposed amendment in diagnosis which must be analyzed and approved/signed by licensed clinical professional; and
   I. Place of evaluation, date of evaluation, start stop times, signature and credentials of evaluator.

Note: H0031, T1023 HE, and **90791 or 90792** are not to be billed at the same initial intake or re-assessment unless the **H0031** is performed first and the evaluator recommends more specific assessment by a medical or psychological professional for further evaluation of the need for medical or other specialty treatment. Documentation must justify need for further evaluation using **90791 or 90792**.

502.15.2 PSYCHOLOGICAL TESTING WITH INTERPRETATION AND REPORT

Procedure Code: 96101
Service Unit: 60 minutes
Telehealth: Not Available
Service Limits: All units must be prior authorized

Prior Authorization: Refer to Utilization Management Guidelines.

Staff Credentials: Must be performed by a West Virginia licensed psychologist in good standing with WV Board of Examiners of Psychology or a Supervised Psychologist under supervision of a Board approved Supervisor.

Definition: Evaluation by a psychologist including psychological testing with interpretation and report. Psychological testing includes, but is not limited to, standard psychodiagnostic assessment of personality, psychopathology, emotionality, and intellectual abilities. Academic

assessment and assessment required to determine the needs, strengths, functioning level(s), mental status and/or social history of an individual are also included. Documentation requires scoring and interpretation of testing and a written report including findings and recommendations. 96101 is also used in those circumstances when additional time is necessary to integrate other sources of clinical data, including previously interpreted, completed and reported technician-and computer-administered tests.

Note: Interpretation and report of technician and computer-based tests may not be completed using this service. It is intended for the integration of previously interpreted and reported technician and computer-based tests.

Documentation: Documentation/Report must contain the following and be completed 15 calendar days from the date of service.

- Date of Service
- Location of Service
- Time Spent (Start/Stop Times)
- Signature with Credentials
- Purpose of Evaluation
- Documentation that Medicaid Member was present for the evaluation
- Report must contain results (score and category) of the administered tests/evaluations
- Report must contain interpretation of the administered tests/evaluations
- Report must contain documentation of mental status exam
- Report must contain a rendering of the Medicaid Member's diagnosis within the current DSM or ICD methodology.
- Report must contain recommendations consistent with the findings of administered test/evaluation

Service Exclusions:

- Psychometrician/Technician Work
- Computer - Scoring
- Self-Administered Assessments
- Computer - Interpretation

502.15.3 PSYCHIATRIC DIAGNOSTIC EVALUATION (NO MEDICAL SERVICES)

Procedure Code: 90791
Service Unit: Event (completed evaluation)

Service Limits: Two events per year
Telehealth: Available

Prior Authorization: Refer Utilization Management Guidelines.

Staff Credentials: Must be performed by a West Virginia licensed psychologist in good standing with WV Board of Examiners of Psychology, a Supervised Psychologist who is supervised by Board approved Supervisor, a Physician, or a Physician Extender.

Definition: An integrated bio-psychosocial assessment, including history, mental status, and recommendations. The evaluation may include communication with family or other sources and review and ordering of diagnostic studies.

Documentation: Documentation must contain the following and must be completed within 15 calendar days of the date of service.

- Date of Service
- Location of Service
- Psychiatrist's/Psychologist's signature with credentials
- Presenting Problem
- Purpose of the Evaluation
- History of Medicaid Member's presenting illness
- Duration and Frequency of Symptoms
- Current and Past Medication efficacy and compliance
- Psychiatric History up to Present Day
- Medical History related to Behavioral Health Condition
- Mental Status Exam
- Members diagnosis per current DSM or ICD methodology
- Medicaid Member's prognosis and rationale
- Rationale for Diagnosis

Appropriate recommendations consistent with the findings of the evaluation.

502.15.4 PSYCHIATRIC DIAGNOSTIC EVALUATION WITH MEDICAL SERVICES (this includes prescribing of medications)*

Procedure Code: 90792
Service Unit: Event (completed evaluation)
Service Limits: Two events per year
Telehealth: Yes, as defined in Telehealth section.

Prior Authorization: Refer to Utilization Management Guidelines.

Staff Credentials: Must be completed by a physician or a physician extender.

Definition: An integrated bio-psychosocial and medical assessment, including history, mental status, other physical examination elements as indicated, and recommendations. The evaluation may include communication with family and other sources, prescription of medications, and review and ordering of laboratory or other diagnostic studies.

Documentation: Documentation must contain the following and be completed in 15 calendar days of the date of service.

- Date of Service
- Location of Service
- Psychiatrist's signature with credentials
- Documentation that Medicaid Member was present for the evaluation
- Documentation that Medical Evaluation was completed
- Purpose of the Evaluation
- Presenting Problem
- History of the Medicaid Member's presenting illness
- Duration and Frequency of symptoms
- Current and Past Medication including efficacy and compliance
- Psychiatric history up to present day
- Medical History related to behavioral health condition
- Documentation of Mental Status Exam
- Medicaid Member's diagnosis per current DSM and ICD Methodology
- Medicaid Member's prognosis and rationale
- Appropriate recommendations consistent with the findings of the evaluation

502.15.5 SCREENING BY LICENSED PSYCHOLOGIST

Procedure Code: T1023 HE
Service Unit: Event (completed evaluation)
Telehealth: Available
Service Limits: One event every six months

Prior Authorization: Refer to Utilization Management Guidelines.

Staff Credentials: Must be performed by a West Virginia Licensed psychologist or Supervised Psychologist in good standing with WV Board of Examiners of Psychology.

Definition: This is a screening to determine the appropriateness of consideration of an individual for participation in a specified program, project or treatment protocol. Procedure codes 96101 or 90791 must be used when a more in-depth assessment is indicated.
Documentation: Documentation must contain the following and be completed in 15 calendar days from the date of service

- Date of Service
- Location of Service
- Purpose of Evaluation
- Start/Stop Times
- Practitioner signature and credentials
- Appropriate recommendations based on clinical data gathered in the evaluation

502.15.6 DEVELOPMENTAL TESTING: LIMITED

Procedure Code: 96110
Service Unit: Event (completed interpretation and report)
Telehealth: Not Available
Service Limits: All units must be prior authorized

Payment Limits: This service cannot be billed if Psychological Testing with Interpretation and Report (procedure code 96101) has been billed in the last six months.

Prior Authorization: Refer to Utilization Management Guidelines

Staff Credentials: Must be performed by a West Virginia licensed psychologist in good standing with WV Board of Examiners of Psychology, a Psychologist who is under the supervision of a Board approved Supervisor, a physician or physician extender.

Definition: This is limited to developmental testing (e.g. Developmental Screening Test II, Early Language Milestone Screen) with interpretation and report**.**

Documentation: Documentation must contain the following and be completed in 15 calendar days of the date of service.

- Date of Service
- Location of Service
- Purpose of Evaluation
- Time Spent (start/stop times)

- Signature with credentials
- Documentation that the member was present for the evaluation
- Documentation must contain the results (scores and category) of the administered tests/evaluations
- Documentation must contain the documentation of the mental status exam
- Rendering of the Medicaid Member's diagnosis within the current DSM or ICD Methodology
- Recommendations consistent with the findings of the administered tests/evaluations.

502.16 SERVICE PLANNING REQUIREMENTS:

Coordinated Care Services:

Service planning and consultation is available only in the Coordinated Care model of service provision. Service planning codes cannot be billed when the development of a service plan is an integral aspect of the service being provided (for example, Community Psychiatric Supportive Treatment). Service planning is to be conducted when multiple programs and services need to be coordinated by a team representative of the differing agencies and provider groups providing care to the member.

All members receiving coordinated care must have a master service plan. The Agency may choose to create one plan that is modified as the individual moves through a service, or may choose to create an initial service plan followed by a master service plan. Agencies with services with shorter lengths of stay may choose the first option if the length of stay is predicted to be less than thirty days. The initial service plan must be completed within 7 days of admission to a service. The plan must be completed by the primary clinician and the member and/or member's guardian.

The initial service plan must be completed within 7 days of admission to a service. The plan must be completed by the primary clinician and the member and/or member's guardian.

Development of the initial plan without the entire interdisciplinary team is not a billable service (see Service Plan Development for clarification and description of exceptions). The initial plan of service describes the services and/or supports the member is to receive until the assessment process is complete and the master plan of service is developed. This initial plan shall consist of the following at a minimum:

- Description of any further assessments or referrals that may need to be performed;
- A listing of immediate interventions to be provided along with objectives for the interventions;
- A date for development of a master plan of services. The designated date must be appropriate for the planned length of service but at no time will that exceed 30 days from

the date of the signing of the initial plan. If a program is an intensive service, the master plan must be completed within 7 days; and
- The signature of the member and/or DLR, intake worker, physician and other persons participating in the development of the initial plan.

The Master Service Plan goals and objectives must be based on problems identified in the intake assessment or in subsequent assessment(s) during the treatment process.

The Master Plan is developed within 30 days of admission and must include:

- Date of development of the plan;
- Participants in the development of the plan;
- A statement or statements of the goal(s) of services in general terms;
- A listing of specific objectives that the service providers and the member hope to achieve or complete;
- The measures to be used in tracking progress toward achievement of an objective;
- The technique(s) and/or services (intervention) to be used in achieving the objective;
- Identification of the individuals responsible for implementing the services relating to the statement(s) of objectives; and
- Discharge Criteria
- A date for review of the plan, timed in consideration of the expected duration of the program or service.
- Start and Stop Times
- Credentials

It is expected that objectives be specific, measureable, realistic and capable of being achieved in the time available in the projected duration of the program or service.

Service plans must be flexible documents that are modified by the team as necessary and clinically appropriate. Service plans must be revisited at critical treatment junctures including changes in level of service to more intensive or less intensive types of care. When an intervention proves to be ineffective the service plan must reflect consideration by the team of changes in the intervention strategy.

502.16.1 MENTAL HEALTH SERVICE PLAN DEVELOPMENT

Procedure Code: H0032
Service Unit: 15 minutes
Telehealth: Available
Service Limits: 16 units per 90 day period If Medicaid Member is in *Focused Care* H0032 cannot be billed.

Prior Authorization: Refer to Utilization Management Guidelines.

Definition: An individual service plan is required for all members receiving services through *Coordinated Care.* The treatment team consists of the member and/or guardian, and/or

member's representative (if requested), the member's case manager, representatives of each professional discipline, and provider and/or program providing services to that person (inter- and intra-agency). If a member is served by multiple behavioral health providers, all providers must be invited to participate in the service planning session. All members of the team must receive adequate notice of the treatment team meeting. If a member of the team does not come, the team decides whether to proceed in his or her absence. If the team elects to proceed, documentation must describe the circumstances. A physician extender may serve on the committee in place of the physician.

An Initial Service Plan is developed based on intake information within seven days of intake; a Master Service Plan is developed within 30 days of intake and must be updated at least every 90 days. It must be updated more frequently, at critical treatment junctures, if necessitated by the member's needs.

All service plans (including updates) must be reviewed, signed, and approved by a physician within 72 hours of the service plan meeting and prior to implementing services.

The physician or designated physician extender must be present physically or by telehealth and participate in all service planning sessions for members who meet any of the following criteria:

- Receive psychotropic medications prescribed by the agency
- Have a diagnosis of major psychosis or major affective disorder
- Have an I/D Diagnosis
- Have an Autism Diagnosis
- Have major medical problems in addition to major psychosis and medications
- The presence of the physician or physician extender has been specifically requested by the case manager or the member.

The case manager is responsible for the scheduling and coordination of treatment team meetings, monitoring the implementation of the service plan, and for initiating treatment team meetings as the needs of the member dictate. Justification for the presence of each staff person participating in the meeting is the responsibility of the case manager. Participation time by staff persons may vary depending on the nature of their involvement and contribution to the team process. Service planning meetings must be scheduled at times and places that facilitate the inclusion of the member. The agency providing services to the member may bill for participation by any of their staff necessary for the service planning process. Participation by staff from other agencies is not billable by the agency coordinating the service planning session. Participation by family members is not billable. It is important to remember that, although coordination of the service planning process is the responsibility of the case manager, development of the service plan is the responsibility of the treatment team.

Providers must make the proper distinction between service planning and other activities related to case management for the member. The case manager may be involved in the development of individual program plans, such as residential plans, day treatment plans, work training plan educational plans, etc. as called for by the member's Master Service Plan. These types of

activities may constitute billable time for case management services; ***however, when the case manager participates in a treatment team meeting he/she must bill Mental Health Service Plan Development rather than Targeted Case Management.***

Individual program plans for Day Treatment and other organized programs are not billable as a separate activity, but are considered part of the services for which the plans were developed, and are covered under the definition of those services.

Mental Health Service Plan Development reimburses for team member participation. A written service plan is a product of that process and serves as substantiation that the process took place.

Documentation: The following documentation is required for substantiation of Mental Health Service Plan Development:

- A service plan signature page is required. This document is to be placed in the member's clinical record along with the completed service plan or service plan update.
  - There must be signatures of all participating members of the treatment team (including the member, their guardian, or the member's requested representative).
  - All signatures must be original, must include the title and credentials of the individual, must be dated by the treatment team member, and must include the actual time spent providing the service by listing the start-and-stop times of their participation. Staff may participate for different lengths of time, depending on the nature of their involvement and contribution to the team process.
- If a staff person from another agency participates in the service planning session, he/she must:
  - Meet the previously listed requirements of the service plan signature page. This includes signing the signature page along with listing the agency they are representing.
  - Write an activity note (which must be included in **their** agency's clinical record) that states their purpose for participating in the meeting, their signature and credentials, the location of the session, date of session, and the actual time spent participating in the session by listing their start-and-stop times.

Documentation must contain the physician's signature or physician extender on the completed service plan or service plan update, the date, and the actual time spent providing the service by listing the start-and-stop times of his/her participation.

If the member, their guardian, or the member's requested representative does not attend the service planning meeting, the reason for the member's absence must be documented in the clinical record. If unable to attend, the service plan must be reviewed and signed within 7 calendar days by the member or their guardian. If the clinical record does not include a valid signature page with required signatures, the service plan will be invalid, and subsequently, no services provided under its auspices will be billable.

502.16.2 PHYSICIAN COORDINATED CARE OVERSIGHT SERVICES

Procedure Code: G9008
Service Unit: 15 minutes
Telehealth: Available
Service Limits: 2 units per 90 days

Prior Authorization: Refer to Utilization Management Guidelines.

Staff Credentials: Must be performed by physician or physician extender.
Definition: These are activities performed by a physician or physician extender directly related to service planning: participation in a treatment team meeting or a review and approval of a service plan. Also, refer to Mental Health Service Plan Development.

Documentation: Documentation must contain the physician or physician extender's signature, date of signature, and the actual time spent providing the service by listing the start-and-stop times of his/her participation.

502.16.3 CASE CONSULTATION

Procedure Code: 90887
Service Unit: Event
Telehealth: Available
Service Limits: 1 unit per 90 days

Prior Authorization: Refer to Utilization Management Guidelines

Definition: A Case Consultation Service is an interpretation or explanation of results of psychiatric, and other medical examinations and procedures through the requesting clinician to family or other responsible persons.

These are services provided at the request of a professional requiring the opinion, recommendation, suggestion and/or expertise of another professional for a specific purpose regarding services and/or activities of a member relevant to the particular area of expertise of the consulting professional. The consulting professional must be licensed or certified in the needed area of expertise. Case Consultation may not be used during service planning. The member's case manager cannot be a case consultant. Professional staff persons who participated in the current member's service plan within the current 90 day period, or were directed to provide treatment, cannot bill for case consultation.

Only the consulting professional's time may be billed for this service. Any other professional(s) involved in the case consultation may not bill case consultation for their time. The consulting professional whose services are being billed must currently be an enrolled Medicaid provider if he/she is not an employee (either directly or under contract) of the agency seeking consultation.

Documentation: The consulting professional must document a summary of the consultation that includes: purpose, activities/services discussed, recommendations with desired outcomes, the relationship of the consultation to a specific objective(s) in the service plan, date of service, location, signature and credentials of the consulting professional, and the actual time spent providing the service by listing the start-and-stop times of the consultation.

502.17 SUPPORTIVE SERVICES

502.17.1 BEHAVIORAL HEALTH COUNSELING, PROFESSIONAL, INDIVIDUAL

Procedure Code: H0004HO
Service Unit: 15 minutes
Telehealth: Available
Service Limits: 60 units per year

Prior Authorization: Refer to Utilization Management Guidelines.

Staff Credentials: Must be performed by a minimum of a Master's level therapist using generally accepted practice of therapies recognized by national accrediting bodies for psychology, psychiatry, counseling, and social work. Alcohol and Drug Counselors (ADCs) are considered to be credentialed to provide Behavioral Health Counseling, Individual, so long as they have a master's degree in a clinical field, but only when directly addressing Substance Abuse treatment issues.

To provide therapy in other treatment areas, the ADCs must be credentialed by the applicable accrediting bodies of their respective professional disciplines. All individuals with an ADC hired after July 1, 2014 must have a Master's Degree. All current individuals employed with an ADC must only address substance abuse treatment issues.

Definition: Behavioral Health Counseling, Professional, Individual, is the treatment of behavioral health conditions in which the qualified health care professional through definitive therapeutic communication attempts to alleviate emotional disturbances, reverse or change maladaptive patterns of behavior, and encourage personality growth and development. This process includes ongoing assessment and adjustment of psychotherapeutic interventions and may include involvement of family members or others in the treatment process. Behavioral Health Counseling, Professional, is a face to face medically necessary service provided to the member and/or family member however the member must be present for some or all of the service.

Often by necessity, Behavioral Health Counseling of children will involve work with parents as the agent of change in maladaptive behavior of children. Structured behavior therapies designed to provide parents with therapeutic tools to control and modify inappropriate behavior and promote adaptive coping behaviors are considered to be appropriate use of this service.

Documentation: Documentation must indicate how often this service is to be provided. There must be an activity note describing each service/activity provided, the relationship of the

service/activity to the identified behavioral health treatment needs, and the member's response to the service. If there is a Master Service Plan, the intervention should be reflective of a goal and/or objective on the Plan. The activity note must include the reason for the service, symptoms and functioning of the member, a therapeutic intervention grounded in a specific and identifiable theoretical base that provides framework for assessing change, and the member's response to the intervention and/or treatment.

The documentation must include the signature and credentials of the staff providing the service, place of service, date of service, and the actual time spent providing the service by listing the start-and-stop times.

502.17.2 BEHAVIORAL HEALTH COUNSELING, PROFESSIONAL, GROUP

Procedure Code: H0004 HO HQ
Service Unit: 15 minutes
Telehealth: Available
Service Limits: 50 units per year

Payment Limits: Behavioral Health Counseling, Professional, Group sessions are limited in size to a maximum of 12 persons per group session.

Prior Authorization: Refer to Utilization Management Guidelines.

Staff Credentials: Must be performed by a minimum of a Master's level therapist using generally accepted practice of therapies recognized by national accrediting bodies for psychology, psychiatry, counseling, and social work. Alcohol and Drug Counselors (ADCs) are considered to be credentialed to provide Behavioral Health Counseling, Professional, Group, so long as they have a master's degree in a clinical field, but only when directly addressing Substance Abuse treatment issues.

To provide therapy in other treatment areas, the ADCs must be credentialed by the applicable accrediting bodies of their respective professional disciplines. All individuals with an ADC hired after July 1, 2014 must have a Master's Degree. All current individuals employed with an ADC must only address substance abuse treatment issues.

Definition: Behavioral Health Counseling, Professional, Group, is the treatment of behavioral health conditions in which the qualified health care professional through definitive therapeutic communication attempts to alleviate emotional disturbances, reverse or change maladaptive patterns of behavior, and encourages personality growth and development. This process includes ongoing assessment and adjustment of psychotherapeutic interventions. Behavioral Health Counseling, Professional, is a face to face medically necessary service provided to the member in a group setting.

Any therapeutic interventions applied must be performed by a minimum of a Master's level therapist using generally accepted practice of therapies recognized by national accrediting

bodies for psychology, psychiatry, counseling, and social work. Alcohol and Drug Counselors (ADCs) are considered to be credentialed to provide Behavioral Health Counseling, Group, so long as they have a master's degree in a clinical field, but only when directly addressing Substance Abuse treatment issues.

Documentation: Documentation must indicate how often this service is to be provided. There must be an activity note describing each service/activity provided, the relationship of the service/activity to the identified behavioral health treatment needs, and the member's response to the service. If there is a Master Service Plan, the intervention should be reflective of a goal on the Plan. The activity note must include the reason for the service, symptoms and functioning of the member, a therapeutic intervention grounded in a specific and identifiable theoretical base that provides framework for assessing change, and the member's response to the intervention and/or treatment.

The documentation must include the signature and credentials of the staff providing the service, place of service, date of service, and the actual time spent providing the service by listing the start-and-stop times.

502.17.3 BEHAVIORAL HEALTH COUNSELING, SUPPORTIVE, INDIVIDUAL

Procedure Code: H0004
Service Unit: 15 minutes
Telehealth: Available
Service Limits: All units must be prior authorized

Prior Authorization: Refer to Utilization Management Guidelines.

Staff Credentials: All new employees hired as of July 1, 2014, must have a bachelor's degree in an approved human services field (see definition of human services degree). Current employees hired before July 1, 2014, and providing supportive counseling must obtain an approved bachelor's degree by July 1, 2018. Staff must be properly supervised according to BMS policy on clinical supervision. The service may be provided in a variety of settings, by appropriately designated, trained and supervised staff.

Definition: Behavioral Health Counseling, Supportive, Individual is a face-to-face intervention provided to a member receiving coordinated care. It must directly support another Behavioral Health service to meet service definition and medical necessity. The supportive intervention is directly related to the individual's behavioral health condition. The service is intended to promote continued progress toward identified goals and to assist members in their day-to-day behavioral and emotional functioning. Behavioral Health Counseling, Supportive, Individual, is not a professional therapy service, but must supplement another Medicaid service that is addressing the individual's identified behavioral health needs.

This service must be included in the member's service plan. The objectives of the service must be clearly identified, and reviewed at a minimum of each 90 days and at every critical treatment juncture.

Service Description:

Supportive counseling should:

1) Promote application and generalization of age appropriate skills such as problem solving, interpersonal relationships, anger management, relaxation, and emotional control as it impacts daily functioning as related to their behavioral health condition; and/or
2) The interventions will assist the individual as he or she explores newly developing skills as well as identifying barriers to implementing those skills that are related to achieving the objectives listed on the service plan.

Supportive counseling should consistently augment other coordinated care services being provided by the agency and if possible, services being provided to the member by other agencies.

Documentation: There must be an activity note describing each service provided, the relationship of the service to a specific objective(s) in the service plan, the signature and credentials of the staff providing the service, place of service, date of service, and the actual time spent providing the service by listing the start-and-stop times. The activity note should describe the member's response to the supportive intervention including any improvement or exacerbation of symptoms.

502.17.4 BEHAVIORAL HEALTH COUNSELING, SUPPORTIVE, GROUP

Procedure Code: H0004HQ
Service Unit: 15 minutes
Telehealth: Available
Service Limits: All units must be prior authorized

Payment Limits: Behavioral Health Counseling, Supportive, Group sessions are limited in size to a maximum of 12 persons per group session.

Prior Authorization: Refer Utilization Management Guidelines.

Staff Credentials: All new employees hired as of July 1, 2014, must have a bachelor's degree in an approved human services field (see definition of human services degree). Current employees hired before July 1, 2014, and providing supportive counseling must obtain an approved bachelor's degree by July 1, 2018. Staff must be properly supervised according to BMS policy on clinical supervision. The service may be provided in a variety of settings, by appropriately designated, trained and supervised staff.

Definition: Behavioral Health Counseling, Supportive, Group is a face-to-face coordinated care intervention that is directly related to the individual's behavioral health condition. The service is intended to promote continued progress toward identified goals and to assist members in their day-to-day behavioral and emotional functioning. Behavioral Health Counseling, Supportive,

Group, is not a professional therapy service, but must supplement another Medicaid service that is addressing the individual's identified behavioral health needs.

This service must be included in the member's service plan. The objectives of the service must be clearly identified, and reviewed at a minimum of each 90 days and at every critical treatment juncture.

Service Description:

Supportive counseling should:

1.) Promote application and generalization of age appropriate skills such as problem solving, interpersonal relationships, anger management, relaxation, and emotional control as it impacts daily functioning as related to their behavioral health condition; and/or

2.) The interventions will assist the individual as he or she explores newly developing skills as well as identifying barriers to implementing those skills that are related to achieving the objectives listed on the service plan.

Supportive counseling should consistently augment other coordinated care services being provided by the agency and if possible, services being provided to the member by other agencies.

Documentation: There must be an activity note describing each service provided, the relationship of the service to a specific objective(s) in the service plan, the signature and credentials of the staff providing the service, place of service, date of service, and the actual time spent providing the service by listing the start-and-stop times. The activity note should describe the member's response to the supportive intervention including any improvement or exacerbation of symptoms.

502.18 GENERAL MEDICATION SERVICES

General medication services assist a Medicaid member in accessing behavioral medication or medication services. (Methadone administration or case management is not covered.)

502.18.1 COMPREHENSIVE MEDICATION SERVICES: MENTAL HEALTH

Procedure Code: H2010
Service Unit: 15 minutes
Telehealth: Available
Service Limits: All units must be prior authorized

Payment Limits: This service includes all physician and nurse oversight; therefore, neither Community Psychiatric Support Treatment (procedure code H0036), Pharmacologic Management (E&M Codes), nor any other physician code can be billed on the same day as Comprehensive Medication Services; Mental Health.

Prior Authorization: Refer to Utilization Management Guidelines.

Staff Credentials: Physician or Physician Extender

Definition: Comprehensive Medication Services; Mental Health is utilized for Clozaril Case Management or other scheduled, face-to-face assessment of medication compliance or efficacy. These services include obtaining the sample for necessary blood work and the laboratory results for a member by a registered nurse and subsequent evaluation of the results by the physician and/or physician extender as necessary for the medical management of the drug Clozaril/Clozapine or other psychotropic medications which require consistent and intensive monitoring. This is a physician directed service, a physician or physician extender must be on site and available for direct service as needed. Members may be served individually or by a group/clinic model. Methadone is **not** a covered medication.

Members receiving this service are not precluded from receiving other Behavioral Health Clinic Services on the same day (except for those indicated in this service's definition or "Payment Limits") as long as the actual time frames do not overlap.

Documentation: Documentation must contain a written note of the assessment results as completed by the registered nurse, and other laboratory results, and current psychotropic medication dosage with authorized pharmacy name. The documentation must include: place of service, start/stop time and date of service, and signature of qualified staff providing the service.

502.18.2 NON-METHADONE MEDICATION ASSISTED TREATMENT

Non-Methadone Medication Assisted Treatment Guidelines:

West Virginia Medicaid covers non-Methadone Medication Assisted Treatment Services under the following circumstances:

- Individuals seeking opioid addiction treatment for Suboxone®/Subutex® or Vivitrol® for the treatment of opioid/alcohol dependence must be evaluated by an enrolled physician as specified below, before beginning medication assisted treatment.
- An initial evaluation may be completed by a staff member other than the physician however no medication may be prescribed until the physician has completed their evaluation.
- Members seeking treatment must have an appropriate diagnosis for the medication utilized.
- All physicians agree to adhere to the Coordination of Care Agreement (*See Attachment A in Appendix*) which will be signed by the member, the treating physician and the treating therapist.
- Each member receiving non-methadone medication assisted treatment must also be involved in individual therapy and/or group therapy as specified in the Coordination of Care Agreement.
- If a change of physician or therapist takes place, a new agreement must be signed. This agreement must be placed in the member's record and updated annually.

- The agreement is not required if the member is receiving services at an agency where both the physician and therapist are employed.

Physician Requirements: The physician responsible for prescribing and monitoring the member's treatment must have a degree as a Medical Doctor and/or Doctor of Osteopathic Medicine. Must be licensed and in good standing in the state of West Virginia. Requirements for the Drug Addiction Treatment Act of 2000 (DATA 2000) must be met by the physician unless indicated by Substance Abuse Mental Health Services Administration (SAMHSA). The physician must be an enrolled WV Medicaid provider.

Therapy Services: Therapy for Non-Methadone Assisted Treatment Patients is the treatment of behavioral health conditions in which the qualified health care professional through definitive therapeutic communication attempts to alleviate emotional disturbances, reverse or change maladaptive patterns of behavior, and encourage personality growth and development. This process includes ongoing assessment and adjustment of psychotherapeutic interventions and may include involvement of family members or others in the treatment process. Behavioral Health Counseling, Professional, is a face to face medically necessary service provided to the member and/or family member however the member must be present for some or all of the service **(See Program Guidelines for Professional Therapy Requirements).**

Any therapeutic intervention applied must be performed by a minimum of a Master's Level Therapist using the generally accepted practice of therapies recognized by national accrediting bodies of:

- Psychology plus possessing 2 years documented experience in the substance abuse field or an Alcohol Drug Counselor (ADC) or higher level accreditation in addictions,
- Psychiatry plus possessing 2 years documented experience in the substance abuse field or an Alcohol Drug Counselor (ADC) or higher level accreditation in addictions,
- Counseling plus possessing 2 years documented experience in the substance abuse field or an Alcohol Drug Counselor (ADC) or higher level accreditation in addictions,
- Social work plus possessing 2 years documented experience in the substance abuse field or an Alcohol Drug Counselor (ADC) or higher level accreditation in addictions

Physician and Professional Therapy services will be provided for individuals utilizing Buprenorphine®, Suboxone® strips or Vivitrol®. Agencies should be aware that West Virginia law forbids the use of Buprenorphine/Naltrexone in tablet form for the treatment of substance use disorders.

Documentation: Documentation for a coordinated care member must include a Master Service Plan that includes individual therapeutic interventions. The plan must also include a schedule detailing the frequency for which therapy services are to be provided.

A member receiving focused care (Physician and Professional Therapy only) will require a treatment strategy in lieu of a Master Service Plan.

The documentation must include the signature and credentials of the staff providing the service, place of service, date of service, and the objectives utilizing individual therapeutic interventions. The activity note must include the reason for the service, symptoms and functioning of the member, a therapeutic intervention grounded in a specific and identifiable theoretical base that provides framework for assessing change, and the member's response to the intervention and/or treatment.

Program Guidelines:

Note: These are the minimum requirements that are set forth in this manual. Physicians and/or agencies may have more stringent guidelines set forth in their internal policy.

Phase 1: Members in phase 1 (less than 12 months of compliance with treatment) will attend a **minimum** of four (4) hours of professional therapeutic services per month. The four hours must contain a **minimum** of one (1) hour individual professional therapy session per month. Frequency of therapeutic services may increase based upon medical necessity.

Phase 2: Members in phase 2 (12 months or more of compliance with treatment) will attend a minimum of (1) hour of professional therapeutic services per month individual, family, or group. Frequency of therapeutic services may increase based upon medical necessity.

Drug Screens: A minimum of two (2) random urine drug screens per month are required for members in phase 1. A minimum of one (1) random urine drug screen per month is required for members in phase 2. A record of the results of these screens must be maintained in the member's record. The drug screen must test for, at a minimum, the following substances:

- Opiates
- Oxycodone
- Methadone
- Buprenorphine
- Benzodiazepines
- Cocaine
- Amphetamine
- Methamphetamine

Instructions for non-compliance with treatment:
Non-compliance is defined as failure of a drug screen or failure to meet the monthly requirement of therapeutic services.

Members in phase 1 must demonstrate increased treatment frequency after two instances of non-compliance such as: two failed drug screens, two months of not meeting therapeutic requirements, or a combination of one failed drug screen and one month of failed therapeutic requirements. If increase in treatment frequency is not demonstrated consistently within seven days, the patient may be terminated from the program at the physician's discretion. The physician and/or treatment program has the option to allow the patient to reapply to the program

after 30 days with proven participation in professional therapies. With three violations within six months, the physician will terminate the individual from the program. The program has the option to allow the patient to reapply after 30 days during which time the patient must demonstrate compliance with professional therapies. An exception is made for pregnant women at physician discretion.

Members in phase 2 will be returned to phase 1 of treatment after one instance of non-compliance (see Phase 1 required timelines).

Individuals discharged for non-compliance and ineligible for re-start must receive information describing alternative methods of treatment and listing contact information for alternative treatment providers as appropriate.

Titration Policy: Titration due to non-compliance is per Physician order when the Medicaid Member is found to be non-compliant during treatment. Titration must be completed within four (4) weeks of the physicians order to stop medication assisted treatment. Vivitrol will be discontinued immediately due to non-compliance.

Any physician that prescribes medication under the Non-Methadone Medication Assistance Treatment must have a plan in place for when they are unavailable to address any medical issues or medication situations that should arise. The Physician must work with another physician that has a DEA-X. The physician taking responsibility for prescribing and monitoring the member's treatment while the primary physician is unavailable must have a degree as a Medical Doctor and/or Doctor of Osteopathic Medicine. Must be licensed, board certified and in good standing in the state of West Virginia. Requirements for the Drug Addiction Treatment Act of 2000 (DATA 2000) must be met by the physician unless indicated by Substance Abuse Mental Health Services Administration (SAMHSA). The physician must be an enrolled WV Medicaid provider so that treatment is not interrupted for any reason for Medicaid Members participating in this service. If a physician fails to have a plan in place **a hold will be placed on all Rx authorizations**. At no time is a Nurse Practitioner or a Physician's Assistant to prescribe Suboxone®.

502.19 COMPREHENSIVE PROGRAMS OF SERVICES

Comprehensive services are all-inclusive and may have only a few services which can be billed separately.

502.19.1 DAY TREATMENT

Procedure Code: H2012
Service Unit: 60 minutes
Telehealth: Not Available
Service Limits: All units must be prior authorized

Payment Limits: Day Treatment services are all-inclusive. This service cannot be billed concurrently with any other Behavioral Health Clinic Service.

Prior Authorization: Refer to Utilization Management Guidelines.

Definition: Behavioral Health Clinic Day Treatment is a program only for Medicaid members with Intellectually/Developmentally Disabled (I/DD) diagnoses. It is a structured program of skill building instruction and supervision designed to assist members in achieving greater independence (and/or employment**)** in activities of daily living. The programming must be in accordance with each member's needs and interests as reflected in his/her Master Service Plan.

Programs are to include positive behavior support interventions that assist members in reducing challenging behaviors and replacing them with socially valuable, adaptive behaviors and skills. If specific written programs for either skill building or behavior reduction are implemented that require one-to-one staff to member ratio, Therapeutic Behavioral Services – Implementation (procedure code H2019) would be utilized in lieu of Day Treatment.

Day Treatment Services for adults have a maximum staff-to-member ratio of one staff person per five members. They must be available for five days a week for a minimum of four hours each day.

For children under age five, the maximum ratio is one staff per four children. Day Treatment Services for children under the age of five must not be utilized to provide therapeutic activities for more than four hours per day and no more than four days per week.

Day Treatment Services must only be provided at a site listed on the provider's behavioral health clinic provider license. **Activities provided for the purpose of leisure or recreations are not billable services.**

Day Treatment Services include activities occurring in a therapeutic environment designed to increase the members' skills in specific areas. These activities may consist of small group activities using training modules or structured developmental exercises which present the opportunities for members to practice and use developing skills, or participate in member meetings designed to develop social skills. The intensity, frequency, and type of Day Treatment activities must be appropriate to the age and functional level of the member.

Progress on all objectives must be reviewed at 90 day intervals. Any objective that results in no progress after two consecutive 90 day intervals must be discontinued or modified. Areas of intervention may include but are not limited to the following:

- Self-care skills
- Emergency skills
- Mobility skills
- Nutritional skills
- Social skills
- Communication and speech instruction
- Carryover of physical and/or occupational therapy
- Interpersonal skills instruction

- Functional community skills (such as recognizing emergency and other public signs, money management skills, travel training, etc.)
- Volunteering in community service settings
- Citizenship, rights and responsibilities, self-advocacy, etc.
- Other services necessary for a member to participate in the community settings of his/her choice

Program Staff Requirements:

- The Day Treatment program supervisor must meet one of the educational criteria along with the training and experience criteria listed below:
  - Education Criteria (one of the educational criteria must be met):
    - Licensed Psychologist (or Masters level psychologist under supervision for licensure)
    - Licensed Professional Counselor
    - Licensed Certified Social Worker
    - Licensed Social Worker with a minimum of a Bachelor's degree
    - Registered Nurse
    - Masters or Bachelor's level in education with a specialization to a disability group and teaching certification
    - Occupational/recreational or physical therapist with appropriate state certification and licensure
    - Certified Addiction Counselor with minimum of a bachelor degree
    - Master's degree in a human services field with 20 hours verified of training specific to the target population served
    - Bachelor's level degree in a human services field with at least one year of specific experience providing services to individuals with mental retardation and/or developmental disabilities under the supervision of a qualified staff person
  - Training Criteria
    - Each qualified staff person must have verified training, experience, and skills specific to the targeted population served by the Day Treatment Program
  - Experience Criteria
    - All Bachelor level staff are required to obtain 15 hours every two years of continued education relevant to the targeted population served or the provision of Day Treatment Services

- Staff with a Bachelor's degree in a human service field that does not specifically provide training in developmental disabilities services must meet one of the three following criteria:
  - Completion of specific courses relating to developmental disabilities
  - Completion of staff development in-service or classes relating to developmental disabilities

- Completion of 15 hours every two years of continuing education relating to developmental disabilities.

- Paraprofessional staff must have, at a minimum, the following qualifications:
  - Be at least 18 years old
  - A high school diploma or Graduate Equivalent Degree
  - Be currently certified in Standard First Aid and Adult/Child Cardiopulmonary Resuscitation
  - Successfully completed Behavioral Health agency training in all of the following criteria:
    - Various aspects of developmental disabilities
    - Instructional techniques necessary to achieve objectives of individual's program plans
    - Health related issues
    - Recognition of abuse and neglect
    - Individuals' rights and confidentiality
    - Awareness of, and sensitivity to, family and individual's needs
    - Non-aversive behavior intervention techniques for those providers who are implementing behavior support and intervention plans

The Behavioral Health Clinic must maintain documentation of training and qualifications.

Documentation:

- Documentation must contain a daily summary of Day Treatment Services that includes the total time in attendance at the Day Treatment Program by listing the start and stop times of each member's attendance, the place of service, and a summary of the member's participation in the services. The attending staff must sign, list their credentials, and date this summary. This documentation is not required to be stored in the main clinical record, but must be maintained and be available for review.
- Documentation must also include an activity note that describes each separate service/activity provided and the relationship of the service to objectives in the service plan. This includes the signature of staff providing the service along with their credentials, place of service, date of service, and actual time spent providing the service by listing the start and stop times. **Note: All treatment objectives provided in the Day Treatment Program must be included on the member's Master Service Plan (or 90 day update).**
- There must be a daily attendance roster listing those members and staff who participate in each ratio. The roster must be signed (with credential initials) and dated by staff that provided the service. This daily attendance roster must not be stored in the main clinical record, but must be maintained and be available for review.
- There must be monthly notes that summarize progress on the objectives specified in the individual member's service plan or Day Treatment Plan. This documentation must be reviewed at 90 day intervals. The review summaries must be placed in the member's master clinical record. Any objective that results in no progress or desired changes after two consecutive 90 day periods must be discontinued or modified.

Day Treatment Program Certification Process:

Behavioral Health Clinic providers must obtain approval from BMS to provide Day Treatment Services and to bill the West Virginia Medicaid Program for such services. Providers must complete and send the Day Treatment Program Certification form to BMS.

Any changes from an approved original certification must be submitted with corresponding rationale for the changes. A Day Treatment Program must recertify every 2 years. This submission must include a summary of utilization information for the 2 years. Specific content is listed on the Application for Day Treatment Program Certification used by BMS.

502.20 CRISIS SERVICES

Crisis services must be provided at a location licensed to the clinic.

502.20.1 CRISIS INTERVENTION

Procedure Code: H2011
Service Unit: 15 minutes- 16 units per 30 days
Telehealth: Not Available
Service Limits: Refer to Utilization Management Guidelines.

Prior Authorization: Refer to Utilization Management Guidelines

Staff Credentials: Specific documented training on crisis intervention

Definition: Crisis Intervention is an unscheduled, direct, face-to-face intervention with a member in need of psychiatric interventions in order to resolve a crisis related to acute or severe psychiatric signs and symptoms. Depending on the specific type of crisis, an array of treatment modalities is available. These include, but are not limited to, individual intervention and/or family intervention. The goal of crisis intervention is to respond immediately, assess the situation, stabilize and create a plan as quickly as possible. This service is not intended for use as an emergency response to situations such as members running out of medication or housing problems. Any such activities will be considered inappropriate for billing of this service by the provider.

Documentation: Documentation must contain an activity note containing a summary of events leading up to the crisis, the therapeutic intervention used, and the outcome of the service. The activity note must include the signature and credentials of the staff providing the intervention, place of service, date of service, and the actual time spent providing the service by listing the start-and-stop times.

A physician, physician extender, supervised psychologist or licensed psychologist must review all pertinent documentation within 72 hours of the conclusion of the crisis and document their findings. The note documenting this review must include recommendations regarding appropriate follow up and whether the treatment plan is to be modified or maintained, the signature and credentials of the physician, physician extender, supervised psychologist or licensed psychologist and the date of service. The signature will serve as the order to perform

the service. If a supervised psychologist is utilized to provide approval for this service, the supervised psychologist must have completed an appropriate training in crisis intervention and systematic de-escalation.

Providers must maintain a permanent clinical record for all members of this service in a manner consistent with applicable licensing regulations.

Exclusions

Listed below are activities that are excluded from being performed through the Crisis Intervention Service Code

- Response to a Domestic Violence Situation
- Admission to a Hospital
- Admission to a Crisis Stabilization Unit
- Time awaiting for Transportation or the transportation itself
- Removal of a minor or an incapacitated adult from an abusive or neglectful household.
- Completion of certification for involuntary commitment.

502.20.2 COMMUNITY PSYCHIATRIC SUPPORTIVE TREATMENT

Procedure Code: H0036
Service Unit: 15 minutes
Telehealth: Available – for medical services provided by a physician or physician extender only. Daily face to face meeting with physician must be in person
Service Limits: 288 units per six months

Payment Limits: No payment will be made for any other Behavioral Health Clinic Services, except for Targeted Case Management (procedure code T1017). Billing for Community Psychiatric Supportive Treatment cannot exceed 48 units in a 24 hour period (midnight to midnight) and must be utilized on consecutive days.

Prior Authorization: Refer to Utilization Management Guidelines.

Definition: Community Psychiatric Supportive Treatment is an organized program of services designed to stabilize the conditions of a person immediately following a crisis episode. An episode is defined as the brief time period of days in which a person exhibits acute or severe psychiatric signs and symptoms. (If a Medicaid member experiences more than one crisis, each crisis is considered a separate crisis episode). This physician driven service is intended for persons whose condition can be stabilized with short-term, intensive services immediately following a crisis without the need for a hospital setting and who, given appropriate supportive care, can be maintained in the community.

Due to the comprehensive nature of this service, no other services (other than Targeted Case Management) may be reimbursed when Community Psychiatric Supportive Treatment is on-

going. These services are not intended for use as an emergency response to situations such as members running out of medication, or loss of housing. Any such activities will be considered as non-reimbursable activities. Since this service is intended to address an episode, it must be rendered on consecutive days of service. Community Psychiatric Supportive Treatment cannot be rendered on alternate days such as Tuesday and Thursday or only on Mondays, Wednesdays, and Fridays; with other days of non-service (such as holidays or weekends) or other intervening services interrupting the episode. Community Psychiatric Supportive Treatment is an acute and short-term service.

Community Psychiatric Supportive Treatment Programs must be available seven days a week to anyone who meets the admission criteria. Availability may include mornings, afternoons, evenings, etc. There must be a minimum of two staff present onsite at all times Community Psychiatric Supportive Treatment is provided, One staff must have at least high school degree or equivalency, trained in systematic de-escalation, and must have training related to the targeted population being treated (i.e. substance abuse, mental health). The other staff must have an LPN or higher degree in the medical field (See Definitions for further clarifications). Additional staff must be added as necessary to meet the needs of increased utilization and/or increased level of need. Staffing must be sufficient to assure that each member receives appropriate individual attention, as well as assure the safety and welfare of all members.

The program must have access to a psychiatrist/physician to provide psychiatric evaluations, medication orders at all times.

Much of the structured, staff-directed activity or face-to-face activity which has been documented in an activity note can be considered billable time. Some examples of billable versus non-billable time are as follows:

- Billable activities:

  - Structured, staff-directed activities such as therapies and counseling
  - Time spent by staff in the process of interviewing/assessing members whether for social history, discharge planning, psychological reports, etc.
  - Time spent in treatment team meetings or staff consultation
  - Time spent by staff monitoring one member when specifically ordered by the physician/psychiatrist for reasons of clinical necessity (The physician/psychiatrist's order must state the frequency and duration of the time to be spent monitoring.)
  - Routine observation/monitoring by staff ordered by physician/psychiatrist limited to 10 minutes per hour (can include member's sleep, meal, grooming time). Routine observation time cannot exceed two hours per day. The physician must document the need for the observation as related to the Medicaid Member's qualifying behavioral health condition/crisis episode.

- Non-billable activities:

  - Activity which is recreation or leisure in nature, such as basketball, exercise, reading

newspaper, watching television and or videos

- Social activity such as talking with other members, visiting with family members or significant others, releasing the member from the program on pass
- Time in which the member is sleeping, eating, grooming (except as outlined above).

The following elements are required components of Community Psychiatric Supportive Treatment:

- Comprehensive Psychiatric Evaluation at intake to contain documentation of:
  A. Reason for admission/presenting problems: Purpose of evaluation is to assess symptoms in order to determine need for crisis stabilization services, determine need for changes to medication regimen, and develops an initial plan of care as appropriate.
  B. Presenting problems/reason for the evaluation including list of any collateral interviews conducted
  C. History and description of present illness
  D. Past psychiatric history including description of any past suicidal or homicidal behavior or threats
  E. History of alcohol and other substance use including longest period of sobriety, history of prior treatment attempts, and medical risks associated with detoxification as appropriate
  F. General medical history including list of current medications, current medical providers, and past treatment attempts (may be completed by ancillary staff person)
  G. Developmental, psychosocial and sociocultural history
  H. Occupational and military history (may be completed by ancillary staff person)
  I. Legal history (may be completed by ancillary staff person)
  J. Family history (may be completed by ancillary staff person)
  K. Review of systems (sleep, appetite, pain levels, other systems directly linked to the patient's psychiatric symptoms)
  L. Focused Physical examination including appearance and vital signs, musculoskeletal review of gait and station and description of any specific physical anomalies and allergies
  M. Mental status examination including assessment of insight, judgment, and general cognitive functioning
  N. Assessment of daily functionality and ADLs (may be completed by ancillary staff person)
  O. Diagnostic conclusions and prognosis
  P. Treatment recommendations including clear statement of justification for recommendation for admission to CSU and reasoning for elimination of lesser level of care.
- Daily psychiatric review and examination
- On going psychotropic medication evaluation and administration
- Intensive one-on-one supervision, when ordered by a physician/psychiatrist
- Individual and small group problem solving/support as needed
- Therapeutic activities consistent with the member's readiness, capacities, and the service plan

- Disability-specific interdisciplinary team evaluation and service planning before discharge from Community Psychiatric Supportive Treatment. Discharge service planning must include consideration of the antecedent condition that led to admission to Community Psychiatric Supportive Treatment.
- Psychological/functional evaluations specific to the disability population where appropriate and;
- Family intervention must be made available to the families of members as appropriate Community Psychiatric Supportive Treatment must be provided at a site licensed by WVDHHR for the delivery of Behavioral Health Clinic Services.

ADMISSION AND CONTINUED STAY CRITERIA:

The criteria for prior authorization to for Community Psychiatric Supportive Treatment Services are organized around three primary areas that determine the need for this service:

- Acute Psychiatric signs and symptoms
- Danger to self/others
- Medication management/active drug or alcohol withdrawal

Additionally, criteria for continued stay have been devised so that those members who exceed the service limit but still require Community Psychiatric Supportive Treatment Services can be authorized to continue services.

To receive or continue to receive Community Psychiatric Supportive Treatment Services, the following corresponding criteria must be satisfied.

- **PSYCHIATRIC SIGNS AND SYMPTOMS**

  Admission Criteria (Both criterions must be met)

  – The member is experiencing a crisis due to a mental health condition or impairment in functioning due to acute psychiatric signs and symptoms. The member may be displaying behaviors and/or impairments ranging from impaired abilities in the daily living skills domains to severe disturbances in conduct and emotions. The crisis results in emotional and/or behavioral instability that may be exacerbated by family dysfunction, transient situational disturbance, physical or emotional abuse, failed placement, or other current living situation;

  – The member is in need of a structured, intensive intervention because less restrictive services alone are not adequate or appropriate to resolve the current crisis and meet the member's needs based on the documented response to prior treatment and/or interventions.

Continued Stay Criteria (One of the three criterions must be met)

- The acute psychiatric signs and symptoms and/or behaviors that necessitated the admission persist at the level documented at admission and the treatments and interventions tried are documented. A modified care plan must be developed which documents treatment methods and projected discharge date based on the change in the care plan.
- New symptoms and/or maladaptive behaviors have appeared which have been incorporated into the care plan and modified the discharge date of the member. These new acute psychiatric symptoms and/or maladaptive behaviors can be treated safely in the Community Psychiatric Supportive Treatment setting, and a less intensive level of care would not adequately meet the member's needs.
- Member progress toward crisis resolution and progress clearly and directly related to resolving the factors that warranted admission to Community Psychiatric Supportive Treatment have been observed and documented, but symptoms and impairments continue to warrant this level of care.

- **DANGER TO SELF/OTHERS**

Admission Criteria

- The member is in need of an intensive treatment intervention to prevent hospitalization (e.g. the member engages in self-injurious behavior but not at a level of severity that would require inpatient care, the member is currently physically aggressive and communicates verbal threats, but not at a level that would require hospitalization).

Continued Care Criteria (One of the three criterions must be met)

- Member progress toward crisis resolution and progress clearly and directly related to resolving the factors that warranted admission to Community Psychiatric Supportive Treatment have been observed and documented, but symptoms and impairments continue to warrant this level of care
- It has been documented that the member has made no progress toward treatment goals nor has progress been made toward alternative placement (less restrictive or more restrictive care), but the care plan has been modified to introduce further evaluation of the member's needs and other appropriate interventions and treatment options.
- New symptoms and/or maladaptive behaviors have appeared which have been incorporated into the care plan and modified the discharge date of the member. These new symptoms and/or maladaptive behaviors may be treated safely in the Community Psychiatric Supportive Treatment setting and, a less intensive level of care would not adequately meet the member's needs.

- **MEDICATION MANAGEMENT/ACTIVE DRUG OR ALCOHOL WITHDRAWAL**

Admission Criteria (Either criterion must be met)

- The member is in need of a medication regimen that requires intensive monitoring/medical supervision or is being evaluated for a medication regimen that requires titration to reach optimum therapeutic effect.
- There is evidence that the member is using drugs that have produced a physical dependency as evidenced by clinically significant withdrawal symptoms which require medical supervision.

Continued Stay Criteria (One of the three criterions must be met)

- Member progress toward crisis resolution and progress clearly and directly related to resolving the factors that warranted admission to Community Psychiatric Supportive Treatment have been observed and documented, but symptoms and impairments continue to warrant this level of care
- It has been documented that the member has made no progress toward treatment goals nor has progress been made toward alternative placement (less restrictive or more restrictive care), but the care plan has been modified to introduce further evaluation of the member's needs and other appropriate interventions and treatment options.
- New symptoms and/or maladaptive behaviors have appeared which have been incorporated into the care plan and modified the discharge date of the member. These new symptoms and/or maladaptive behaviors can be treated safely in the Community Psychiatric Supportive Treatment setting, and a less intensive level of care would not adequately meet the member's needs.

- **DOCUMENTATION**

  There must be a permanent clinical record consistent with licensing regulations and agency records/policies for each member-provided Psychiatric Supportive Treatment Service. Items to be included in the clinical record are written orders (for each crisis episode) from the physician/psychiatrist for the Community Psychiatric Supportive Treatment Program, medication orders for each member as indicated, medication administration records when medications are administered, and the member's individualized service plan. See below for Documentation Requirements.

Daily Documentation criteria:

- Number of treatment hours per day
- Summary of the member's status – need for continued CSU
- Member's Service participation
- Symptoms related to the crisis that are being addressed
- If admitted for detox; vitals and use of nationally recognized withdrawal protocol
- Services Provided:

Individual Therapy – notes at a minimum need to contain:

- Addressed specifics of admission criteria to substantiate appropriate level of care
- Substantiation of daily/appropriate treatment services
- Intervention
- Relate back to treatment plan
- Member's response

Group Therapy – notes at a minimum need to contain:

- Addresses specifics of admission criteria to substantiate appropriate level of care
- Substantiation of daily/appropriate treatment services
- Intervention
- Relate back to treatment plan
- Member's response

Family Therapy: notes at a minimum need to contain:

- Addresses specifics of admission criteria to substantiate appropriate level of care.
- Substantiation of daily/appropriate treatment services.
- Intervention
- Relate back to treatment plan.
- Member's response.

Individual Supportive Counseling: notes at a minimum need to contain:

- Addresses specifics of admission criteria to substantiate appropriate level of care.
- Substantiation of daily/appropriate treatment services.
- Intervention
- Relate back to treatment plan.
- Member's response.

Group Supportive Counseling: notes at a minimum need to contain:

- Addresses specifics of admission criteria to substantiate appropriate level of care.
- Substantiation of daily/appropriate treatment services.
- Intervention

- Relate back to treatment plan.
- Member's response.

502.21 BEHAVIOR MANAGEMENT SERVICES

Behavior Management Services are to address the symptoms of the diagnosed behavioral health condition that are negatively impacting the members functioning. These services arise in relation to areas of need identified on the member's service plan. Behavior Management is a time-limited service that must end when the desired outcomes have been achieved (i.e., targeted behaviors have been acquired or eliminated).

502.21.1 THERAPEUTIC BEHAVIORAL SERVICES – DEVELOPMENT

Procedure Code: H2019HO
Service Unit: 15 minutes
Service Limits: All units must be prior authorized
Prior Authorization: Refer to Utilization Management Guidelines.

Staff Credentials: The Behavior Management Specialist must be an individual with a minimum education at the Master's level in psychology, psychiatry, education, social work or counseling This individual's training must have include successful completion of course work or training in the techniques of applied behavior analysis. The Behavior Management Specialist is responsible for all aspects of Behavior Management Services provided by Behavior Management Assistants and must sign all documentation of those services.

The Behavior Management Assistant must be an individual with a minimum education of a bachelor's degree in a human services field **(See definitions for complete listing)** who has been certified by the agency as having training specific to behavior management which is consistent with techniques of applied behavior analysis. Behavior Management Services provided by Behavior Management Assistants are subject to review and approval by the Behavior Management Specialist. A copy of the provider's training program for its Behavioral Health Assistant staff must be retained and filed by the provider. (The Behavior Management Assistant must use the HO modifier when providing Therapeutic Behavioral Services – Development, procedure code H2019HO, since their documentation must be reviewed and signed by the Behavior Management Specialist. Otherwise, the wrong service, Therapeutic Behavioral Services – Implementation, procedure code H2019, would be billed).

Definition: Therapeutic Behavioral Services - Development includes four major components:

- Behavior Assessment
- Plan Development
- Implementation Training
- Data Analysis and Review of the Behavior Management Plan once implementation has begun.

Management services (detailed under procedure code H2019).

Behavior Assessment Component

Behavior Assessment is a process of observation, data collection, behavior and skill assessments, and functional analysis that describes behaviors and the circumstances under which they occur. Prior to the development of the Behavior Management Plan, behavior assessment activities must culminate in the identification of target behavior(s) (those behaviors which the plan proposes to increase, decrease, shape, or eliminate). The target behaviors must be described in specific terms, and they must be stated in terms of an objective, quantifiable measurement. The target behaviors must address symptoms of the diagnosed behavioral health condition that negatively impacts the member's overall functioning. Baseline data (quantified measurements which describe the scope, frequency and duration of the targeted behaviors) must be collected on each target behavior. Baseline data are then reviewed to determine if the data justifies or supports the development of a Behavior Management Plan.

Following implementation of the Behavior Management Plan, behavior assessment must occur to determine objectively whether to continue, modify, or terminate the plan.

Plan Development Component

Plan Development refers to those activities required for the formal development of a Behavior Management Plan. It should be noted that a formal plan is developed only if objective baseline data supports and demonstrates the need for such a plan. A Behavior Management Plan for which there is no documentation of behavior management implementation activity must be considered invalid for billing purposes except for those activities related to assessment where a decision was made based on assessment data that it was not appropriate to proceed.

In those instances when baseline data indicate an occurrence of the target behavior(s) at a frequency or duration not sufficient to warrant the development of a complete Behavior Management Plan and its implementation training and on-going data analysis and review, the Behavior Management Specialist or the Behavior Management Assistant may develop a **Behavior Protocol**. A Behavior Protocol is a document that describes a consistent response(s) upon the occurrence/reoccurrence of the target behavior(s) as a means to maintain the rate of behavior(s) at a low rate. No more than two units of Therapeutic Behavioral Services – Development (H2019HO) may be billed for the development of the Behavior Protocol**.** Following the development of a Behavior Protocol, no further Therapeutic Behavioral Services billing must occur unless a new problem behavior is discovered. If this occurs, behavior assessment on the new behavior must follow, and the process should start anew.

When a Behavior Management Plan has achieved the criteria for success (the objective, quantified amount of behavior change has been maintained for the time period specified in the plan), the Behavior Management Specialist or the Behavior Management Assistant must develop a **Behavior Management Maintenance Plan**. A Behavior Management Maintenance Plan is a document that describes a consistent response(s) to the target behavior(s) as a means Therapeutic Behavioral Services - Implementation is an integral component of Behavior to maintain target level performance. No more than four units of Therapeutic Behavioral Services – Development (H2019HO) may be billed for the development of the Behavior Management

Maintenance Plan. Following the implementation of the Behavior Management Maintenance Plan (which is not to exceed 90 days), the Behavior Management Specialist or the Behavior Management Assistant may conduct data analysis and review on no more than three occasions (a maximum of one unit each occasion) to assure that behavior levels are maintained.

Implementation Training Component

Implementation training is the process by which the Behavior Management Specialist or the Behavior Management Assistant provides the rationale for the plan, defines the behavior(s) that are targeted for change and instructs the individual(s) responsible in the specific steps necessary for implementation of the plan. All individuals who will be involved in providing Therapeutic Behavioral Services – Implementation (procedure code H2019) must receive implementation training prior to implementation of the plan. This includes agency employees and/or significant others (e.g., parents, teachers, foster care providers, etc.).

Data Analysis and Review Component

Data Analysis and Review is the process by which the Behavior Management Specialist or the Behavior Management Assistant evaluates plan effectiveness. Plan effectiveness is determined through a comparison of the baseline data for the target behavior(s) with objective, quantified implementation data to determine whether the plan is leading to achievement of the criteria for success. Any necessary direct observation of member ***behavior*** is included in this category. This analysis and review result in the determination of continuation, modification, or termination of the Behavior Management Plan.

Documentation Requirements:

There are four types of Therapeutic Behavioral Services - Development documentation:

- Activity notes
- Behavior Management Plan
- Behavior Protocol
- Behavior Management Maintenance Plan.

Standard Activity Notes Documentation Requirements

Activity Notes identify the specific component of Therapeutic Behavioral Services - Development (i.e., Behavior Assessment, Plan Development, Implementation Training, Data Analysis and Review) that was performed, place of service, date of service, the amount of time spent by listing the start-and-stop times, and the signature (with credential initials) of the staff person who provided the service.

Behavior Assessment documentation must be present prior to the development of the Behavior Management Plan In addition to the standard activity notes documentation requirements, behavior assessment documentation must reflect that the following activities have occurred in this order.

- Identification of the target behavior(s).

- Specific description of each target behavior in terms capable of objective, quantified measurement.
- Collection of baseline data on each target behavior to obtain an objective, quantifiable determination of its occurrence/nonoccurrence.
- Review and analysis of baseline data to determine objectively if a need for further Behavior Management Services exists.

Following implementation of the Behavior Management Plan, **Behavior Assessment** documentation must include (in addition to the standard activity notes documentation requirements) rationale for such assessment, which may take one of two forms. These are:

- Identification of a new target behavior. Should this occur, behavior assessment must meet the requirements identified in the above listed additional requirements for behavior assessment documentation to provide objective documentation of the need to modify the plan.

Objective determination through data analysis and review that the plan is not effective. If this occurs, behavior assessment must be conducted to determine if the plan is being implemented correctly. If implementation is not occurring correctly, implementation training must reoccur. If the plan is being implemented correctly, further data-based assessment to determine whether to modify the plan will occur. Documentation for the latter must reflect the specific components of the plan addressed and modified to obtain the desired behavior change.

Activity notes documenting **Plan Development** must include the specific components of the plan itself that were developed in addition to the standard activity notes documentation requirements.

Activity notes for **Implementation Training** must document the training of implementation staff (and/or unpaid support staff) as defined by the plan, the definitions of the behavior(s) targeted for change, and the specific steps necessary for implementation of the plan. It must also include the standard activity notes documentation requirements.

Activity notes for **Data Analysis and Review** must document a measured amount of each target behavior, a comparison of that amount to a previously documented amount and, based on that measured amount, a determination of continuation, modification, or termination of the plan. It must also include the standard activity notes documentation requirements.

Behavior Management Plan Documentation Requirements

The second type of documentation is a separate, freestanding document labeled **Behavior Management Plan.** The Behavior Management Plan must contain, at a minimum, the following components within the body of the plan itself, regardless of their presence anywhere else in the member's record.

- The Name and Agency Identification Number of the member for whom the plan has been developed
- Implementation Date - the date the plan is implemented

- Target Behaviors/Specific Descriptions.
- Baseline data including the actual dates the baseline data was collected.
- The criteria for success – (A generic statement such as "The member will obey the rules more frequently" is not acceptable, as it does not state a quantified amount that can be compared to baseline data).
- Methods of Behavioral Intervention includes the following:
  - Method - A description of the behavioral intervention that implementation staff (and/or unpaid support staff) will employ given the occurrence/nonoccurrence of the target behavior(s).
  - Method and Schedule of Reinforcement - The method statement must specify and describe the method of reinforcement, the type of re-enforcers to be used, when the re-enforcers will be provided (i.e., the schedule of reinforcement), by whom, and whether re-enforcers are delivered upon occurrence/reoccurrence of the target behavior(s), or upon the occurrence of behavior(s) incompatible with the target behavior(s).
  - Data Collection - A description of the quantified information that will be collected during the implementation of the Behavior Management Plan. This must include who collects the information and what type of quantified information is recorded, such as frequency or duration of behavior. This information must be of the same type as that collected during baseline so that comparisons can occur.
- Responsible person - a designated Behavior Management Specialist is responsible for the Behavior Management Plan in terms of its appropriateness in clinical practice and for financial reimbursement, and for identifying staff and/or others and their respective responsibility relative to the plan. It should be noted that implementation staff do not have to be named individually, but they must have received the required implementation training prior to implementing the plan. The Behavior Management Specialist must sign and date all plans prior to their implementation (or review and co-sign plans signed and dated by a Behavior Management Assistant). The signature of any individual(s) who participated in the development of the written plan must also be included in the plan (and the date of their participation), along with the degree, and other credentials (license type and number) of each individual.

Behavior Protocol Documentation Requirements

The third type of documentation is the completed Behavior Protocol. The Behavior Protocol consists of:

- A summary of objective, quantified baseline data
- A rationale for the development of the protocol
- Recommendations for consistent response(s) upon the occurrence/nonoccurrence of the target behavior(s)
- Date the protocol was developed, the amount of time spent developing the protocol by listing the start and stop times, and the signature (with credential initials) of the staff person who developed the protocol.

Behavior Management Maintenance Plan Documentation Requirements

The fourth type of documentation is the Behavior Management Maintenance Plan. The Behavior Management Maintenance Plan consists of:

- A summary of objectives
- Quantified implementation data (collected during the implementation of the plan)
- A rationale for the development of a maintenance plan (i.e., the criteria for success has been achieved)
- Recommendation for consistent response(s) upon the occurrence/nonoccurrence of the target behavior(s).
  Date the maintenance plan was developed, the amount of time spent developing the plan by listing the start and stop times, and the signature (with credential initials) of the staff person who developed the plan.

502.21.2 THERAPEUTIC BEHAVIORAL SERVICES – IMPLEMENTATION

Procedure Code: H2019
Service Unit: 15 minutes
Service Limits: All units must be prior authorized
Prior Authorization: Refer to Utilization Management Guidelines.

Definition: Behavior Management Implementation services means a face-to-face, hands-on encounter where the actual time is spent in the delivery of a behavioral health service to a specific member (i.e., any delivery of the service must be on a strictly one staff to one member basis). Such encounters are interventions, or reinforcements that have been previously described in the Behavior Management Plan and are measured and recorded. Any and all Therapeutic Behavioral Services - Implementation activities under this procedure will be considered non-reimbursable if the activities are not supported by a Behavior Management Plan that meets the documentation requirements detailed under Therapeutic Behavioral Services – Development (procedure code H2019HO).

General observation and/or monitoring are not considered billable implementation activities.

Documentation: Documentation must contain the intervention used (which is individualized to meet the needs of the member), methods, measurements, delivery of service, outcome of the implementation, place of service, date of service, signature of implementing staff (with credential initials), and the actual time spent by listing the start-and-stop times.

Only trained, qualified staff can provide **billable** Therapeutic Behavioral Services - Implementation Services. Activities provided by a non-staff person may be considered as a valid part of the service if there is documentation of the role and specific activities by such individuals in both the description of the methods of intervention in the Behavior Management Plan and in the data which describes the encounters by non-staff persons as they implement the plan. Activity by non-staff persons as described above, however, will not be considered billable under neither Therapeutic Behavioral Services – Development (procedure code H2019HO), nor Therapeutic Behavioral Services – Implementation (procedure code H2019).

502.22 TRANSPORTATION SERVICES

Behavioral Health Transportation Services are the services used to physically transport a Medicaid member to/from a therapeutic or diagnostic Medicaid service that is designated in the member's service plan.

502.22.1 NON-EMERGENCY TRANSPORTATION BY VEHICLE OTHER THAN AMBULANCE

Procedure Code: A0120HE
Service Unit: Trip
Service Limits: Six trips daily
Prior Authorization: None

Definition: Non-emergency Transportation by minibus is a service in which a one-way transport of a member by a vehicle other than an ambulance is provided. If more than one member is being transported, each member's transport to the Medicaid service is billable. However, if multiple stops must be made for multiple members, the service provider must only bill for each member's transport to his/her Medicaid reimbursable service. (e.g., a vehicle, carrying two members from their group home, transports the first member to a physician's office and the second to a Day Treatment Program. Only two separate transports must be billed; one for each member. The provider cannot unbundle the second member's trip as two trips; one from the group home to the physician's office, since he received no service there, and the second to the Day Treatment Program).

Documentation: Documentation must contain an activity note for each separate transport describing the purpose for the transport, type of vehicle used for the transport, place of departure and arrival, date of service, signature of the providing staff (along with their credentials), and actual time spent providing the service by listing the start-and-stop times.

502.22.2 NON-EMERGENCY TRANSPORTATION: PER MILE

Procedure Code: A0160HE
Service Unit: One mile
Service Limits: 500 miles per month
Prior Authorization: None

Definition: Non-emergency Transportation: Per Mile is a service in which the member's transportation by the provider is documented and subsequently billed by the mile. Mileage cannot be accumulated during the transport of other members to their destinations even if the member remains in the vehicle during the transport of the other members. Mileage can only be calculated using the shortest, most direct route between the member's place of departure and destination. This code cannot be billed by provider staff unless a member is present in the vehicle.

Documentation: Documentation must consist an activity note describing the purpose for the transport, signed by the providing staff (along with their credentials), type of vehicle used for the transport, place of departure and arrival, actual billable mileage, and date of service.

502.23 SERVICE LIMITATIONS

Service limitations governing the provision of all WV Medicaid services will apply pursuant to *Chapter 100, General Information* of the Provider Manual.

502.24 SERVICE EXCLUSIONS

In addition to the exclusions listed in *Chapter 100, General Information*, BMS will not pay for the following services:

- Services not meeting the definition of Medical Necessity
- Telephone consultations
- Missed appointments
- Time spent in preparation of reports
- A copy of medical report when the agency paid for the original service
- Experimental services or drugs
- Methadone administration or management
- Any activity provided for the purpose of leisure or recreation
- Services rendered outside the scope of a provider's license

502.25 ROUNDING UNITS OF SERVICE

- Services covered by Medicaid are, by definition, either based on the time spent providing the service or episodic. Units of service based on an episode or event cannot be rounded.
- Many services are described as being "planned", "structured", or "scheduled". If a service is planned, structured, or scheduled, this would assure that the service is billed in whole units; therefore, rounding is not appropriate.
- The following services are eligible for rounding:
  - Mental Health Service Plan Development (H0032)
  - Mental Health Service Plan Development (H0032AH)
  - Physician Coordinated Care Oversight Services (G9008)
  - Case Consultation (90887)
  - Comprehensive Medication Services; Mental Health (H2010)
  - Crisis Intervention (H2011)
  - Therapeutic Behavioral Services – Development (H2019HO)
  - Therapeutic Behavioral Services – Implementation (H2019)

In filing claims for Medicaid reimbursement for a service eligible for rounding, the amount of time documented in minutes must be totaled and divided by the number of minutes in a unit. The result of the division must be rounded to the nearest whole number in order to arrive at the number of billable units. After arriving at the number of billable units, the last date of service provision must be billed as the date of service. **The billing period cannot overlap calendar months. Only whole units of service may be billed.**

502.26 PRIOR AUTHORIZATION

Prior authorization requirements governing the provision of all WV Medicaid services will apply pursuant to Chapter 300, General Provider Participation Requirements of the Provider Manual. In addition, the following limitations also apply to the requirements for payment of Behavioral Health Clinic Services described in this chapter.

502.26.1 PRIOR AUTHORIZATION PROCEDURES

- The Bureau for Medical Services requires that providers register and/or prior authorize **all** Behavioral Health Clinic Services described in this manual with exception of Transportation Services, procedure codes A0120HE and A0160HE) with BMS' contracted agent.
- Prior authorization must be obtained from BMS' contracted agent.
- General information on, prior authorization requirements for additional services, and contact information for submitting a request may be obtained by contacting BMS' contracted agent.

502.26.2 PRIOR AUTHORIZATION REQUIREMENTS

- Prior authorization requests for Behavioral Health Clinic Services must be submitted within the timelines required by BMS' contracted agent.
- Prior authorization requests must be submitted in a manner specified by BMS' contracted agent.

502.27 DOCUMENTATION AND RECORD RETENTION REQUIREMENTS

- Documentation and record retention requirements governing the provision of all WV Medicaid services will apply pursuant to Chapter 300, General Provider Participation Requirements and Chapter 800, General Administration of the Provider Manual.
- Providers of Behavioral Health Clinic Services must comply, at a minimum, with the following documentation requirements:

  - Providers must maintain a specific record for all services received for each WV Medicaid eligible member including, but not limited to: name, address, birth date, Medicaid identification number, pertinent diagnostic information, a current service plan signed by the provider, signature and credentials of staff providing the service, designation of what service was provided, documentation of services provided, the dates the services were provided, and the actual time spent providing the service by listing the start-and-stop times as required by service.

  - All required documentation must be maintained for at least five years in the provider's file subject to review by authorized BMS personnel. In the event of a dispute concerning a service provided, documentation must be maintained until the end of the dispute or five years, whichever is greater.

  - Failure to maintain all required documentation may result in the disallowance and recovery by BMS of any amounts paid to the provider for which the required documentation is not maintained and not provided to BMS upon request.

- Providers of Behavioral Health Clinic Services must also comply with the specific documentation requirements for the program or service procedure, as described in this manual.

502.28 BILLING PROCEDURES

- Claims from providers must be submitted on the BMS designated form or electronically transmitted to the BMS fiscal agent and must include all information required by BMS to process the claim for payment.
- The amount billed to BMS must represent the provider's usual and customary charge for the services delivered.
- Claims must be accurately completed with required information.
- By signing the BMS Provider Enrollment Agreement, providers certify that all information listed on claims for reimbursement from Medicaid is true, accurate, and complete. Therefore, claims may be endorsed with computer-generated, manual, or stamped signatures.
- Claim must be filed on a timely basis, i.e., filed within 12 months from date of service, and a separate claim must be completed for each individual member.

502.29 PROGRAM OF SERVICE REQUIREMENTS

Program approval from BMS is required for the following Behavioral Health Clinic Services Program:

- Day Treatment

Coordination of Care and Release of Information Form

Suboxone/Subutex/Vivitrol Providers

Coordination of Care and Release of Information between Suboxone/Subutex/Vivitrol Provider and BH Provider

Communication between behavioral providers and your Suboxone/Subutex/Vivitrol Prescribing Physician other Behavioral health providers and/or facilities is important to ensure that you receive comprehensive and quality health care. This form will allow your behavioral health provider to share protected health information (PHI) with your other provider. This information will not be released without your signed authorization. This PHI may include diagnosis, treatment plan, progress, and medication, if necessary.

Patient Rights

- You may end this authorization (permission to use or disclose information) any time by contacting the practitioner's office.
- If you make a request to end this authorization, it will not include information that may have already been used or disclosed based on your previous permission. For more information about this and other rights, please see the applicable Notice of Privacy Practices.
- You have a right to a copy of this signed authorization.

Patient Authorization

I hereby authorize the name(s) or entities written below to release verbally or in writing information regarding any medical, mental health and/or alcohol/drug abuse diagnosis or treatment recommended or rendered to the following identified patient. I understand that these records are protected by Federal and state laws governing the confidentiality of mental health and substance abuse records, and cannot be disclosed without my consent unless otherwise provided in the regulations. I also understand that I may revoke this consent at any time and must do so in writing. **This consent expires in one year (12 months) from the date of my signature below unless otherwise stated herein.**

Application for Day Treatment Certification

APPLICATION FOR
MEDICAID DAY TREATMENT CERTIFICATION

Please complete the following identifying information for your agency.

Name of Provider/Agency operating Day-Treatment at site listed below: _____

_____

Provider/Agency Address: _____

_____

Current Medicaid Provider Number: _____

Name of Day-Treatment Program: _____

Day-Treatment Program Address: _____

_____

Effective Dates of B. H. License: _____ Date of Approved CON: _____

Name & Title of Individual Completing Application: _____

_____

Telephone Number: _____ Extension: _____

Fax Number: _____

PROGRAM DESCRIPTION

A. THIS AGENCY IS APPLYING FOR CERTIFICATION (PLEASE CHECK ALL BOXES THAT APPLY):

☐ Initial or New Certification
☐ Recertification
☐ Clinic Services Day-Treatment Program
☐ Rehabilitation Services Day-Treatment Program

B. TYPES OF POPULATION(S) TO BE SERVED:

An application must be submitted for each day-treatment licensed program site operated by your agency. If your agency is serving more than one population at one site, a separate program activity time grid must be completed for each of the populations checked below.

1. ADULTS WITH:

☐ Alcohol/Substance Abuse ☐ Mental Illness ☐ Intellectually/Developmentally Disabled

2. CHILDREN WITH:

☐ Developmental Delay ☐ Serious Emotional Disturbances

C. SITE OF OPERATIONS

Day-Treatment Program Site:

_____

Address:

_____

D. HOURS OF OPERATIONS

Hours of Operation: ___a.m. ___a.m.
___p.m. ___p.m.

Days of Operations: M T W T F S S
(CIRCLE ALL THAT APPLY)

E. PROGRAM CAPACITY

In the last month, what was:

1. Average number of clients served in program per day? _____
2. Maximum number of clients who can be served on any day? _____

PROGRAM SUMMARY

Please provide a summary description of the program at this site which includes the following points:

- Difference in programmatic approaches or emphasis on each population served at this site

- Program admission and discharge criteria

- Differences in programmatic approaches to individuals with lower-versus-higher functional impairment

- Any specific programmatic emphasis or focus

MANAGEMENT AND PERSONNEL

1. DAY-TREATMENT PROGRAM DIRECTOR:

   NAME: _____

   QUALIFICATIONS: _____

   EDUCATION: _____

   _____

   _____

2. ATTACH QUALIFYING WORK EXPERIENCE (Resume may be used if it indicates dates of experience for each position held by month/year.)

   Date of Experience:

3. As qualifying work experience, this agency assures that the individual named above meets the minimum qualifications for day-treatment program director in terms of education, type(s) of position(s) held previously, length of work experience, and experience with the disability type served by this program, and written reference checks.

   _____ Yes Date of Review: _____

4. PROGRAM DIRECTOR TIME SCHEDULE:

   A. Please indicate the number of hours per week the program director spends in program management activities, such as staff scheduling, activities planning, service plan review, treatment planning, etc.

      _____ Program management hours per week

   B. Please indicate the number of hours per week the program director spends carrying out or participating directly with clients in activities listed on weekly grid.

      _____ Day-treatment activities hours per week.

   C. List each type of staff member by job title used by your agency for day-treatment services.

JOB TITLE	NUMBER OF STAFF IN DAY-TREATMENT WITH THIS TITLE
1.	
2.	
3.	
4.	
5.	
6.	
7.	
8.	

5. Attach a job description for each job title listed in #1 above.

6. Attach a weekly schedule for all staff reflected in #1 above.

CLINIC DAY-TREATMENT

A. Program Activities: Population MR/DD

Please indicate which of the following activities are carried out in your agency's day-treatment program by checking the appropriate boxes and filling in the staff-to-client ratio for each activity:

Attachment D: Comprehensive Community Support Services Program Certification Form

Attachment E: Application for Assertive Community Treatment(ACT) Team Form and ACT Team Modification Form

CHAPTER 503 – COVERED SERVICES, LIMITATIONS, AND EXCLUSIONS FOR BEHAVIORAL HEALTH REHABILITATION SERVICES

INTRODUCTION

The West Virginia Medicaid Program offers a comprehensive scope of medically necessary behavioral health services to diagnose and treat eligible members. Covered and authorized services must be rendered by enrolled providers within the scope of their license and in accordance with all State and Federal regulations. Any service, procedure, item, or situation not discussed in the manual must be presumed non-covered unless informed otherwise, in writing, by the West Virginia Bureau for Medical Services (BMS).

This chapter sets forth BMS's requirements for payment of Behavioral Health Rehabilitation Services provided by Behavioral Health providers to eligible West Virginia (WV) Medicaid members.

The policies and procedures set forth herein are promulgated as regulations governing the provision of Behavioral Health Rehabilitation Services in the Medicaid Program administered by the West Virginia Department of Health and Human Resources (WVDHHR) under the provisions of Title XIX of the Social Security Act and Chapter 9 of the Public Welfare Law of WV.

The Bureau of Medical Services has a joint goal with Medicaid Enrolled Providers to ensure effective services are provided to Medicaid Members.

Medicaid Enrolled Providers should give priority to children that have been identified as being in the foster care system. To uphold our responsibility to children in foster care, addressing children's needs must begin at entry and by making these foster children a priority especially with the assessment services stated in this manual. Medicaid Enrolled Providers should make a good faith effort to complete assessments in a timely manner as well as work with Bureau for Children and Families (BCF) to ensure that information is shared in a timely manner with BCF, court systems, as well as other entities involved in the care and treatment process of the foster child while conforming to state and federal confidentiality requirements.

All Medicaid Members have the right to freedom of choice when choosing a provider for treatment. A Medicaid Member may receive one type of service from one provider and another type of service from a different provider. Providers that are found to be inhibiting freedom of choice to Medicaid Members are in violation of their provider agreement.

All Medicaid Enrolled Providers should coordinate care if a Medicaid Member has different Medicaid services at different sites with other providers to ensure that quality of care is taking place and that safety is the forefront of the Member's treatment. Appropriate Releases of Information should be signed in order that HIPAA Compliant Coordination of Care takes place.

503.1 DEFINITIONS

Definitions governing the provision of all WV Medicaid services will apply pursuant to *Chapter 200, Definitions of the Provider* Manual. In addition, the following definitions also apply to the requirements for payment of Behavioral Health Rehabilitation Services described in this chapter.

Abuse and Neglect as defined in **West Virginia Code §49-1-3**

Assertive Community Treatment (ACT) is an intensive and highly integrated approach for community mental health service delivery. ACT teams serve outpatients whose symptoms of mental illness result in serious functioning difficulties in several major areas of life.

Advanced Alcohol & Drug Counselor (AADC): professional certification as defined by the West Virginia Certification Board of Addiction Prevention Professionals requirements.

Advanced Practice Registered Nurse (APRN) : As defined in **West Virginia Code §30-7-1**: A registered nurse who has acquired advanced clinical knowledge and skills preparing him or her to provide direct and indirect care to patients, who has completed a board-approved graduate-level education program and who has passed a board-approved national certification examination. An advanced practice registered nurse shall meet all the requirements set forth by the board by rule for an advance practice registered nurse that shall include, at a minimum, a valid license to practice as a certified registered nurse anesthetist, a certified nurse midwife, a clinical nurse specialist or a certified nurse practitioner.

Alcohol & Drug Counselor (ADC): professional certification as defined by the West Virginia Certification Board of Addiction Prevention Professionals requirements.

Alcohol & Drug Clinical Supervisor (ADC-S): certification as defined by the West Virginia Certification Board of Addiction Prevention Professionals requirements

Administrative Service Organization (ASO): the contracted agent of BMS.

Behavioral Health Rehabilitation Services: services that are medical or remedial that recommended by a physician, physician extender, licensed psychologist, or supervised psychologist for the purpose of reducing a physical or mental disability and restoration of a member to his/her best function level. These services are designed for all members with conditions associated with mental illness, substance abuse and/or dependence. Behavioral Health Rehabilitation Services may be provided to members in a variety of settings, including in the home, community, or a residential program, but do not include services provided in an inpatient setting.

Behavioral Health Condition: a mental illness, behavioral disorder and/or substance use disorder which necessitates therapeutic and/or supportive treatment.

Coordination of Care: Sharing information between relevant parties to plan, arrange, implement, and monitor provision of services to Medicaid Members.

Critical Juncture: any time there is a significant event or change in the member's life that requires a treatment team meeting. The occurrence constitutes a change in the member's needs that require services, treatment, or interventions to be decreased, increased or changed. The member's needs affected would be related to their behavioral health, physical health, change in setting or crisis.

Designated Legal Representative (DLR): Parent of a minor child, conservator, legal guardian (full or limited), health care surrogate, medical power of attorney, power of attorney, representative payee, or other individual authorized to make certain decisions on behalf of a member and operating within the scope of his/her authority.

External Credentialing: a process by which an individual's external credential is verified to provide Medicaid Rehabilitation Services by the agency's working committee composed of experienced licensed and/or certified staff representative of the appropriate disciplines or practitioners. A provider agency with few clinical staff may designate a credentialing officer.

Freedom of Choice: The guaranteed right of a beneficiary to select a participating provider of their choice.

Homeless- An individual meeting the current federal definition of homelessness as defined in **42 USC § 11302.**

Foster Child: The West Virginia Department of Health and Human Resources defines a foster child as a child receiving 24-hour substitute care while placed away from his or her parents or guardians and for whom the State agency has placement and care responsibility. This includes, but is not limited to, placements in foster family homes, foster homes of relatives, group homes, emergency shelters, residential facilities, child care institutions, and pre-adoptive homes.

Human Services Degree: A Masters' or Bachelors' degree granted by an accredited college or university in one of the following human services fields:

- Psychology
- Criminal Justice
- Nursing
- Sociology
- Social Work
- Counseling/Therapy
- Teacher Education
- Behavioral Health
- Other Degrees approved by the West Virginia Board of Social Work.

(Note: Some services require specific degrees as listed in the manual see specific services for detailed information on staff qualification.)
Incident: any unusual event occurring to a member that needs to be recorded and investigated for risk management or Quality Improvement purposes.

Incident: any unusual event occurring to a member that needs to be recorded and investigated for risk management or Quality Improvement purposes.

Intensive Services (IS): A combination of specific services for a targeted population to be used on a frequent basis for a limited period of time. Approval for an IS program and prior authorization for members admitted to an IS program must be obtained by contacting the ASO.

Internal Credentialing: an individual approved to provide Rehabilitation Services by the agency's working committee composed of experienced licensed and/or certified staff representative of the appropriate disciplines or practitioners. A provider agency with few clinical staff may designate a credentialing officer.

Licensed Practical Nurse (LPN): an individual who has completed the licensed practical nurse program from an accredited school and who is licensed by the WV State Board of Examiners for Licensed Practical Nurses.

Licensed Psychologist: a psychologist who has completed the requirements for licensure that have been established by the WV Board of Examiners of Psychologist and is in current good standing with the board.

Office of Health Facility Licensure and Certification (OHFLAC): The office designated by the West Virginia Department of Health and Human Resources to determine whether facilities comply with Federal and State licensure and State certification standards.

Physician: As defined in West Virginia Code Annotated §30-3-10, an individual who has been issued a license to practice medicine in the state of WV by the WV Board of Medicine and is in good standing with the board; or an individual licensed by the WV Board of Osteopathy in accordance with West Virginia Code Annotated 30-14-6.

Physician's Assistant: An individual who meets the credentials described in West Virginia Code Annotated §30-3-16, §30-3-13, §30-3-5. A graduate of an approved program of instruction in primary health care or surgery who has attained a baccalaureate or master's degree, has passed the national certification exam, and is qualified to perform direct patient care services under the supervision of a physician.

Physician Extender: A medical professional including an advanced practice registered nurse or a physician's assistant functioning within his or her legal scope of practice.

Registered Nurse (RN): A person who is professionally licensed by the State of West Virginia as a Registered Nurse and in good standing with the West Virginia Board of Examiners for Registered Professional Nurses.

Supervised Psychologist: an individual who is an unlicensed psychologist with a documented completed degree in psychology at the level of M.A., M.S., Ph.D., Psy.D. or Ed.D. and has met the requirements of, and is formally enrolled in, the WV Board of Examiners of Psychologists Supervision Program.

Telehealth: the use of identified technologies to provide behavioral health services for Medicaid Members by qualified providers. When billing a service that has been utilized through Telehealth, providers must bill the service code with a GT Modifier (**See Telehealth Section).**

503.2 MEMBER ELIGIBILITY

Behavioral Health Rehabilitation Services are available to all Medicaid members with a known or suspected behavioral health disorder. Each member's level of services will be determined when prior authorization for Behavioral Health Rehabilitation Services is requested of the agency authorized by BMS to perform administrative review. The Prior Authorization process is explained in Section 503.29 of this manual.

503.3 MEDICAL NECESSITY

All Behavioral Health Rehabilitation Services covered in this chapter are subject to a determination of medical necessity. In the managed care position paper published in 1999 by the State of WV, medical necessity was defined as:

"Services and Supplies that are:

1. appropriate and necessary for the symptoms, diagnosis or treatment of an illness;
2. provided for the diagnosis or direct care of an illness;
3. within the standards of good practice;
4. not primarily for the convenience of the plan member or provider; and
5. the most appropriate level of care that can be safely provided."

Medical Necessity must be demonstrated throughout the provision of services. For these types of services, the following five factors will be included as part of this determination.

- Diagnosis (as determined by a physician or licensed psychologist)
- Level of functioning
- Evidence of clinical stability
- Available support system
- Service is the appropriate level of care

Consideration of these factors in the service planning process must be documented and re-evaluated at regular service plan updates. As stated in section 503.15.1, the provider may perform one assessment per calendar year in order to update medical necessity (See Service Code H0031 for more details). Diagnostic and standardized instruments may be administered at the initial evaluation and as clinically indicated. The results of these measures must be available as part of the clinical record, as part of the documentation of the need for the service, and as justification for the level and type of service provided.

The Bureau for Medical Services requires that providers register and/or prior authorize with the agency designated by the Bureau to perform administrative review for services that are rendered. Prior Authorization does not guarantee payment for services rendered.

503.4 PROVIDER ENROLLMENT

In order to participate in the WV Medicaid Program and receive payment from BMS, providers of Behavioral Health Rehabilitation Services must meet all enrollment criteria as described in Chapter 300.

503.4.1 ENROLLMENT REQUIREMENTS: AGENCY ADMINISTRATION

Each participating provider must develop and maintain a Credentialing Committee composed of senior licensed and/or certified staff representative of the disciplines or practitioners within the agency. This committee is responsible for overseeing and assuring the following activities:

- Development of written criteria for each specific type of service provided. These criteria must identify the required education, licensure, certification, training, and experience necessary for each staff person to perform each type of service. These criteria must be age and disability specific to populations served as well as ensuring that staff has demonstrated competency to provide the services rendered.
- Review all documented evidence of credentials such as university transcripts, copies of professional licenses, certificates or documents relating to the completion of training, letters of reference and supervision, etc. must be reviewed by the committee. Based on this review, the committee must determine which services staff are qualified to provide.
- These reviews and determinations must be completed at initiation of employment, as changes to credentials occur, and as licenses or certifications expire. Documentation of the credentials review must be filed in each staff person's personnel file and available for review.

All documented evidence of staff credentials (including university transcripts/copies of diplomas, copies of professional licenses, and certificates or documents relating to the completion of training) must be maintained in staff personnel records.

Participating providers must develop standards for staff training, supervision, and compliance monitoring in accordance with existing state policy and federal regulations.

503.4.2 ENROLLMENT REQUIREMENTS: STAFF QUALIFICATIONS

Services may be rendered to Medicaid members by physician's assistants under the supervision of a psychiatrist. Services may also be rendered to Medicaid members by an Advanced Practice Registered Nurse as defined below. An Advanced Practice Registered Nurse without a psychiatric certification must function under the direct supervision of a WV Board of Medicine approved supervising physician. An Advanced Practice Registered Nurse with a psychiatric certification may practice without direct supervision by a psychiatrist.

A Physician's Assistant (PA) and/or Advanced Practice Registered Nurse must have a signed collaborative agreement for prescriptive authority with a psychiatrist. The collaborative agreement must document the professional relationship between the Advanced RN practitioner and the physician. Regulations set forth in WV Code, Chapter 30 – Professions and Occupations, Title 11 Legislative Rule – West Virginia Board of Medicine, and Title 19 Legislative Rules – Board of Examiners for Registered Professional Nurses must be followed. Physician's Assistants and/or Advanced Practice Registered Nurses will be referred to as physician extenders throughout the manual.

Documentation including required licenses, certifications, proof of completion of training, contracts between physicians and physician assistants, collaborative agreements for prescriptive authority, if applicable, between certified nurse practitioners and physicians, proof of psychiatric certification as applicable, and any other materials substantiating an individual's eligibility to perform as a practitioner must be kept on file at the Behavioral Health Facility.

All further Staff Qualifications will be indicated under the service codes. All documentation for staff including college transcripts, certifications, credentials, background checks, trainings should be kept in the staff's personnel file and may be reviewed at any time by BMS or the Bureau's contractors or state and federal auditors.

503.5 CRIMINAL BACKGROUND CHECKS

All Rehabilitation provider staff, having direct contact with members must, at a minimum, have results from a state level Fingerprint Based Background check. This check must be conducted initially and again every 3 years. If the current or prospective employee, within the past 5 years, has lived or worked out of state or currently lives or works out of state, the agency must request an additional federal background check through the West Virginia State Police also upon hire and every 3 years of employment. Providers may do an on-line preliminary name based check and use these results for a period of 3 months while waiting for state and/or federal fingerprint results to be received. Providers may only use on-line companies that check counties in which the applicant has lived and worked within the last 5 years. An individual who is providing services or is employed by a provider cannot be considered to provide services nor can be employed or continue to be employed if ever convicted of the following:

- Abduction;
- Any violent felony crime including but not limited to rape, sexual assault, homicide, or felonious battery;
- Child/adult abuse or neglect;
- Crimes which involve the exploitation, including financial exploitation, of a child or an incapacitated adult;
- Any type of felony battery;
- Felony arson;
- Felony or misdemeanor crime against a child or incapacitated adult which causes harm; Felony drug related offenses within the last 10 years;

- Felony DUI within the last 10 years;
- Hate crimes;
- Kidnapping;
- Murder/ homicide;
- Neglect or abuse by a caregiver;
- Pornography crimes involving children or incapacitated adults including but not limited to, use of minors in filming sexual explicit conduct, distribution and exhibition of material depicting minors in sexually explicit conduct or sending, distributing, exhibiting, possessing, displaying or transporting material by a parent, legal representative or custodian, depicting a child engaged in sexually explicit conduct;
- Purchase or sale of a child;
- Sexual offenses including but not limited to incest, sexual abuse, or indecent exposure;
- Healthcare fraud; and
- Felony forgery.

Fingerprint based background check results, other than those listed above, which may place a member at risk of personal health and safety or have evidence of a history of Medicaid fraud or abuse must be considered.

If aware of recent convictions or change in conviction status of an agency staff member providing Rehabilitation services, the Rehabilitation provider will notify the Program Manager for Behavioral Health Services.

The Federal Office of the Inspector General (OIG) List of Excluded Individuals and Entities must be checked by the Rehabilitation provider for every agency staff who provides Medicaid services prior to employment and monthly throughout employment. Persons on the OIG Exclusion List cannot provide Medicaid services. The list can be checked at http://exclusions.oig.hhs.gov/. A form may be printed from this website to verify that the check occurred. Any document that has multiple staff names may be kept in a separate file and made available to staff as needed and during agency audits.

503.6 CLINICAL SUPERVISION

The purpose of clinical supervision is to improve the quality of services for every member while ensuring adherence to WV Medicaid policy, therefore the provider must have a policy for Clinical Supervision including guidelines for the following:

- the responsibilities of the supervisor,
- credentialing requirements of the supervisor, and
- the minimum frequency for which supervision should occur.

Each agency shall have a chart demonstrating clinical chain of command and responsibility. Each agency shall have a documented process for ensuring all staff are aware of their clinical and administrative supervision.

The clinical supervisor should have an equal or higher degree, credential, or clinical experience than those they supervise. If a clinical supervisor is responsible for a Medicaid funded program, the supervisor should be able to demonstrate familiarity with Medicaid requirements and relevant manuals. This applies to all rehabilitation services rendered.

503.7 SERVICE CERTIFICATION REQUIREMENTS

A physician, physician extender, or psychologist must certify the need for Behavioral Health Rehabilitation Coordinated Services by:

- Signing the "Behavior Health Clinic/Rehabilitation Services, Authorization for Services" form within 72 hours of the member's admission to the program for services and prior to the start of treatment. **If an Initial Service Plan is created on day of intake then a 72-hour authorization form is not required. Upon initiation of the Initial Service Plan, the "Behavior Health Clinic/Rehabilitation Services, and Authorization for Services" form is no longer in effect since it is no longer necessary.** This form, which is filled out by the provider initiating/admitting staff, authorizes the provision of all Behavioral Health Rehabilitation Services until the development and initiation of the Initial Service Plan. The initial service plan must include all information that is required on the 72-hour authorization form.

- If a Medicaid Member is considered to be in *Focused Care* then a provider cannot bill for a Service Plan and/or Treatment Plan. No 72 hour Authorization is required for individuals receiving only Focused Treatment Services.

For members receiving *Coordinated Care*, the following is required:

- Development of the Initial Service Plan within seven days of the initial admission and intake
- Development of the Master Service Plan within 30 days of the initial admission and intake
- Review and re-evaluation of the service plan at a minimum every 90 days, or sooner if dictated by the member's needs

If any Behavioral Health Rehabilitation Services occur outside the time frames of these forms which authorize services, the services provided are not billable.

503.8 METHODS OF VERIFYING BUREAU FOR MEDICAL SERVICES' REQUIREMENTS

Enrollment requirements, as well as provision of services, are subject to review by BMS and/or its contracted agents. BMS' contracted agents may promulgate and update utilization management guidelines that have been reviewed and approved by BMS. These approved guidelines function as

policy. Additional information governing the surveillance and utilization control program may be found in *Chapter 800 (A), General Administration*, of the Provider Manual and are subject to review by state and federal auditors.

503.9 REHABILITATION PROVIDER REVIEWS

The primary means of monitoring the quality of Rehabilitation services is through provider reviews conducted by OHFLAC and the Contracted Agent as determined by BMS by a defined cycle. The Contracted agent performs on-site and desk documentation provider reviews and face-to-face member/legal representative and staff interviews to validate documentation and address CMS quality assurance standards. Targeted on-site Rehabilitation provider reviews and/or desk reviews may be conducted by OHFLAC and/or the Contracted Agent in follow up to Incident Management Reports, complaint data, Plan of Corrections, etc. Upon completion of each provider review, the Contracted Agent conducts a face-to-face exit summation with staff as chosen by the provider to attend. Following the exit summation, the Contracted Agent will make available to the provider a draft exit report and a Plan of Correction to be completed by the Rehabilitation provider. If potential disallowances are identified, the Rehabilitation provider will have 30 calendar days from receipt of the draft exit report to send comments back to the Contracted Agent. After the 30-day comment period has ended, BMS will review the draft exit report and any comments submitted by the Rehabilitation provider and issue a final report to the Rehabilitation Provider's Executive Director. The final report reflects the provider's overall performance, details of each area reviewed and any disallowance, if applicable, for any inappropriate or undocumented billing of Rehabilitation Services. A cover letter to the Rehabilitation provider's Executive Director will outline the following options to effectuate repayment:

(1) Payment to BMS within 60 days after BMS notifies the provider of the overpayment; or

(2) Placement of a lien by BMS against further payments for Medicaid reimbursements so that recovery is effectuated within 60 days after notification of the overpayment; or

(3) A recovery schedule of up to a 12-month period through monthly payments or the placement of a lien against future payments.

If the Rehabilitation provider disagrees with the final report, the Rehabilitation provider may request a document/desk review within 30 days of receipt of the final report pursuant to the procedures in *Common Chapter 800 (A), General Administration* of the West Virginia Medicaid Provider Manual. The Rehabilitation provider must still complete the written repayment arrangement within 30 days of receipt of the Final Report, but scheduled repayments will not begin until after the document/desk review decision. The request for a document/desk review must be in writing, signed and set forth in detail the items in contention.

The letter must be addressed to the following:

Commissioner
Bureau for Medical Services
350 Capitol Street, Room 251
Charleston, WV 25301-3706

If no potential disallowances are identified during the Contracted Agent review, then the Rehabilitation Provider will receive a final letter and a final report from BMS.

Plan of Correction

In addition to the draft exit report sent to the Rehabilitation providers, the Contracted Agent will also send a draft Plan of Correction (POC) electronically. Rehabilitation providers are required to complete the POC and electronically submit a POC to the Contracted Agent for approval within 30 calendar days of receipt of the draft POC from the Contracted Agent. BMS may place a hold on claims if an approved POC is not received by the Contracted Agent within the specified time frame. The POC must include the following:

1.) How the deficient practice for the services cited in the deficiency will be corrected and what system will be put into place to prevent recurrence of the deficient practice;

2.) How the provider will monitor to assure future compliance and who will be responsible for the monitoring;

3.) The date the Plan of Correction will be completed; and

4.) Any provider-specific training requests related to the deficiencies

503.10 TRAINING AND TECHNICAL ASSISTANCE

The Contracted Agent develops and conducts training for Rehabilitation providers and other interested parties as approved by BMS as necessary to improve systemic and provider-specific quality of care and regulatory compliance. Training is available through both face-to-face and web-based venues.

503.11 OTHER ADMINISTRATIVE REQUIREMENTS

- The provider must assure implementation of BMS' policies and procedures pertaining to service planning, documentation, and case record review. Uniform guidelines for case record organization should be used by staff, so similar information will be found in the same place from case record to case record and can be quickly and easily accessed. Copies of completed release of information forms and consent forms must be filed in the case record.
- Records must contain completed member identifying information. The member's individual plan of service must contain service goals and objectives which are derived from a comprehensive member assessment, and must stipulate the planned service activities and how they will assist in goal attainment. Discharge reports must be filed upon case closure.
- Records must be legible.
- Prior to the retrospective review all records requested must be presented to the reviewers completing the retrospective review.
- If requested the providers must provide copies of Medicaid Members records within one business day of the request.

- Provider must facilitate the records access that is requested as well as equipment that may need to be utilized to complete the Comprehensive Retrospective Review Process.
- A point of contact must be provided by the provider throughout the Comprehensive Retrospective Review Process.
- In addition to the documentation requirements described in this chapter, Behavioral Health Rehabilitation Service providers must comply with the documentation and maintenance of records requirements described in Chapter 100, General Information, Chapter 300, Provider Participation, and Chapter 800 (A) General Administration of the Provider Manual.
- Documentation of the services provided in this manual must demonstrate only one staff person's time is billed for any specific activity provided to the member.

503.12 FOCUSED AND COORDINATED CARE SERVICES

The Bureau of Medical Services expects that each member will receive the type and amount of behavioral health service(s) necessary to ameliorate and stabilize the behavioral health disorder(s) defining medical necessity for services. The BMS has established two levels of behavioral health treatment, with similar but somewhat differing credentialing and documentation requirements. Assessment services are not included within either category but are considered necessary to establish medical necessity for a particular service or level of care.

Focused Care: Members receiving focused services have been determined to have a behavioral health disorder which may be addressed through the provision of low frequency (generally a maximum of once per week, ranging as rarely as once each six months) professional treatment services. Services are provided by a behavioral health professional with at minimum a master's degree in a behavioral health service field, excluding Mental Health Assessment by a Non-Physician. The treatment team consists of the professional and the member and/or member's designated legal representative who together establish a treatment strategy which is documented in the member's record. The treatment strategy is a flexible tool guiding treatment which may consist of one or more of the following Medicaid services:

- Medical office services (billed as E/M codes);
- Professional Individual therapy
- Professional Group therapy
- Assessment and Screening codes

The treatment strategy must relate directly to the behavioral health condition(s) identified as being medically necessary to treat. Documentation of on-going therapeutic and/or medication management contacts must relate directly to the treatment strategy.

Coordinated Care: Members requiring coordinated care are those with severe and/or chronic behavioral health conditions that necessitate a team approach to providing medically necessary care. The treatment is usually provided on a more intensive basis, several times a week if not daily. A full range of individuals may be employed in providing care, ranging from paraprofessionals through psychiatrists. The treatment team consists of the personnel involved

in providing the care and includes the member and the member's guardian if any. The member is likely to have a case manager, who is responsible for coordinating and facilitating care.

Documentation consists of a comprehensive service plan. When the member enters the service, an initial plan is developed which dictates care until the interdisciplinary team can meet. An initial plan must be completed within seven days. Those services that are time-limited and of high intensity may require an initial plan immediately upon admission that is then adapted as the member moves through levels of care. Services that are projected to be of unlimited or extended duration are expected to include development of a master service plan within 30 days that describes specific objectives to be achieved during the course of treatment, stated in observable and/or measureable terms. The master service plan must address integration and coordination of various entities and programs providing services to the member. On-going documentation must reflect the team's ability to communicate issues of concern, member progress and barriers to treatment.

Services falling under Coordinated Care may include but are not limited to the following:

- Assertive Community Treatment
- Professional Individual Therapy
- Professional Group Therapy
- Crisis Stabilization and detoxification services
- Targeted Case Management
- Comprehensive Community Support Services
- Basic Living Skills
- Intensive Service Programs
- Supportive Counseling
- Professional therapy and medication management provided in the context of the Coordinated Care services
- Residential Care for Children and Youth
- Emergency Shelter Care
- Day Treatment

503.13 TELEHEALTH SERVICES

The West Virginia Bureau for Medical Services encourages providers that have the capability to render services via Telehealth to allow easier access to services for WV Medicaid Members. To utilize Telehealth providers will need to document that the service was rendered under that modality. When filing a claim the Provider will bill the service code with a GT Modifier. Each service in this manual is identified as "Available" or "Not Available" for Telehealth. Some services codes give additional instruction and/or restriction for Telehealth as appropriate.

- Minimum equipment standards are transmission speeds of 256kbps or higher over ISDN (Integrated Services Digital Network) or proprietary network connections including VPNs (Virtual Private Networks), fractional T1, or T1 comparable cable bandwidths. Software that has been developed for the specific use of Telehealth may be used as long as the software is HIPAA Compliant and abides by a federal code pertaining to Telehealth.
- The audio, video, and/or computer telemedicine system used must, at a minimum, have the capability of meeting the procedural definition of the code provided through telemedicine. The telecommunication equipment must be of a quality to complete adequately all necessary components to document the level of service for the CPT or HCPCS codes that are available to be billed. If a peripheral diagnostic scope is required to assess the patient, it must provide adequate resolution or audio quality for decision-making.
- The provider at the distant site is responsible to maintain standards of care within the identified scope of practice.
- All Medicaid conditions and regulations apply to Telehealth services unless otherwise specified in this manual.
- The provider must have an appropriately trained employee of the facility available in the building at all Telehealth contacts with a member. Appropriately trained is defined as trained in systematic de-escalation that involves patient management.
- The health care agency or entity that has the ultimate responsibility for the care of the patient must be licensed in the State of West Virginia and enrolled as a WV Medicaid provider. The practitioner performing services via telemedicine, whether from West Virginia or out of state, must meet the credentialing requirements contained within this manual.
- Telehealth providers must have in place a systematic quality assurance and improvement program relative to Telehealth services that is documented and monitored.
- All providers are required to develop and maintain written documentation of the services provided in the form of progress notes. The notes must meet the same guidelines as those required of an in-person visit or consultation, with the exception that the mode of communication (i.e., Telehealth) must be noted.
- The operator of the Telehealth equipment must be an enrolled provider, a contracted employee, or an employee of the enrolled provider for compliance with confidentiality and quality assurance.
- The practitioner who delivers the service to a participant shall ensure that any written information is provided to the participant in a form and manner which the participant can understand using reasonable accommodations when necessary.
- Participant's consent to receive treatment via telehealth shall be obtained, and may be included in the participant's initial general consent for treatment.

- If the participant (or legal guardian) indicates at any point that he or she wishes to stop using the technology, the service should cease immediately and an alternative method of service provision should be arranged.

  The health care practitioner who has the ultimate responsibility for the care of the patient must first obtain verbal and written consent from the recipient, including as listed below:
  - The right to withdraw at any time.
  - A description of the risks, benefits and consequences of telemedicine
  - Application of all existing confidentiality protections
  - Right of the patient to documentation regarding all transmitted medical information
  - Prohibition of dissemination of any patient images or information to other entities without further written consent.

- BMS Manual standards apply to all services available through Telehealth unless otherwise described. Medicaid will reimburse according to the fee schedule for services provided.
- Reimbursement is not available for a telephone conversation, electronic mail message (e-mail), or facsimile transmission (fax) between a Provider and a participant.

503.14 DOCUMENTATION

The WV Bureau for Medical Services recognizes that some providers use an electronic system to create and store documentation while other providers choose to use a hard copy based system. When services require documentation the Bureau will accept both types of documentation. Each service code in this manual describes the required documentation. All requirements must be met no matter the modality of system choice.

503.15 ASSESSMENT SERVICES

Assessment services include evaluative services and standardized testing instruments applied by suitably trained staff credentialed by the internal credentialing policies and procedures of the agency. Assessment services are designed to make determinations concerning the mental, physical and functional status of the member. Those identified as being in the Foster Care system should receive assessment as rapidly as possible.

503.15.1 MENTAL HEALTH ASSESSMENT BY NON-PHYSICIAN

Procedure Code: **H0031**
Service Unit: Event-
Telehealth: Available-

Service Limits: Maximum of (four) 4 per year for members with complex behavioral healthcare needs (Coordinated Care) and (two) 2 per year per member with relatively simple behavioral healthcare needs (Focused Care). The

provider may request more units if a critical treatment juncture arises, however not until all current authorizations for H0031 are expired/utilized. The provider may request authorization to conduct one global assessment per year to reaffirm medical necessity and the need for continued care/services. Change of payer source does not justify H0031.

Staff Credentials: Staff must have a minimum of a master's degree, bachelor's degree in a field of human services, or a registered nurse. Supervision and oversight by an individual with a minimum of a master's degree is required (See Clinical Supervision). Staff must be properly credentialed by the agency's internal credentialing committee.

Definition: Mental Health Assessment by Non-Physician is an initial or reassessment evaluation to determine the needs, strengths, functioning level(s), mental status and/or social history of a member. This code may also be used for special requests of the West Virginia Department of Health and Human Resources for assessments, reports, and court testimony on adults or children for cases of suspected abuse or neglect. The administration and scoring of functional assessment instruments necessary to determine medical necessity and level of care are included in this service.

Approved Causes For Utilization:

1. Intake/Initial evaluation;
2. Alteration in level of care with the exception of individuals being stepped down related to function of their behavioral Health condition to a lesser level of care.
3. Critical treatment juncture, defined as: The occurrence of an unusual or significant event which has an impact on the process of treatment. A critical treatment juncture will result in a documented meeting between the provider and the member and/or DLR and may cause a revision of the plan of services;
4. Readmission upon occurrence of unusual or significant events that justify the re-initiation of treatment or that have had an impact on the individual's willingness to accept treatment;
   The provider may request authorization to conduct one global assessment per year to reaffirm medical necessity and the need for continued care/services.
5. No one under the age of three (3) will have a H0031 conducted on them. The Medicaid member under the age of the 3 should be referred to the Birth to Three Program.

Documentation:

1. Initial/intake (may include use of standardized screening tools):
   A. Demographic data (name, age, date of birth, etc.);
   B. Presenting problem(s) (must establish medical necessity for evaluation) including a description of frequency, duration, and intensity of presenting symptomatology that warrants admission;
   C. Impact of the current level of functioning (self-report and report of others present at interview), which may include as appropriate a description of activities of daily living,

social skills, role functioning, concentration, persistence, and pace; for children, current behavioral and academic functioning;
D. History of behavioral health and health treatment (recent and remote);
E. History of any prior suicide/homicide attempts, high risk behaviors, self-injurious behaviors, etc.;
F. Medical problems and medications currently prescribed;
G. Social history which may include family history as relevant, description of significant childhood events, arrests, educational background, current family structure, vocational history, financial status, marital history, domestic violence (familial and/or personal), substance abuse (familial and/or personal), military history if any;
H. Analysis of available social support system at present;
I. Mental status examination;
J. Recommended treatment (initial);
K. Diagnostic Impression, (must be approved/signed by licensed clinical professional with diagnostic privileges in scope of practice); and
L. Place of evaluation, date of evaluation, start stop times, signature and credentials of evaluator.
M. Efficacy of and compliance with past treatment. (If past treatment is reported)
N. Past treatment history and medication compliance (If past treatment is reported)

2. Re-assessment:
   A. Date of last comprehensive assessment;
   B. Current demographic data;
   C. Reason for re-assessment, including description of current presenting problems (must document medical necessity for evaluation. If the re-evaluation is a global annual assessment it must be labeled as such).
   D. Changes in situation, behavior, functioning since prior evaluation;
   E. Summary of treatment since prior evaluation including a description of treatment provided over the interval and response to treatment;
   F. Mental status examination;
   G. Suggested amendments in treatment/intervention and/or recommendations for continued treatment or discharge;
   H. Specific rationale for any proposed amendment in diagnosis which must be analyzed and approved/signed by licensed clinical professional; and
   I. Place of evaluation, date of evaluation, start stop times, signature and credentials of evaluator.

Note: H0031, T1023HE and **90791 or 90792** are not to be billed at the same initial intake or re-assessment unless the **H0031** is performed first and the evaluator recommends more specific assessment by a medical or psychological professional for further evaluation of the need for medical or other specialty treatment. Documentation must justify need for further evaluation using **90791 or 90792**.

503.15.2 PSYCHOLOGICAL TESTING WITH INTERPRETATION AND REPORT

Procedure Code: 96101

Service Unit: 60 minutes
Telehealth: Not Available
Service Limits: All units must be prior authorized

Prior Authorization: Refer to Utilization Management Guidelines.

Staff Credentials: Must be performed by a West Virginia licensed psychologist in good standing with WV Board of Examiners of Psychology or a Supervised Psychologist under supervision of a Board approved Supervisor.

Definition: Evaluation by a psychologist including psychological testing with interpretation and report. Psychological testing includes, but is not limited to standard psychodiagnostic assessment of personality, psychopathology, emotionality, and intellectual abilities. Academic assessment and assessment required to determine the needs, strengths, functioning level(s), mental status and/or social history of an individual are also included. Documentation requires scoring and interpretation of testing and a written report including findings and recommendations. 96101 is also used in those circumstances when additional time is necessary to integrate other sources of clinical data, including previously interpreted, completed and reported technician-and computer-administered tests.

Note: Interpretation and report of technician and computer-based tests may not be completed using this service. It is intended for the integration of previously interpreted and reported technician and computer-based tests.

Documentation: Documentation/Report must contain the following and be completed in 15 calendar days from the date of service:

- Date of Service
- Location of Service
- Time Spent (Start/Stop Times)
- Signature with Credentials
- Purpose of the Evaluation
- Documentation that Medicaid Member was present for the evaluation
- Report must contain results (score and category) of the administered tests/evaluations
- Report must contain interpretation of the administered tests/evaluations
- Report must contain documentation of mental status exam
- Report must contain a rendering of the Medicaid Member's diagnosis within the current DSM or ICD methodology.
- Report must contain recommendations consistent with the findings of administered test/evaluation

Service Exclusions:

- Psychometrician/Technician Work
- Computer - Scoring
- Self-Administered Assessments
- Computer - Interpretation

503.15.3 PSYCHIATRIC DIAGNOSTIC EVALUATION (NO MEDICAL SERVICES)

Procedure Code:	90791
Service Unit:	Event (completed evaluation)
Service Limits:	Two events per year
Telehealth:	Available
Prior Authorization:	Refer to Utilization Management Guidelines.
Staff Credentials:	Must be performed by a West Virginia licensed psychologist in good standing with WV Board of Examiners of Psychology, a Supervised Psychologist who is supervised by Board approved Supervisor, a Physician, or a Physician Extender.

Definition: An integrated bio-psychosocial assessment, including history, mental status, and recommendations. The evaluation may include communication with family or other sources and review and ordering of diagnostic studies.

Documentation: Documentation must contain the following and be completed in 15 calendar days from the date of service.

- Date of Service
- Location of Service
- Purpose of Evaluation
- Psychiatrist's/Psychologist's signature with credentials
- Presenting Problem
- History of Medicaid Member's presenting illness
- Duration and Frequency of Symptoms
- Current and Past Medication efficacy and compliance
- Psychiatric History up to Present Day
- Medical History related to Behavioral Health Condition
- Mental Status Exam

- Members diagnosis per current DSM or ICD methodology
- Medicaid Member's prognosis and rationale
- Rationale for Diagnosis
- Appropriate Recommendations consistent with the findings of the evaluation

503.15.4 PSYCHIATRIC DIAGNOSTIC EVALUATION WITH MEDICAL SERVICES *(this includes prescribing of medications)

Procedure Code: 90792
Service Unit: Event (completed evaluation)
Service Limits: Two events per year
Telehealth: Yes, as defined in Telehealth section.

Prior Authorization: Refer to Utilization Management Guidelines

Staff Credentials: Must be completed by a physician or a physician extender

Definition: An integrated bio-psychosocial and medical assessment, including history, mental status, other physical examination elements as indicated, and recommendations. The evaluation may include communication with family and other sources, prescription of medications, and review and ordering of laboratory or other diagnostic studies.

Documentation: Documentation must contain the following and be completed 15 calendar days from the date of service.

- Date of Service
- Location of Service
- Psychiatrist's signature with credentials
- Purpose of the evaluation
- Documentation that Medicaid Member was present for the evaluation
- Documentation that Medical Evaluation was completed
- Presenting Problem
- History of the Medicaid Member's presenting illness
- Duration and Frequency of symptoms
- Current and Past Medication including efficacy and compliance
- Psychiatric history up to present day
- Medical History related to behavioral health condition
- Documentation of Mental Status Exam

- Medicaid Member's diagnosis per current DSM and ICD Methodology
- Medicaid Member's prognosis and rationale
- Appropriate recommendations consistent with the findings of the evaluation

503.15.5 SCREENING BY LICENSED PSYCHOLOGIST

Procedure Code: T1023 HE
Service Unit: Event (completed evaluation)
Telehealth: Available
Service Limits: One event every six months

Prior Authorization: Refer to Utilization Management Guidelines.

Staff Credentials: Must be performed by a West Virginia Licensed psychologist or Supervised Psychologist in good standing with WV Board of Examiners of Psychology

Definition: This is a screening to determine the appropriateness of consideration of an individual for participation in a specified program, project or treatment protocol. Procedure codes 96101 or 90791 must be used when a more in-depth assessment is indicated.

Documentation: Documentation must contain the following:

- Date of Service
- Location of Service
- Purpose of Evaluation
- Start/Stop Times
- Practitioner signature and credentials
- Appropriate recommendations based on clinical data gathered in the evaluation

503.15.6 DEVELOPMENTAL TESTING: LIMITED

Procedure Code: 96110
Service Unit: Event (completed interpretation and report)
Telehealth: Not Available
Service Limits: All units must be prior authorized

Payment Limits: This service cannot be billed if Psychological Testing with Interpretation and Report (procedure code 96101) has been billed in the last six months.

Prior Authorization: Refer to Utilization Management Guidelines

Staff Credentials: Must be performed by a West Virginia licensed psychologist in good standing with WV Board of Examiners of Psychology, a Psychologist who is under the supervision of a Board approved Supervisor, a physician or physician extender.

Definition: This is limited to developmental testing (e.g. Developmental Screening Test II, Early Language Milestone Screen) with interpretation and report**.**

Documentation:

Documentation must contain the following:

- Date of Service
- Location of Service
- Purpose of Evaluation
- Time Spent (start/stop times)
- Signature with credentials
- Documentation that the member was present for the evaluation
- Documentation must contain the results (scores and category) of the administered tests/evaluations
- Documentation must contain the documentation of the mental status exam
- Rendering of the Medicaid Member's diagnosis within the current DSM or ICD Methodology

Recommendations consistent with the findings of the administered tests/evaluations.

503.16 SERVICE PLANNING REQUIREMENTS:

Coordinated Care Services:

Service planning and consultation is available only in the Coordinated Care model of service provision. Service planning codes cannot be billed when the development of a service plan is an integral aspect of the service being provided (for example, Community Psychiatric Supportive Treatment). Service planning is to be conducted when multiple programs and services need to be coordinated by a team representative of the differing agencies and provider groups providing care to the member.

All members receiving coordinated care must have a master service plan. The Agency may choose to create one plan that is modified as the individual moves through a service, or may choose to create an initial service plan followed by a master service plan. Agencies with services with shorter lengths of stay may choose the first option if the length of stay is predicted to be less than thirty days. The initial service plan must be completed within 7 days of admission to a service. The plan must be completed by the primary clinician and the member and/or member's guardian.

Development of the initial plan without the entire interdisciplinary team is not a billable service (see Service Plan Development for clarification and description of exceptions). The initial plan of service describes the services and/or supports the member is to receive until the assessment process is complete and the master plan of service is developed. This initial plan shall consist of the following at a minimum:

- Description of any further assessments or referrals that may need to be performed;
- A listing of immediate interventions to be provided along with objectives for the interventions;
- A date for development of a master plan of services. The designated date must be appropriate for the planned length of service but at no time will that exceed 30 days from the date of the signing of the initial plan. If a program is an intensive service the master plan must be completed within 7 days; and
- The signature of the member and/or DLR, intake worker, physician and other persons participating in the development of the initial plan.

The Master Service Plan goals and objectives must be based on problems identified in the intake assessment or in subsequent assessment(s) during the treatment process.

The Master Plan is developed within 30 days of admission and must include:

- Date of development of the plan;
- Participants in the development of the plan;
- A statement or statements of the goal(s) of services in general terms;
- A listing of specific objectives that the service providers and the member hope to achieve or complete;
- The measures to be used in tracking progress toward achievement of an objective;
- The technique(s) and/or services (intervention) to be used in achieving the objective;
- Identification of the individuals responsible for implementing the services relating to the statement(s) of objectives; and
- Discharge Criteria
- A date for review of the plan, timed in consideration of the expected duration of the program or service.
- Start and Stop Times
- Credentials

It is expected that objectives be specific, measureable, realistic and capable of being achieved in the time available in the projected duration of the program or service.

Service plans must be flexible documents that are modified by the team as necessary and clinically appropriate. Service plans must be revisited at critical treatment junctures including changes in level of service to more intensive or less intensive types of care. When an intervention proves to be ineffective the service plan must reflect consideration by the team of changes in the intervention strategy.

503.16.1 MENTAL HEALTH SERVICE PLAN DEVELOPMENT

Procedure Code: H0032
Service Unit: 15 minutes
Telehealth: Available
Service Limits: 16 units per 90 day period. If Medicaid Member is in *Focused Care* H0032 cannot be billed.

Prior Authorization: Refer Utilization Management Guidelines.

Definition: An individual service plan is required for all members receiving services through *Coordinated Care.* The treatment team consists of the member and/or guardian, and/or member's representative (if requested), the member's case manager, representatives of each professional discipline, and provider and/or program providing services to that person (inter- and intra-agency). If a member is served by multiple behavioral health providers, all providers must be invited to participate in the service planning session. All members of the team must receive adequate notice of the treatment team meeting. If a member of the team does not come, the team decides whether to proceed in his or her absence. If the team elects to proceed, documentation must describe the circumstances. A physician extender may serve on the committee in place of the physician.

An Initial Service Plan is developed based on intake information within seven days of intake; a Master Service Plan is developed within 30 days of intake and must be updated at least every 90 days. It must be updated more frequently, at critical treatment junctures, if necessitated by the member's needs.

All service plans (including updates) must be reviewed, signed, and approved by a physician within 72 hours of the service plan meeting and prior to implementing services.

The physician, designated physician extender, or licensed or supervised psychologist must be present physically or by telehealth and participate in all service planning sessions for members who meet any of the following criteria:

- Receive psychotropic medications prescribed by the agency
- Have a diagnosis of major psychosis or major affective disorder
- Have an I/D Diagnosis
- Have an Autism Diagnosis
- Have major medical problems in addition to major psychosis and medications
- The presence of the physician or physician extender has been specifically requested by the case manager or the member.

The case manager is responsible for the scheduling and coordination of treatment team meetings, monitoring the implementation of the service plan, and for initiating treatment team meetings as the needs of the member dictate. Justification for the presence of each staff person participating in the meeting is the responsibility of the case manager. Participation time by staff persons may vary depending on the nature of their involvement and contribution to the team process. Service planning meetings must be scheduled at times and places that facilitate the

inclusion of the member. The agency providing services to the member may bill for participation by any of their staff necessary for the service planning process. Participation by staff from other agencies is not billable by the agency coordinating the service planning session. Participation by family members is not billable. It is important to remember that, although coordination of the service planning process is the responsibility of the case manager, development of the service plan is the responsibility of the treatment team.

Providers must make the proper distinction between service planning and other activities related to case management for the member. The case manager may be involved in the development of individual program plans, such as residential plans, day treatment plans, work training plans, educational plans, etc. as called for by the member's Master Service Plan. These types of activities may constitute billable time for case management services; ***however, when the case manager participates in a treatment team meeting he/she must bill Mental Health Service Plan Development rather than Targeted Case Management.***

Individual program plans for Day Treatment, Children's Residential Services, and other organized programs are not billable as a separate activity, but are considered part of the services for which the plans were developed, and are covered under the definition of those services.

Mental Health Service Plan Development reimburses for team member participation. A written service plan is a product of that process and serves as substantiation that the process took place.

Documentation: The following documentation is required for substantiation of Mental Health Service Plan Development:

- A service plan signature page is required. This document is to be placed in the member's clinical record along with the completed service plan or service plan update.
  - There must be signatures of all participating members of the treatment team (including the member, their guardian, or the member's requested representative).
  - All signatures must be original, must include the title and credentials of the individual, must be dated by the treatment team member, and must include the actual time spent providing the service by listing the start-and-stop times of their participation. Staff may participate for different lengths of time, depending on the nature of their involvement and contribution to the team process.
- If a staff person from another agency participates in the service planning session, he/she must:
  - Meet the previously listed requirements of the service plan signature page. This includes signing the signature page along with listing the agency they are representing.
  - Write an activity note (which must be included in **their** agency's clinical record) that states their purpose for participating in the meeting, their signature and credentials, the location of the session, date of session, and the actual time spent participating in the session by listing their start-and-stop times.

Documentation must contain the physician's signature or that of the psychologist or physician extender on the completed service plan or service plan update, the date, and the actual time spent providing the service by listing the start-and-stop times of his/her participation.

If the member, their guardian, or the member's requested representative does not attend the service planning meeting, the reason for the member's absence must be documented in the clinical record. If unable to attend, the service plan must be reviewed and signed within 7 calendar days by the member or their guardian. If the clinical record does not include a valid signature page with required signatures, the service plan will be invalid, and subsequently, no services provided under its auspices will be billable.

503.16.2 MENTAL HEALTH SERVICE PLAN DEVELOPMENT BY PSYCHOLOGIST

PROCEDURE CODE: H0032 AH
SERVICE UNIT: 15 minutes
TELEHEALTH: Available
SERVICE LIMITS: One unit per month
PRIOR AUTHORIZATION: Refer to Utilization Management Guidelines.

DEFINITION:
These are activities performed by a licensed psychologist directly related to service planning: participation in a treatment team meeting or a review and approval of a service plan. Mental Health Service Plan Development.

DOCUMENTATION:
Documentation must contain the licensed psychologist's signature, **in ink or in an electronic documentation system**, on the completed service plan or service plan update, the date, and the actual time spent providing the service by listing the start-and stop times of his/her participation. A psychologist under supervision of a Licensed Psychologist may perform this service with oversight of their Supervising Licensed Psychologist. The Supervising Licensed Psychologist must indicate their oversight by their signature and the date.

503.16.3 PHYSICIAN COORDINATED CARE OVERSIGHT SERVICES

Procedure Code: G9008
Service Unit: 15 minutes
Telehealth: Available
Service Limits: 2 units per 90 days

Prior Authorization: Refer to Utilization Management Guidelines.

Staff Credentials: Must be performed by physician or physician extender.

Definition: These are activities performed by a physician or physician extender directly related to service planning: participation in a treatment team meeting or a review and approval of a service plan. Also, refer to Mental Health Service Plan Development.

Documentation: Documentation must contain the physician or physician extender's signature, date of signature, and the actual time spent providing the service by listing the start-and-stop times of his/her participation.

503.16.4 CASE CONSULTATION

Procedure Code: 90887
Service Unit: Event
Telehealth: Available

Service Limits: 1 unit per 90 days

Prior Authorization: Refer to Utilization Management Guidelines

Definition: A Case Consultation Service is an interpretation or explanation of results of psychiatric, and other medical examinations and procedures through the requesting clinician to family or other responsible persons.

These are services provided at the request of a professional requiring the opinion, recommendation, suggestion and/or expertise of another professional for a specific purpose regarding services and/or activities of a member relevant to the particular area of expertise of the consulting professional. The consulting professional must be licensed or certified in the needed area of expertise.

Case Consultation may not be used during service planning. The member's case manager cannot be a case consultant. Professional staff persons who participated in the current member's service plan within the current 90 day period, or were directed to provide treatment, cannot bill for case consultation.

Only the consulting professional's time may be billed for this service. Any other professional(s) involved in the case consultation may not bill case consultation for their time. The consulting professional whose services are being billed must currently be an enrolled Medicaid provider if he/she is not an employee (either directly or under contract) of the agency seeking consultation.

Documentation: The consulting professional must document a summary of the consultation that includes: purpose, activities/services discussed, recommendations with desired outcomes, the relationship of the consultation to a specific objective(s) in the service plan, date of service, location, signature and credentials of the consulting professional, and the actual time spent providing the service by listing the start-and-stop times of the consultation.

503.17 SUPPORTIVE SERVICES

503.17.1 BEHAVIORAL HEALTH COUNSELING, PROFESSIONAL, INDIVIDUAL

Procedure Code: H0004HO
Service Unit: 15 minutes
Telehealth: Available
Service Limits: 60 units per year

Prior Authorization: Refer to Utilization Management Guidelines.

Staff Credentials: Must be performed by a minimum of a Master's level therapist using generally accepted practice of therapies recognized by national accrediting bodies for psychology, psychiatry, counseling, and social work. Alcohol and Drug Counselors (ADCs) are considered to be credentialed to provide Behavioral Health Counseling, Individual, so long as they have a master's degree in a clinical field, but only when directly addressing Substance Abuse treatment issues.

To provide therapy in other treatment areas, the ADCs must be credentialed by the applicable accrediting bodies of their respective professional disciplines. All individuals with an ADC hired after July 1, 2014 must have a Master's Degree. All current individuals employed with an ADC must only address substance abuse treatment issues.

Definition: Behavioral Health Counseling, Professional, Individual, is the treatment of behavioral health conditions in which the qualified health care professional through definitive therapeutic communication attempts to alleviate emotional disturbances, reverse or change maladaptive patterns of behavior, and encourage personality growth and development. This process includes ongoing assessment and adjustment of psychotherapeutic interventions and may include involvement of family members or others in the treatment process. Behavioral Health Counseling, Professional, is a face to face medically necessary service provided to the member and/or family member however the member must be present for some or all of the service.

Often by necessity, Behavioral Health Counseling of children will involve work with parents as the agent of change in maladaptive behavior of children. Structured behavior therapies designed to provide parents with therapeutic tools to control and modify inappropriate behavior and promote adaptive coping behaviors are considered to be appropriate use of this service.

Documentation: Documentation must indicate how often this service is to be provided. There must be an activity note describing each service/activity provided, the relationship of the service/activity to the identified behavioral health treatment needs, and the member's response to the service. If there is a Master Service Plan, the intervention should be reflective of a goal and/or objective on the Plan. The activity note must include the reason for the service, symptoms and functioning of the member, a therapeutic intervention grounded in a specific and identifiable theoretical base that provides framework for assessing change, and the member's response to the intervention and/or treatment.

The documentation must include the signature and credentials of the staff providing the service, place of service, date of service, and the actual time spent providing the service by listing the start-and-stop times.

503.17.2 BEHAVIORAL HEALTH COUNSELING, PROFESSIONAL, GROUP

Procedure Code: H0004 HO HQ
Service Unit: 15 minutes
Telehealth: Available
Service Limits: 50 units per year

Payment Limits: Behavioral Health Counseling, Professional, Group sessions are limited in size to a maximum of 12 persons per group session.

Prior Authorization: Refer to Utilization Management Guidelines.

Staff Credentials: Must be performed by a minimum of a Master's level therapist using generally accepted practice of therapies recognized by national accrediting bodies for psychology, psychiatry, counseling, and social work. Alcohol and Drug Counselors (ADCs) are considered to be credentialed to provide Behavioral Health Counseling, Professional, Group, so long as they have a master's degree in a clinical field, but only when directly addressing Substance Abuse treatment issues.

To provide therapy in other treatment areas, the ADCs must be credentialed by the applicable accrediting bodies of their respective professional disciplines. All individuals with an ADC hired after July 1, 2014 must have a Master's Degree. All current individuals employed with an ADC must only address substance abuse treatment issues.

Definition: Behavioral Health Counseling, Professional, Group, is the treatment of behavioral health conditions in which the qualified health care professional through definitive therapeutic communication attempts to alleviate emotional disturbances, reverse or change maladaptive patterns of behavior, and encourages personality growth and development. This process includes ongoing assessment and adjustment of psychotherapeutic interventions. Behavioral Health Counseling, Professional, is a face to face medically necessary service provided to the member in a group setting.

Any therapeutic interventions applied must be performed by a minimum of a Master's level therapist using generally accepted practice of therapies recognized by national accrediting bodies for psychology, psychiatry, counseling, and social work. Alcohol and Drug Counselors (ADCs) are considered to be credentialed to provide Behavioral Health Counseling, Group so long as they have a master's degree in a clinical field, but only when directly addressing Substance Abuse treatment issues.

Documentation: Documentation must indicate how often this service is to be provided. There must be an activity note describing each service/activity provided, the relationship of the service/activity to the identified behavioral health treatment needs, and the member's response

to the service. If there is a Master Service Plan, the intervention should be reflective of a goal on the Plan. The activity note must include the reason for the service, symptoms and functioning of the member, a therapeutic intervention grounded in a specific and identifiable theoretical base that provides framework for assessing change, and the member's response to the intervention and/or treatment.

The documentation must include the signature and credentials of the staff providing the service, place of service, date of service, and the actual time spent providing the service by listing the start-and-stop times.

503.17.3 BEHAVIORAL HEALTH COUNSELING, SUPPORTIVE, INDIVIDUAL

Procedure Code: H0004
Service Unit: 15 minutes
Telehealth: Available
Service Limits: All units must be prior authorized

Prior Authorization: Refer to Utilization Management Guidelines.

Staff Credentials: All new employees hired as of July 1, 2014, must have a bachelor's degree in an approved human services field (see definition of human services degree). Current employees hired before July 1, 2014, and providing supportive counseling must obtain an approved bachelor's degree by July 1, 2018. Staff must be properly supervised according to BMS policy on clinical supervision. The service may be provided in a variety of settings, by appropriately designated, trained and supervised staff.

Definition: Behavioral Health Counseling, Supportive, Individual is a face-to-face intervention provided to a member receiving coordinated care. It must directly support another Behavioral Health service to meet service definition and medical necessity The supportive intervention is directly related to the individual's behavioral health condition. The service is intended to promote continued progress toward identified goals and to assist members in their day-to-day behavioral and emotional functioning. Behavioral Health Counseling, Supportive, Individual, is not a professional therapy service, but must supplement another Medicaid service that is addressing the individual's identified behavioral health needs.

This service must be included in the member's service plan. The objectives of the service must be clearly identified, and reviewed at a minimum of each 90 days and at every critical treatment juncture.

Service Description:

Supportive counseling should:

1) Promote application and generalization of age appropriate skills such as problem solving, interpersonal relationships, anger management, relaxation, and emotional

control as it impacts daily functioning as related to their behavioral health condition; and/or

2) The interventions will assist the individual as he or she explores newly developing skills as well as identifying barriers to implementing those skills that are related to achieving the objectives listed on the service plan.

Supportive counseling should consistently augment other coordinated care services being provided by the agency and if possible, services being provided to the member by other agencies.

Documentation: There must be an activity note describing each service provided, the relationship of the service to a specific objective(s) in the service plan, the signature and credentials of the staff providing the service, place of service, date of service, and the actual time spent providing the service by listing the start-and-stop times. The activity note should describe the member's response to the supportive intervention including any improvement or exacerbation of symptoms.

503.17.4 BEHAVIORAL HEALTH COUNSELING, SUPPORTIVE, GROUP

Procedure Code: H0004HQ
Service Unit: 15 minutes
Telehealth: Available
Service Limits: All units must be prior authorized

Payment Limits: Behavioral Health Counseling, Supportive, Group sessions are limited in size to a maximum of 12 persons per group session.

Prior Authorization: Refer to Utilization Management Guidelines.

Staff Credentials: All new employees hired as of July 1, 2014, must have a bachelor's degree in an approved human services field (see definition of human services degree). Current employees hired before July 1, 2014, and providing supportive counseling must obtain an approved bachelor's degree by July 1, 2018. Staff must be properly supervised according to BMS policy on clinical supervision. The service may be provided in a variety of settings, by appropriately designated, trained and supervised staff.

Definition: Behavioral Health Counseling, Supportive, Group is a face-to-face coordinated care intervention that is directly related to the individual's behavioral health condition. The service is intended to promote continued progress toward identified goals and to assist members in their day-to-day behavioral and emotional functioning. Behavioral Health Counseling, Supportive, Group, is not a professional therapy service, but must supplement another Medicaid service that is addressing the individual's identified behavioral health needs.

This service must be included in the member's service plan. The objectives of the service must be clearly identified, and reviewed at a minimum of each 90 days and at every critical treatment juncture.

Service Description:

Supportive counseling should:

1.) Promote application and generalization of age appropriate skills such as problem solving, interpersonal relationships, anger management, relaxation, and emotional control as it impacts daily functioning as related to their behavioral health condition; and/or

2.) The interventions will assist the individual as he or she explores newly developing skills as well as identifying barriers to implementing those skills that are related to achieving the objectives listed on the service plan.

Supportive counseling should consistently augment other coordinated care services being provided by the agency and if possible, services being provided to the member by other agencies.

Documentation: There must be an activity note describing each service provided, the relationship of the service to a specific objective(s) in the service plan, the signature and credentials of the staff providing the service, place of service, date of service, and the actual time spent providing the service by listing the start-and-stop times. The activity note should describe the member's response to the supportive intervention including any improvement or exacerbation of symptoms.

503.18 SKILLS TRAINING AND DEVELOPMENT

Procedure Code: H2014U4 Skills Training 1:1 by Paraprofessional
H2014U1 Skills Training 1:2-4 by Paraprofessional
H2014HNU4 Skills Training 1:1 by Professional
H2014HNU1 Skills Training 1:2-4 by Professional
Service Unit: 15 minutes
Telehealth: Not Available
Service Limits: All units must be prior authorized

Prior Authorization: Refer to Utilization Management Guidelines.

Definition: Skills Training and Development is a combination of structured individual and group activities offered to members who have basic skill deficits. These skill deficits may be due to several factors such as history of abuse or neglect, or years spent in institutional settings or supervised living arrangements that did not allow normal development in the areas of daily living skills.

The purpose of this service is to provide therapeutic activities focused on Skills Training and Development Services which are elementary, basic, and fundamental to higher-level skills and are designed to improve or preserve a member's level of functioning. Therapeutic activities may be provided to a member in his/her natural environment through a structured program as identified in the goals and objectives described in the service plan. Therapeutic activities include, but are not limited to:

- Learning and demonstrating personal hygiene skills
- Managing living space
- Manners
- Sexuality
- Social appropriateness
- Daily living skills

Where these services are provided in a group context, the group must be limited to four members to each staff person. In any setting, these services target members who require direct prompting or direct intervention by a provider.

Recreational trips, visits to the mall, recreational/leisure time activities, activities which are reinforcements for behavioral management programs, and social events are not therapeutic services and cannot be billed as Skills Training and Development Services.

The following guidelines apply to Skills Training and Development Services provided to young children:

- The service must be age and functionally appropriate and be delivered at the intensity and duration that best meets the needs of individual children.
- The service must not be utilized to provide therapeutic activities for children under the age of five in a group setting for more than four hours per day or more than four days per week.
- Therapeutic activities for young children must promote skill acquisition, include necessary adaptations and modifications, and be based upon developmentally appropriate practice. These services must also be provided in a way that supports the daily activities and interactions within the family's routine.

Skill acquisitions for Skills Training and Development Services for young children include, but are not limited to:

- Adaptive, self-help, safety, and nutritional skills
- Parent-child interactions, peer interactions, coping mechanisms, social competence, and adult-child interactions
- Interpersonal and communication skills
- Mobility, problem solving, causal relationships, spatial relationships, sensorimotor, sensory integration, and cognitive skills.

Documentation: Documentation must contain an activity note describing the service/activity provided and the relationship of the service/activity to objectives in the member's service plan. Documentation must include: the signature and credentials of the staff providing the service,

place of service, date of service, and the actual time spent providing the service by listing the start-and-stop times.

Additionally, if the service is provided in a ratio of 1:2-4, there must be an attendance roster listing those members and staff who participate in each ratio. The roster must be signed (with credential initials) and dated by staff that provided the service. It must not be stored in the main clinical record, but must be maintained and be available for review.

503.19 GENERAL MEDICATION SERVICES

General medication services assist a Medicaid member in accessing behavioral medication or medication services. (Methadone administration or case management is not covered.)

503.19.1 COMPREHENSIVE MEDICATION SERVICES: MENTAL HEALTH

Procedure Code: H2010
Service Unit: 15 minutes
Telehealth: Available
Service Limits: All units must be prior authorized

Payment Limits: This service includes all physician and nurse oversight; therefore, neither Community Psychiatric Support Treatment (procedure code H0036), Pharmacologic Management (E&M Codes), nor any other physician code can be billed on the same day as Comprehensive Medication Services; Mental Health.

Prior Authorization: Refer Utilization Management Guidelines.

Staff Credentials: Physician or Physician Extender

Definition: Comprehensive Medication Services; Mental Health is utilized for Clozaril Case Management or other scheduled, face-to-face assessment of medication compliance or efficacy. These services include obtaining the sample for necessary blood work and the laboratory results for a member by a registered nurse and subsequent evaluation of the results by the physician and/or physician extender as necessary for the medical management of the drug Clozaril/Clozapine or other psychotropic medications which require consistent and intensive monitoring. This is a physician directed service, a physician or physician extender must be on site and available for direct service as needed. Members may be served individually or by a group/clinic model. Methadone is **not** a covered medication.

Members receiving this service are not precluded from receiving other Behavioral Health Rehabilitation Services on the same day (except for those indicated in this service's definition or "Payment Limits") as long as the actual time frames do not overlap.

Documentation: Documentation must contain a written note of the assessment results as completed by the registered nurse, and other laboratory results, and current psychotropic medication dosage with authorized pharmacy name. The documentation must include: place of service, start/stop time and date of service, and signature of qualified staff providing the service.

503.19.2 NON-METHADONE MEDICATION ASSISTED TREATMENT

Non-Methadone Medication Assisted Treatment Guidelines:

West Virginia Medicaid covers non-Methadone Medication Assisted Treatment Services under the following circumstances:

- Individuals seeking opioid addiction treatment for Suboxone®/Subutex® or Vivitrol® for the treatment of opioid/alcohol dependence must be evaluated by an enrolled physician as specified below, before beginning medication assisted treatment.
- An initial evaluation may be completed by a staff member other than the physician however no medication may be prescribed until the physician has completed their evaluation.
- Members seeking treatment must have an appropriate diagnosis for the medication utilized.
- All physicians agree to adhere to the Coordination of Care Agreement (See Attachment A) which will be signed by the member, the treating physician and the treating therapist.
- Each member receiving non-methadone medication assisted treatment must also be involved in individual therapy and/or group therapy as specified in the Coordination of Care Agreement.
- If a change of physician or therapist takes place, a new agreement must be signed. This agreement must be placed in the member's record and updated annually.
- The agreement is not required if the member is receiving services at an agency where both the physician and therapist are employed.

Physician Requirements: The physician responsible for prescribing and monitoring the member's treatment must have a degree as a Medical Doctor and/or Doctor of Osteopathic Medicine. Must be licensed and in good standing in the state of West Virginia. Requirements for the Drug Addiction Treatment Act of 2000 (DATA 2000) must be met by the physician unless indicated by Substance Abuse Mental Health Services Administration (SAMHSA). The physician must be an enrolled WV Medicaid provider.

Therapy Services: Therapy for Non-Methadone Assisted Treatment Patients is the treatment of behavioral health conditions in which the qualified health care professional through definitive therapeutic communication attempts to alleviate emotional disturbances, reverse or change maladaptive patterns of behavior, and encourage personality growth and development. This process includes ongoing assessment and adjustment of psychotherapeutic interventions and may include involvement of family members or others in the treatment process. Behavioral Health Counseling, Professional, is a face to face medically necessary service provided to the member and/or family member however the member must be present for some or all of the service **(See Program Guidelines for Professional Therapy Requirements).**

Any therapeutic intervention applied must be performed by a minimum of a Master's Level Therapist using the generally accepted practice of therapies recognized by national accrediting bodies of:

- Psychology plus possessing 2 years documented experience in the substance abuse field or an Alcohol Drug Counselor (ADC) or higher level accreditation in addictions,
- Psychiatry plus possessing 2 years documented experience in the substance abuse field or an Alcohol Drug Counselor (ADC) or higher level accreditation in addictions,
- Counseling plus possessing 2 years documented experience in the substance abuse field or an Alcohol Drug Counselor (ADC) or higher level accreditation in addictions,
- Social work plus possessing 2 years documented experience in the substance abuse field or an Alcohol Drug Counselor (ADC) or higher level accreditation in addictions

Physician and Professional Therapy services will be provided for individuals utilizing Buprenorphine, Suboxone strips or Vivitrol®. Agencies should be aware that West Virginia law forbids the use of Buprenorphine/Naltrexone in tablet form for the treatment of substance use disorders.

Documentation: Documentation for a coordinated care member must include a Master Service Plan that includes individual therapeutic interventions. The plan must also include a schedule detailing the frequency for which therapy services are to be provided.
A member receiving focused care (Physician and Professional Therapy only) will require a treatment strategy in lieu of a Master Service Plan.

The documentation must include the signature and credentials of the staff providing the service, place of service, date of service, and the objectives utilizing individual therapeutic interventions. The activity note must include the reason for the service, symptoms and functioning of the member, a therapeutic intervention grounded in a specific and identifiable theoretical base that provides framework for assessing change, and the member's response to the intervention and/or treatment.

Program Guidelines:

Note: These are the minimum requirements that are set forth in this manual. Physicians and/or agencies may have more stringent guidelines set forth in their internal policy.

Phase 1: Members in phase 1 (less than 12 months of compliance with treatment) will attend a **minimum** of four (4) hours of professional therapeutic services per month. The four hours must contain a **minimum** of one (1) hour individual professional therapy session per month. Frequency of therapeutic services may increase based upon medical necessity.

Phase 2: Members in phase 2 (12 months or more of compliance with treatment) will attend a minimum of (1) hour of professional therapeutic services per month individual, family, or group. Frequency of therapeutic services may increase based upon medical necessity.

Drug Screens: A minimum of two (2) random urine drug screens per month are required for members in phase 1. A minimum of one (1) random urine drug screen per month is required for members in phase 2. A record of the results of these screens must be maintained in the member's record. The drug screen must test for, at a minimum, the following substances:

- Opiates
- Oxycodone
- Methadone
- Buprenorphine
- Benzodiazepines
- Cocaine
- Amphetamine
- Methamphetamine

Instructions for non-compliance with treatment:
Non-compliance is defined as failure of a drug screen or failure to meet the monthly requirement of therapeutic services.

Members in phase 1 must demonstrate increased treatment frequency after two instances of non-compliance such as: two failed drug screens, two months of not meeting therapeutic requirements, or a combination of one failed drug screen and one month of failed therapeutic requirements. If increase in treatment frequency is not demonstrated consistently within seven days, the patient may be terminated from the program at the physician's discretion. The physician and/or treatment program has the option to allow the patient to reapply to the program after 30 days with proven participation in professional therapies. With three violations within six months, the physician will terminate the individual from the program. The program has the option to allow the patient to reapply after 30 days during which time the patient must demonstrate compliance with professional therapies. An exception is made for pregnant women at physician discretion.

Members in phase 2 will be returned to phase 1 of treatment after one instance of non-compliance (see Phase 1 required timelines).

Individuals discharged for non-compliance and ineligible for re-start must receive information describing alternative methods of treatment and listing contact information for alternative treatment providers as appropriate.

Titration Policy: Titration due to non-compliance is per Physician order when the Medicaid Member is found to be non-compliant during treatment. Titration must be completed within four (4) weeks of the physicians order to stop medication assisted treatment. Vivitrol will be discontinued immediately due to non-compliance.

Any physician that prescribes medication under the Non-Methadone Medication Assistance Treatment must have a plan in place for when they are unavailable to address any medical issues or medication situations that should arise. The Physician must work with another physician that has a DEA-X. The physician taking responsibility for prescribing and monitoring the member's treatment while the primary physician is unavailable must have a degree as a Medical Doctor and/or Doctor of Osteopathic Medicine. Must be licensed, board certified and in good standing in the state of West Virginia. Requirements for the Drug Addiction Treatment Act

of 2000 (DATA 2000) must be met by the physician unless indicated by Substance Abuse Mental Health Services Administration (SAMHSA). The physician must be an enrolled WV Medicaid provider so that treatment is not interrupted for any reason for Medicaid Members participating in this service. If a physician fails to have a plan in place **a hold will be placed on all Rx authorizations**. At no time is a Nurse Practitioner or a Physician's Assistant to prescribe Suboxone.

503.20 COMPREHENSIVE PROGRAMS OF SERVICES

Comprehensive services are all-inclusive and may have only a few services which can be billed separately.

503.20.1 DAY TREATMENT

Procedure Code: H2012
Service Unit: 60 minutes
Telehealth: Not Available
Service Limits: All units must be prior authorized

Payment Limits: Day Treatment services are all-inclusive. This service cannot be billed concurrently with any other Behavioral Health Rehabilitation Service.

Prior Authorization: Refer to Utilization Management Guidelines.

Definition: Day Treatment is a structured program of on-going, regularly scheduled therapeutic activities to increase a member's skill level, produce behavioral change which improves adaptive functioning, and/or which facilitates progress toward more independent living in accordance with member's potential and interest as reflected in the Service Plan Day Treatment Services for adults have a maximum staff-to-member ratio of one staff person per five members. They must be available for five days a week for a minimum of four hours each day.

For children under age five, the maximum ratio is one staff per four children. Day Treatment Services for children under the age of five must not be utilized to provide therapeutic activities for more than four hours per day and no more than four days per week.

Day Treatment Services must only be provided at a site listed on the provider's behavioral health provider license. **Activities provided for the purpose of leisure or recreations are not billable services.**

Day Treatment Services include activities occurring in a therapeutic environment designed to increase the members' skills in specific areas. These activities may consist of small group activities using training modules or structured developmental exercises which present the opportunities for members to practice and use developing skills, or participate in member meetings designed to develop social skills. The intensity, frequency, and type of Day Treatment activities must be appropriate to the age and functional level of the member.

Progress on all objectives must be reviewed at 90 day intervals. Any objective that results in no progress after two consecutive 90 day intervals must be discontinued or modified. Areas of intervention may include but are not limited to the following:

- Self-care skills
- Emergency skills
- Mobility skills
- Nutritional skills
- Social skills
- Communication and speech instruction
- Carryover of physical and/or occupational therapy
- Interpersonal skills instruction
- Functional community skills (such as recognizing emergency and other public signs, money management skills, travel training, etc.)
- Volunteering in community service settings
- Citizenship, rights and responsibilities, self-advocacy, etc.
- Other services necessary for a member to participate in the community settings of his/her choice

Program Staff Requirements:

- The Day Treatment program supervisor must meet one of the educational criteria along with the training and experience criteria listed below:
  - Education Criteria (one of the educational criteria must be met):
    - Licensed Psychologist (or Masters level psychologist under supervision for licensure)
    - Licensed Professional Counselor
    - Licensed Certified Social Worker
    - Licensed Social Worker with a minimum of a Bachelor's degree
    - Registered Nurse
    - Masters or Bachelor's level in education with a specialization to a disability group and teaching certification
    - Occupational/recreational or physical therapist with appropriate state certification and licensure
    - Certified Addiction Counselor with minimum of a bachelor degree
    - Masters degree in a human services field with 20 hours verified of training specific to the target population served
  - Bachelor's level degree in a human services field with at least one year of specific experience providing services to the target population served.
  - Training Criteria
    - Each qualified staff person must have verified training, experience, and skills specific to the targeted population served by the Day Treatment Program

  - Experience Criteria
    - All Bachelor level staff are required to obtain 15 hours every two years of continued education relevant to the targeted population served or the provision of Day Treatment Services

- Staff with a Bachelor's degree in a human service field that does not specifically provide training in developmental disabilities services must meet one of the three following criteria:
  - Completion of specific courses relating to developmental disabilities
  - Completion of staff development in-service or classes relating to developmental disabilities
  - Completion of 15 hours every two years of continuing education relating to developmental disabilities.

- Paraprofessional staff must have, at a minimum, the following qualifications:
  - Be at least 18 years old
  - A high school diploma or Graduate Equivalent Degree
  - Be currently certified in Standard First Aid and Adult/Child Cardiopulmonary Resuscitation
  - Successfully completed Behavioral Health agency training in all of the following criteria:
    - Various aspects of developmental disabilities
    - Instructional techniques necessary to achieve objectives of individual's program plans
    - Health related issues
    - Recognition of abuse and neglect
    - Individuals' rights and confidentiality
    - Awareness of, and sensitivity to, family and individual's needs
    - Non-aversive behavior intervention techniques for those providers who are implementing behavior support and intervention plans

The Behavioral Health Rehabilitation Provider must maintain documentation of training and qualifications.

Documentation:

- Documentation must contain a daily summary of Day Treatment Services that includes the total time in attendance at the Day Treatment Program by listing the start and stop times of each member's attendance, the place of service, and a summary of the member's participation in the services. The attending staff must sign, list their credentials, and date this summary. This documentation is not required to be stored in the main clinical record, but must be maintained and be available for review.
- Documentation must also include an activity note that describes each separate service/activity provided and the relationship of the service to objectives in the service plan. This includes the signature of staff providing the service along with their credentials, place

of service, date of service, and actual time spent providing the service by listing the start and stop times. **Note: All treatment objectives provided in the Day Treatment Program must be included on the member's Master Service Plan (or 90 day update).**

- There must be a daily attendance roster listing those members and staff who participate in each ratio. The roster must be signed (with credential initials) and dated by staff that provided the service. This daily attendance roster must not be stored in the main clinical record, but must be maintained and be available for review.
- There must be monthly notes that summarize progress on the objectives specified in the individual member's service plan or Day Treatment Plan. This documentation must be reviewed at 90 day intervals. The review summaries must be placed in the member's master clinical record. Any objective that results in no progress or desired changes after two consecutive 90 day periods must be discontinued or modified.

Day Treatment Program Certification Process:

Behavioral Health Rehabilitation providers must obtain approval from BMS to provide Day Treatment Services and to bill the West Virginia Medicaid Program for such services. Providers must complete and send the Day Treatment Program Certification form to BMS.

Any changes from an approved original certification must be submitted with corresponding rationale for the changes. A Day Treatment Program must recertify every 2 years. This submission must include a summary of utilization information for the 2 years. Specific content is listed on the Application for Day Treatment Program Certification used by BMS.

503.20.2 COMPREHENSIVE COMMUNITY SUPPORT SERVICES

PROCEDURE CODE: H2015
TELEHEALTH: Unavailable
SERVICE UNIT: 15 minutes
SERVICE LIMITS: All units must be prior authorized

PAYMENT LIMITS: Comprehensive Community Support services are all-inclusive. This service cannot be billed concurrently with any other Behavioral Health Rehabilitation Service.

PRIOR AUTHORIZATION: Refer to Utilization Management Guidelines.

DEFINITION: Comprehensive Community Support is a long-term, preventive, and rehabilitative service designed to serve members with severe and persistent mental illness whose quality of life and level of functioning would be negatively impacted without structured, ongoing skill maintenance and/or enhancement activities. This is a structured program of ongoing, regularly scheduled activities designed to maintain a member's level of functioning, prevent deterioration which could result in the need for institutionalization, and/or facilitate a member's return to their previously demonstrated level of functioning. This may be accomplished through skill maintenance and/or development and behavioral programming designed to maintain or improve adaptive functioning. This service emphasizes community-based activities.

Comprehensive Community Support Services are to be provided in accordance with the member's potential and interests as reflected in the Master Service Plan. The intensity, frequency and type of Comprehensive Community Support activities must be appropriate to the age and functional level of the member, and individualized to meet their own specific needs and future plans. Critical skills identified as essential to maintain placement in the community and preventing hospitalization will also be targeted for skill maintenance/enhancement.
Examples of skill areas (if the member has the specific need) include:

- Health Education - first aid, pedestrian and passenger safety, home safety
- Meal Preparation - nutrition, menu planning, cooking
- Personal Hygiene - grooming, oral and general body care
- Utilization of Community Resources - church groups, clubs, volunteer work, getting and keeping entitlements, learning to access recreational opportunities, Internet and computer skills, etc. [Note: Recreational activities themselves (including trips to a mall, activities which may be reinforcement for a behavioral program, and social events) are not billable under this code.]
- Interpersonal Skills
- Problem Solving
- Communications - assertiveness, correspondence, initiating conversation, giving and taking compliments and criticism, body language, active listening, etc.
- Stress Reduction - relaxation techniques, biofeedback, etc.
- Interpersonal relationships with peers, caregivers, family, etc.
- Interaction with strangers
- Social Skill Development and Coping Skills
- Social Competence - social skill training, presenting opportunities for social interaction
- Understanding Mental Illness - medication usage, course of the illness, symptom management, coping mechanisms, normalization, etc.

This service has a maximum staff-to-member ratio of one staff person per 12 members when provided at a licensed site; and a maximum staff-to-member ratio of one staff person to eight members when provided in a community setting. The amount of Comprehensive Community Support provided is individually determined and should not automatically reflect the program's operating hours. Members eligible for Comprehensive Community Support do not meet medical necessity for Day Treatment services. Comprehensive Community Support services must be based at a site listed on the agency's behavioral health license. Training may occur onsite or in community settings.

DOCUMENTATION:

- All treatment objectives addressed in a Comprehensive Community Support Program must be included on the member's Individual Master Service Plan.
- A daily attendance roster reflecting all participants (with start-and-stop times of participation specific to each member) must be maintained and available for review at the community treatment site. The roster must be signed and dated by all staff that have been providing Comprehensive Community Support Services, and must list staff start-and-stop times. The

daily attendance roster must note the location of the services/activities and actual staff/member ratios. It is not required to be maintained in the master clinical record, but must be maintained in accordance with Medicaid records retention policy. After one year, daily attendance rosters may be stored at the provider's record retention facility.

- Documentation for each daily episode of Comprehensive Community Support must include a description of the service/activity provided and the relationship of the service/activity to objectives in the service plan. Progress on each objective in the service plan being addressed must be noted. Documentation must include the date of service, start-and-stop time spent for each specified activity, and the location of the service/activity. Daily documentation must become part of the master clinical file.
- When services are reviewed by the treatment team as part of the service planning process, each objective being implemented in the Comprehensive Community Support Program must be addressed. Documentation must include progress toward objectives, problems that impeded progress, and provide a decision to continue the same plan, or adjust the plan to meet the changing needs of the member. Additionally, all documentation requirements for Mental Health Service Plan Development (procedure code H0032) must be satisfied.

STAFF QUALIFICATIONS:

- The Comprehensive Community Support program site must be supervised by a Qualified Mental Health Professional (QMHP) with a minimum of a Bachelor's degree and experience working with individuals with serious and persistent mental illness. The full-time-equivalent hours in the agency's job description for the supervisor must reflect the number of hours expected supervising the program If the supervisor is included as part of the direct care ratio, the hours spent supervising must be outside of the direct care hours provided by the supervisor.
- Paraprofessional staff must possess at a minimum a high school diploma and have verified training, experience and skills specific to working with individuals with serious and persistent mental illness.

COMPREHENSIVE COMMUNITY SUPPORT PROGRAM CERTIFICATION PROCESS:

- All Comprehensive Community Support programs require approval through the completion of the Comprehensive Community Support Certification Form. The application is reviewed and subject to approval by the Bureau for Medical Services.
- New Comprehensive Community Support Programs must submit the Comprehensive Community Support Certification Form to BMS for approval. All programs must be based at a site listed on the provider Behavioral Health License. Billing may commence after receiving initial Bureau approval.
- After initial approval, a desk review and/or an onsite review will be conducted to validate the approval. BMS reserves the right to review any program at any time for the purpose of certifying or de-certifying a program. Programs not receiving approval may appeal the decision as per policy contained in Chapter 800 (A), Medicaid regulations.
- Any changes from an original certification must be submitted with corresponding rationale for the changes. See Attachment C.

503.21 CRISIS SERVICES

503.21.1 CRISIS INTERVENTION

Procedure Code: H2011
Service Unit: 15 minutes- 16 units per 30 days
Telehealth: Not Available
Service Limits: Refer to Utilization Management Guidelines.

Prior Authorization: Refer to Utilization Management Guidelines

Staff Credentials: Bachelor's degree in Human Services with specific documented training on crisis intervention

Definition: Crisis Intervention is an unscheduled, direct, face-to-face intervention with a member in need of psychiatric interventions in order to resolve a crisis related to acute or severe psychiatric signs and symptoms. Depending on the specific type of crisis, an array of treatment modalities is available. These include, but are not limited to, individual intervention and/or family intervention. The goal of crisis intervention is to respond immediately, assess the situation, stabilize and create a plan as quickly as possible. This service is not intended for use as an emergency response to situations such as members running out of medication or housing problems. Any such activities will be considered inappropriate for billing of this service by the provider.

Documentation: Documentation must contain an activity note containing a summary of events leading up to the crisis, the therapeutic intervention used, and the outcome of the service. The activity note must include the signature and credentials of the staff providing the intervention, place of service, date of service, and the actual time spent providing the service by listing the start-and-stop times.

A physician, physician extender, supervised psychologist or licensed psychologist must review all pertinent documentation within 72 hours of the conclusion of the crisis and document their findings. The note documenting this review must include recommendations regarding appropriate follow up and whether the treatment plan is to be modified or maintained, the signature and credentials of the physician, physician extender, supervised psychologist or licensed psychologist and the date of service. The signature will serve as the order to perform the service. If a supervised psychologist is utilized to provide approval for this service, the supervised psychologist must have completed an appropriate training in crisis intervention and systematic de-escalation.

Providers must maintain a permanent clinical record for all members of this service in a manner consistent with applicable licensing regulations.

Exclusions

Listed below are activities that are excluded from being performed through the Crisis Intervention Service Code

- Response to a Domestic Violence Situation
- Admission to a Hospital
- Admission to a Crisis Stabilization Unit
- Time awaiting for Transportation or the transportation itself
- Removal of a minor or an incapacitated adult from an abusive or neglectful household.
- Completion of certification for involuntary commitment.

503.21.2 COMMUNITY PSYCHIATRIC SUPPORTIVE TREATMENT

Procedure Code: H0036
Service Unit: 15 minutes
Telehealth: Available – for medical services provided by a physician or physician extender only. Daily face to face meeting with physician must be in person
Service Limits: 288 units per six months

Payment Limits: No payment will be made for any other Behavioral Health Rehabilitation Services, except for Targeted Case Management (procedure code T1017). Billing for Community Psychiatric Supportive Treatment cannot exceed 48 units in a 24 hour period (midnight to midnight) and must be utilized on consecutive days.

Prior Authorization: Refer to Utilization Management Guidelines.

Definition: Community Psychiatric Supportive Treatment is an organized program of services designed to stabilize the conditions of a person immediately following a crisis episode. An episode is defined as the brief time period of days in which a person exhibits acute or severe psychiatric signs and symptoms. (If a Medicaid member experiences more than one crisis, each crisis is considered a separate crisis episode). This physician driven service is intended for persons whose condition can be stabilized with short-term, intensive services immediately following a crisis without the need for a hospital setting and who, given appropriate supportive care, can be maintained in the community.

Due to the comprehensive nature of this service, no other services (other than Targeted Case Management) may be reimbursed when Community Psychiatric Supportive Treatment is on-going. These services are not intended for use as an emergency response to situations such as members running out of medication, or loss of housing. Any such activities will be considered as non-reimbursable activities. Since this service is intended to address an episode, it must be rendered on consecutive days of service. Community Psychiatric Supportive Treatment cannot be rendered on alternate days such as Tuesday and Thursday or only on Mondays, Wednesdays, and Fridays; with other days of non-service (such as holidays or weekends) or other intervening services interrupting the episode. Community Psychiatric Supportive Treatment is an acute and short-term service.

Community Psychiatric Supportive Treatment Programs must be available seven days a week to anyone who meets the admission criteria. Availability may include mornings, afternoons, evenings, etc. There must be a minimum of two staff present onsite at all times Community Psychiatric Supportive Treatment is provided, one of which must have at least high school degree or equivalency, trained in systematic de-escalation, and must have training related to the targeted population being treated (i.e. substance abuse, mental health). The other staff must have an LPN or higher degree in the medical field (See Definitions for further clarifications). Additional staff must be added as necessary to meet the needs of increased utilization and/or increased level of need. Staffing must be sufficient to assure that each member receives appropriate individual attention, as well as assure the safety and welfare of all members.

The program must have access to a psychiatrist/physician/physician extender to provide psychiatric evaluations and medication orders at all times.

Much of the structured, staff-directed activity or face-to-face activity which has been documented in an activity note can be considered billable time. Some examples of billable versus non-billable time are as follows:

- Billable activities:
  - Structured, staff-directed activities such as therapies and counseling
  - Time spent by staff in the process of interviewing/assessing members whether for social history, discharge planning, psychological reports, etc.
  - Time spent in treatment team meetings or staff consultation
  - Time spent by staff monitoring one member when specifically ordered by the physician/psychiatrist for reasons of clinical necessity (The physician/psychiatrist's order must state the frequency and duration of the time to be spent monitoring.)
  - Routine observation/monitoring by staff ordered by physician/psychiatrist limited to 10 minutes per hour (can include member's sleep, meal, grooming time). Routine observation time cannot exceed two hours per day. The physician must document the need for the observation as related to the Medicaid Member's qualifying behavioral health condition/crisis episode.
- Non-billable activities:
  - Activity which is recreation or leisure in nature, such as basketball, exercise, reading a newspaper, watching television and or videos
  - Social activity such as talking with other members, visiting with family members or significant others, releasing the member from the program on pass
  - Time in which the member is sleeping, eating, grooming (except as outlined above).

The following elements are required components of Community Psychiatric Supportive Treatment:

- Comprehensive Psychiatric Evaluation at intake to contain documentation of:

A. Reason for admission/presenting problems: Purpose of evaluation is to assess symptoms in order to determine need for crisis stabilization services, determine need for changes to medication regimen, and develops an initial plan of care as appropriate.
B. Presenting problems/reason for the evaluation including list of any collateral interviews conducted
C. History and description of present illness
D. Past psychiatric history including description of any past suicidal or homicidal behavior or threats
E. History of alcohol and other substance use including longest period of sobriety, history of prior treatment attempts, and medical risks associated with detoxification as appropriate
F. General medical history including list of current medications, current medical providers, and past treatment attempts (may be completed by ancillary staff person)
G. Developmental, psychosocial and sociocultural history (may be completed by ancillary staff person)
H. Occupational and military history (may be completed by ancillary staff person)
I. Legal history (may be completed by ancillary staff person)
J. Family history (may be completed by ancillary staff person)
K. Review of systems (sleep, appetite, pain levels, other systems directly linked to the patient's psychiatric symptoms)
L. Focused Physical examination including appearance and vital signs, musculoskeletal review of gait and station and description of any specific physical anomalies and allergies
M. Mental status examination including assessment of insight, judgment, and general cognitive functioning
N. Assessment of daily functionality and ADLs (may be completed by ancillary staff person)
O. Diagnostic conclusions and prognosis
P. Treatment recommendations including clear statement of justification for recommendation for admission to CSU and reasoning for elimination of lesser level of care.

- Daily psychiatric review and examination
- On going psychotropic medication evaluation and administration
- Intensive one-on-one supervision, when ordered by a physician/psychiatrist
- Individual and small group problem solving/support as needed
- Therapeutic activities consistent with the member's readiness, capacities, and the service plan
- Disability-specific interdisciplinary team evaluation and service planning before discharge from Community Psychiatric Supportive Treatment. Discharge service planning must include consideration of the antecedent condition that led to admission to Community Psychiatric Supportive Treatment.
- Psychological/functional evaluations specific to the disability population where appropriate and;

- Family intervention must be made available to the families of members as appropriate Community Psychiatric Supportive Treatment must be provided at a site licensed by WVDHHR for the delivery of Behavioral Health Rehabilitation Services.

ADMISSION AND CONTINUED STAY CRITERIA:

The criteria for prior authorization to exceed service limits for Community Psychiatric Supportive Treatment Services are organized around three primary areas that determine the need for this service:

- Acute Psychiatric signs and symptoms
- Danger to self/others
- Medication management/active drug or alcohol withdrawal

Additionally, criteria for continued stay have been devised so that those members who still require Community Psychiatric Supportive Treatment Services can be authorized to continue services.

To receive or continue to receive Community Psychiatric Supportive Treatment Services, the following corresponding criteria must be satisfied.

- **PSYCHIATRIC SIGNS AND SYMPTOMS**

  Admission Criteria (Both criteria must be met)

  - The member is experiencing a crisis due to a mental health condition or impairment in functioning due to acute psychiatric signs and symptoms. The member may be displaying behaviors and/or impairments ranging from impaired abilities in the daily living skills domains to severe disturbances in conduct and emotions. The crisis results in emotional and/or behavioral instability that may be exacerbated by family dysfunction, transient situational disturbance, physical or emotional abuse, failed placement, or other current living situation;

  - The member is in need of a structured, intensive intervention because less restrictive services alone are not adequate or appropriate to resolve the current crisis and meet the member's needs based on the documented response to prior treatment and/or interventions.

  Continued Stay Criteria (One of the three criteria must be met)

  - The acute psychiatric signs and symptoms and/or behaviors that necessitated the admission persist at the level documented at admission and the treatments and interventions tried are documented. A modified care plan must be developed which documents treatment methods and projected discharge date based on the change in the care plan.

- New symptoms and/or maladaptive behaviors have appeared which have been incorporated into the care plan and modified the discharge date of the member. These new acute psychiatric symptoms and/or maladaptive behaviors can be treated safely in the Community Psychiatric Supportive Treatment setting, and a less intensive level of care would not adequately meet the member's needs.

- Member progress toward crisis resolution and progress clearly and directly related to resolving the factors that warranted admission to Community Psychiatric Supportive Treatment have been observed and documented, but symptoms and impairments continue to warrant this level of care.

- **DANGER TO SELF/OTHERS**

  Admission Criteria

  - The member is in need of an intensive treatment intervention to prevent hospitalization (e.g. the member engages in self-injurious behavior but not at a level of severity that would require inpatient care, the member is currently physically aggressive and communicates verbal threats, but not at a level that would require hospitalization).

  Continued Care Criteria (One of the three criteria must be met)

  - Member progress toward crisis resolution and progress clearly and directly related to resolving the factors that warranted admission to Community Psychiatric Supportive Treatment have been observed and documented, but symptoms and impairments continue to warrant this level of care.
  - It has been documented that the member has made no progress toward treatment goals nor has progress been made toward alternative placement (less restrictive or more restrictive care), but the care plan has been modified to introduce further evaluation of the member's needs and other appropriate interventions and treatment options.
  - New symptoms and/or maladaptive behaviors have appeared which have been incorporated into the care plan and modified the discharge date of the member. These new symptoms and/or maladaptive behaviors can be treated safely in the Community Psychiatric Supportive Treatment setting and, a less intensive level of care would not adequately meet the member's needs.

- **MEDICATION MANAGEMENT/ACTIVE DRUG OR ALCOHOL WITHDRAWAL**

  Admission Criteria (Either criteria must be met)

  - The member is in need of a medication regimen that requires intensive monitoring/medical supervision or is being evaluated for a medication regimen that requires titration to reach optimum therapeutic effect.
  - There is evidence that the member is using drugs that have produced a physical dependency as evidenced by clinically significant withdrawal symptoms which require medical supervision.

Continued Stay Criteria (One of the three criteria must be met)

- Member progress toward crisis resolution and progress clearly and directly related to resolving the factors that warranted admission to Community Psychiatric Supportive Treatment have been observed and documented, but treatment goals have not been reached.
- It has been documented that the member has made no progress toward treatment goals nor has progress been made toward alternative placement (less restrictive or more restrictive care), but the care plan has been modified to introduce further evaluation of the member's needs and other appropriate interventions and treatment options.
- New symptoms and/or maladaptive behaviors have appeared which have been incorporated into the care plan and modified the discharge date of the member. These new symptoms and/or maladaptive behaviors can be treated safely in the Community Psychiatric Supportive Treatment setting, and a less intensive level of care would not adequately meet the member's needs.

- **DOCUMENTATION**

  There must be a permanent clinical record consistent with licensing regulations and agency records/policies for each member-provided Psychiatric Supportive Treatment Service. Items to be included in the clinical record are written orders (for each crisis episode) from the physician/psychiatrist for the Community Psychiatric Supportive Treatment Program, medication orders for each member as indicated, medication administration records when medications are administered, and the member's individualized service plan. See below for Documentation Requirement.

  Daily Documentation criteria:

- Number of treatment hours per day
- Summary of the member's status – need for continued CSU
- Member's Service participation
- Symptoms related to the crisis that are being addressed
- If admitted for detox; vitals and use of nationally recognized withdrawal protocol
- Services Provided:

Individual Therapy – notes at a minimum need to contain:

- Addressed specifics of admission criteria to substantiate appropriate level of care
- Substantiation of daily/appropriate treatment services
- Intervention

- Relate back to treatment plan
- Member's response

Group Therapy – notes at a minimum need to contain:

- Addresses specifics of admission criteria to substantiate appropriate level of care
- Substantiation of daily/appropriate treatment services
- Intervention
- Relate back to treatment plan
- Member's response

Family Therapy – notes at a minimum need to contain:

- Addresses specifics of admission criteria to substantiate appropriate level of care.
- Substantiation of daily/appropriate treatment services.
- Intervention
- Relate back to treatment plan.
- Member's response.

Individual Supportive Counseling: notes at a minimum need to contain:

- Addresses specifics of admission criteria to substantiate appropriate level of care.
- Substantiation of daily/appropriate treatment services.
- Intervention
- Relate back to treatment plan.
- Member's response.

Group Supportive Counseling: notes at a minimum need to contain:

- Addresses specifics of admission criteria to substantiate appropriate level of care.
- Substantiation of daily/appropriate treatment services.
- Intervention
- Relate back to treatment plan.
- Member's response.

503.22 ASSERTIVE COMMUNITY TREATMENT (ACT)

Procedure Code: H0040
Service Unit: 24 hours

Telehealth: Available for the following services Behavioral Health, Supportive, Individual and Group; Behavioral Health Counseling, Professional, Individual and Group; Mental Health Assessment by Non-Physician; Psychiatric Diagnostic Evaluation (No Medical Services); Psychiatric Diagnostic Evaluation with Medical Services; medication management via E/M codes; and Screening by a Licensed Psychologist.

Service Limits: One per day - All units must be prior authorized

Payment Limits: Payment for ACT services is all-inclusive. GT Modifier does not need to billed when Telehealth is utilized. Documentation should reflect that Telehealth was utilized.

No payment will be made for ACT services when the member is hospitalized for a psychiatric condition, or receiving Community Psychiatric Supportive Services (except for 84 hours per year). However, the ACT Team must maintain contact and be part of the hospital discharge efforts. No Psychiatric services other than 90887, Personal Care Services (procedure codes T1001, T1002, or T1019) or H0036 Community Psychiatric Supportive Services up to 84 hours per year may be billed for members receiving ACT services; however ACT cannot be billed concurrently with Community Psychiatric Supportive Services.

Prior Authorization: Refer to Utilization Management Guidelines.

Definition: ACT is an inclusive array of community-based rehabilitative mental health services for members with serious and persistent mental illness who have a history of high use of psychiatric hospitalization and/or crisis stabilization and therefore, require a well-coordinated and integrated package of services, provided over an extended duration, in order to live successfully in the community of their choice. Eligible members will have a primary mental health diagnosis and may have co-occurring conditions including mental health and substance use or mental health and mild intellectual disability. ACT is a very specialized model of treatment/service delivery in which a multidisciplinary team assumes ultimate accountability for a small, defined caseload of individuals. ACT is a unique treatment model in which the majority of direct services are provided by the ACT team members in the member's community environment.

ACT combines clinical, rehabilitation, supportive, and case management services, providing direct assistance for symptom management, as well as facilitating a more supportive environment with direct assistance in meeting basic needs and improving social, family, and environmental functioning.

Only qualified teams, certified by the Bureau of Behavioral Health and Health Facilities and the Bureau for Medical Services, may provide ACT services. Certification of the team must be renewed, following initial approval, at Bureau-designated intervals, or with any changes in personnel. All currently certified ACT Teams must submit for recertification by January 1, 2015.

Purpose: ACT is a service designed to achieve the following treatment goals:

- To reduce psychiatric hospitalization for members with serious and persistent mental illnesses;
- To provide an established clinical relationship with the member and his or her natural support system in order to promote continuity of care;
- To compose and implement a mutually agreed service plan promoting success and satisfaction in the community;
- To increase the cognizance of the member to the need for medication compliance, the nature of his or her disease, and early warning signs of psychiatric difficulty so as to maximize his or her functioning and independence in the community;
- To improve successful integration into the larger community through non-traditional approaches to broadening a member's social support base;
- To ensure that the member's basic needs for sustaining community living are addressed, promoting acquisition of independent levels of adult living skills whenever possible; and
- To maintain member engagement in treatment by providing supportive behavioral health and skill development services in a community environment so as to maximize generalization of learning.

Member Participation Criteria: Members eligible to become a recipient of ACT services must meet one of the following criteria:

- Three or more hospitalizations in a psychiatric inpatient unit or psychiatric hospital in the past 12 months;
- Five or more hospitalizations in a psychiatric inpatient unit, psychiatric hospital, or Community Psychiatric Supportive Treatment Program in the past 24 months; or
- 180 days total length of stay in a psychiatric inpatient unit or psychiatric hospital within the past 12 months.

The Bureau for Medical Services may authorize ACT services for members within other specific target populations who exhibit medical necessity for the service (e.g., persons who are homeless and who have a severe and persistent mental illness, members with a mental illness who have frequent contact with law enforcement or the criminal justice system, or members with co-occurring mental illness and chemical addiction who require consistent monitoring).

A member must have an eligible diagnosis as determined by BMS' contracted authorization agent and be in an eligible disability group of Serious and Persistent Mental Health Disorders or co-occurring Mental Health and Substance Abuse Disorders or co-occurring Mental Health Disorders and Mild Intellectual Disability.

An ACT Team may serve members on an on-going basis following authorization/re-authorization of eligibility based upon continuing need and clinical appropriateness of ACT services.

ACT Team Composition And Staff Qualifications: The ACT Team must include a multidisciplinary staff mix, including mental health professionals and substance abuse treatment professionals. The team is composed at a minimum of a psychiatrist or board certified physician

with behavioral health experience and five other staff persons. The additional five (minimum) staff composing the ACT Team must include:

1. One full time Team Leader/Supervisor with three (3) years' experience in behavioral health services, two (2) of which must be in a supervisory capacity, and a master's degree and valid West Virginia license in Counseling, Social Work, Psychology, a Supervised Psychologist. A registered nurse may serve as a team leader if the team has an additional full time registered nurse.

2. One full time Registered nurse with one year of psychiatric experience;

3. Two (2) full time staff at the Master's level in Counseling, Social Work, or Psychology and two (2) years' experience in behavioral health services. At least one of these individuals must have experience in substance abuse assessment/treatment and/or vocational rehabilitation; and

4. One full time staff with a Bachelor's degree in Social Work or an alternative Behavioral Science, with one year of behavioral health experience.

ACT Weekend and Holiday Requirements: Staff working as weekend and holiday coverage may be on a rotating basis. Staff must be sufficient to meet ACT Members' needs including, but not limited to, medication delivery, crisis response – via phone or face to face, therapeutic services to promote stability. The ACT staff individual on call must review each member with the ACT Team Leader or the team leader's designee, which must be a master's level staff or RN on the certified ACT Team each weekend day and holiday. The physician or physician extender must be accessible for medication adjustments or any issues that arise that would indicate the need for a physician or physician extender to be involved.

Role Of The Physician: The physician must be actively involved with members and the team. He/she must participate in the daily ACT Team meetings, though he or she may do so by means of tele-video conferencing when unable to be physically present. A suitably trained and experienced physician extender (Advanced Practice Registered Nurse or Physician's Assistant) under the direct supervision of the team physician may participate on the team in lieu of the physician; however the substitution on team meetings must be documented. The physician and/or physician extender must physically attend at least one team meeting per week.

The physician must physically participate in the annual service planning session, and must demonstrate direct and on-going involvement with the ACT team and ACT members.
The physician or physician extender must be actively involved with the team and the members for a minimum of 16 hours per week.

Caseload Mix And Ratios: The certified ACT Team must always have the required minimum staffing unless temporary approval is obtained from the Bureau for Medical Services to operate the team in the absence of a member.

The maximum number of members served by an approved ACT Team is 120.

The team must preserve a staff/member ratio of at least 1:10 (i.e., one staff person to ten members, not counting the Physician or physician extender) when the number of ACT members served by the team exceeds 50.

With the exception of the team physician and physician extender, if any, the ACT Team cannot serve non-ACT members.

ACT Service Elements: ACT is a Recovery oriented program**. "**"Recovery is a process of change whereby individuals work to improve their own health and wellness and to live a meaningful life in a community of their choice while striving to achieve their full potential " (SAMHSA, 2012).

The ACT Team is required to directly provide the following combination of case management and rehabilitation services:

- Assertive outreach designed to identify and engage individuals that meet clinical guidelines and could benefit from the program;
- Sustained effort to engage the member in treatment, medication education and prompting, and skill development activities in order to facilitate more integrated and successful community living;
- Comprehensive and appropriate assessment of medical, environmental and social needs;
- Maintenance of on-going involvement with the member during stays in environments such as inpatient care, convalescent care facilities, community care hospitals, or rehabilitation centers in order to assist in transition back to a community placement;
- Member-specific advocacy;
- Assistance with securing basic necessities (e.g., food, income, safe and stable housing, medical and dental care, other social, educational, vocational, and recreational services);
- Facilitation of maintenance of living arrangements during periods of institutional care. The member and his/her support system remains responsible for these expenses;
- Counseling, problem solving, and personal support;
- Psychiatric services and medication management;
- Assistance in obtaining necessary primary care services;
- Facilitation and improvement of daily living/community living skills;
- Behavior management as necessary and appropriate;
- 24-hour crisis response for ACT members;
- Transportation or facilitation of transportation to necessary community and Medicaid services as specified on the treatment plan;
- Representative payee-ship or facilitation of representative payeeship when needed;
- Collaboration with family/personal support network; and
- Assistance with preparation of advanced psychiatric directives.

Because ACT is a community focused treatment modality, a minimum of 75 percent of service must be delivered outside of program offices.

ACT Fidelity Indicators:

- The team works with a small caseload (10 to one preferred when caseloads exceed 50);
- The team is cooperative and collaborative. Team members are familiar with and work with all clients;
- Program meeting occurs daily other than federally recognized holidays;
- The team leader is a practicing clinician providing services at least 50% of the time;
- Program staff remain consistent over time; turnover is low;
- The program operates at 95% or more of full staffing on average over a 12 month period;
- The physician/physician extender works at least 16 hours per week on teams with 50 clients, proportionally more on larger teams;
- Each team has one full time registered nurse in a program of 50 clients;
- At least one staff member has training or certification in working with members with substance abuse issues;
- The program is of sufficient size to provide consistently the necessary staffing, diversity, and coverage (minimum 6 members);
- The program has explicitly defined admission criteria that address a clearly defined population;
- No more than 6 new members are admitted per month on average;
- The program is required to have available the following five services: medication management, counseling/psychotherapy, housing support, substance abuse treatment, and employment/rehabilitative services;
- The program provides 24 hour services for crisis intervention;
- The team is actively involved in admission in 95% or more of hospital admissions. Admission involvement must become active as soon as the team becomes aware that the member is at risk of being admitted or has been admitted without the team's prior knowledge to an institutional environment, including Crisis Stabilization Units. Active involvement is demonstrated by regular contact with the institutional treatment team, exchange of information as necessary, contact with the member as possible and appropriate, and interaction with family members as necessary and desired by the member;
- The team participates in discharge planning for 95% of members, providing assistance to the institutional team with housing, benefits, medication appointments, etc.;
- All members are served on a time-unlimited basis with fewer than 5% of the population expected to graduate annually;
- 75% of member contacts occur outside the clinic setting;
- The team actively pursues engagement of treatment resistant members as described in the policy described below under "Discharge Criteria";
- The program is aggressive in assuring engagement and uses outreach and contacts with corrections and homeless programs to engage members;

- Each member receives an average of two face to face contacts with a team member per week;
- Each member receives at least four contacts per week of any type;
- With or without the member present, the team provides support and skills for the member's support network: family, landlords, employers, etc.;
- One or more team members provides direct treatment and substance abuse treatment for members with substance use disorders;
- The program uses group modalities as a treatment strategy for people with substance use disorders;
- The program uses a treatment model that is non-confrontational, follows behavioral principles, considers interactions of mental illness and substance abuse and has gradual expectations of abstinence; and
- Stable recovering members may be involved as members of the team providing direct services.

Medication Delivery And Monitoring: If a provider delivers medications to a member on a regular basis, the provider must have a policy that ensures that:

Delivery date, time, person receiving and name of medication delivered is documented, including amount delivered (the list of medications and dosages may be contained in the member record however each delivery must be logged either in the member record or in a central location);

If there are children or other incapacitated adults in the home, medications are at least initially stored properly in a secure location;

If medications are delivered to a member at a location other than the home, the medications must be delivered in a manner that ensures the confidentiality of the member and shields the nature of the items delivered; and

A system of monitoring the member's compliance with consumption of medications is created with the agreement and participation of the member. The nature of the monitoring system will be individualized and designed by the clinical team in conjunction with the member. This system may consist of the member logging consumption of his or her own medications. The member has the right to refuse participation in a monitoring system however the provider may then refuse to deliver medications to the member's residence and/or make alternative arrangements for the provision of medications if clinically appropriate.

Documentation: The program must have a valid authorization for service from the Bureau for Medical Services to bill for ACT services.

At entry into the program, there must be documentation of a comprehensive assessment and a recommendation by a qualified professional that ACT services are necessary and appropriate. The team must develop an initial service plan for the ACT member within seven days of admission into the program. The initial plan must authorize the services to be provided to the member until the comprehensive plan for the member is complete.

The ACT Team, including the member, must amend or develop a comprehensive service plan for the member within 30 days. The plan must describe goals and specific objectives the member hopes to achieve with the assistance of ACT. The comprehensive plan must identify the services to be provided under ACT and must be approved by the member, as signified by his or her signature.

The team may elect to create a comprehensive plan upon admission into the program without completing an initial and subsequent comprehensive plan, however the on-going plan must reflect amendments made in services, goals and/or objectives as the team moves forward. The service plan is a fluid document which must be amended as the needs of the member change or are newly recognized.

The record must sufficiently document assessments, service plans, and the nature and extent of services provided, such that a person unfamiliar with the ACT Team can identify the member's treatment needs and services rendered.

The comprehensive plan must identify the Qualified Team that is providing ACT to the member. The certification of the team and a roster of members assigned to an ACT Team must be available for review.

All staff contacts with members of the ACT team must be documented. Each entry needs to include date and place of the contact, the purpose, content and outcome of the contact, the start and stop times of the contact, and the signature, credentials, and title of the individual providing the service.

At minimum the documentation must include the following:

1. A log documenting the discussion of each member in the daily team meeting (except weekends and federal holidays);
2. A weekly summary of member status;
3. 90 day reviews of the comprehensive plan and/or documentation of team meetings and revisions of comprehensive plans at the time of critical treatment junctures; and
4. Documentation of each member contact as described above.

Each member enrolled in ACT must receive a minimum of two face-to-face contacts with one or more ACT team members per week. Documentation must provide evidence of the delivery of at least four separate ACT services per week (e.g., four days of medication delivery is inappropriate and insufficient to meet this standard), but so long as the two contacts required for face to face is met, the service may be indirect, telephonic, collateral, etc. It is permissible for a member to receive more than one service during one member contact, however the documentation must clearly describe the two or more services provided.

The 90 day review required for each ACT participant must summarize progress towards achieving the service objectives and describe problems that impeded progress towards meeting objectives. If a member is clearly not making progress toward achieving an objective after 90

days, the team must either amend the objective or describe why the objective was not amended. An objective on an ACT plan may include activities designed to preserve stability in the community, rather than requiring active progress towards meeting an objective.

A team may maintain an "inactive roster" as described below. The roster must include a list of each ACT recipient who has not received services in the past 30 to 60 days and describe why the member is included on the roster. Members must be discharged from ACT if they have been on the "inactive roster" more than 60 days.

Discharge Criteria:

A provider may discharge an ACT recipient of services for the following reasons:

1. The member no longer meets eligibility criteria;
2. The member has met all program goals and is at maximum level of functioning;
3. The member has moved outside of the ACT team's geographic area;
4. The member is no longer participating or refuses services regardless of the ACT team's efforts at engagement; and/or
5. By virtue of diagnosis or intensity of service needs, the member would be better served by an alternative program of care.

The team must document at least weekly attempts to locate the member for 30 days before a discharge should be considered. Attempts should not consist solely of telephone calls but should include at least weekly visits to the location the member was last known to live and telephone calls or visits to significant others for the member.

If a member consistently refuses to participate or cannot be located, the provider has the option to place the member on an "inactive roster" after 30 days of no contact, preserving the authorization for service. Providers must not bill ACT services for members on an inactive roster. This option should be utilized primarily when the member is familiar to the team and has a history of being unavailable or noncompliant for periods of time, but returning to service regularly. At 30 days of lack of contact or refusal to participate, the provider must make a decision as to whether to place the individual on the inactive roster, or discharge him or her. If the member is on the inactive roster for 60 days with no contact and/or continued refusal of services, the agency must discharge the member from ACT.

The provider is required to notify the Contracted Agent within 72 hours of discharge of an ACT participant in order to terminate the authorization for services.

Billing for ACT services is permissible only when active treatment is occurring based on a current service plan. No billing may be submitted for a member enrolled in ACT who has not received services from ACT Team staff for a period of seven days or more. When services resume, billing may resume.

ACT Team Certification Process:

- All ACT Teams require initial approval through the completion of the ACT Team Certification form. The certification form is reviewed and subject to approval by the Bureau for Medical Services (BMS) and the Bureau of Behavioral Health and Health Facilities (BHHF). Certification is specific to the individuals in a team, the team composition, and qualifications submitted. Specific certification elements are described in the BMS application form for the ACT Certification.
- Certification packet may be requested from BMS and will be sent electronically or through postal service at the request of the provider **(See Attachment D**)
- Certification is valid for 2 years from the approval date stated on the certification letter issued by BMS.
- BMS will issue a denial or acceptance of a certification team within 30 days of receipt of completed certification packet
- A provider must apply for certification of each ACT Team.
- No ACT services may be billed for a member without written certification of the ACT Team by BMS.
- Re-certification shall occur each two years through a process developed by BMS in conjunction with BHHF.
- All teams must be based at a site listed on the provider's Behavioral Health License. Administrative support must be provided by the parent agency sufficient to meet scheduling and support needs of the ACT Team.
- Billing may commence after receiving approval from BMS. After initial approval, a site review will be conducted to validate the approval.
- BMS reserves the right to review any program at any time for the purpose of certifying or de-certifying a program. Programs not receiving approval may appeal the decision as per the policy contained in Chapter 800, Medicaid regulations.
- Variations from the original certification must be submitted with corresponding rationale for changes.
- When a team member resigns or is no longer associated with the Certified ACT Team, the ACT Team must replace the team member within 30 days of the team member's last day. The provider is responsible for notification of the BMS in writing within two working days of the resignation of the team member. A team is considered then to be provisionally certified until the team member is replaced. The provisional is in place until the team member is replaced. The provider may apply for extended provisional certification if an appropriately credentialed individual cannot be found within the original 30 day period. The BMS will notify the provider in writing of the acceptability of the proposed replacement team member after review of the individual's credentials as submitted by the provider. If more than one team member resigns or is terminated, the 30 day provisional status will be reinitiated at the loss of the subsequent team member.

503.23 RESIDENTIAL CHILDREN'S SERVICES

Residential Children's Services are comprehensive programs for those children who, when professionally evaluated, reflect a combination of diagnostic, functional, behavioral, or social support conditions which indicate they must be served in residential settings outside their families, and in some instances outside a regular school setting. Services must include a comprehensive array of

treatment/intervention modalities in accordance with the service description for which the provider is certified, and must be clinically appropriate for the type of child population served. EPSDT services for children in child residential programs should be requested and authorized by the ASO.

503.23.1 RESIDENTIAL CHILDREN'S SERVICES LEVEL I

PROCEDURE CODE: H0019U1
SERVICE UNIT: 24 hours
SERVICE LIMITS: One per day - All units must be prior authorized

PAYMENT LIMITS: Residential Children's Services are limited in age to members under the age of 21. Many Behavioral Health Services are included in the provision of this service and; therefore, cannot be billed while a child is reflected in the census of a Residential Children's Service setting. The Behavioral Health Services not included in this service which may be billed separately are: Psychological Testing with Interpretation and Report (procedure code 96101), Psychiatric Diagnostic Interview Examination (procedure code 90791 & 90792), Screening by Licensed Psychologist (procedure code T1023), Mental Health Service Plan Development by Psychologist (procedure code H0032AH), Physician Coordinated Care Oversight Services (procedure code G9008), Behavioral Health Counseling, Professional (procedure codes H0004HO and H0004HOHQ), Crisis Intervention (procedure code H2011), Therapeutic Behavioral Services - Developmental (procedure code H2019HO), and the Transportation Services (procedure codes A0120HE and A0160HE).

PRIOR AUTHORIZATION: Refer to APS Health Care Utilization Management Guidelines.

DEFINITION:
Residential Children's Services, Level I is a structured 24-hour therapeutic group care setting that targets youth with a confirmed current DSM or ICD diagnosis that manifests itself through adjustment difficulties in school, home, and/or community. This level of service is designed for children or youth whose needs can best be met in a community-based setting where the child can remain involved in community-based school and recreational activities. These youths usually can function in public school and in a group residential setting with a minimal amount of supportive services and behavioral interventions. The goal of supportive residential programs is to enable children to overcome their problems to the degree that they may move to a less restrictive community placement or independent living situation. This service level is appropriate for members:

- Whose relationship with their families or whose family situations, level of development, and social or emotional problems are such that they cannot accept family ties or establish and maintain relationships in a less restrictive environment, or
- Who are in transition from a more intensive form of care.

Members in need of this level of service display impaired abilities in the social, communication, or daily living skills domains. Life threatening symptoms are generally absent. They generally are able to interact appropriately in social settings with a minimal amount of adjustment problems. Although they may display emotional problems such as anxiety, depression, avoidance, etc., these are not part of a persistent, long term pattern nor do they preclude normal social functioning in most school or community settings. Where aggressive acting out behaviors are present, they are not of a degree or at a frequency to require ongoing measures of control (restraint, hospitalization, and chemical

interventions) and generally respond to logical/natural consequences and supportive counseling interventions.

PROGRAM REQUIREMENT:
Providers of this program must be able to provide a comprehensive array of treatment/intervention modalities in accordance with the service description for which they are certified, and to provide them for the type of child population as clinically described. This comprehensive array of services includes, but is not limited to, the following services:

- Assessment services
- Service Planning
- Targeted Case Management
- Behavioral Health Counseling, Supportive
- Skills Training and Development

These services must be provided in accordance with the minimum standards established by the Bureau for Medical Services in this chapter of the Provider Manual, and with the certification standards established by the WVDHHR for children's group residential services. This service can only be reimbursed to agencies dually licensed as behavioral health services and as childcare group residential facilities, and only for those programs which meet the certification standards noted above.

A member day (one service unit) is defined as eight continuous hours in residence in the facility in a twenty-four hour period. (However, only one unit of service is billable during each 24 hour period.) Since the daily census time starts at 12:00 a.m. (midnight), the eight continuous hours must occur between the start and end of the census period. On each day of the member's residence, he/she must receive Behavioral Health Rehabilitation Services (other than transportation services).

DOCUMENTATION:
There must be a permanent clinical record maintained in a manner consistent with applicable licensing regulations and the agency's record-keeping policies. The child's record must contain a written physician's order authorizing Residential Children's Services and the member's individualized service plan. Documentation must also include:

- Behavioral observations of the child
- There must be a daily summary of the child's program participation, which includes identification of the supportive and therapeutic services received by the member, the start and stop times of each service, and a summary of the member's participation in the services. The attending staff must sign, list their credentials, and date this summary.
- Medication administration records.
- Each member must have a sign-in/sign-out sheet to be filled out if the member exits the residential site. The list must note the actual time the child departs the site and returns to the site. The reason for absence must be noted on the sheet. Each notation must be signed and dated by the agency staff.

503.23.2 RESIDENTIAL CHILDREN'S SERVICES LEVEL II

PROCEDURE CODE: H0019U2
SERVICE UNIT: 24 hours
SERVICE LIMITS: One per day - All units must be prior authorized

PAYMENT LIMITS: Residential Children's Services are limited in age to members under the age of 21. Many Behavioral Health Services are included in the provision of this service and; therefore, cannot be billed while a child is reflected in the census of a Residential Children's Service setting. The Behavioral Health Services not included in this service which may be billed separately are: Psychological Testing with Interpretation and Report (procedure code 96101), Psychiatric Diagnostic Interview Examination (procedure code 90791 &90792), Mental Health Service Plan Development by Psychologist (procedure code H0032AH), Physician Coordinated Care Oversight Services (procedure code G9008), and the Transportation Services (procedure codes A0120HE and A0160HE).

PRIOR AUTHORIZATION: Refer to APS Health Care Utilization Management Guidelines.

DEFINITION:
Residential Children's Services, Level II is a structured group-care setting targeting youth with a confirmed current DSM or ICD Diagnosis that manifests itself in the form of moderate to severe adjustment difficulties in school, home, and/or community. These youths cannot function in a public school setting without significant psychosocial and psycho-educational support. In the residential care setting they require substantial professional level treatment services and behavioral interventions that normally require a multidisciplinary team. The goals of intermediate residential treatment programs are to develop interpersonal skills and remediate social skill deficits and disruptive behavior patterns that preclude living in a less restrictive environment.

Children served at this level are characterized by persistent patterns of disruptive behavior and exhibit disturbances in age-appropriate adaptive functioning and social problem solving. Disturbance in psychological functioning is common and may present some risk of causing harm to themselves or others. This population generally displays emotional problems and/or persistent behavior patterns challenging enough to preclude socially appropriate functioning in family, school, and community contacts without behavior management and additional structure and support.

Most often the children display multi-agency needs that require interagency planning and interventions including behavioral health, education, child welfare, juvenile justice, and others. In this target population, children display a persistent pattern of challenging behavior that has been present for at least 1 year and is not a reaction to a single precipitating event.

Children in Level II have a current ICD or DSM diagnosis usually in the disruptive behavior disorders, mood disorders, or in the psychoactive substance use disorder categories. Their social functioning limitations are significant to a degree that they require up to 24 hours of supervision, structure and support upon admission. Generally, they respond well to structure and treatment, and the level of supervision required initially can be gradually withdrawn. From time-to-time, they can present a danger to themselves or others, but this is not a routine issue in treatment.

They possess cognitive capacity and can participate in academic and vocational education, but often require specialized instruction and a modified learning environment within a public or alternative secondary or primary school setting.

PROGRAM REQUIREMENTS:
Providers of this program must be able to provide a comprehensive array of treatment/intervention modalities in accordance with the service description for which they are certified, and to provide them for the type of child population as clinically described. This comprehensive array of services includes, but is not limited to, the following services:

- Assessment Services
- Service Planning
- Targeted Case Management
- Behavioral Health Counseling
- Skills Training and Development
- Crisis Intervention 24-hour availability
- Therapeutic Behavioral Services

These services must be provided in accordance with the minimum standards established by BMS in this chapter of the Provider Manual, and with the certifications standards as established by the WVDHHR for children's group residential services.

This service can only be reimbursed to providers who are dually licensed as behavioral health services and childcare facilities and for those programs which meet the certification standards noted above.

A member day (one service unit) is defined as eight continuous hours in residence in the facility in a twenty-four hour period. (However, only one unit of service is billable during each 24 hour period.) Since the daily census time starts at 12:00 am (midnight), the eight continuous hours must occur between the start and end of the census period. On each day of the member's residence, he/she must receive Behavioral Health Rehabilitation Services (other than transportation services).

DOCUMENTATION:
There must be a permanent clinical record maintained in a manner consistent with applicable licensing regulations and the agency's record-keeping policies. The child's record must contain a written physician's order authorizing Residential Children's Services and the member's individualized service plan. Documentation must also include:

- Behavioral observations of the child
- There must be a daily summary of the child's program participation, which includes identification of the supportive and therapeutic services received by the member, the start and stop times of each service, and a summary of the member's participation in the services. The attending staff must sign, list their credentials, and date this summary.
- Medication administration records.

- Each member must have a sign-in/sign-out sheet to be filled out if the member exits the residential site. The list must note the actual time the child departs the site and returns to the site. The reason for absence must be noted on the sheet. Each notation must be signed and dated by the agency staff.

503.23.3 RESIDENTIAL CHILDREN'S SERVICES LEVEL III

PROCEDURE CODE: H0019U3
SERVICE UNIT: 24 hours
SERVICE LIMITS: One per day - All units must be prior authorized

PAYMENT LIMITS: Residential Children's Services are limited in age to members under the age of 21. No other Behavioral Health Services, other than Transportation Services (procedure codes A0120HE and A0160HE), can be billed while a child is reflected in the census of a Residential Children's Service setting.

PRIOR AUTHORIZATION: Refer to APS Health Care Utilization Management Guidelines.

DEFINITION:
Residential Children's Services, Level III is a highly-structured, intensively-staffed, 24-hour group care setting targeting youth with a confirmed current DSM or ICD diagnosis which manifests itself in severe disturbances in conduct and emotions. As a result, they are unable to function in multiple areas of their lives. Residential treatment facilities provide a highly structured program with formalized behavioral programs and therapeutic interventions designed to create a therapeutic environment where all planned activities and applied interventions are designed with the goal of stabilizing the child's serious mental condition.

The service plan is implemented in all aspects of the child's daily living routine. The focus of intensive residential treatment is on psycho-social rehabilitation aimed at returning the child to an adequate level of functioning. In the case of children and adolescents, this includes rehabilitation in instances where psychiatric or substance abuse disorders have significantly disrupted the achievement of the expected development level.

This service level is comprised of children who display seriously disordered behaviors with sufficient frequency to be considered an established pattern of long duration, or are so intense that they preclude social interaction in school, family, or community environments. Often, they exhibit persistent or unpredictable aggression, serious sexual acting-out behavior, and marked withdrawal and depression.

Symptoms of thought disorder are often present. They routinely present a significant danger to themselves or others.

Children in Level III have a current ICD or DSM diagnoses that include major depression, bipolar disorders, posttraumatic stress disorders, other anxiety disorders, thought disorders, and personality disorders. Where the focus of care has been on antisocial and dangerous behavior patterns, an

initial diagnosis of Conduct Disorder, Severe may be present. However, in many of these cases, underlying significant psychiatric disturbance will reveal itself during the course of treatment.

Substantial social, academic, and vocational functional limitations are characteristics of the population's behavior pattern, and as a result they require substantial environmental structure and controls including 24-hour awake supervision, verbal crisis response, medical management, chemical interventions, physical restraint, and alternative learning environments. The key element is that these children present behaviors so intense, severe, and unpredictable to be seriously detrimental to their growth, development, welfare, or to the safety of others.

PROGRAM REQUIREMENTS:
Providers of this program must be able to provide a comprehensive array of treatment/intervention modalities in accordance with the service description for which they are certified, and to provide them for the type of child population as clinically described. This comprehensive array of services includes, but is not limited to, the following services:

- Assessment Services
- Service Planning
- Targeted Case Management
- Behavioral Health Counseling
- Skills Training and Development
- Crisis Intervention 24-hour availability
- Therapeutic Behavioral Services
- Any needed Behavioral Health Service including psychiatric and medication management services
- On-campus schooling

These services must be provided in accordance with the minimum standards established by BMS in this chapter of the Provider Manual, and with the certification standards established by the DHHR for children's group residential services.

This service can be reimbursed only to providers who are dually licensed to provide behavioral health services and as childcare group residential facilities, and for those programs which meet the certification standards noted above.

A member day (one service unit) is defined as eight continuous hours in residence in the facility in a twenty-four hour period. (However, only one unit of service is billable during each 24 hour period.) Since the daily census time starts at 12:00 a.m. (midnight), the eight continuous hours must occur between the start and end of the census period. On each day of the member's residence, he/she must receive Behavioral Health Rehabilitation Services (other than transportation services).

DOCUMENTATION:
There must be a permanent clinical record maintained in a manner consistent with applicable licensing regulations and the agency's record-keeping policies. The child's record must contain a

written physician's order authorizing Residential Children's Services and the member's individualized service plan. Documentation must also include:

- Behavioral observations of the child
- There must be a daily summary of the child's program participation, which includes identification of the supportive and therapeutic services received by the member, the start and stop times of each service, and a summary of the member's participation in the services. The attending staff must sign, list their credentials, and date this summary.
- Medication administration records.
- Each member must have a sign-in/sign-out sheet to be filled out if the member exits the residential site.

The list must note the actual time the child departs the site and returns to the site. The reason for absence must be noted on the sheet. Each notation must be signed and dated by the agency staff.

503.23.4 BEHAVIORAL HEALTH: SHORT-TERM RESIDENTIAL (FOR CHILDREN)

PROCEDURE CODE: H0019U4
SERVICE UNIT: 24 hours
SERVICE LIMITS: One per day - All units must be prior authorized

PAYMENT LIMITS: Short-Term Residential Services are limited in age to members under the age of 21. No payment will be made for any other Behavioral Health Services, except for Targeted Case Management (procedure code T1017) or Transportation Services (procedure codes A0120HE and A0160HE).

PRIOR AUTHORIZATION: Refer to APS Health Care Utilization Management Guidelines.

DEFINITION:
Short-Term Residential is a structured crisis service for children up to age 21 and provided in a community-based, small-group, residential setting. It must be provided in a site licensed as a Children's Emergency Shelter by the WVDHHR. The service is delivered in an environment that is safe, supportive, and therapeutic. The purpose of this service is to provide a supportive environment designed to minimize stress and emotional instability which may have resulted from family dysfunction, transient situational disturbance, physical or emotional abuse, neglect, sexual abuse, loss of family or other support system, or the abrupt removal of a child from a failed placement or other current living situation. Short-Term Residential involves a comprehensive array of supportive and therapeutic services including, but not limited to, individual and small-group counseling, crisis intervention, behavior management, clinical evaluation, service planning, and enhancement of daily living skills.

A member day (one service unit) is defined as eight continuous hours in residence in the facility in a twenty-four hour period. (However, only one unit of service is billable during each 24 hour period.) Since the daily census time starts at 12:00 a.m. (midnight), the eight continuous hours must occur between the start and end of the census period. On each day of

the member's residence, he/she must receive Behavioral Health Rehabilitation Services (other than transportation services).

ADMISSION CRITERIA FOR SHORT-TERM RESIDENTIAL SERVICES:
In order to be eligible to receive Short-Term Residential Services, a child must meet the following criteria: criteria A and A1, or criteria B, or criteria C.

(A) Child is experiencing a crisis due to a mental condition or impairment in functioning due to a problematic family setting. The child may be displaying behaviors and/or impairments ranging from impaired abilities in the social, communication, or daily living skills domains to severe disturbances in conduct and emotion. The crisis results in emotional instability which may be caused by family dysfunction, transient situational disturbance, physical or emotional abuse, neglect, sexual abuse, loss of family or other support system, or the abrupt removal of the child from a failed placement or other current living situation.

AND

(A1) Child is in need of 24-hour treatment intervention because less restrictive services alone are not adequate or appropriate to resolve the current crisis and meet the child's needs based on the documented response to prior treatment and/or intervention.

OR

(B) Child is in need of 24-hour treatment/intervention to prevent hospitalization (e.g., the child engages in self-injurious behavior, but not at a level of severity that would require psychiatric hospitalization, or the child is currently physically aggressive and communicates verbal threats, but not at a level that would require hospitalization).

OR

(C) The child is in need of step-down from a more restrictive level of care as part of a transitional discharge plan (e.g., behaviors/symptoms remain at a level which requires out of home care, but the placement plan has not been fully implemented).

DISCHARGE CRITERIA FOR SHORT-TERM RESIDENTIAL SERVICES:
It is expected that in most cases, a child's Short-term Residential needs will be met within a 30-day period prior to discharge. In order to be discharged, the child must meet one of the following criteria:

- Appropriate placement has been located which meets the child's treatment and care needs as outlined in the service plan.
- The crisis that necessitated placement has abated, and the child has returned to a level of functioning that allows reintegration into a previous care setting.
- The child exhibits new symptoms or maladaptive behaviors that cannot be treated safely and effectively in the Short-term Residential setting and which necessitate more restrictive care (e.g. inpatient).

CRITERIA FOR APPROVAL OF CONTINUED CARE EXTENSIONS IN A SHORT-TERM RESIDENTIAL PROGRAM:

For those cases in which it is considered necessary to continue a child's participation in the program, a physician's order and appropriate justification with related documentation are required. Short-Term

Residential Services may be extended beyond 30 days in those cases where appropriate clinical criteria for continued service are met, and the extension has prior authorization approval by BMS' contracted agent. The child must meet one of the following criteria to receive approval for a continued care extension:

- Symptoms, behaviors or conditions persist at the level documented upon admission and the projected time frame for accessing longer-term placement has not been reached.
- Relevant member and family progress toward crisis resolution and progress clearly and directly related to resolving the factors that warranted admission to this level of care have been observed and documented, but treatment goals have not been reached and/or an appropriate level of care is not available.
- It has been documented that the member has made no progress toward treatment goals nor has progress been made toward alternative placement but the treatment/placement plan has been modified to introduce further evaluation of the member's needs and other appropriate interventions and placement options.
- New symptoms or maladaptive behaviors have appeared which have been incorporated into the service plan and modified the plan of care for the member.
- These new symptoms and maladaptive behaviors may be treated safely in the Short-term Residential setting and a less intensive level of care would not adequately meet the child's needs.

PROGRAM CERTIFICATION:

Short-Term Residential Programs must be approved by the Bureau for Medical Services and the Bureau of Children and Families (BCF). The Behavioral Health Rehabilitation Services provider proposing to provide the services must submit to BMS and BCF a program description which includes: proposed staffing patterns, staff credentials, service locations, operating hours, service components, and a general schedule of Short-term Residential service component activities.

DOCUMENTATION:

There must be a permanent clinical record maintained in a manner consistent with applicable licensing regulations and the agency's record-keeping policies. The child's record must contain a written physician's order authorizing Short-Term Residential Services and the member's individualized service plan. Documentation must also include:

- Behavioral observations of the child
- There must be a daily summary of the child's program participation, which includes identification of the supportive and therapeutic services received by the member, the start and stop times of each service, and a summary of the member's participation in the services. The attending staff must sign, list their credentials, and date this summary.
- Medication administration records.
- Each member must have a sign-in/sign-out sheet to be filled out if the member exits the residential site. The list must note the actual time the child departs the site and returns to the site. The reason for absence must be noted on the sheet. Each notation must be signed and dated by the agency staff.

503.24 BEHAVIOR MANAGEMENT SERVICES

Behavior Management Services are to address the symptoms of the diagnosed behavioral health condition that are negatively impacting the members functioning. These services arise in relation to areas of need identified on the member's service plan. Behavior Management is a time-limited service that must end when the desired outcomes have been achieved (i.e., targeted behaviors have been acquired or eliminated).

503.24.1 THERAPEUTIC BEHAVIORAL SERVICES – DEVELOPMENT

Procedure Code: H2019HO
Service Unit: 15 minutes
Service Limits: All units must be prior authorized
Prior Authorization: Refer to Utilization Management Guidelines.

Staff Credentials: The Behavior Management Specialist must be an individual with a minimum education at the Master's level in psychology, psychiatry, education, social work or counseling This individual's training must have include successful completion of course work and documented training in behavioral theory. The Behavior Management Specialist is responsible for all aspects of Behavior Management Services provided by Behavior Management Assistants and must sign all documentation of those services.

The Behavior Management Assistant must be an individual with a minimum education of a bachelor's degree in a human services field **(See definitions for complete listing)** who has been certified by the agency as having training specific to behavior management which is consistent with documented training in behavioral theory. Behavior Management Services provided by Behavior Management Assistants are subject to review and approval by the Behavior Management Specialist. A copy of the provider's training program for its Behavioral Health Assistant staff must be retained and filed by the provider. (The Behavior Management Assistant must use the HO modifier when providing Therapeutic Behavioral Services – Development, procedure code H2019HO, since their documentation must be reviewed and signed by the Behavior Management Specialist. Otherwise, the wrong service, Therapeutic Behavioral Services – Implementation, procedure code H2019, would be billed).

Definition: Therapeutic Behavioral Services - Development includes four major components:

- Behavior Assessment
- Plan Development
- Implementation Training
- Data Analysis and Review of the Behavior Management Plan once implementation has begun.

Therapeutic Behavioral Services - Implementation is an integral component of Behavior Management services (detailed under procedure code H2019).

Behavior Assessment Component

Behavior Assessment is a process of data collection, behavior and skill assessments, functional

analysis, and observation that describes behaviors and the circumstances under which they occur. Prior to the development of the Behavior Management Plan, behavior assessment activities must culminate in the identification of target behavior(s) (those behaviors which the plan proposes to increase, decrease, shape, or eliminate). The target behaviors must be described in specific terms beyond the developmental and they must be stated in terms of an objective, quantifiable measurement. The target behaviors must address symptoms of the diagnosed behavioral health condition that negatively impacts the member's overall functioning. The target behavior(s) is causing a functional deficit and is related to the behavioral health condition. Baseline data (quantified measurements which describe the intensity, frequency and duration of the targeted behaviors) must be collected on each target behavior. Baseline data are then reviewed to determine if the data justifies or supports the development of a Behavior Management Plan.

Following implementation of the Behavior Management Plan, behavior assessment must occur to determine objectively whether to continue, modify, or terminate the plan.

Plan Development Component

Plan Development refers to those activities required for the formal development of a Behavior Management Plan. It should be noted that a formal plan is developed only if objective baseline data supports and demonstrates the need for such a plan. A Behavior Management Plan for which there is no documentation of behavior management implementation activity must be considered invalid for billing purposes except for those activities related to assessment where a decision was made based on assessment data that it was not appropriate to proceed.

In those instances when baseline data indicate an occurrence of the target behavior(s) at a frequency or duration not sufficient to warrant the development of a complete Behavior Management Plan and its implementation training and on-going data analysis and review, the Behavior Management Specialist or the Behavior Management Assistant may develop a **Behavior Protocol**. A Behavior Protocol is a document that describes a consistent response(s) upon the occurrence/reoccurrence of the target behavior(s) as a means to maintain the rate of behavior(s) at a low rate. No more than two units of Therapeutic Behavioral Services – Development (H2019HO) may be billed for the development of the Behavior Protocol**.** Following the development of a Behavior Protocol, no further Therapeutic Behavioral Services billing must occur unless a new problem behavior is discovered. If this occurs, behavior assessment on the new behavior must follow, and the process should start anew.

When a Behavior Management Plan has achieved the criteria for success (the objective, quantified amount of behavior change has been maintained for the time period specified in the plan), the Behavior Management Specialist or the Behavior Management Assistant may develop a **Behavior Management Maintenance Plan**. A Behavior Management Maintenance Plan is a document that describes a consistent response(s) to the target behavior(s) as a means to maintain target level performance. No more than four units of Therapeutic Behavioral Services – Development (H2019HO) may be billed for the development of the Behavior Management Maintenance Plan. Following the implementation of the Behavior Management Maintenance Plan (which is not to exceed 90 days), the Behavior Management Specialist or the Behavior Management Assistant may conduct data analysis and review on no more than three occasions (a maximum of one unit each occasion) to assure that behavior levels are maintained.

Implementation Training Component

Implementation training is the process by which the Behavior Management Specialist or the Behavior Management Assistant provides the rationale for the plan, defines the behavior(s) that are targeted for change and instructs the individual(s) responsible in the specific steps necessary for implementation of the plan. All individuals who will be involved in providing Therapeutic Behavioral Services – Implementation (procedure code H2019) must receive implementation training prior to implementation of the plan. This includes agency employees and/or significant others (e.g., parents, teachers, foster care providers, etc.).

Data Analysis and Review Component

Data Analysis and Review is the process by which the Behavior Management Specialist or the Behavior Management Assistant evaluates plan effectiveness. Plan effectiveness is determined through a comparison of the baseline data for the target behavior(s) with objective, quantified implementation data to determine whether the plan is leading to achievement of the criteria for success. Any necessary direct observation of member ***behavior*** is included in this category. This analysis and review result in the determination of continuation, modification, or termination of the Behavior Management Plan.

Documentation Requirements:

There are four types of Therapeutic Behavioral Services - Development documentation:

- Activity notes
- Behavior Management Plan
- Behavior Protocol
- Behavior Management Maintenance Plan.

Standard Activity Notes Documentation Requirements

Activity Notes identify the specific component of Therapeutic Behavioral Services - Development (i.e., Behavior Assessment, Plan Development, Implementation Training, Data Analysis and Review) that was performed, place of service, date of service, the amount of time spent by listing the start-and-stop times, and the signature (with credential initials) of the staff person who provided the service.

Behavior Assessment documentation must be present prior to the development of the Behavior Management Plan In addition to the standard activity notes documentation requirements, behavior assessment documentation must reflect that the following activities have occurred in this order:

- Identification of the target behavior(s).
- Specific description of each target behavior in terms capable of objective, quantified measurement.
- Collection of baseline data on each target behavior to obtain an objective, quantifiable determination of its occurrence/nonoccurrence.
- Review and analysis of baseline data to determine objectively if a need for further Behavior Management Services exists.

Following implementation of the Behavior Management Plan, **Behavior Assessment** documentation must include (in addition to the standard activity notes documentation requirements) rationale for such assessment, which may take one of two forms. These are:

- Identification of a new target behavior. Should this occur, behavior assessment must meet the requirements identified in the above listed additional requirements for behavior assessment documentation to provide objective documentation of the need to modify the plan.

Objective determination through data analysis and review that the plan is not effective. If this occurs, behavior assessment must be conducted to determine if the plan is being implemented correctly. If implementation is not occurring correctly, implementation training must reoccur. If the plan is being implemented correctly, further data-based assessment to determine whether to modify the plan will occur. Documentation for the latter must reflect the specific components of the plan addressed and modified to obtain the desired behavior change.

Activity notes documenting **Plan Development** must include the specific components of the plan itself that were developed in addition to the standard activity notes documentation requirements.

Activity notes for **Implementation Training** must document the training of implementation staff (and/or unpaid support staff) as defined by the plan, the definitions of the behavior(s) targeted for change, and the specific steps necessary for implementation of the plan. It must also include the standard activity notes documentation requirements.

Activity notes for **Data Analysis and Review** must document a measured amount of each target behavior, a comparison of that amount to a previously documented amount and, based on that measured amount, a determination of continuation, modification, or termination of the plan. It must also include the standard activity notes documentation requirements.

Behavior Management Plan Documentation Requirements

The second type of documentation is a separate, freestanding document labeled **Behavior Management Plan.** The Behavior Management Plan must contain, at a minimum, the following components within the body of the plan itself, regardless of their presence anywhere else in the member's record.

- The Name and Agency Identification Number of the member for whom the plan has been developed
- Implementation Date - the date the plan is implemented
- Target Behaviors/Specific Descriptions.

- Baseline data including the actual dates the baseline data was collected.
- The criteria for success – (A generic statement such as "The member will obey the rules more frequently" is not acceptable, as it does not state a quantified amount that can be compared to baseline data).
- Methods of Behavioral Intervention includes the following:

- Method - A description of the behavioral intervention that implementation staff (and/or unpaid support staff) will employ given the occurrence/nonoccurrence of the target behavior(s).
- Method and Schedule of Reinforcement - The method statement must specify and describe the method of reinforcement, the type of reinforcers to be used, when the reinforcers will be provided (i.e., the schedule of reinforcement), by whom, and whether reinforcers are delivered upon occurrence/reoccurrence of the target behavior(s), or upon the occurrence of behavior(s) incompatible with the target behavior(s).
- Data Collection - A description of the quantified information that will be collected during the implementation of the Behavior Management Plan. This must include who collects the information and what type of quantified information is recorded, such as frequency or duration of behavior. This information must be of the same type as that collected during baseline so that comparisons can occur.

- Responsible person - a designated Behavior Management Specialist is responsible for the Behavior Management Plan in terms of its appropriateness in clinical practice and for financial reimbursement, and for identifying staff and/or others and their respective responsibility relative to the plan. It should be noted that implementation staff do not have to be named individually, but they must have received the required implementation training prior to implementing the plan. The Behavior Management Specialist must sign and date all plans prior to their implementation (or review and co-sign plans signed and dated by a Behavior Management Assistant). The signature of any individual(s) who participated in the development of the written plan must also be included in the plan (and the date of their participation), along with the degree, and other credentials (license type and number) of each individual.

Behavior Protocol Documentation Requirements

The third type of documentation is the completed Behavior Protocol. The Behavior Protocol consists of:

- A summary of objective, quantified baseline data
- A rationale for the development of the protocol
- Recommendations for consistent response(s) upon the occurrence/nonoccurrence of the target behavior(s)
- Date the protocol was developed, the amount of time spent developing the protocol by listing the start and stop times, and the signature (with credential initials) of the staff person who developed the protocol.

Behavior Management Maintenance Plan Documentation Requirements

The fourth type of documentation is the Behavior Management Maintenance Plan. The Behavior Management Maintenance Plan consists of:

- A summary of objectives
- Quantified implementation data (collected during the implementation of the plan)
- A rationale for the development of a maintenance plan (i.e., the criteria for success has been achieved)
- Recommendation for consistent response(s) upon the occurrence/nonoccurrence of the target behavior(s).

Date the maintenance plan was developed, the amount of time spent developing the plan by listing the start and stop times, and the signature (with credential initials) of the staff person who developed the plan.

503.24.2 THERAPEUTIC BEHAVIORAL SERVICES – IMPLEMENTATION

Procedure Code: H2019
Service Unit: 15 minutes
Service Limits: All units must be prior authorized
Prior Authorization: Refer to Utilization Management Guidelines.

Definition: Behavior Management Implementation services means a face-to-face, hands-on encounter where the actual time is spent in the delivery of a behavioral health service to a specific member (i.e., any delivery of the service must be on a strictly one staff to one member basis). Such encounters are interventions, or reinforcements that have been previously described in the Behavior Management Plan and are measured and recorded. Any and all Therapeutic Behavioral Services - Implementation activities under this procedure will be considered non-reimbursable if the activities are not supported by a Behavior Management Plan that meets the documentation requirements detailed under Therapeutic Behavioral Services – Development (procedure code H2019HO).

General observation and/or monitoring are not considered billable implementation activities.

Documentation: Documentation must contain the intervention used (which is individualized to meet the needs of the member), methods, measurements, delivery of service, outcome of the implementation, place of service, date of service, signature of implementing staff (with credential initials), and the actual time spent by listing the start-and-stop times.

Only trained, qualified staff can provide **billable** Therapeutic Behavioral Services - Implementation Services. Activities provided by a non-staff person may be considered as a valid part of the service if there is documentation of the role and specific activities by such individuals in both the description of the methods of intervention in the Behavior Management Plan and in the data which describes the encounters by non-staff persons as they implement the plan. Activity by non-staff persons as described above, however, will not be considered billable under neither Therapeutic Behavioral Services – Development (procedure code H2019HO), nor Therapeutic Behavioral Services – Implementation (procedure code H2019).

503.25 TRANSPORTATION SERVICES

Behavioral Health Transportation Services are the services used to physically transport a Medicaid member to/from a therapeutic or diagnostic Medicaid service that is designated in the member's service plan.

503.25.1 NON-EMERGENCY TRANSPORTATION BY VEHICLE OTHER THAN AMBULANCE

Procedure Code: A0120HE
Service Unit: Trip

Service Limits: Six trips daily
Prior Authorization: None

Definition: Non-emergency Transportation by minibus is a service in which a one-way transport of a member by a vehicle other than an ambulance is provided. If more than one member is being transported, each member's transport to the Medicaid service is billable. However, if multiple stops must be made for multiple members, the service provider must only bill for each member's transport to his/her Medicaid reimbursable service. (e.g., a vehicle, carrying two members from their group home, transports the first member to a physician's office and the second to a Day Treatment Program. Only two separate transports must be billed; one for each member. The provider cannot unbundle the second member's trip as two trips; one from the group home to the physician's office, since he received no service there, and the second to the Day Treatment Program).

Documentation: Documentation must contain an activity note for each separate transport describing the purpose for the transport, type of vehicle used for the transport, place of departure and arrival, date of service, signature of the providing staff (along with their credentials), and actual time spent providing the service by listing the start-and-stop times.

503.25.2 NON-EMERGENCY TRANSPORTATION: PER MILE

Procedure Code: A0160HE
Service Unit: One mile
Service Limits: 500 miles per month
Prior Authorization: None

Definition: Non-emergency Transportation: Per Mile is a service in which the member's transportation by the provider is documented and subsequently billed by the mile. Mileage cannot be accumulated during the transport of other members to their destinations even if the member remains in the vehicle during the transport of the other members. Mileage can only be calculated using the shortest, most direct route between the member's place of departure and destination. This code cannot be billed by provider staff unless a member is present in the vehicle.

Documentation: Documentation must consist an activity note describing the purpose for the transport, signed by the providing staff (along with their credentials), type of vehicle used for the transport, place of departure and arrival, actual billable mileage, and date of service.

503.26 SERVICE LIMITATIONS

Service limitations governing the provision of all WV Medicaid services will apply pursuant to *Chapter 100, General Information* of the Provider Manual.

503.27 SERVICE EXCLUSIONS

In addition to the exclusions listed in *Chapter 100, General Information*, BMS will not pay for the following services:

- Services not meeting the definition of Medical Necessity

- Telephone consultations
- Missed appointments
- Time spent in preparation of reports
- A copy of medical report when the agency paid for the original service
- Experimental services or drugs
- Methadone administration or management
- Any activity provided for the purpose of leisure or recreation
- Services rendered outside the scope of a provider's license

503.28 ROUNDING UNITS OF SERVICE

- Services covered by Medicaid are, by definition, either based on the time spent providing the service or episodic. Units of service based on an episode or event cannot be rounded.
- Many services are described as being "planned", "structured", or "scheduled". If a service is planned, structured, or scheduled, this would assure that the service is billed in whole units; therefore, rounding is not appropriate.

The following services are eligible for rounding:

- Mental Health Service Plan Development (H0032)
- Mental Health Service Plan Development by Psychologist (H0032AH)
- Physician Coordinated Care Oversight Services (G9008)
- Case Consultation (90887)
- Comprehensive Medication Services; Mental Health (H2010)
- Crisis Intervention (H2011)
- Therapeutic Behavioral Services – Development (H2019HO)
- Therapeutic Behavioral Services – Implementation (H2019)

In filing claims for Medicaid reimbursement for a service eligible for rounding, the amount of time documented in minutes must be totaled and divided by the number of minutes in a unit. The result of the division must be rounded to the nearest whole number in order to arrive at the number of billable units. After arriving at the number of billable units, the last date of service provision must be billed as the date of service. **The billing period cannot overlap calendar months. Only whole units of service may be billed.**

503.29 PRIOR AUTHORIZATION

Prior authorization requirements governing the provision of all WV Medicaid services will apply pursuant to Chapter 300, General Provider Participation Requirements of the Provider Manual. In addition, the following limitations also apply to the requirements for payment of Behavioral Health Rehabilitation Services described in this chapter.

503.30 PRIOR AUTHORIZATION PROCEDURES

- The Bureau for Medical Services requires that providers prior authorize **all** Behavioral Health Rehabilitation Services described in this manual with exception of Transportation Services, (procedure codes A0120HE and A0160HE) with BMS' contracted agent.

- Prior authorization must be obtained from BMS' contracted agent.
- Information on prior authorization requirements for additional services, and contact information for submitting a request may be obtained by contacting BMS' contracted agent.

503.30.1 PRIOR AUTHORIZATION REQUIREMENTS

- Prior authorization requests for Behavioral Health Rehabilitation Services must be submitted within the timelines required by BMS' Contracted agent
- Prior authorization requests must be submitted in a manner specified by BMS' contracted agent.

503.31 DOCUMENTATION AND RECORD RETENTION REQUIREMENTS

- Documentation and record retention requirements governing the provision of all WV Medicaid services will apply pursuant to Chapter 300, General Provider Participation Requirements and Chapter 800, General Administration of the Provider Manual.
- Providers of Behavioral Health Rehabilitation Services must comply, at a minimum, with the following documentation requirements:
  - Providers must maintain a specific record for all services received for each WV Medicaid eligible member including, but not limited to: name, address, birth date, Medicaid identification number, pertinent diagnostic information, a current service plan signed by the provider, signature and credentials of staff providing the service, designation of what service was provided, documentation of services provided, the dates the services were provided, and the actual time spent providing the service by listing the start-and-stop times as required by service.
  - All required documentation must be maintained for at least five years in the provider's file subject to review by authorized BMS personnel. In the event of a dispute concerning a service provided, documentation must be maintained until the end of the dispute or five years, whichever is greater.
  - Failure to maintain all required documentation may result in the disallowance and recovery by BMS of any amounts paid to the provider for which the required documentation is not maintained and not provided to BMS upon request.
- Providers of Behavioral Health Rehabilitation Services must also comply with the specific documentation requirements for the program or service procedure, as described in this manual.

503.32 BILLING PROCEDURES

- Claims from providers must be submitted on the BMS designated form or electronically transmitted to the BMS fiscal agent and must include all information required by BMS to process the claim for payment.
- The amount billed to BMS must represent the provider's usual and customary charge for the services delivered.
- Claims must be accurately completed with required information.
- By signing the BMS Provider Enrollment Agreement, providers certify that all information listed on claims for reimbursement from Medicaid is true, accurate, and complete. Therefore, claims may be endorsed with computer-generated, manual, or stamped signatures.

- Claim must be filed on a timely basis, i.e., filed within 12 months from date of service, and a separate claim must be completed for each individual member.

503.33 PROGRAM OF SERVICE REQUIREMENTS

Program approval from BMS is required for the following Behavioral Health Rehabilitation Services Program:

- Day Treatment
- Assertive Community Treatment
- Comprehensive Community Supportive Services

Coordination of Care and Release of Information Form

Suboxone/Subutex/Vivitrol Providers

Coordination of Care and Release of Information between Suboxone/Subutex/Vivitrol Provider and BH Provider

Communication between behavioral health providers and your Suboxone/Vivitrol Prescribing Physician other Behavioral Health providers and/or facilities is important to ensure that you receive comprehensive and quality health care. This form will allow your behavioral health provider to share protected health information (PHI) with your other provider. This information will not be released without your signed authorization. This PHI may include diagnosis, treatment plan, progress, and medication, if necessary.

Patient Rights

- You may end this authorization (permission to use or disclose information) any time by contacting the practitioner's office.
- If you make a request to end this authorization, it will not include information that may have already been used or disclosed based on your previous permission. For more information about this and other rights, please see the applicable Notice of Privacy Practices.
- You have a right to a copy of this signed authorization.

Patient Authorization

I hereby authorize the name(s) or entities written below to release verbally or in writing information regarding any medical, mental health and/or alcohol/drug abuse diagnosis or treatment recommended or rendered to the following identified patient. I understand that these records are protected by Federal and state laws governing the confidentiality of mental health and substance abuse records, and cannot be disclosed without my consent unless otherwise provided in the regulations. I also understand that I may revoke this consent at any time and must do so in writing. **This consent expires in one year (12 months) from the date of my signature below unless otherwise stated herein.**

Application for Day Treatment Certification

APPLICATION FOR
MEDICAID DAY TREATMENT CERTIFICATION

Please complete the following identifying information for your agency:

Name of Provider/Agency operating Day-Treatment at site listed below:
_____

Provider/Agency Address: _____

_____

Current Medicaid Provider Number: _____

Name of Day-Treatment Program: _____

Day-Treatment Program Address: _____

_____

Effective Dates of B. H. License: _____

Date of Approved CON: _____

Name & Title of Individual Completing Application: _____

_____

Telephone Number: _____

Extension: _____

Fax Number: _____

PROGRAM DESCRIPTION

A. THIS AGENCY IS APPLYING FOR CERTIFICATION (PLEASE CHECK ALL BOXES THAT APPLY):

- ☐ Initial or New Certification
- ☐ Recertification
- ☐ Clinic Services Day-Treatment Program
- ☐ Rehabilitation Services Day-Treatment Program

B. TYPES OF POPULATION(S) TO BE SERVED:

An application must be submitted for each day-treatment licensed program site operated by your agency. If your agency is serving more than one population at one site, a separate program activity time grid must be completed for each of the populations checked below.

1. ADULTS WITH:

- ☐ Alcohol/Substance Abuse
- ☐ Mental Illness
- ☐ Intellectually/Developmentally Disabled

2. CHILDREN WITH:

- ☐ Developmental Delay
- ☐ Serious Emotional Disturbances

C. SITE OF OPERATIONS

Day-Treatment Program Site:

_____

Address:

_____

D. HOURS OF OPERATIONS

Hours of Operation: ___a.m. ___a.m.
___p.m. ___p.m.

Days of Operations: M T W T F S S
(CIRCLE ALL THAT APPLY)

E. PROGRAM CAPACITY

In the last month, what was:

1. Average number of clients served in program per day_____
2. Maximum number of clients who can be served on any day? ____

PROGRAM SUMMARY

Please provide a summary description of the program at this site which includes the following points:

- Difference in programmatic approaches or emphasis on each population served at this site

- Program admission and discharge criteria

- Differences in programmatic approaches to individuals with lower-versus-higher functional impairment

- Any specific programmatic emphasis or focus

MANAGEMENT AND PERSONNEL

1. DAY-TREATMENT PROGRAM DIRECTOR:

   NAME: _____

   QUALIFICATIONS:_____

   EDUCATION:_____

2. ATTACH QUALIFYING WORK EXPERIENCE (Resume may be used if it indicates dates of experience for each position held by month/year)

   Date of Experience:

3. As qualifying work experience, this agency assures that the individual named above meets the minimum qualifications for day-treatment program director in terms of education, type(s) of position(s) held previously, length of work experience, and experience with the disability type served by this program, and written reference checks.

   _____ Yes Date of Review: _____

4. PROGRAM DIRECTOR/SUPERVISOR TIME SCHEDULE:

   A. Please indicate the number of hours per week the program director spends in program management activities, such as staff scheduling, activities planning, service plan review, treatment planning, etc.

      _____ Program management hours per week

   B. Please indicate the number of hours per week the program director spends carrying out or participating directly with clients in activities listed on weekly grid.

      _____ Day-treatment activities hours per week.

C. List each type of staff member by job title used by your agency for day-treatment services.

JOB TITLE	NUMBER OF STAFF IN DAY-TREATMENT WITH THIS TITLE
1.	
2.	
3.	
4.	
5.	
6.	
7.

Application for Assertive Community Treatment (ACT) Team Form & ACT Team Modification Form

ACT PROGRAM CERTIFICATION:

Provisional Certification will be granted by BMS, or its designee, when the provider's initial application for ACT certification meets all required elements with the exception of the hiring of staff. During the provisional period of 60 days the provider shall recruit and hire staff in order to achieve ACT compliance. Full certification is required prior to delivering ACT services.

Certification is granted when an ACT team is compliant with all service requirements , including fidelity factors. Once certified, the ACT team can provide services eligible for reimbursement under ACT to qualified members. Certification includes a site visit by BMS or their designee to ensure all required components are in place. Certification is granted for a period of one year.

Recertification *review* is *conducted* one year following the certification by BMS or their designee to ensure compliance with requirements. This review will consist of a site visit to score the ACT team on adherence to the fidelity scale, organizational and policy requirements. Following the recertification, the ACT team recertification date will then occur every two years. Failure to obtain a satisfactory fidelity rating during any recertification (initial or subsequent) will result in the following:

- Mandatory training for the ACT Team on service requirements and fidelity factors. This training will occur within 30 days from the recertification decision and be administered by BMS or its designee.
- A repeat recertification review will occur 6 months following the negative recertification attempt. If compliance is achieved, then recertification will be granted for a two year period.
- If compliance is not achieved within 6 months then the ACT program will be decertified and the behavioral health providers will transition members served to other appropriate programs or services
- A de-certified ACT program may reapply for certification upon receipt and approval of a remedial plan that addresses prior deficiencies.

If BMS or its designee receives information that an ACT team is not in full compliance with policy, use of licensed personnel, and all requirements then BMS or its designee will complete a recertification review prior to the two year expiration BMS reserves the right to review any program at any time for the purpose of certifying or de-certifying a program.

Please complete the following identifying information for your agency/company for each team.

Name of Provider/Agency Operating the Assertive Community Treatment Team	
Provider/Agency Telephone number	
Address of Provider/Agency	
Assertive Community Treatment Team Telephone Number/Extension

ASSESSMENT - TREATMENT PLANNING - DOCUMENTATION

1. Procedure for conducting Assessments

2. Procedures for Treatment Planning - Treatment Place Reviews.

JOB DESCRIPTION/STAFF ROLES:

- Attach a job description for each job title associated with the Assertive Community Treatment Team.

PROGRAM ORGANIZATION AND OPERATION

1. Program Hours - Coverage (Address the following)
   - Description of weekday and weekend hours
   - Description of how after hours on-call will be addressed by the team to cover 24 hours/7 days week
   - Description of how Psychiatrist will be a after hours

2. Service, Intensity and Location (Address the following)

- Location of Site Assertive Community Treatment Team will base operations
- Capacity to provide assertive outreach (multiple contacts per week)
- Capacity to rapidly increase service intensity for an individual when his or her status requires
- Capacity to provide 75 % of contacts in a non-office or non-facility based setting
- Maintaining ongoing involvement with the client during days in environments such as inpatient care, convalescent care facilities, community care hospitals or rehabilitation centers.

3. Program Size (Address the following)

- Anticipated number of clients to be served by the Assertive Community Treatment Team.
- Description of Geographical Area to being served by the team
- Staff/Client Ratio for the following:
  - Psychiatrist (Certified Physician Assistant, Certified Nurse Practitioner, Clinical Nurse Specialist)
  - Nurse
  - Other Staff

4. Staff Communication (Address the following)

- Client Roster of Active Team Members
- Description of how the Daily Staff Assignment will be assigned
- Schedule of Treatment Plan meetings and Treatment Plan Reviews.
- Description of how the Daily Meeting will be conducted
- Procedure for ensuring an intensive review of each active client takes place on a weekly basis

5. Service Scope (Description of the following)

- Case Management
- Crisis Assessment and Intervention;
- Symptom Assessment, Management & Supportive Therapy;
- Provision of Substance Abuse Services
- Work Related Services
- Activities of Daily Living
- Assistance with securing basic necessities
- Social, Interpersonal Relationships and Leisure Time Skill Training
- Support Services
- Education, Support and Consultation to Clients= Families and Other Major Supports

CHAPTER 504 – COVERED SERVICES, LIMITATIONS AND EXCLUSIONS FOR CHIROPRACTIC SERVICES

CHANGE LOG

Replace	Title	Change Date	Effective Date
Section 504.4.2	Prior Authorization Requirements for Outpatient Services	9/27/05	10/01/05

CHAPTER 504 – COVERED SERVICES, LIMITATIONS AND EXCLUSIONS FOR CHIROPRACTIC SERVICES

SEPTEMBER 27, 2005

SECTION 504.4.2

Introduction: Implementing changes in policy for imaging procedures effective 10/01/05.

Change: Effective 10/01/05, prior authorization will be required on all outpatient radiological services that include Computerized Tomography (CT), Magnetic Resonance Angiography (MRA), Magnetic Resonance Imaging (MRI), Positron Emission Tomography Scans (PET), and Magnetic Resonance Cholangiopancreatography (MRCP). Prior authorization requirements governing the provisions of all West Virginia Medicaid services will apply pursuant to Chapter 300 General Provider Participation Requirements, provider manual. Diagnostic services required during an emergency room episode will not require prior authorization. It is the responsibility of the ordering provider to obtain the prior authorization. Failure to obtain prior authorization will result in denial of the service; the Medicaid member cannot be billed for failure to receive authorization for these services.

Prior authorization must be obtained from West Virginia Medical Institute (WVMI) prior to the provision of the service. Failure to obtain prior authorization will result in denial of the service; the Medicaid member cannot be billed for failure to receive authorization for these services.

Directions: Replace pages.

CHAPTER 504—COVERED SERVICES, LIMITATIONS, AND EXCLUSIONS FOR CHIROPRACTIC SERVICES

TABLE OF CONTENTS

TOPIC

CHAPTER 504–COVERED SERVICES, LIMITATIONS, AND EXCLUSIONS FOR CHIROPRACTIC SERVICES

INTRODUCTION

The West Virginia (WV) Medicaid Program offers a comprehensive scope of medically necessary medical and mental health services to diagnose and treat eligible members. Covered and authorized services must be rendered by enrolled providers within the scope of their license and in accordance with all State and Federal requirements. Any service, procedure, item, or situation not discussed in the manual must be presumed non-covered unless informed otherwise in writing by the Bureau for Medical Services (BMS).

West Virginia Medicaid coverage of chiropractic services is limited to manual manipulation for subluxation of the spine and certain diagnostic radiological examinations related to chiropractic services.

The West Virginia Medicaid Program is administered pursuant to Title XIX of the Social Security Act and Chapter 9 of the Public Welfare Law of West Virginia.

This chapter sets forth the Bureau for Medical Services requirements for reimbursement of services provided by independently practicing and licensed chiropractors to eligible West Virginia Medicaid members.

504.1 DEFINITIONS

Definitions governing the provision of all West Virginia Medicaid services will apply pursuant to Chapter 200, Definitions of the Provider Manual. In addition, the following definition also applies to the requirements for reimbursement of chiropractic services described in this chapter.

Manual manipulation – Coverage of chiropractic services specifically limited to treatment by means of manual manipulation, i.e. by use of hands. Additionally, manual devices may be used by chiropractors in performing manual manipulation of the spine, however, no additional payment is available for use of a device nor does Medicaid recognize an extra charge for devices.

Subluxation - For Medicaid coverage, subluxation means an incomplete dislocation, off-centering, misalignment, fixation, or abnormal spacing of the vertebrae anatomically.

504.2 MEDICAL NECESSITY

All services must be medically necessary and appropriate to the member's needs in order to be eligible for reimbursement. The medical records of all members receiving chiropractic services must contain documentation that establishes the medical necessity of the service. Manipulation is deemed ineffective and not medically necessary when it is rendered for conditions other than subluxation of the spine.

IMPORTANT: The fact that a provider prescribes, recommends, or approves medical care does not in itself make the care medically necessary or a covered service. Nor does it mean that the patient is eligible for Medicaid benefits. It is the provider's responsibility to verify Medicaid eligibility before services are provided.

504.3 PROVIDER PARTICIPATION

To participate in the West Virginia Medicaid Program and receive reimbursement from the Bureau for Medical Services, Chiropractors must:

- Meet and maintain all applicable licensing as required by the state in which the practice is located.
- Meet and maintain all BMS provider enrollment requirements (Outlined in Chapter 300).
- Have a valid signed provider enrollment application/agreement on file.

For provider enrollment application forms or additional information regarding provider participation requirements, please contact the Provider Enrollment Unit at 1-888-483-0793 or (304) 348-3360.

504.4 MEDICAID PROGRAM COVERAGE OF CHIROPRACTIC SERVICES

West Virginia Medicaid limits its coverage of chiropractic services to treatment by means of manual manipulation to correct a subluxation of the spine which is demonstrated by an x-ray. The x-ray requirement is waived for the initially covered services for pregnant women and children, but will be required for children if services above the initial twelve visits are requested.

The x-ray must be taken no more than three months prior to the date a course of treatment was initiated. In certain cases of an acute exacerbation of a chronic subluxation, an x-ray no older than a year may be accepted.

The manual manipulation must be directed to the spine to correct the subluxation. The precise level of the subluxation must be specified in the proposed treatment plan and the symptoms pertinent to the diagnosis must be described. The patient's symptoms must be related to the documented level of subluxation. For example, if pain is the symptom, the pain's location must be stated and an indication given as to whether the listed vertebrae can cause the pain in the identified area.

Attachment 1 lists the types of spinal manipulations (CPT 98940-CPT 98942) that West Virginia Medicaid covers and summarizes the services covered by these codes.

504.4.1 DIAGNOSTIC RADIOLOGY SERVICES

Medicaid reimburses chiropractors for the professional and technical components of covered diagnostic radiology services (CPT 72010-CPT 72120) if the chiropractor performs both parts of the procedure. Attachment 1 summarizes the radiological services reimbursed to Chiropractors.

To be reimbursable, x-rays must be taken on certified radiology equipment that complies with all applicable State and Federal requirements. It is the chiropractor's responsibility to furnish a copy of that certification and to keep that certification current with Medicaid's Provider Enrollment Unit.

Medicaid will provide reimbursement for only one interpretation of an x-ray and will not pay for a second confirmatory x-ray.

504.4.2 IMAGING PROCEDURE

Effective 10/01/05, prior authorization will be required on all outpatient radiological services that include Computerized Tomography (CT), Magnetic Resonance Angiography (MRA), Magnetic

Resonance Imaging (MRI), Positron Emission Tomography Scans (PET), and Magnetic Resonance Cholangiopancreatography (MRCP). Prior authorization requirements governing the provisions of all West Virginia Medicaid services will apply pursuant to Chapter 300 General Provider Participation Requirements, provider manual. Diagnostic services required during an emergency room episode will not require prior authorization. It is the responsibility of the ordering provider to obtain the prior authorization. Failure to obtain prior authorization will result in denial of the service; the Medicaid member cannot be billed for failure to receive authorization for these services.

Prior authorization must be obtained from West Virginia Medical Institute (WVMI) prior to the provision of the service. Failure to obtain prior authorization will result in denial of the service; the Medicaid member cannot be billed for failure to receive authorization for these services.

504.5 LIMITATIONS AND CONDITIONS

Coverage of chiropractic services for subluxation of the spine is limited to one treatment per day for a Medicaid member and no more than twelve (12) treatments without prior authorization. A member may receive an additional twelve (12) treatments per calendar year if medically necessary and prior authorized. The maximum number of treatments that a member can have in any given year is 24 treatments.

Adjunctive therapies that a chiropractor may perform, such as diathermy, ultrasound, traction, laboratory tests, or other diagnostic procedures (excluding covered x-rays) are not covered services and will not be reimbursed. The chiropractic manipulative treatment codes include the pre-manipulation patient assessment and post-service work associated with the procedure.

Reimbursement is not available to chiropractors for any of the following radiology services:

- Mobile radiology services
- X-rays for soft tissue diagnosis
- Ultrasound or electrical stimulations.

504.6 PRIOR AUTHORIZATION

All chiropractic services beyond the initial twelve will require prior authorization. The provider is responsible for obtaining any required approvals. Any service rendered prior to obtaining authorization will not be reimbursed to providers, nor may the Medicaid member be held responsible for such charges unless the member did not inform the provider of the Medicaid coverage or signed an agreement to be treated as a private pay patient.

Attachment 2 contains the Chiropractic Information Form that must be completed in order to request prior authorization for chiropractic services. The completed form along with an x-ray report that is timely to the prior authorization request must be sent to:

West Virginia Medical Institute
3100 Chesterfield Ave SE
Charleston, West Virginia 25304

The West Virginia Medical Institute (WVMI) can be reached at 1-800-982-6334 or (304) 346-9167. The fax number is 304-346-8185.

Prior authorization for members who have Medicare and Medicaid benefits is unnecessary for services covered by the Medicare Program. Likewise, if a Medicaid member has private

health insurance, prior authorization is not required from Medicaid and the private insurance must be used before Medicaid.

Prior authorization does not guarantee payment for the approved services. Both providers and members must meet all applicable eligibility requirements, and services must be rendered within the Medicaid Program benefit limitations in effect as of the date of service.

All approved services must be performed within the authorized time frame. Medicaid payments will not be made for services provided outside the time frame.

504.7 GENERAL DOCUMENTATION REQUIREMENTS

Providers must maintain a specific record for all services provided for each West Virginia Medicaid eligible member including, but not limited to: name, address, birth date, Medicaid identification number, pertinent diagnostic information, documentation of services provided, the dates, and times, plus the services which were provided, and the signature of the chiropractor who provided the service along with his/her credentials. Documentation must substantiate medical necessity of the service provided.

In addition to the documentation requirements in this Chapter 504, chiropractors must also comply with the documentation and maintenance of records requirements described in Chapter 100 – General Information, Chapter 300 – Provider Participation, and Chapter 800 – General Administration of the Provider Manual.

504.8 BILLING AND REIMBURSEMENT

Reimbursement for covered spinal manipulations and diagnostic radiological examinations is based on the Resource Based Relative Value Scale (RBRVS) fee schedule, subject to West Virginia Medicaid's coverage policies within the scope of services a chiropractor is legally authorized to perform by the State in which he or she practices. Payment equals the lower of the fee schedule amount or the amount the practitioner charges for the service.

Chapter 600 explains the RBRVS fee schedule.

504.9 MANAGED CARE

If the member belongs to the PAAS Program, the member's PCP must authorize and provide a referral for chiropractic services prior to services being rendered. Unless noted otherwise, services detailed in this manual are the responsibility of the HMO if the Medicaid member is a member of an HMO. Medicaid will not reimburse for services provided when HMO or PAAS requirements are not met for those members.

ATTACHMENT 1

COVERED PROCEDURES CODES FOR SPINAL MANIPULATIONS AND CHIROPRACTIC DIAGNOSTIC RADIOLOGY SERVICES

Covered Procedures Codes
For Spinal Manipulations and
Chiropractic Diagnostic Radiology Services

Spinal Manipulation Procedure Codes:

CPT Code	Description
98940	Chiropractor manipulation treatment: spinal, one to two regions
98941	Chiropractor manipulation treatment: spinal, three to four regions
98942	Chiropractor manipulation treatment: spinal, five regions

Diagnostic Radiology Services:

CPT Code	Description
72010	Radiological examination, spine, entire, survey study, anteroposterior and lateral
72020	Radiologic examination, spine, single view, specify level
72040	Radiologic examination, spine, cervical, two or three views
72050	Radiologic examination, spine, cervical, minimum of four views
72052	Radiologic examination, spine, cervical, complete, including oblique and flexion and/or extension studies
72069	Radiologic examination, spine, thoracolumbar, standing (scoliosis)
72070	Radiologic examination, spine, thoracic, two views
72072	Radiologic examination, spine, thoracic, three views
72074	Radiologic examination, spine, thoracic, minimum of four views
72080	Radiologic examination, spine, thoracolumbar, two views
72090	Radiologic examination, spine, scoliosis study, including supine and erect studies
72100	Radiologic examination, spine, lumbrosacral; two or three views
72110	Radiologic examination, spine, lumbrosacral; minimum of four views
72114	Radiologic examination, spine, lumbrosacral, complete, including bending views
72120	Radiologic examination, spine, lumbrosacral; bending views only, minimum of four views

TABLE OF CONTENTS

SECTION **PAGE NO.**

CHAPTER 505– COVERED SERVICES, LIMITATIONS, AND EXCLUSIONS FOR DENTAL, ORTHODONTIC, AND ORAL HEALTH SERVICES

INTRODUCTION

The West Virginia Medicaid Program is administered pursuant to Title XIX of the Social Security Act and Chapter 9 of the West Virginia Code. The Bureau for Medical Services (BMS) in the West Virginia Department of Health and Human Resources (DHHR) is the single State agency responsible for administering the Program. This program, therefore, must also function within federally defined parameters. Any service, procedure, item, or situation not discussed in this chapter must be presumed non-covered.

Medicaid offers a comprehensive scope of medically necessary medical, dental, and mental services. All covered and authorized services must be provided by enrolled providers practicing within the scope of their license, utilizing professionally accepted standards of care, and in accordance with all State and Federal requirements. Enrolled providers are subject to review of services provided to Medicaid members by BMS whether or not the services require prior authorization. All providers of services must maintain current, accurate, legible and complete documentation to justify medical necessity of services provided to each Medicaid member and made available to BMS or its designee upon request.

General dentists and specialty dentists may provide a variety of covered dental services in accordance with his/her licensure and in accordance with the West Virginia State Code Chapter 30, Article 4 and 4A. Coverage decisions are based upon the member's age, medical necessity, and the member's need and may be provided in a practitioner's office, ambulatory surgical center, and outpatient or inpatient hospital. If a Current Dental Terminology (CDT) code requires prior authorization, the service requires prior authorization regardless of place of service. All inpatient hospitalizations require prior authorization (PA) by BMS' Utilization Management Contractor (UMC). Inpatient hospitalization shall not be reimbursed when the service could be provided in an outpatient setting. Requests for prior authorization do not guarantee approval or payment.

Medical doctors who possess a medical or osteopathic license in addition to a dental license will be assigned both a medical and dental provider number for billing services. Current Procedural Terminology (CPT) codes must be billed on a CMS 1500 claim or an 837P electronic claim format with the medical provider number. Current Dental Terminology (CDT) codes must be billed on an ADA claim or an 837D electronic format with the dental provider number. If both CPT and CDT codes exist for the services, CPT codes must be utilized for the service.

Enrolled children up to 21 years of age are eligible for covered diagnostic, preventive, restorative, periodontic, prosthodontics, maxillofacial prosthetics, oral and maxillofacial surgery, and orthodontics. Covered dental services for enrolled adults 21 years of age and older are limited to emergent procedures to treat fractures, reduce pain, or eliminate infection. Refer to Appendix C for Infant and Child Oral Health Fluoride Varnish Policy.

The fact that a practitioner prescribes, recommends, or approves medical care does not in itself make the care medically necessary or a covered service. Nor does it mean that the patient is

eligible for Medicaid benefits. It is the provider's responsibility to verify Medicaid eligibility and obtain appropriate authorizations before services are provided.

This chapter describes West Virginia Medicaid's coverage policies for general dentistry, orthodontia, and oral surgery.

505.1 DEFINITIONS

Definitions governing the provision of all West Virginia Medicaid services will apply pursuant to *Common Chapter 200, Definitions and Acronyms.* In addition, the following definitions for general dentistry, specialty dentistry and other oral health services as described in this chapter, include but are not limited to the following:

Abscess – An acute or chronic localized inflammation, probably with a collection of pus, associated with tissue destruction and frequently, swelling; usually secondary to infection.

Benefit Package or Plan – The group of services which make up a plan or set of benefits covered by Medicaid.

Bicuspid – A premolar tooth; a tooth with two cusps.

Bitewing radiograph – An interproximal radiographic view of the coronal portion of the tooth/teeth.

Complete series – An entire set of intra-oral radiographs usually consisting of 14 to 22 periapical and posterior bitewing images intended to display the crowns and roots of all teeth, periapical areas and alveolar bone.

Comprehensive Orthodontic Treatment – A phrase indicating multiple phases of treatment provided at different stages of dentofacial development.

Crown –

- An abutment (artificial crown serving for the retention or support of a dental prosthesis);
- Anatomical (that portion of tooth normally covered by, and including, enamel);
- Artificial (restoration covering or replacing the major part, or the whole of the clinical crown of a tooth); and,
- Clinical (that portion of a tooth not covered by tissues).

Current Dental Terminology (CDT) – A listing of procedure codes and descriptive terms published by the American Dental Association (ADA) for reporting dental services and procedures.

Current Procedural Terminology (CPT) – A listing of descriptive terms and identifying codes developed by the American Medical Association (AMA) for reporting practitioner services and procedures to medical plans and Medicare.

Cuspid – A single cusped tooth located between the incisors and bicuspids.

Dentition – The teeth in the dental arch:

- Adolescent (refers to the stage of permanent dentition prior to cessation of growth)
- Deciduous (refers to the deciduous or primary teeth in the dental arch)
- Permanent (adult, refers to the permanent teeth in the dental arch)
- Transitional (refers to a mixed dentition; begins with the appearance of the permanent first molars and ends with the exfoliation of the deciduous teeth).

Dental Assistant – An individual qualified by education, training, and experience who aids or assists a dentist in the delivery of patient care in accordance with delegated procedures or who may perform intra-oral tasks in the dental office. No occupational title other than dental assistant shall be used to describe this individual.

Dental Auxiliary Personnel – Dental hygienists and dental assistants who assist the dentist in the provision of oral health care services to patients.

Dental Hygienist – A person licensed by the West Virginia Board of Dental Examiners who provides preventive oral health care services to patients in the dental office and in a public health setting. No occupational title other than dental hygienist may be used to describe this individual. State dental regulations determine the dental hygienist duties.

Dentures – An artificial substitute for some or all of the natural teeth and adjacent tissues.

- Complete – a prosthetic for the edentulous maxillary or mandibular arch, replacing the full dentition.
- Fixed partial – a prosthetic replacement of one or more missing teeth cemented or otherwise attached to the abutment teeth.
- Removable partial – a removable prosthetic device that replaces missing teeth.

Direct Supervision – Supervision of dental auxiliary personnel provided by a licensed dentist who is physically present in the dental office or treatment facility when procedures are being performed.

Emergent Oral Health Procedures – Covered services provided as quickly as the situation warrants necessary to relieve pain, eliminate infection, or reduce fractures.

Endodontist – A dental specialist who limits his/her practice to treating disease and injuries of the pulp and associated periradicular conditions.

Extraction – The process or act of removing a tooth or tooth parts.

Fracture – The breaking of a part, especially of a bony structure; breaking of a tooth.

General Dentist – A dentist who is not considered a specialist and can perform examinations, evaluations, diagnosing of diseases, disorder and conditions of the oral cavity, maxillofacial area and adjacent and associated structures. They can treat diseases, disorders and conditions of the oral cavity, maxillofacial area and the adjacent and associated structures, fabricate, repair

and alter dental prosthesis, administer anesthesia in accordance with West Virginia Code Chapter 30, Article 4a, and prescribing drugs necessary for dentistry.

General Supervision – A dentist is not required to be in the office or treatment facility when procedures are being performed by the auxiliary dental personnel, but has personally diagnosed the condition to be treated, has personally authorized the procedures and will evaluate the treatment provided by the dental auxiliary personnel.

Impacted tooth – An unerupted or partially erupted tooth that is positioned against another tooth, bone, or soft tissue so that complete eruption is unlikely.

Malocclusion – improper alignment of biting or chewing surfaces of upper and lower teeth.

- **Class I malocclusion** – The relationship of the first molars is normal and the upper and lower jaws are in a normal relationship to each other, but the other teeth are crowded, irregularly spaced, or overlapped.
- **Class II malocclusion** – The lower first molar is distally positioned relative to the upper first molar.
- **Class III malocclusion** – The lower molar mesially positioned relative to the upper molar.

Molar – Teeth posterior to the premolars (bicuspids) on either side of the jaw; grinding teeth, having large crowns and broad chewing surfaces.

Mountain Health Trust – The name of West Virginia Medicaid's Managed Care Program that consists of the Physician Assured Access System (PAAS) and the Medicaid Managed Care Organizations (MCOs).

Occlusion – Any contact between biting or chewing surfaces of maxillary (upper) and mandibular (lower) teeth.

Oral and Maxillofacial Surgeon – A dental specialist whose practice is limited to the diagnosis, surgical and adjunctive treatment of diseases, injuries, deformities, defects and esthetic aspects of the oral and maxillofacial regions.

Orthodontist – A dental specialist whose practice is limited to the interception and treatment of malocclusion and other neuromuscular and skeletal abnormalities of the teeth and their surrounding structures.

Orthognathic – The functional relationship of maxilla and mandible.

Pediatric Dentist (Pedodontist—old terminology) – A dental specialist whose practice is limited to treatment of children from birth through adolescence (including those with special health care needs, at any age), providing primary and comprehensive preventive and therapeutic oral healthcare.

Periapical – The area surrounding the end of the tooth root.

Peridontist – A dental specialist whose practice is limited to the treatment of diseases of the supporting and surrounding tissues of the teeth.

Preventive dentistry – The aspects of dentistry concerned with promoting good dental and function by preventing or reducing the onset and/or development of oral diseases or deformities and the occurrence of oro-facial injuries.

Primary – A current term used to describe the older verbiage of deciduous or baby teeth.

Primary Care Provider (PCP) – A practitioner associated with the medical home that is the primary contact for provision and coordination of a member's health care services or needs.

Primary Dentition- The teeth that erupt first and are usually replaced by the permanent teeth (baby teeth).

Prosthodontist – A dental specialist whose practice is limited to the restoration of the natural teeth and/or the replacement of missing teeth with artificial substitutes.

Quadrant – One of the four equal sections into which the dental arches can be divided, begins at the midline of the arch and extends distally to the last tooth.

Radiograph – An image or picture produced on a radiation sensitive film emulsion or digital sensor by exposure to ionizing radiation.

Root canal – The portion of the pulp cavity inside the root of a tooth; the chamber within the root of the tooth that contains the pulp.

Sealant – A resinous material designed to be applied to the occlusal surfaces of posterior teeth to prevent occlusal caries.

Space maintainer – A passive appliance, usually cemented in place that holds teeth in position.

Specialty – The practice of a certain branch of dentistry.

Supernumerary teeth – extra erupted or unerupted teeth that resemble teeth of normal shape.

Symptomatic impacted tooth – Pain and/or infection or demonstrated malocclusion causing a shifting of existing dentition.

Transitional Dentition- Begins with the appearance of the permanent first molars and ends with the exfoliation of the deciduous (baby) teeth.

505.2 PRACTITIONER PARTICIPATION

West Virginia Medicaid recognizes Doctor of Dental Surgery (DDS) and Doctor of Dental Medicine (DDM) as eligible practitioners to provide general dental, orthodontic and oral and maxillofacial surgery services to enrolled Medicaid members. To be eligible for participation and reimbursement of services provided to Medicaid members, all providers shall:

- Meet all applicable licensing, accreditation and certification requirements;
- Have a valid signed provider enrollment application/agreement on file; and,
- Meet and maintain all BMS provider enrollment requirements.

Refer to *Common Chapter 300, Provider Participation Requirement* for additional information.

505.3 DENTAL HYGIENIST/DENTAL ASSISTANT

Licensed practitioners may assign intra-oral tasks to employed dental hygienists or dental assistants. Refer to West Virginia State Code *§30-4-17 and §30-4-18* for dental hygienists and dental assistants scope of practice. Dental hygienists and dental assistants are not eligible to enroll individually as a Medicaid provider or receive direct reimbursement for services rendered. Services are to be billed over the dentist's NPI.

505.4 COVERED SERVICES

West Virginia Medicaid reimburses for general dentistry, orthodontics, oral and maxillofacial surgery services. Children up to 21 years of age are eligible for covered diagnostic, preventive, restorative, periodontic, prosthodontics, maxillofacial prosthetics, oral and maxillofacial services, and orthodontics. When covered services are required and initiated before the member's 21st birthday, the service shall be completed within the timeframe established by the treatment plan. Prior authorization may apply.

Covered dental services for adults 21 years of age and older are limited to emergent procedures to treat fractures, reduce pain, or eliminate infection. Prior authorization and service limits may apply.

Orthodontia services, covered for children up to 21 years, must be medically necessary, and require prior authorization before the service is provided. (See Prior Authorization Form located at www.wvmi.org for orthodontia criteria). BMS reimburses one treatment of comprehensive orthodontia (CDT Codes D8070, D8080 and D8090) per lifetime per member. If any of the comprehensive orthodontia codes are billed then none of the remaining can be billed; they are a one per lifetime limit for any of the three and are not looked at as per code lifetime limit.

Orthognathic surgical procedures associated with orthodontic treatment shall be covered even if the member exceeds 21 years of age AND the needed surgery is documented in the original orthodontic request.

Current Dental Terminology Procedure Codes for covered dental services for children up to 21 years of age and adults 21 years of age and older is available in *Appendices A and B*.

505.5 LIMITATIONS OF COVERAGE—ADULTS

Dental services for adults, 21 years of age and older, are limited to Emergent services necessary to treat fractures, reduce pain, or eliminate infection. An Oral evaluation for limited

fractures, pain or infection is covered. Prior authorization and service limits may apply. Refer to *Appendix B*.

505.6 ANESTHESIA

Anesthesia in the form of general anesthesia, conscious sedation, and anxiolysis is covered when basic behavior guidance techniques have not been successful or for members who cannot cooperate due to lack of psychological or emotional maturity and/or mental, physical or medical disability. In addition it may be required for members where the use of sedation may protect the developing psyche and/or reduce medical risk.

No dentist may induce central nervous system anesthesia without first having obtained an anesthesia permit and/or certificate from the West Virginia Board of Dental Examiners or from the State Board of Dental Examiners in the state in which they practice for the level of anesthesia being induced.

Local anesthesia and oral sedation are considered part of the treatment procedures and may not be billed separately.

505.7 NON-COVERED SERVICES

Dental services not covered by West Virginia Medicaid include, but are not limited to, the following. Non-covered services are not eligible for a DHHR fair hearing or a desk/document review.

- Experimental/investigational or services for research purposes
- Removal of primary teeth whose exfoliation is imminent
- Dental services for which PA has been denied or not obtained
- Dental services for the convenience of the member, the member's caretaker, or the provider of service
- Procedures for cosmetic purposes
- Temporomandibular Joint (TMJ) for adults
- Anesthesia services when solely for the convenience of the member, the member's caretaker or the provider of service
- Local anesthesia and oral sedation are considered part of the treatment procedures and may not be billed separately
- Dental services for residents of Intermediate Care and Nursing Facilities i.e., Nursing Home, ICF/MR, and PRTF
- Dental services for participants enrolled in the Division of Rehabilitation Services or when services are covered under a Workers Compensation plan
- Dental services provided by providers not enrolled with West Virginia Medicaid
- Use of an unlisted code when a national CDT code is available
- Unbundled CDT codes

505.8 PRIOR AUTHORIZATION

Effective with this manual, medical necessity review criteria may be based on adaptations of dental standards developed by the Periodicity and Anticipatory Guidance Recommendations by the American Academy of Pediatric Dentistry (AAPD), the American Academy of Pediatrics (AAP), the American Dental Association (ADA), and research-based, nationally accredited medical appropriateness criteria, such as InterQual, OR other appropriate criteria approved by BMS. Prior authorization request forms are available at the BMS' Utilization Management Contractor (UMC) website www.wvmi.org/corp/web_sites/links_wvmedicaid.aspx Prior authorization does not guarantee approval or payment.

The UMC reviews all requests for services requiring prior authorization. It is the responsibility of the treating/prescribing practitioner to submit the appropriate Prior Authorization Request Form with medical documentation to the UMC. The treating practitioner is responsible to assure the assigned prior authorization number is documented on the appropriate claim form when submitting the claim for payment consideration. Refer to *Common Chapter 800*, *General Administration*, for additional information.

When a request for service is denied based on medical necessity, the denial is communicated with the reason(s) of denial to the provider of service and the member or their legal guardian by the UMC. Information related to the member's right to a fair hearing and the provider's right to a reconsideration of the denial is included in the communication.

The use of an unlisted code is prohibited when an appropriate code is available. Therefore, unlisted codes for procedures/services require prior authorization by the UMC. The practitioner shall provide medical documentation and the reason(s) why an unlisted code shall be utilized for the specific procedure/service requested. The aforementioned prior authorization process shall be followed. When an assigned code is identified, the request for the unlisted code shall be denied.
Refer to *Appendices A* and *B* for specific procedure codes requiring prior authorization and service limits for covered services.

Retrospective authorization is available in the following circumstances:

- A procedure/service denied by the member's primary payer providing all requirements for the primary payer have been followed, including appeal processes; or
- Retroactive Medicaid eligibility; or
- Retrospective review is available for Medicaid members in instances where it is in the dental practitioner's opinion that a procedure that requires prior authorization is medically necessary and per recommended dental practices delaying the procedure may subject the member to unnecessary or duplicative service if delivery of the service is delayed until prior authorization is granted. In these instances, a request for prior authorization must be made by the provider within 10 business days of the date the service is performed. If the procedure(s) does not meet medical necessity criteria upon review by the Utilization Management Contractor (UMC) the prior authorization request will be denied and the provider will not be reimbursed for the service by Medicaid or the member. Prior authorization is also available for medical necessity review before the service is provided.

- A request for retrospective authorization is submitted the next business day following an Emergent procedure/service occurring on weekends, holidays, or at times when the UMC is unavailable.

A request for consideration of retrospective authorization does not guarantee approval or payment.

505.9 DOCUMENTATION REQUIREMENTS

In addition to the documentation requirements identified in *Common Chapter 300, Provider Participation Requirements, Section 320.5, Document and Retain Records*, practitioners submitting claims for Medicaid reimbursement shall maintain complete, individual, accurate, and legible medical records. Records shall include documentation of medical necessity procedures/services provided and must be available to BMS or its designee upon request. When documentation is not available, BMS will request repayment.

Documentation requirements include, but are not limited to:

- A referral for treatment
- The primary diagnosis and appropriate CDT code for service to be provided
- A treatment plan (Orthodontics)
- Radiographs
- Photos, when appropriate
- Dental molds, when appropriate
- Documentation to justify medical necessity
- Copy of Prior Authorization Request Form, when applicable
- Copy of ADA claim form submitted for payment consideration, when appropriate.

Supporting documentation for prior authorization review cannot be older than 6 months.

505.10 EARLY PERIODIC, SCREENING, DIAGNOSIS, AND TREATMENT (EPSDT)

West Virginia Medicaid's Early and Periodic Screening, Diagnosis, and Treatment (EPSDT) Program offers screenings and other preventive health services at regularly scheduled intervals to Medicaid members less than 21 years of age. These services target early detection of disease and illness to correct or ameliorate a physical or mental condition and provide referral of members for necessary diagnostic and treatment services. Based on medical necessity, prior authorization is required when service limits are exceeded.

Dental screenings are covered to any child under the age of 21 years per the recommended guidelines set forth by the American Academy of Pediatric Dentistry (AAPD) and Bright Futures. Refer to www.aap.org for the American Academy of Pediatrics Dental (AAPD) periodicity schedule.

505.11 RESIDENTIAL FACILITIES

A. Nursing Facility

Dental services are not eligible for reimbursement as a direct billing to Medicaid if the Medicaid member is a resident of the nursing facility at the time the dental service is provided.

B. Intermediate Care Facility for Mental Retardation (ICF/MR)

Any service required by the member is reimbursed as an all inclusive rate. However, if the ICF/MR does not provide the required service on-site, such as dental, a mutual dental agreement between the ICF/MR and an outside source shall be developed and implemented. Services provided by outside sources are included in the ICF/MR rate and shall not be billed separately.

C. Psychiatric Residential Treatment Facility (PRTF)

Any service required by the member is reimbursed an all inclusive rate. However, if the PRTF does not provide the required service on-site, such as dental, a mutual dental agreement between the PRTF and an outside source shall be developed and implemented. Services provided by outside sources are included in the PRTF rate and shall not be billed separately.

505.12 TOBACCO CESSATION

West Virginia Medicaid in partnership with the Bureau for Public Health (BPH) operates a tobacco cessation program to assist members to discontinue use of tobacco products. In order for members to have access to drugs and other tobacco cessation services, they are required to see their primary care provider and enroll in the program. Participants are screened for their readiness to quit the use of tobacco. Written materials and phone coaching are also available through the program. All tobacco cessation products must be prescribed by a licensed practitioner within the scope of his/her license under West Virginia law. Prior authorization is required for coverage of tobacco cessation medications and is coordinated through the tobacco quit line.

Members are limited to one 12-week treatment period per calendar year. Pregnant females are eligible for additional course(s) of treatment, when appropriate. Refer to *Chapter 518, Pharmacy Services,* for covered tobacco cessation drug products.

Additional information regarding the tobacco cessation program can be accessed through www.wvdtp.com or www.wvquitline.com. The Bureau for Public Health may also assist in providing services for those who are uninsured or under-insured.

505.13 BILLING and REIMBURSEMENT

505.13.1 Billing

West Virginia Medicaid utilizes Current Dental Terminology (CDT) procedure codes for billing of dental services provided to Medicaid members. Only enrolled providers shall be eligible for reimbursement of services provided. Billing prior to providing services is prohibited. Providers shall not directly bill a Medicaid member for any service without first informing the member that the service is not covered by Medicaid AND a written signed agreement by the member signifying that he/she accepts responsibility for payment.

Medical doctors who possess a medical or osteopathic license in addition to a dental licensed will be assigned both a medical and dental provider number for billing services. Current Procedural Terminology (CPT) codes must be billed on a CMS 1500 claim or an 837P electronic claim format with the medical provider number. Current Dental Terminology (CDT) codes must be billed on an ADA claim or an 837D electronic format with the dental provider number. If both CPT and CDT codes exist for the services, CPT codes must be utilized for the service. Refer to Appendix C for Infant and Child Oral Health Fluoride Varnish Policy.

At the initiation of the approved orthodontic treatment plan, BMS reimburses a one-time total payment to the orthodontist. In the event the initial orthodontist is unable to complete the approved treatment plan, he/she must refund the monies for uncompleted portions of the treatment plan through the reversal/replacement process. Through this process, reimbursement is available to the orthodontist who ultimately completes the treatment plan.

BMS does not require a prior authorization for most services when the member has a primary insurance and that insurance approved and reimbursed for the service. Orthodontic services shall require a Medicaid prior authorization from the UMC regardless of primary insurance.

In instances where procedure/service codes are bundled, unbundling of individual codes is prohibited.

The ADA claim form or electronic form 837D is required for billing general dentistry and specialty dental services.

Refer to *Common Chapter 600, Reimbursement Methodology*, for additional information

505.13.2 Reimbursement Methodology

Medicaid is the payer of last resort. Third-Party Liability, (TPL) is a method of ensuring that BMS is the last payer to reimburse for covered services. Refer to *Common Chapter 600, Reimbursement Methodology,* for additional information.

Reimbursement for general and specialty dental services is based on:

- American Dental Association Survey of Dental Fees for Southern Atlantic Regional Norms

- American Society of Anesthesiology guidelines
- Lesser of the established fees or the provider's usual customary charge to the general public
- Unaltered cost invoice.

Refer to *Common Chapter 600, Reimbursement Methodologies,* for additional information.

505.14 MANAGED CARE

If the Medicaid member is enrolled in a Managed Care Organization (MCO), the MCO is responsible for covered emergent dental services to treat fractures, reduce pain, or eliminate infection for adults 21 years of age and older. These dental services are covered under Mountain Health Trust and reimbursed by the MCO.

505.15 PAAS PROGRAM

If a Medicaid member is enrolled in the PAAS Program, no referral by the PAAS provider is necessary for the member to receive dental services; however, all applicable prior authorization requirements remain and age restrictions apply. Based on medical necessity, prior authorization is required when service limits are exceeded.

505.16 MOUNTAIN HEALTH CHOICES

Mountain Health Choices program is offered by West Virginia Medicaid for certain eligibility categories. It includes a choice of benefit package and primary care provider (PCP), encourages personal responsibility, and provides care coordination for its members through the member's medical home.

Providers can view the member's benefit plan designation on the member's Medicaid card, call the provider eligibility telephone line or utilize the Medicaid Management Information System (MMIS) vendor web portal to determine member eligibility and benefit package. The following will be noted on the member's card to identify the benefit plan in which the member is enrolled:

- ~~T~~R" Traditional Medicaid Benefit Package
- ~~B~~A" Basic Adult Benefit Package
- ~~E~~A" Enhanced Adult Benefit Package
- ~~B~~C Basic Child Benefit Package
- ~~E~~C" Enhanced Child Benefit Package.

See *Chapter 527, Mountain Health Choices*, for information on the Basic and Enhanced Benefit Packages.

CHAPTER 505
DENTAL, ORTHODONTIC AND ORAL HEALTH SERVICES
NOVEMBER 1, 2010

APPENDIX A
COVERED DENTAL, ORTHODONTIC AND ORAL HEALTH SERVICES
CHILDREN UP TO AGE 21 YEARS

Appendix A
COVERED DENTAL, ORTHODONTIC AND ORAL HEALTH SERVICES, CHILDREN UP TO AGE 21 YEARS
Children Oral Health Procedures/Codes
PRIOR AUTHORIZATION MUST BE OBTAINED WHEN SERVICE LIMITS ARE EXCEEDED

CDT CODE	DESCRIPTION	SERVICE LIMITS	SPECIAL INSTRUCTIONS
DIAGNOSTIC			
CLINICAL ORAL EVALUATION			
D0120	Periodic oral examination - established patient	2 per calendar year	Not billable with D0140, D0145, D0150 or D9310
D0140	Limited oral evaluation - problem focused	Emergent	Not billable with D0120, D0145, D0150 or D9310
D0145	Oral evaluation for a patient under three years of age and counseling with primary caregiver	1 per 6 months	Age restriction up to 36 months. Not billable with D0120, D0140, D0150 or D9310
D0150	Comprehensive oral evaluation - new or established patient	1 per calendar year	Not billable with D0120, D0140, D0145, D9310
RADIOGRAPH/DIAGNOSTIC IMAGING (INCLUDING INTERPRETATION)			
D0210	Intraoral-complete series (including bitewings)	1 per 2 years	Not billable with D0220, D0230, D0240, D0250, D0260, D0270, D0272, D0273, D0274
D0220	Intraoral-periapical, first film	1 per day	Not billable with D0210 and D0240
D0230	Intraoral-periapical, each additional film	8 per 3 months	Not billable with D0210 and D0240. Must be billed with D0220
D0240	Intraoral- occlusal film	2 per calendar year	Not billable with D0210 and D0220, D0230
D0250	Extraoral- first film	1 per 3 years	
D0260	Extraoral- each additional film	3 per 3 years	Must be billed with D0250
D0270	Bitewing-single film	4 per calendar year	Not billable with D0210, D0272, D0273, D0274
D0272	Bitewings -two films	1 per calendar year	Not billable with D0210, D0273, D0274
D0273	Bitewings – three films	1 per calendar year	Not billable with D0210, D0272, D0274
D0274	Bitewings- four films	1 per calendar year	Not billable with D0210, D0272, D0273
D0290	Posterior - anterior or lateral skull and facial bone survey films	2 per calendar year	

Appendix A
COVERED DENTAL, ORTHODONTIC AND ORAL HEALTH SERVICES, CHILDREN UP TO AGE 21 YEARS
Children Oral Health Procedures/Codes
PRIOR AUTHORIZATION MUST BE OBTAINED WHEN SERVICE LIMITS ARE EXCEEDED

CDT CODE	DESCRIPTION	SERVICE LIMITS	SPECIAL INSTRUCTIONS
D0310	Sialography		
D0320	Temporomandibular joint arthrogram, including injection		
D0321	Other temporomandibular joint films, by report		Requires PA with documentation to identify type of radiograph requested.
D0322	Tomographic survey		
D0330	Panoramic film	1 per 3 years	
D0340	Cephalometric film	1 per calendar year	
D0350	Oral/facial photographic images		This code excludes conventional radiographs - For orthodontics only.
TESTS AND EXAMINATIONS			
D0470	Diagnostic casts	2 per calendar year	
D0474	Accession of tissue, gross and microscopic examination, including assessment of surgical margins for presence of disease, preparation and transmission of written report.		
ORAL PATHOLOGY LABORATORY			
GENERALLY PERFORMED IN A PATHOLOGY LABORATORY AND DOES NOT INCLUDE THE REMOVAL OF THE TISSUE SAMPLE FROM THE PATIENT.			
D0486	Accession of transepithelial cytologic sample, microscopic examination, preparation and transmission of written report		To be used in pathology laboratory reporting transepithelial, disaggregated cell samples by brush biopsy technique.
PREVENTIVE			
DENTAL PROPHYLAXIS			

Appendix A
COVERED DENTAL, ORTHODONTIC AND ORAL HEALTH SERVICES, CHILDREN UP TO AGE 21 YEARS
Children Oral Health Procedures/Codes
PRIOR AUTHORIZATION MUST BE OBTAINED WHEN SERVICE LIMITS ARE EXCEEDED

CDT CODE	DESCRIPTION	SERVICE LIMITS	SPECIAL INSTRUCTIONS
D1110	Prophylaxis-adult	1 per 6 months	13 to 21 years of age; Not reimbursable with D1120
D1120	Prophylaxis-child	1 per 6 months	up to 13 years of age; Not reimbursable with D1110
TOPICAL FLUORIDE TREATMENT (OFFICE PROCEDURE)			
D1203	Topical application of fluoride - child	2 per calendar year	3 to 13 years of age; Not reimbursable with D1204 or D1206
D1204	Topical application of fluoride-adult	2 per calendar year	13 to 21 years of age; Not reimbursable with D1203 or D1206
D1206	Topical fluoride varnish; therapeutic application for moderate to high caries	2 per calendar year	Not reimbursable with D1203 or D1204. Age restriction of 6 months to 3 years.
OTHER PREVENTIVE SERVICES			
D1320	Tobacco counseling for the control and prevention of oral disease	2 per calendar year	12 to 21 years of age
D1351	Sealant	1 sealant per tooth per 3 years	Tooth numbers 1-32 or A-T must be documented on the claim form for payment consideration Requires dental areas configuration.
SPACE MAINTENANCE (PASSIVE APPLIANCES)			
D1510	Space maintainer-fixed-unilateral	4 per calendar year	Per quadrant –UR, UL, LL, LR must be included on claim form for payment consideration.
D1515	Space maintainer-fixed-bilateral	2 per calendar year	Upper arch or lower arch must be included on claim form for payment consideration.
D1520	Space maintainer-removable- unilateral	4 per calendar year	See D1510
D1525	Space maintainer-removable- bilateral	2 per calendar year	See D1515
D1550	Recementation of space maintainer	1 per calendar year	
RESTORATIVE			

Appendix A
COVERED DENTAL, ORTHODONTIC AND ORAL HEALTH SERVICES, CHILDREN UP TO AGE 21 YEARS
Children Oral Health Procedures/Codes
PRIOR AUTHORIZATION MUST BE OBTAINED WHEN SERVICE LIMITS ARE EXCEEDED

CDT CODE	DESCRIPTION	SERVICE LIMITS	SPECIAL INSTRUCTIONS
AMALGAM RESTORATIONS (INCLUDING POLISHING)			
D2140	Amalgam- one surface, primary or permanent	5 surfaces per tooth number per 3 years	Tooth numbers 1-32, A-T must be included on the claim form for payment consideration. Tooth preparation, all adhesives (including amalgam bonding agents), liners, bases, & local anesthesia are included the fee & may not be billed separately. Radiographs with documentation must be documented in the medical record for date of service.
D2150	Amalgam- two surfaces, primary or permanent	5 surfaces per tooth number per 3 years	Tooth numbers 1-32, A-T must be included on the claim form for payment consideration. Tooth preparation, all adhesives (including amalgam bonding agents), liners, bases, and local anesthesia are included the fee and may not be billed separately. Radiographs with documentation must be documented in the medical record for date of service.
D2160	Amalgam-three surfaces, primary or permanent	5 surfaces per tooth number per 3 years	Tooth numbers 1-32, A-T must be included on the claim form for payment consideration. Tooth preparation, all adhesives (including amalgam bonding agents), liners, bases, and local anesthesia are included the fee and may not be billed separately. Radiographs with documentation must be documented in the medical record for date of service.
D2161	Amalgam-four or more surfaces, primary or permanent	5 surfaces per tooth number per 3 years	Tooth numbers 1-32, A-T must be included on the claim form for payment consideration. Tooth preparation, all adhesives (including amalgam bonding agents), liners, bases, and local anesthesia are included the fee and may not be billed separately. Radiographs with documentation must be documented in the medical record for date of service.
RESIN-BASED COMPOSITE RESTORATIONS – DIRECT			
D2330	Resin-based composite-one surface, anterior	5 surfaces per tooth number per 3 years	Tooth numbers 6-11, 22-27, C-H, M-R must be included on the claim form for payment consideration. Fees include bonded composite, light-cured composite, etc., tooth preparation, acid etching, adhesives (included resin bonding agents), liners, bases, curing, glass ionomers and local anesthesia and may not be separately billed. Radiographs with documentation must be documented in the medical record for date of service.
D2331	Resin-based composite- two surfaces, anterior	5 surfaces per tooth number per 3 years	Tooth numbers 6-11, 22-27, C-H, M-R must be included on the claim form for payment consideration. Fees include bonded composite, light-cured composite, etc., tooth preparation, acid etching, adhesives (included resin bonding agents), liners, bases, curing, glass ionomers and local anesthesia and may not be separately billed. Radiographs with documentation must be documented in the medical record for date of service.

Appendix A
COVERED DENTAL, ORTHODONTIC AND ORAL HEALTH SERVICES, CHILDREN UP TO AGE 21 YEARS
Children Oral Health Procedures/Codes
PRIOR AUTHORIZATION MUST BE OBTAINED WHEN SERVICE LIMITS ARE EXCEEDED

CDT CODE	DESCRIPTION	SERVICE LIMITS	SPECIAL INSTRUCTIONS
D2332	Resin-based composite-three surfaces, anterior	5 surfaces per tooth number per 3 years	Tooth numbers 6-11, 22-27, C-H, M-R must be included on the claim form for payment consideration. Fees include bonded composite, light-cured composite, etc., tooth preparation, acid etching, adhesives (included resin bonding agents), liners, bases, curing, glass ionomers and local anesthesia and may not be separately billed. Radiographs with documentation must be documented in the medical record for date of service.
D2335	Resin-based composite-four or more surfaces or involving incisal angle (anterior)	5 surfaces per tooth number per 3 years	Tooth numbers 6-11, 22-27, C-H, M-R must be included on the claim form for payment consideration. Fees include bonded composite, light-cured composite, etc., tooth preparation, acid etching, adhesives (included resin bonding agents), liners, bases, curing, glass ionomers and local anesthesia and may not be separately billed. Radiographs with documentation must be documented in the medical record for date of service.
D2390	Resin-based composite crown, anterior	1 tooth number per 3 years	Tooth numbers 6-11, 22-27, C-H, M-R must be included on the claim form for payment consideration. Fees include bonded composite, light-cured composite, etc., tooth preparation, acid etching, adhesives (included resin bonding agents), liners, bases, curing, glass ionomers and local anesthesia and may not be separately billed. Radiographs with documentation must be documented in the medical record for date of service.
D2391	Resin-based composite, one surface posterior	5 surfaces per tooth per 3 years	Tooth numbers 1-5, 12-21, 28-32, A, B, I, J, K, L, S, T, must be included on the claim form for payment consideration. Fees include bonded composite, light-cured composite, etc., tooth preparation, acid etching, adhesives (included resin bonding agents), liners, bases, curing, glass ionomers and local anesthesia and may not be separately billed. Radiographs with documentation must be documented in the medical record for date of service.
D2392	Resin-based composite, two surfaces posterior	5 surfaces per tooth per 3 years	Tooth numbers 1-5, 12-21, 28-32, A, B, I, J, K, L, S, T, must be included on the claim form for payment consideration. Fees include bonded composite, light-cured composite, etc., tooth preparation, acid etching, adhesives (included resin bonding agents), liners, bases, curing, glass ionomers and local anesthesia and may not be separately billed. Radiographs with documentation must be documented in the medical record for date of service.
D2393	Resin-based composite, three surfaces posterior	5 surfaces per tooth per 3 years	Tooth numbers 1-5, 12-21, 28-32, A, B, I, J, K, L, S, T, must be included on the claim form for payment consideration. Fees include bonded composite, light-cured composite, etc., tooth preparation, acid etching, adhesives (included resin bonding agents), liners, bases, curing, glass ionomers and local anesthesia and may not be separately billed.

Appendix A
COVERED DENTAL, ORTHODONTIC AND ORAL HEALTH SERVICES, CHILDREN UP TO AGE 21 YEARS
Children Oral Health Procedures/Codes
PRIOR AUTHORIZATION MUST BE OBTAINED WHEN SERVICE LIMITS ARE EXCEEDED

CDT CODE	DESCRIPTION	SERVICE LIMITS	SPECIAL INSTRUCTIONS
			Radiographs with documentation must be documented in the medical record for date of service
D2394	Resin-based composite, four or more surfaces	5 surfaces per tooth per 3 years	Tooth numbers 1-5, 12-21, 28-32, A, B, I, J, K, L, S, T, must be included on the claim form for payment consideration. Fees include bonded composite, light-cured composite, etc., tooth preparation, acid etching, adhesives (included resin bonding agents), liners, bases, curing, glass ionomers and local anesthesia and may not be separately billed. Radiographs with documentation must be documented in the medical record for date of service
CROWNS - SINGLE RESTORATIONS ONLY			
D2751	Crown- porcelain fused to predominately base metal	1 tooth number per 5 years	Requires PA with documentation identifying tooth numbers 1-32 and A, B, I, J, K, L, S & T. Tooth numbers must also be documented on the claim form for payment consideration.
D2791	Crown- full cast predominately base metal	1 tooth number per 5 years	Requires PA with documentation identifying tooth numbers 1-32 and A, B, I, J, K, L, S, & T. Tooth numbers must also be documented on the claim form for payment consideration.
OTHER RESTORATIVE SERVICES			
D2920	Recement crown	1 per tooth number per 1 calendar year	Tooth numbers 1-32, A-T must be included on the claim form for payment consideration.
D2930	Prefabricated stainless steel crown-primary tooth	1 per tooth number per 1 calendar year	Requires PA with radiographs. Tooth number A-T primary teeth must be documented on the claim form for payment consideration. Use only when a regular filling is not applicable. Radiographs with documentation must be documented in the medical record for date of service.
D2931	Prefabricated stainless steel crown-permanent tooth	1 per tooth number per 1 calendar year	Requires PA with radiographs. Tooth number 1-32 must be documented on the claim form for payment consideration. Use only when a regular filling is not applicable. Radiographs with documentation must be documented in the medical record for date of service.
D2932	Prefabricated resin crown	1 per tooth number per 1 calendar year	Requires PA with radiographs. Tooth numbers 1-32 or A-T must be documented on the claim form for payment consideration. Radiographs with documentation must be documented in the medical record for date of service.
D2933	Prefabricated stainless steel crown with resin window		Requires PA with radiographs. Tooth numbers1-32 must be documented on the claim form for payment consideration. Radiographs with documentation must be documented in the medical record for date of service.

Appendix A
COVERED DENTAL, ORTHODONTIC AND ORAL HEALTH SERVICES, CHILDREN UP TO AGE 21 YEARS
Children Oral Health Procedures/Codes
PRIOR AUTHORIZATION MUST BE OBTAINED WHEN SERVICE LIMITS ARE EXCEEDED

CDT CODE	DESCRIPTION	SERVICE LIMITS	SPECIAL INSTRUCTIONS
D2940	Protective restoration	2 per calendar year per tooth number	Tooth numbers 1-32, A-T must be documented on claim form for payment consideration. Not allowed in conjunction with root canal therapy, pulpotomy, pulpectomy or on the same date of services as a restoration.
D2950	Core buildup, including any pins	1 per calendar year per tooth number	Tooth numbers 1-32, A-T must be documented on claim form for payment consideration.
D2951	Pin retention- per tooth, in addition to restoration	1 per 3 years per tooth number	Tooth numbers 1-32 must be documented on claim form for payment consideration.
D2952	Cast and core in addition to crown (indirectly fabricated)	1 per 3 years per tooth number	Tooth numbers 1-32 must be documented on claim form for payment consideration.
D2954	Prefabricated post & core in addition to crown	1 per 3 years per tooth number	Tooth numbers 1-32 or A-T must be documented on claim form for payment consideration.
ENDODONTICS - INCLUDES LOCAL ANESTHESIA			
PULPOTOMY			
D3220	Therapeutic pulpotomy (excluding final restoration) - removal of pulp coronal to the dentinocemental junction and application of medicament	1 per 3 years per tooth number	Tooth numbers 1-32, A-T must be documented on claim form for payment consideration. Not reimbursable with D3310, D3320, or D3330. This is not to be construed as the first stage of root canal therapy. Not to be used for apexogenesis.
ENDODONTIC THERAPY (INCLUDING TREATMENT PLAN, CLINICAL PROCEDURES AND FOLLOW UP CARE)			
D3310	Endodontic therapy, anterior tooth (excluding final restoration)	1 tooth number per lifetime	Tooth numbers 6-11, 22-27 must be documented on the claim form for payment consideration. Not reimbursed with D3220, D3320, or D3330
D3320	Endodontic therapy, bicuspid tooth (excluding final restoration)	1 tooth number per lifetime	Tooth numbers 4, 5, 12, 13, 20, 21, 28, 29 or C, H, Q, N must be documented on the claim form for payment consideration. Not reimbursed with D3220, D3310, or D3330. To be performed on primary or permanent teeth.
D3330	Endodontic therapy, molar (excluding final restoration)	1 tooth number per lifetime	Tooth numbers 1-3, 14-19, 30-32 and primary teeth # A,B,I,J,K,L,S, and T, if no permanent successor present, must be documented on the claim form for payment consideration. Not reimbursed with D3220, D3310, or D3320
ENDODONTIC RETREATMENT			

Appendix A
COVERED DENTAL, ORTHODONTIC AND ORAL HEALTH SERVICES, CHILDREN UP TO AGE 21 YEARS
Children Oral Health Procedures/Codes
PRIOR AUTHORIZATION MUST BE OBTAINED WHEN SERVICE LIMITS ARE EXCEEDED

CDT CODE	DESCRIPTION	SERVICE LIMITS	SPECIAL INSTRUCTIONS
D3346	Retreatment of previous root canal therapy-anterior	1 tooth number per lifetime	Tooth numbers 6-11 and 22-27, must be documented on the claim form for payment consideration includes all diagnostic tests, radiographs, and post operative treatments and may not be billed separately.
D3347	Retreatment of previous root canal therapy-bicuspid	1 tooth number per lifetime	Tooth numbers 4,5,12,13,20,21,28, and 29 must be documented on the claim form for payment consideration includes all diagnostic tests, radiographs, and post operative treatments and may not be billed separately.
D3348	Retreatment of previous root canal therapy-molar	1 tooth number per lifetime	Tooth numbers 1-3, 14-19, and 30-32 must be documented on the claim form for payment consideration includes all diagnostic tests, radiographs, and post operative treatments and may not be billed separately.
APEXIFICATION/RECALCIFICTION PROCEDURES			
D3351	Apexification/recalcification/ pulpal regeneration-initial visit (apical closure/calcific repair of perforations, root resorption, pulp space disinfection, etc.)		Tooth numbers 1-32 must be documented on the claim form for payment consideration. Fees include all diagnostic tests, evaluations, radiographs and post-operative treatment and may not be billed separately.
D3352	Apexification/recalcification/ pulpal regeneration-interim medication replacement (apical closure/calcific repair of perforations, root resorption, pulp space disinfection, etc.)	3 treatment per tooth number per lifetime	Tooth numbers 1-32 must be documented on claim form for payment consideration. Fees include all diagnostic tests, evaluations, radiographs and post-operative treatment and may not be billed separately.
D3353	Apexification/recalcification-final visit (includes completed root canal therapy-apical closure/calcify repair of perforations, root resorption, etc.)	1 tooth number per lifetime	Tooth numbers 1-32 must be documented on claim form for payment consideration. Fees include all diagnostic tests, evaluations, radiographs and post-operative treatment and may not be billed separately.
APICOECTOMY/PERIRADICULAR SERVICES			
D3410	Apicoectomy/periradicular surgery-anterior	1 tooth number per lifetime	Requires PA with documentation, tooth number(s), and radiographs as appropriate. Tooth numbers 6-11, 22-27 must be documented on the claim form for payment consideration.

Appendix A
COVERED DENTAL, ORTHODONTIC AND ORAL HEALTH SERVICES, CHILDREN UP TO AGE 21 YEARS
Children Oral Health Procedures/Codes
PRIOR AUTHORIZATION MUST BE OBTAINED WHEN SERVICE LIMITS ARE EXCEEDED

CDT CODE	DESCRIPTION	SERVICE LIMITS	SPECIAL INSTRUCTIONS
D3421	Apicoectomy/periradicular surgery-bicuspid (first root)	1 tooth number per lifetime	Requires PA with documentation, tooth number(s), and radiographs as appropriate. Tooth numbers 4, 5, 12, 13, 20, 21, 28, 29 must be documented on the claim form for payment consideration.
D3999	Unspecified endodontic procedure, by report		This code should be used only if a more specific CDT code is not available. Requires PA with radiographs, documentation and description of procedure to be performed.
PERIODONTICS			
SURGICAL SERVICES (INCLUDING USUAL POST-OPERATIVE CARE)			
D4210	Gingivectomy or Gingivoplasty – four or more contiguous teeth or tooth bounded spaces per quadrant	1 quadrant per 1 calendar year	Requires PA with documentation, identification of the quadrant(s) and radiographs as appropriate. Quadrants are defined as UR, UL, LL, LR. Not reimbursed with D4211.
D4211	Gingivectomy or Gingivoplasty – one to three contiguous teeth or tooth bounded spaces per quadrant	1 quadrant per 1 calendar year	Requires PA with documentation, identification of the quadrant, and radiographs as appropriate. Quadrants are defined as UR, UL, LL, LR. Not reimbursed with D4210.
D4260	Osseous surgery (including flap entry and closure) – four or more contiguous teeth or tooth bounded spaces per quadrant	1 quadrant per 1 calendar year	Requires PA with documentation, identification of the quadrant, and radiographs as appropriate. Quadrants are defined as UR, UL, LL, LR. Not reimbursed with D4210. Must be billed with the number codes.
D4261	Osseous surgery (including flap entry and closure) one to three contiguous teeth or tooth bounded spaces per quadrant	1 quadrant per 1 calendar year	Requires PA with documentation, identification of the quadrant, and radiographs as appropriate. Quadrants are defined as UR, UL, LL, LR. Not reimbursed with D4210.
NON-SURGICAL PERIODONTAL SERVICE			
D4341	Periodontal scaling and root planing- four/more teeth per quadrant	1 quadrant per 1 calendar year	Requires PA. Quadrants are defined as UR, UL, LL, LR. Not reimbursed with D4342.
D4342	Periodontal scaling and root planing- one - three teeth, per quadrant	1 quadrant per 1 calendar year	Requires PA. Quadrants are defined as UR, UL, LL, LR. Not reimbursed with D4341.
D4355	Full mouth debridement to enable comprehensive	1 per 6 months	Requires PA. Only covered when there is substantial gingival inflammation (gingivitis in all 4 quadrants).

Appendix A
COVERED DENTAL, ORTHODONTIC AND ORAL HEALTH SERVICES, CHILDREN UP TO AGE 21 YEARS
Children Oral Health Procedures/Codes
PRIOR AUTHORIZATION MUST BE OBTAINED WHEN SERVICE LIMITS ARE EXCEEDED

CDT CODE	DESCRIPTION	SERVICE LIMITS	SPECIAL INSTRUCTIONS
	evaluation and diagnosis		
OTHER PERIODONTAL SERVICES			
D4999	Unspecified periodontal procedure, by report		This code should be used only if a more specific CDT code is not available. Requires PA with radiographs, documentation and description of procedure to be performed.
PROSTHODONTICS (REMOVABLE)			
COMPLETE DENTURES (INCLUDING ROUTINE POST-DELIVERY CARE)			
D5110	Complete denture- maxillary	1 per 5 years	Requires PA
D5120	Complete denture- mandibular	1 per 5 years	Requires PA
D5130	Immediate denture – maxillary	1 per 5 years	Requires PA
D5140	Immediate denture – mandibular	1 per 5 years	Requires PA
PARTIAL DENTURES (INCLUDING ROUTINE POST-DELIVERY CARE)			
D5213	Maxillary partial denture - cast metal framework with resin denture bases (including any conventional clasps, rests and teeth)	1 per 5 years	Requires PA Partials and complete dentures may not be re-based or re-lined within a period of one (1) year after construction.
D5214	Mandibular partial denture - cast metal framework with resin denture bases (including any conventional clasps, rests and teeth)	1 per 5 years	Requires PA Partials and complete dentures may not be re-based or re-lined within a period of one (1) year after construction.
D5281	Removable unilateral partial denture - one piece cast metal (including clasps and teeth)	1 per 5 years	Requires PA Partials and complete dentures may not be re-based or re-lined within a period of one (1) year after construction.
ADJUSTMENTS TO DENTURES			
D5410	Adjust complete denture-maxillary	3 per calendar year	Adjustments not covered within 3 months of placement
D5411	Adjust complete denture-mandibular	3 per calendar year	Adjustments not covered within 3 months of placement
D5421	Adjust partial denture –	3 per calendar year	Adjustments not covered within 3 months of placement

Appendix A

Children Oral Health Procedures/Codes
PRIOR AUTHORIZATION MUST BE OBTAINED WHEN SERVICE LIMITS ARE EXCEEDED

CDT CODE	DESCRIPTION	SERVICE LIMITS	SPECIAL INSTRUCTIONS
	maxillary		
D5422	Adjust partial denture – mandibular	3 per calendar year	Adjustments not covered within 3 months of placement
REPAIRS TO COMPLETE DENTURES			
D5510	Repair broken complete denture base	2 per calendar year per arch	Upper arch, Low arch must be documented on the claim form for payment consideration.
D5520	Replace missing or broken teeth- complete denture (each tooth)	2 per calendar year per tooth number	Tooth numbers 1-32 must be documented on the claim form for payment consideration.
REPAIRS TO PARTIAL DENTURES			
D5610	Repair resin denture base	2 per calendar year per arch	Upper arch, Lower arch must be documented on the claim form for payment consideration. Must be billed with the number codes.
D5620	Repair cast framework	2 per calendar year per arch	Upper arch, Lower arch must be documented on the claim form for payment consideration. Must be billed with the number codes.
D5630	Repair or replace broken clasp	2 per calendar year	
D5640	Replace broken teeth- per tooth	2 per calendar year	Tooth number 1-32 must be documented on the claim form for payment consideration.
D5650	Add tooth to existing partial denture	2 per calendar year	Tooth number 1-32 must be documented on the claim form for payment consideration
D5660	Add clasp to existing partial denture		
DENTURE REBASED PROCEDURES			
D5710	Rebase complete maxillary denture	1 per 5 years	
D5711	Rebase complete mandibular denture	1 per 5 years	
D5720	Rebase maxillary partial denture	1 per 5 years	
D5721	Rebase mandibular partial denture	1 per 5 years	
DENTURE RELINE PROCEDURES			
D5730	Reline complete maxillary denture (chairside)	1 per 2 years	Not covered within first 6 months of placement unless it is for an immediate denture.
D5731	Reline complete mandibular	1 per 2 years	Not covered within first 6 months of placement unless it is for an

CDT CODE	DESCRIPTION	SERVICE LIMITS	SPECIAL INSTRUCTIONS
	denture (chairside)		immediate denture.
D5740	Reline maxillary partial denture (chairside)	1 per 2 years	Not covered within first 6 months of placement.

D5750	Reline complete maxillary denture (laboratory)	1 per 2 years	Not covered within first 6 months of placement.
D5751	Reline complete mandibular denture (laboratory)	1 per 2 years	Not covered within first 6 months of placement.
D5760	Reline maxillary partial denture (laboratory)	1 per 2 years	Not covered within first 6 months of placement.
D5761	Reline mandibular partial denture (laboratory)	1 per 2 years	Not covered within first 6 months of placement.
D5899	Unspecified removable prosthodontics procedure, by report		Require PA with documentation and radiographs as appropriate. Procedure must be documented on the claim form.
MAXILLOFACIAL PROSTHETICS			
D5911	Facial moulage (sectional)		Requires PA with documentation and radiographs as appropriate. Oral and maxillofacial or prosthodontist certification required.
D5912	Facial moulage (complete)		Requires PA with documentation and radiographs as appropriate. Oral and maxillofacial or prosthodontist certification required.
D5913	Nasal prosthesis		Requires PA with documentation and radiographs as appropriate. Oral and maxillofacial or prosthodontist certification required.
D5914	Auricular prosthesis	1 in 5 years	Requires PA with documentation and radiographs as appropriate. Oral and maxillofacial or prosthodontist certification required.
D5915	Orbital prosthesis		Requires PA with documentation and radiographs as appropriate. Oral and maxillofacial or prosthodontist certification required.
D5916	Ocular prosthesis Prosthetic eye, plastic, custom Prosthetic eye, other type		Requires PA with documentation and radiographs as appropriate. Oral and maxillofacial or prosthodontist certification required.
D5919	Facial prosthesis		Requires PA with documentation and radiographs as appropriate. Oral and maxillofacial or prosthodontist required.
D5924	Cranial prosthesis		Requires PA with documentation and radiographs as appropriate. Oral and maxillofacial or prosthodontist required.
D5925	Facial augmentation implant prosthesis		Requires PA with documentation and radiographs as appropriate. Oral and maxillofacial or prosthodontist certification required.

CDT CODE	DESCRIPTION	SERVICE LIMITS	SPECIAL INSTRUCTIONS
D5931	Obturator prosthesis, surgical		Requires PA with documentation and radiographs as appropriate. Oral and maxillofacial or prosthodontist certification required.
D5932	Obturator prosthesis, definitive (post-surgical)		Requires PA with documentation and radiographs as appropriate. Oral and maxillofacial or prosthodontist certification required.
D5933	Obturator prosthesis, modification (re-fitting)		Requires PA with documentation and radiographs as appropriate. Oral and maxillofacial or prosthodontist certification required.
D5934	Mandibular resection pros-thesis with guide flange		Requires PA with documentation and radiographs as appropriate. Oral and maxillofacial or prosthodontist certification required.
D5935	Mandibular resection prosthesis without guide flange		Requires PA with documentation and radiographs as appropriate. Oral and maxillofacial or prosthodontist certification required.
D5937	Trismus appliance (not for temporomandibular joint dysfunction treatment)		Requires PA with documentation and radiographs as appropriate. Oral and maxillofacial or prosthodontist certification required.
D5951	Feeding aid		Requires PA with documentation and radiographs as appropriate. Oral and maxillofacial or prosthodontist certification required.
D5952	Speech aid prosthesis, pediatric		Requires PA with documentation and radiographs as appropriate. Oral and maxillofacial or prosthodontist certification required.
D5954	Palatal augmentation prosthesis		Requires PA with documentation and radiographs as appropriate. Oral and maxillofacial or prosthodontist certification required.
D5955	Palatal lift prosthesis, definitive		Requires PA with documentation and radiographs as appropriate. Oral and maxillofacial or prosthodontist certification required.
D5982	Surgical stent		Requires PA with documentation and radiographs as appropriate. Oral and maxillofacial or prosthodontist certification required.
D5983	Radiation carrier		Requires PA with documentation and radiographs as appropriate. Oral and maxillofacial or prosthodontist certification required.
D5984	Radiation shield		Requires PA with documentation and radiographs as appropriate. Oral and maxillofacial or prosthodontist certification required.
D5985	Radiation cone locator		Requires PA with documentation and radiographs as appropriate. Oral and maxillofacial or prosthodontist certification required.
D5986	Fluoride gel carrier		Requires PA with documentation and radiographs as appropriate. Oral and maxillofacial or prosthodontist certification required.
D5987	Commissure splint		Requires PA with documentation and radiographs as appropriate. Oral and maxillofacial or prosthodontist certification required.
D5999	Unspecified maxillofacial prosthesis, by report		This code should be used only if a more specific code is not available. Requires PA with radiographs, documentation and description of procedure to be performed. Oral and maxillofacial or prosthodontist certification required.
PROSTHODONTIC FIXED			

Appendix A
COVERED DENTAL, ORTHODONTIC AND ORAL HEALTH SERVICES, CHILDREN UP TO AGE 21 YEARS
Children Oral Health Procedures/Codes
PRIOR AUTHORIZATION MUST BE OBTAINED WHEN SERVICE LIMITS ARE EXCEEDED

CDT CODE	DESCRIPTION	SERVICE LIMITS	SPECIAL INSTRUCTIONS
FIXED PARTIAL DENTURE PONTICS – EACH ABUTMENT AND EACH PONTIC CONSTITUTE A UNIT IN A BRIDGE			
D6211	Pontic- cast predominantly base metal	1 per 5 years	Requires PA Tooth numbers 1-32 must be documented on the claim form for payment consideration.
D6241	Pontic- porcelain fused to predominantly base metal	1 per 5 years	Requires PA Tooth numbers 1-32 must be documented on the claim form for payment consideration.
D6545	Retainer case metal for resin bonded fixed prosthesis	1 per 5 years	Requires PA Tooth numbers 1-32 must be documented on the claim form for payment consideration.
OTHER FIXED DENTURE SERVICES			
D6930	Recement fixed partial denture	1 per calendar year	
D6999	Unspecified, fixed prostho-dontic procedures, by report		This code should be used only if a more specific code is not available. Requires PA with radiographs, documentation and description of procedure to be performed.
ORAL AND MAXILLOFACIAL SURGERY			
Extraction - includes local anesthesia and post operative care Any necessary suture included in fee for extraction.			
D7140	Extraction, erupted tooth or exposed root (elevation and/or forceps removal)	1 per lifetime per tooth number	Tooth numbers 1-32 or A-T must be documented on the claim form for payment consideration.
D7210	Surgical removal of erupted tooth requiring removal of bone and/or sectioning of tooth, and including elevation of mucoperiosteal flap if indicated	1 per lifetime per tooth number	Tooth numbers 1-32 or A-T must be documented on the claim form for payment consideration.
D7220	Removal of impacted tooth-soft tissue	1 per lifetime per tooth number	Tooth numbers 1-32 or A-T must be documented on the claim form for payment consideration.
D7230	Removal of impacted tooth-partially bony	1 per lifetime per tooth number	Tooth numbers 1-32 or A-T must be documented on the claim form for payment consideration.
D7240	Removal of impacted tooth-completely bony	1 per lifetime per tooth number	Tooth numbers 1-32 or A-T must be documented on the claim form for payment consideration.
OTHER SURGICAL PROCEDURES			
D7260	Oral antral fistula closure		

Appendix A
COVERED DENTAL, ORTHODONTIC AND ORAL HEALTH SERVICES, CHILDREN UP TO AGE 21 YEARS
Children Oral Health Procedures/Codes
PRIOR AUTHORIZATION MUST BE OBTAINED WHEN SERVICE LIMITS ARE EXCEEDED

CDT CODE	DESCRIPTION	SERVICE LIMITS	SPECIAL INSTRUCTIONS
D7270	Tooth reimplantation &/or stabilization of accidentally evulsed or displaced tooth. (includes splinting or stabili-zation)		Tooth numbers 1-32 and primary teeth # A, B, I, J, K, L, S, and T must also be documented on the claim form for payment consideration.
D7280	Surgical access of an unerupted tooth		Tooth numbers 1-32 must also be documented on the claim form for payment consideration.
D7283	Placement of device to facilitate eruption of impacted tooth		Tooth numbers 1-32 must also be documented on the claim form for payment consideration.
D7285	Biopsy of oral tissue - hard (bone, tooth)		
D7286	Biopsy of oral tissue - soft		
ALVELOLPLASTY – SURGICAL PREPARATION OF RIDGE FOR DENTURE			
D7310	Alveoloplasty in conjunction with extractions - four or more teeth or tooth spaces per quadrant	1 quadrant UR, UL, LL, LR per lifetime.	Quadrant UR, UL, LL, LR must also be documented on the claim form for payment consideration. Alveoloplasty is distinct (separate procedure) from extractions. Usually in preparation for a prosthesis or other treatments such as radiation therapy and transplant surgery.
D7320	Alveoloplasty not in conjunction with extractions - four or more teeth or tooth spaces per quadrant	1 quadrant UR, UL, LL, LR per lifetime.	Quadrant UR, UL, LL, LR must also be documented on the claim form for payment consideration.
VESTIBULOPLASTY			
D7340	Vestibuloplasty – ridge extension (2nd epithelialization)		Requires PA with documentation and radiographs as appropriate.
D7350	Vestibuloplasty - ridge extension (including soft tissue grafts, muscle reattachments, revision of soft tissue attachment & management of hypertrophied &hyperplastic tissue)		Requires PA with documentation and radiographs as appropriate.
D7410	Excision of benign lesion up		

CDT CODE	DESCRIPTION	SERVICE LIMITS	SPECIAL INSTRUCTIONS
	to 1.25cm		
D7411	Excision of benign lesion greater than 1.25cm		
D7440	Excision of malignant tumor - lesion diameter up to 1.25 cm.		
D7441	Excision of malignant tumor - lesion diameter greater than 1.25cm		
D7450	Removal of benign odontogenic cyst or tumor - lesion diameter up to 1.25cm		
D7451	Removal of benign odontogenic cyst or tumor - lesion diameter greater than 1.25cm		
D7460	Removal of benign nonodontogenic cyst or tumor - lesion diameter up to 1.25cm		
D7461	Removal of benign nonodontogenic cyst or tumor - lesion diameter greater than 1.25cm		
EXCISION OF BONE TISSUE			
D7471	Removal of lateral exostosis (maxilla or mandible)		UA, LA must be documented on the claim form for payment consideration. Must be billed with the number codes.
D7472	Removal of torus palatinus		
D7473	Removal of torus mandibularis		
D7485	Surgical reduction of osseous tuberosity		
D7490	Radical resection of maxilla or mandible		Requires PA with documentation and radiographs as appropriate.
SURGICAL INCISION			
D7510	Incision and drainage of abscess - intraoral soft		

CDT CODE	DESCRIPTION	SERVICE LIMITS	SPECIAL INSTRUCTIONS
	tissue		
D7520	Incision and drainage of abscess - extraoral soft tissue		
D7530	Removal of foreign body from mucosa, skin or subcutaneous alveolar tissue		
D7550	Partial ostectomy/sequestrectomy for removal of non-vital bone		This code should only be used if a more specific code is not available. Requires PA with documentation.
D7560	Maxillary sinusotomy for removal of tooth fragment or foreign body		
TREATMENT OF FRACTURES (SIMPLE)			
D7610	Maxilla - open reduction (teeth immobilized, if present)		
D7620	Maxilla - closed reduction (teeth immobilized, if present)		
D7630	Mandible - open reduction (teeth immobilized, if present)		
D7640	Mandible - closed reduction (teeth immobilized, if present)		
D7671	Alveolus - open reduction, may include stabilization of teeth		
D7680	Facial bones- complicated reduction with fixation and multiple surgical approaches		Requires PA with documentation and radiographs as appropriate
TREATMENT OF FRACTURES (COMPOUND)			
D7710	Maxilla - open reduction		
D7720	Maxilla - closed reduction		

CDT CODE	DESCRIPTION	SERVICE LIMITS	SPECIAL INSTRUCTIONS
D7730	Mandible, open reduction		
D7740	Mandible, closed reduction		
D7750	Malar and/or zygomatic arch - open reduction		
D7770	Alveolus - open reduction stabilization of teeth		
D7780	Facial bones - complicated reduction with fixation and multiple surgical approaches		Requires PA
REDUCTION OF DISLOCATION AND MANAGEMENT OF OTHER TEMPOROMANDIBULAR JOINT DYSFUNCTIONS			
D7810	Open reduction of dislocation		Requires PA
D7820	Closed reduction of dislocation		Requires PA
D7830	Manipulation under anesthesia		Requires PA
D7850	Surgical discectomy with/without implant		Requires PA. Not reimbursable with D7852
D7852	Disc repair		Requires PA Not reimbursable with D7850
D7858	Joint reconstruction		Requires PA
D7865	Arthroplasty		Requires PA
D7870	Arthrocentesis		Requires PA
D7872	Arthroscopy - diagnosis with biopsy or without		Requires PA
D7873	Arthroscopy - surgical; lavage & lysis of adhesions		Requires PA
D7874	Arthroscopy - surgical; disc repositioning & stabilization		Requires PA
D7876	Arthroscopy - surgical; discectomy		Requires PA
D7877	Arthroscopy - surgical; debridement		Requires PA
D7880	Occlusal orthotic device, by report		Requires PA with documentation and radiographs as appropriate. Covered only for temporomandibular pain dysfunction or associated musculature.
D7910	Suture of recent small		Excludes closure of surgical incisions

CDT CODE	DESCRIPTION	SERVICE LIMITS	SPECIAL INSTRUCTIONS
	wounds up to 5 cm		
D7911	Complicated suture - up to 5cm	1 unit: not reimbursable with D7912	Excludes closure of surgical incisions
D7912	Complicated suture - greater than 5cm	1 unit: not reimbursable with D7911	Excludes closure of surgical incisions
D7920	Skin graft (identify defect covered, location & type of graft)		Requires PA
D7941	Osteotomy - mandibular rami		Requires PA
D7943	Osteotomy - mandibular rami with bone graft; includes obtaining the graft		Requires PA
D7944	Osteotomy - segmented or subapical - per sextant or quadrant		Requires PA
D7946	LeFort I (maxilla - total)		Requires PA
D7947	LeFort I (maxilla - segmented)		Requires PA
D7948	LeFort II or LeFort III (osteo-plasty of facial bones for mid-face hypoplasia or retrusion) - without bone graft		Requires PA
D7949	LeFort II or LeFort III - with bone graft		Requires PA
D7950	Osseous, osteoperiosteal or cartilage graft of the mandible or facial bones - autogenous or nonautogenous, by report		Requires PA
D7955	Repair of maxillofacial soft and/or hard tissue defect		Requires PA
D7960	Frenuloplasty	2 per site per lifetime	Requires PA

CHAPTER 505
DENTAL, ORTHODONTIC AND ORAL HEALTH SERVICES
NOVEMBER 1, 2010

APPENDIX C
INFANT AND CHILD HEALTH FLUORIDE VARNISH POLICY FOR PRIMARY CARE PRACTITIONERS

STATE OF WEST VIRGINIA
DEPARTMENT OF HEALTH AND HUMAN RESOURCES

Earl Ray Tomblin
Governor

Bureau for Medical Services
Commissioner's Office
350 Capitol Street – Room 251
Charleston, West Virginia 25301-3706
Telephone: (304) 558-1700 Fax: (304) 558-1451

Michael J. Lewis, M.D., Ph.D.
Cabinet Secretary

Bureau for Medical Services
Infant and Child Oral Health Fluoride Varnish Program for Primary Care Practitioners
Coverage Criteria

Physician fluoride varnish (FV) services are defined as preventive procedures provided by or under the supervision of a physician. This includes caries screening, recording of notable findings in the in the oral cavity, preventive oral health and dietary counseling, and administration of topical fluoride varnish. Such services shall maintain a high standard of quality and shall be within the reasonable limits of services customarily available and provided to most persons in the community with the limitations specified below in this document. The American Dental Association (ADA) expert panels have reviewed evidence-based (class 1a) studies and concluded that "Fluoride varnish applied every six months is effective in preventing caries in the primary and permanent dentition of children and adolescents." Please see JADA executive Summary 2006 recommendations attached.

Fluoride varnish is a thin coating of resin that is applied to the tooth surface to protect it from decay. According to the Food & Drug Administration (FDA), fluoride varnish falls under the category of "drugs and devices" that presents minimal risk and is subject to the lowest level of regulation. The purpose of applying fluoride varnish is to retard, arrest, and reverse the process of cavity formation.

Fluoride varnish is easy to apply, does not require special dental equipment or a professional cleaning prior to application. It also requires minimal training, and is inexpensive. Fluoride varnish dries immediately upon contact with saliva and is safe and well tolerated by infants, young children, and individuals with special needs.

Effective January 16, 2012, the Bureau for Medical Services (BMS) will start reimbursing primary care providers who have been certified through a face-to-face training for fluoride varnish application offered through the West Virginia University School of Dentistry for the application of fluoride varnish to children ages 6 months to 36 months (3 years) who are at high risk of developing dental caries. The application of the fluoride varnish should include communication with and counseling of the child's caregiver, including a referral to a dentist.

A child is considered at high risk of developing cavities if he or she:

- ✓ Has had cavities in the past or has white spot lesions and stained fissures
- ✓ Continues to use the bottle past one year of age or sleeps with a bottle containing liquids other than water
- ✓ Breastfeeds on demand at night
- ✓ Has a developmental disability
- ✓ Chronically uses high sugar oral medications
- ✓ Has family members with histories of caries
- ✓ Engages in prolonged or ad lib use throughout the day of a bottle or "sippy" cup containing liquids other than water

Who is not Covered:

- ✓ Children with a low risk of cavity formation who consume optimally fluoridated water or children who receive routine fluoride treatments through a dental office.

BMS recognizes the following types of primary care providers to be eligible for payment of this service:

- ✓ Pediatricians
- ✓ General and Family Practice Doctors
- ✓ Nurse Practitioners
- ✓ Physician Assistants (in FQHC settings only)

Provider Eligibility to Bill for Program Services

Providers must have completed a certified training course from the WVU School of Dentistry prior to performing and billing for these services. The WVU School of Dentistry will provide a list of all current certifications monthly in 2011 and thereafter to BMS and its fiscal agent in order to create a file of reimbursable providers. Information about this course is available at www.hsc.wvu.edu/sod/oral-health.

Reimbursement for the Services

BMS allows coverage of two fluoride varnish applications per year (one every six months). The first application must be provided and billed in conjunction with a comprehensive well-child exam as reported under the CPT codes listed in the table below. The second fluoride varnish application can be reimbursed during the 12-month subsequent period, and may be billed in conjunction with the HCPCS code outlined in the table below.

BMS will use the following codes to reimburse primary care providers for fluoride varnish application:

Code	Description	Comments
99381-99382 99391-99392	Comprehensive well-child exam codes for children less than 1 year and up to age 4 (note FV coverage under this program is only through age 3)	Oral evaluation and counseling are components of comprehensive well –child exams
T1503	Administration of medication, other than oral and/or injectable by a health care agency/professional, per visit Note: Use this code to bill for the topical fluoride varnish; therapeutic application for moderate to high caries risk patients. By mid-2012, updates to the BMS Fiscal Agent's claim processing system will allow this code to be replaced by D1206-Topical fluoride varnish; therapeutic application for moderate to high caries risk patients.	Covered 2 times per year for children up to age 3; 1st application must be billed in conjunction with one of the comprehensive well child exam codes listed above
T1503-DA	Use Code T1503 with modifier-DA (Oral health assessment by a licensed health professional other than a dentist) to bill for oral evaluation of patient under three years of age and counseling with primary caregiver. Note: By mid-2012, updates to the BMS Fiscal Agent's claim processing system will allow this code to be replaced by D0145 – Oral Evaluation for patient under three years of age and counseling with primary caregiver.	Covered once per year in conjunction with 2nd fluoride varnish application; cannot be covered when comprehensive well-child exam is billed on the same day and at least 180 days after billing for the comprehensive well child-exam
V20.2	Routine infant or child health check	Primary diagnosis used when billing well-child exam
V82.89	Special screening for other specified conditions	Secondary diagnosis used when billing comprehensive well-child exam
V72.2	Dental Exam	Primary diagnosis used when billing D0145 – dental exam; cannot report in combination with V20.2

Reimbursement will be made using the dental fee schedule effective on the date of service. The current fee for T1503 (D1206) will be $20.00 and T1503-DA (D0145) will be $25.00.

Introduction: Section 506.2.1, 1st paragraph (17)
Old Policy: (17) provide any changes to original enrollment application (i.e., personnel, licensure, certification, registration, demographics) to Unisys, Provider Services, PO Box 2002, Charleston, WV, 25327-2002 within fifteen (15) days of change.
New Policy:(17) provide any changes to original enrollment application (i.e., personnel, licensure, certification, registration, demographics) to Unisys, Provider Services, PO Box 2002, Charleston, WV, 25327-2002 within fifteen (15) days. Copies of updated license, certification and/or registration must be submitted to Unisys annually.
Directions: Replace page

SECTION 506.5

Introduction: Section 506.5, 3rd paragraph, 6th bullet
Old Policy: Home Oxygen Therapy (E0424, E0431, E0434, E0439).
Effective March 15, 2006, any new oxygen system requested for medical necessity must follow InterQual criteria to include documentation of initial lab results. PA recertification review is required at the end of

the prescription period specified or within one (1) year whichever comes first. Date of lab results must be within 6 months of the oxygen request. Note: The number of unused months of oxygen systems placed in the home for individual Medicaid members prior to March 15, 2006 is to be submitted to WVMI before June 1, 2006. However, if information is not received by WVMI within the specified time frame, DME providers are not eligible for reimbursement by WV Medicaid.
New Policy: Home Oxygen Therapy (E0424, E0431, E0434, E0439).
Effective March 15, 2006, any new oxygen system requested for medical necessity must follow InterQual criteria to include documentation of initial lab results. PA recertification review is required at the end of the prescription period specified or within one (1) year whichever comes first. Date of lab results must be within 6 months of the oxygen request.

Introduction: Section 506.1, 7th paragraph
Old Policy: Identified as an M.D., D.O., DPM, Nurse Practitioner, or Physician Assistant.
New Policy: Identified as an M.D., D.O., DPM, Nurse Practitioner (NP), or Physician Assistant (PA) under the supervision of a participating physician. WV Medicaid does not recognize hospital residents as prescribing practitioners.
Directions: Replace page.

Introduction: Section 506.1, 8th paragraph
Old Policy: **WVMI Medicaid DME/Medical Supplies Authorization Request Form – Effective 03/15/2006 – Replaces DME/Medical Supplies CMN.** This form is used by the prescribing practitioner to document the medical necessity utilizing InterQual or DMERC criteria for DME/Medical Supply items requiring prior authorization (PA). Refer to Section 506.2.1.
New Policy: Delete.
Directions: Replace page.

SECTION 506.2.1

Introduction: Section 506.2.1, lst & 2nd paragraph
Old Policy: The current DME/Medical Supplies CMN will no longer be valid after March 15, 2006. The current CMN will be replaced by the West Virginia Medical Institute (WVMI) Medicaid DME/Medical Supplies Authorization Request Form **(Attachment III)**. The prescribing practitioner is responsible for providing WVMI with medical necessity documentation via fax to 1-304-346-8185, telephonically at 1-800-296-9849 or 1-304-346-9167, option 5, or via mail to WVMI Medical Review Department, 3001 Chesterfield Place, Charleston, WV 25304. The WVMI Medicaid DME/Medical Supplies Authorization Request Form will be available at www.wvmi.org and www.wvdhhr.org websites. The Internet is the most efficient means of keeping current on updates and information regarding the Bureau for Medical Services. If you do not have the Internet, you may request a CD or paper copy of manuals or manual updates by calling Unisys Provider Enrollment at 1-888-483-0793.
New Policy: In addition to Chapter 300 Provider Participation Requirements, MDs, DOs, DPMs, NPs, and PAs under the supervision of a participating physician, prescribing DME/medical supplies and related items must:

(1) be actively enrolled in Medicaid;
(2) inquire if the member has a DME provider of choice;
(3) provide a written prescription to the member;
(4) provide clinical documentation for medical necessity to include diagnosis code, frequency of use, duration, quantity, and any relevant information to WVMI. Documentation may be submitted to WVMI in writing (with legal signature of prescribing practitioner), fax or telephonically;
(5) maintain all appropriate medical documentation in the Medicaid member's individual file; and,
(6) participate in on-site reviews and/or submission of medical documentation to BMS upon request.

The Bureau's website @ www.wvdhhr.org is the most efficient means of keeping current on updates and information regarding the Bureau for Medical Services. If you do not have the Internet, you may request a CD or paper copy of manuals or manual updates by calling Unisys Provider Enrollment at 1-888-483-0793.
Directions: Replace page

SECTION 506.2.2

Introduction: 506.2.2, 2nd paragraph
Old Policy: (13) contact WVMI to obtain PA number before services are rendered;
New Policy: Delete #13 and re-number the remaining requirements
Directions: Replace page

SECTION 506.2.3

Introduction: 506.2.3, 1st paragraph, 2nd sentence
Old Policy: This change includes HCPCS codes A4221, A4222, A4223, B9004, B9006, and E0781.
New Policy: This change includes HCPCS codes A4221, A4222, A4223, B4164-B4224, B5000, B5100, and B5200
Directions: Replace page.

Introduction: 506.2.3, 2nd paragraph, 2nd sentence
Old Policy: Refer to Chapter 518, Pharmacy Manual, for additional information.
New Policy: Delete sentence
Directions: Replace page.

SECTION 506.3.1.b

Introduction: 506.3.1.b, 1st paragraph, 1st sentence
Old Policy: WV Medicaid's coverage for repair of equipment is limited to items that have been fully purchased by WV Medicaid including items in which the cap-rental timeframe has been exhausted, the medical need is expected to continue, and the repair is more economical than replacement.
New Policy: WV Medicaid's coverage for repair of equipment is limited to:

(1) items that have been fully purchased by WV Medicaid or by the Children with Special Healthcare Needs Program (CSHCN);
(2) equipment provided by CSHCN is covered by Medicaid;
(3) items in which the cap-rental time frame has been exhausted;
(4) the medical need is expected to continue; and
(5) the repair is more economical than replacement.

Directions: Replace page.

SECTION 506.4

Introduction: 506.4, 2nd paragraph (1)
Old Policy: Effective March 15, 2006, WVMI Medicaid DME Authorization Request Form is required to provide WVMI medical necessity documentation for items or services prescribed by the treating practitioner.
New Policy: (1) Effective May 1, 2006, formal certificate of medical necessity forms (i.e, the WVMI Medicaid DME Authorization Request Form, the DME/Medical Supply Certificate of Medical Necessity, the Apnea Monitor Initial and Recertification Certificates of Medical Necessity) are not required to document medical necessity of items requiring prior authorization. However, as an enrolled participant of WV Medicaid, practitioners and DME providers are required to maintain individual Medicaid member files

with documentation to assure that all services provided to Medicaid members are medically necessary and that billing of such services are accurate. **Attachment III** provides forms that may be submitted via fax to 1-304-346-8185 or 1-877-762-4338 or in writing to WVMI Medical Review Department, 3001 Chesterfield Place, Charleston, WV 25304. Telephonic reviews for urgent or emergency requests are available at 1-304-414-2551 or 1-800-296-9849.

Introduction: 506.4, 2nd paragraph (2)
Old Policy: (2) Effective March 15, 2006, a written prescription which includes the member's name, date of prescription, appropriate HCPCS code for item requested, description of code, estimated length of need in months, quantity of item(s), frequency of use and prescribing practitioner's signature, is to be given to the member by the prescribing practitioner. A copy of the hospital discharge plan and/or progress notes do not constitute a written prescription for DME/Medical Supplies.
New Policy: Effective May 1, 2006, delete "appropriate HCPCS code for item requested".
Directions: Replace page.

Introduction: 506.4, 2nd paragraph (3)
Old Policy: (3) Effective March 15, 2006, a signed delivery document by the member or caregiver and documentation of education for the DME item provided must be maintained in the individual member's record.
New Policy: The DME provider must maintain a delivery document signed …"
Direction: Replace page.

Introduction: 506.4, 2nd paragraph (5)
Old Policy: (5) Medical documentation submitted for review must not be more than six (6) months old at the time the prescription is written.
New Policy: "The prescriber's medical …"
Direction: Replace page.

SECTION 506.5

Introduction: 506.5, 1st paragraph, 1st, 2nd, and 3rd
Old Policy: For DME services and items requiring review for medical necessity by WVMI, it is the responsibility of the prescribing practitioner to submit the appropriate form to WVMI. The Authorization Form must be renewed at the end of the prescription period specified or within one (1) year whichever comes first.
New Policy: For DME services and items requiring prior authorization review for medical necessity by WVMI, it is the responsibility of the prescribing practitioner to submit the appropriate clinical documentation i.e., ICD-9 code(s), all information required on the written prescription (see Section 504, 2nd paragraph, (2) for clarification) and any other relevant information. Additionally, a licensed physical therapist or licensed occupational therapist who is fiscally, administratively and contractually independent from the DME provider may also submit clinical documentation for review when requested by the prescribing practitioner. PA recertification review is required at the end of the prescription period specified or within one (1) year whichever comes first.

Introduction: 506.5, 1st paragraph - Insert as 4th sentence
Old Policy: N/A
New Policy: It is strongly recommended that DME providers, in partnership with prescribing practitioners, assist in obtaining prior authorizations. Prescribing practitioners must provide clinical information and a written prescription while DME providers submit the appropriate HCPCS code and

billing information.
Directions: Replace page.

Introduction: 506.5, 2nd paragraph, Insert as 4th sentence.
Old Policy: N/A
New Policy: The explanation of benefit (EOB) must accompany the claim. An EOB documenting reasons for the denial of TPL for services requested must be provided to WVMI when requesting prior authorization review.

Introduction: 506.5, 3rd paragraph, 6th bullet
Old Policy: Home Oxygen Therapy (E0424, E0431, E0434, E0439)
New Policy: Add – Effective March 15, 2006, any new oxygen system requested for medical necessity must follow InterQual criteria to include documentation of initial lab results. PA recertification review is required at the end of the prescription period specified or within one (1) year whichever comes first. Date of lab results must be within 6 months of the oxygen request. Note: The number of unused months of oxygen systems placed in the home for individual Medicaid members prior to March 15, 2006 is to be submitted to WVMI before June 1, 2006. However, if information is not received by WVMI within the specified time frame, DME providers are not eligible for reimbursement by WV Medicaid.

Introduction: 506.5, 4th paragraph, 1st & 2nd sentences.
Old Policy: Practitioners are required to provide medical necessity documentation via mail, fax or telephonically to WVMI prior to items/services provided. Documentation form for DME PA will be available at www.wvmi.org and www.wvdhhr.org/bms.
New Policy: Delete

Introduction: 506.5, 4th paragraph, 3rd sentence
Old Policy: Items not listed above
New Policy: Items requiring PA not listed above will follow Palmetto, Region C, medical necessity criteria for covered services.
Directions: Replace page

Introduction: 506.5, 5th paragraph, 1st sentence
Old Policy: Retrospective authorization is only available under the following certain circumstances: (1) services covered by private insurance; (2) termination of Medicaid coverage; (3) Medicaid retro eligibility; and (4) an apnea monitor seven (7) days post hospital discharge.
New Policy: Retrospective authorization is available (1) for items denied due to TPL; (2) retrospective Medicaid eligibility; (3) within 7 days post hospital discharge for apnea monitors and oxygen systems; and, (4) for items other than referenced here on a case-by-case basis.
Directions: Replace page.

Introduction: 506.8, 1st paragraph, #6
Old Policy: by BMS
New Policy: Insert “or CSCHN” after BMS
Direction: Replace page.

Introduction: 506.8 1st paragraph, #8
Old Policy: through DME
New Policy: Insert “suppliers” after DME
Direction: Replace page.

Introduction: 506.8 1st paragraph, #9
Old Policy: through DME
New Policy: Insert "suppliers" after DME
Direction: Replace page.

Introduction: 506.8 1st paragraph, #10
Old Policy: through DME
New Policy: Insert "suppliers" after DME
Direction: Replace page.

Introduction: 506.9, 5th paragraph, 7th sentence
Old Policy: In those instances where liability cannot be currently established; i.e., accident or injury, Medicaid benefits will not be withheld.
New Policy: Delete sentence.
Direction: Replace page.

Introduction: 506.9, 5th paragraph, 8th sentence
Old Policy: "on-setting adjustment"
New Policy: Delete "on-setting"
Direction: Replace page.

Attachment III

Introduction: Attachment III
Old Policy: N/A
New Policy: Add BMS Durable Medical Equipment/Medical Supplies Certificate of Medical Necessity

•BMS Certificate of Medical Necessity, Initial Infant Apnea Monitor

•BMS Certificate of Medical Necessity, Infant Apnea Monitor Request for Extension

FEBRUARY 16, 2006

New Policy: Mobility Assistive Equipment (MAE) – Items that offer assistance to members who have a physical impairment that results in a mobility deficit. MAE includes, but is not limited to, canes, crutches, walkers, manual wheelchairs, power wheelchairs, power operated vehicles and scooters.
Directions: Replace page.

Introduction: Section 506.1, insert 8th paragraph
Old Policy: Not Applicable
New Policy: "**WVMI Medicaid DME/Medical Supplies Authorization Request Form – Effective 03/15/2006 – Replaces DME/Medical Supplies CMN.** This form is used by the prescribing practitioner to document the medical necessity utilizing InterQual or DMERC criteria for DME/Medical Supply items requiring prior authorization (PA). Refer to Section 502.1."
Directions: Replace page.

SECTION 506.2

Introduction: Section 506.2, change heading
Old Policy: "Provider Participation Requirements" In addition to Chapter 300, Provider Participation Requirement, DME/medical supply providers must:

- maintain a physical facility. (PO Box, commercial mailbox, residence or homestead is prohibited) located within WV or within thirty (30) miles of WV's border. This requirement does not apply to Medicare crossover providers.

- maintain a retail store open to the public at least forty (40) hours per week. A notarized letter must be attached to the enrollment form indicating that the physical facility is a retail store.

- post a visible sign indicating hours of operation. Hours of operation and availability of emergency coverage must be stated on the WV Medicaid enrollment form.

- employ a WV licensed respiratory therapist that provides twenty-four (24) hour emergency coverage, if respiratory/oxygen equipment and/or supplies are to be provided to the Medicaid members.

- maintain inventory of equipment/supplies and display at least one of each item listed on an inventory and made readily available for delivery.

- maintain a business telephone that is listed locally under the name of the business. A toll-free number must be provided for Medicaid members. Exclusive use of a beeper number, answering service, pager, facsimile machine, car phone or an answering machine does not constitute a primary business telephone.

- maintain adequate space to store inventory, business and member records.
  have at least one public handicapped-accessible door from the street and/or parking lot.

- have handicapped-accessible parking.

- obtain individual WV Medicaid provider numbers for each physical facility under the same ownership. Satellite businesses affiliated with a provider are not covered under the provider's contract; therefore, no reimbursement will be made to a provider doing business at a satellite location, unless the satellite enrolls as a separate entity and receives a separate provider number.

- employ or have the appropriate licensed or credentialed individuals on staff, depending on type of service provided (e.g., mastectomy fitter and/or orthotic fitter must be accredited by a nationally accrediting body that is certified by National Commission for Certifying Agencies (NCCA); e.g., American Board for Certification in Orthotics and Prosthetics, Board for Orthotist/Prosthetist Certification.)

- include the names of certified/licensed personnel on the enrollment form and attach copies of certification or license that demonstrates type, number and expiration date to the enrollment form.

- if any circumstances change that were part of the original application, including personnel, licensure, certification, or demographics, those changes must be provided in writing within 15 days and sent to Unisys, Provider Services, PO Box 2002, Charleston, WV 25327-2002 .

New Policy: "Section 506.2 Prescribing Practitioner and Provider Participation Requirements**"**

SECTION 506.2.1

New Policy:506.2.1 Prescribing Practitioner
The current DME/Medical Supplies CMN will no longer be valid after March 15, 2006. The current CMN will be replaced by the West Virginia Medical Institute (WVMI) Medicaid DME/Medical Supplies Authorization Request Form **(Attachment III)**. The prescribing practitioner is responsible for providing WVMI with medical necessity documentation via fax to 1-304-346-8185, telephonically at 1-800- 296-9849 or 1-304- 346-9167, option 5, or via mail to WVMI Medical Review Department, 3001 Chesterfield Place, Charleston, WV 25304. The WVMI Medicaid DME/Medical Supplies Authorization Request Form will be available at www.wvmi.org and www.wvdhhr.org websites. The Internet is the most efficient means of keeping current on updates and information regarding the Bureau for Medical Services. If you do not have the Internet, you may request a CD or paper copy of manuals or manual updates by calling Unisys Provider Enrollment at 1-888-483-0793.

Related to DME/Medical Supplies the Prescribing Practitioner must:

(1) be actively enrolled in Medicaid;
(2) ask member where they wish to obtain prescribed DME

(3) provide a written prescription to the member and instruct the member to present the prescription to the DME provider of choice;
(4) provide WVMI with the medical necessity documentation for items/services prescribed and obtain an assigned PA number, if approved;
(5) inform WVMI of the member's choice for DME provider;
(6) maintain all appropriate medical documentation in the Medicaid member's individual file; and,
(7) participate in on-site reviews and/or submission of medical documentation to BMS upon request.

SECTION 506.2.2

New Policy: 506.2.2 Durable Medical Equipment/Medical Supply Provider (Includes respective Pharmacies, Home IV Infusion Therapy and Home Health Agencies with DME and/or medical supply provider specialty)

The DME/Medical Supply Provider must:
(1) be actively enrolled in Medicaid;
(2) maintain a retail store open to the public at least forty (40) hours per week with a toll free telephone number and handicapped accessibilities. The store must be located within thirty (30) miles of the WV border;
(3) post a visible sign indicating hours of operation. Hours of operation and availability of emergency coverage must be stated on the WV Medicaid enrollment form;
(4) maintain inventory of equipment/supplies and display at least one of each item listed on an inventory and made readily available for delivery;
(5) maintain adequate space to store inventory, business and member records;
(6) obtain individual WV Medicaid provider numbers for each physical facility under the same ownership;
(7) provide DME/Medical Supplies per treating practitioner's prescription;
(8) assure the item/service provided is appropriate to the member's needs;
(9) assure the item/service can be used by the member;
(10) provide an appropriate replacement at no extra cost if the member is unable to use the equipment provided;
(11) agree to accept Medicaid's reimbursement as payment in full for all covered items/services;
(12) provide most economical items/services that meet the member's basic health care needs. Expensive items are not covered when less costly items/services are available;
(13) contact WVMI to obtain PA number before services are rendered;
(14) maintain all medical documentation and proof of delivery of all DME/medical supplies in the member's individual file;
(15) participate in on-site reviews and/or provide medical documentation upon request by BMS;
(16) employ current WV licensed respiratory therapist, registered professional nurse OR physician to provide 24 hour coverage if respiratory/related accessory services/items are offered. A maximum call response time is within thirty (30) minutes. Refer to West Virginia Board of Respiratory Care online at www.wvborc.org for additional information;
(17) employ current licensed or credentialed mastectomy, pedorthotist and/or orthotic fitter certified by National Commission for Certifying Agencies (NCCA), if providing orthotic and/or prosthetic services. Certifying Agencies e.g., American Board for Certification in Orthotics and Prosthetics (ABC), or Board for Orthotist/Prosthetist Certification (BOC), or Board for Certification

in Pedorthotics; and,
(18) provide any changes to original enrollment application (i.e., personnel, licensure, certification, demographics) to Unisys, Provider Services, and PO Box 2002, Charleston, WV, 25327-2002 within fifteen (15) days of change.

SECTION 506.2.3

Introduction: Section 506.5, 3rd paragraph
Old Policy: **"NOTE:** Prior authorization is required from Rational Drug Therapy Program (RDTP) for home IV services. However, if equipment and supplies are required, a completed CMN and a copy of the final determination (RDTP) must be submitted to the UMC for assignment of a PA number. This number may be assigned before or after the IV therapy services are provided. Information from RDTP must contain language which clearly states that the member requires such services or supplies. RDTP may be contacted at 1-800-847-3859 or by fax to 1-800-531-7787."
New Policy: 506.2.3 Home Intravenous Infusion Therapy Suppliers
"Effective February 16, 2006, Home IV Infusion Therapy equipment and medical supplies provided through DME will not require prior authorization by WVMI. This change includes HCPCS codes A4221, A4222, A4223, B9004, B9006, and E0781. Services limits for medical supplies are based on Rational Drug Therapy Program's (RDTP) prior authorization of number(s) of bags or cassettes approved within a specified time frame. For example; if RDTP approves 63 bags or cassettes, the maximum medical supply units is 63; if 10 bags or cassettes are approved, the maximum medical supply units is 10, etc. Service limits for equipment is unchanged. PA from RDTP for medications is also unchanged. RDTP may be contacted at 1-800-847-3859 or fax to 1-800-531-7787. Refer to Chapter 518, Pharmacy Manual, for additional information."

SECTION 506.2.4

New Policy: 506.2.4 Home Health Agencies
"Refer to Chapter 508, Home Health Manual, Section 508.5, Medical Supplies, for additional information."
Directions: Replace/insert pages for Section 506.2

SECTION 506.3

Introduction: Section 506.3, delete 4th paragraph and replace with:
Old Policy: "Unless otherwise specified, WV Medicaid follows Medicare DMERC, Region B criteria for review of medical necessity for covered services/items. BMS Utilization Management Contractor (UMC) is available for information regarding medical necessity."
New Policy: "The most economical items/services will be provided. Expensive items are not covered when less costly items/services are available."
Directions: Replace page.

SECTION 506.3.1

Introduction: Section 506.3.1, lst paragraph, insert 2nd sentence, change second sentence to 3rd sentence
Old Policy: N/A
New Policy: "All DME repairs and replacement require PA through WVMI."

Introduction: Section 506.3.1.b, lst paragraph, delete 2nd, 3rd, & 4th sentences
Old Policy: "Charges should include the materials necessary to complete the repair, including HCPCS codes for any parts with the RP modifier and a period of necessary repair. Labor services are to be billed separately with the units equal to the number of hours of labor. DME providers are not reimbursed for setup or delivery following repair or for service calls that do not involve actual labor time for repairs**."**

New Policy: "DME providers may be reimbursed for materials necessary to complete the repair; however, providers are not eligible for reimbursement of setup or delivery following repair or service calls that do not involve actual labor time for repairs. Labor services are to be billed separately with the units equal to the number of labor hours.
Directions: Replace page.

SECTION 506.4

Introduction: Section 506.4, lst paragraph
Old Policy: "In addition to the documentation requirements identified in Common Chapter 300, Provider Participation Requirements 320.5, DOCUMENT AND RETAIN RECORDS, providers submitting claims for Medicaid reimbursement must maintain complete, accurate and legible records documenting medical necessity for equipment and/or supplies provided to meet the basic health care needs of the individual Medicaid member."

New Policy: "In addition to the documentation requirements identified in Common Chapter 300, Provider Participation Requirements 320.5, DOCUMENT AND RETAIN RECORDS, providers submitting claims for Medicaid reimbursement must maintain complete individual, accurate and legible records. Records must include documentation of medical necessity for equipment and/or supplies provided to meet the basic health care needs of the member."

Introduction: Section 506.4, 2nd paragraph, number 1
Old Policy: "CMN must be completed in its entirety for DME /medical supplies and other related services/items requiring prior authorization. For BMS purposes, the CMN is considered a prescription once signed by the practitioner; therefore, a separate written prescription is not required. The prescribing practitioner must have examined **the** patient within the last six months. A copy of the manufacturer's cost invoice must be attached to the CMN for unlisted HCPCS codes and for items/services noted in Attachment I. The CMN must be renewed at the end of the prescription period specified or within one (1) year whichever comes first. (See Attachment III for the DME CMN with Instructions.)
New Policy: "Effective March 15. 2006, WVMI Medicaid DME Authorization Request Form is required to provide WVMI medical necessity documentation for items or services prescribed by the treating practitioner. The Authorization Form must be renewed at the end of the prescription period specified or within one (1) year whichever comes first.

Introduction: Section 506.4, 2nd paragraph, number 2
Old Policy: "A written prescription signed by the prescribing practitioner for DME/medical supplies that do not require prior authorization must be maintained in the individual member's records. Diagnosis, signature and date are required. Rubber stamp is prohibited. The written prescription must be renewed at the end of the prescriptive period specified or within one (1) year whichever comes first. A copy of the hospital discharge plan and/or progress notes do not constitute a written prescription for DME/medical supplies."
New Policy: "Effective March 15, 2006, a written prescription which includes the member's name, date

of prescription, appropriate HCPCS code for item requested, description of code, estimated length of need in months, quantity of item(s), frequency of use and prescribing practitioner's signature, is to be given to the member by the prescribing practitioner. A copy of the hospital discharge plan and/or progress notes do not constitute a written prescription for DME/Medical Supplies.

Introduction: Section 506.4, 2nd paragraph, number 3
Old Policy: "Proof of delivery (date and mode) and education to the member and/or caregiver must be documented in the individual member's record".
New Policy: "Effective March 15, 2006, a signed delivery document by the member or caregiver and documentation of education for the DME item provided must be maintained in the individual member's record."
Directions: Replace pages.

SECTION 506.5

Introduction: Section 506.5, delete
Old Policy: "Codes requiring PA must be reviewed and approved by the UMC before service is rendered. These specific services are identified in Attachment I of this manual. The exception to this rule is HCPCS Code E0619, Infant Apnea Monitor with recording feature. The "Initial Infant Apnea Monitor" CMN must be submitted to WVMI seven (7) calendar days post hospital discharge. If the monitor is medically necessary beyond the initial approval, the "Request for Extension" CMN must be submitted to WVMI prior to the end of the initial authorization. These CMN's are included in Attachment IV. Unless otherwise, specified, WV Medicaid follows Medicare DMERC, Region B, medical necessity criteria for covered services. All required documentation noted in Section 504 must be attached to a completed CMN and mailed or faxed to:

West Virginia Medical Institute (WVMI)
3001 Chesterfield Place
Charleston, WV 25304
Fax Number: 304-346-8185
Attn: DME/Medical Supply Review

When documentation submitted fails to justify medical necessity for DME or medical supplies, the UMC may request additional information, and/or deny the request for lack of medical necessity. Information must be member specific and not copied from the DMERC Medicare Manual. Retroactive or verbal authorization is not accepted. The issuance of an authorization from the UMC does not guarantee payment.

NOTE: Prior authorization is required from Rational Drug Therapy Program (RDTP) for home IV services. However, if equipment and supplies are required, a completed CMN and a copy of the final determination (RDTP) must be submitted to the UMC for assignment of a PA number. This number may be assigned before or after the IV therapy services are provided. Information from RDTP must contain language which clearly states that the member requires such services or supplies. RDTP may be contacted at 1-800-847-3859 or by fax to 1-800-531-7787.
New Policy: "For DME services and items requiring review for medical necessity by WVMI, it is the responsibility of the prescribing practitioner to submit the appropriate form to WVMI. If items and/or services provided before the PA is confirmed, the DME will not be reimbursed. PA does not guarantee payment. Refer to Attachment I for specific DME/medical supplies requiring PA and service limits for covered services.

Effective, January 1, 2006, Medicaid covered services which currently require a PA will no longer require a PA if the primary insurance approves the service. The EOB must accompany the claim. If the service is not allowed by the primary insurance, but is a covered service for Medicaid and the service requires a PA from the WVMI, Medicaid policy will be enforced. Please refer to Chapter 600 – Payment Methodologies for additional information.

Effective March 15, 2006, InterQual General Durable Medical Equipment Criteria, will be utilized by WVMI for determining medical necessity for DME items. These items include the following:

- Adaptive Strollers (E1232, E1236, E0950, E0966, E0978, E1029, E1030)
- Aerosol Delivery Devices (E0565, E0570)
- Augmentative and Alternative Communication Devices (E2508, E2510) - Refer to Speech/Audiology Manual for additional information
- Bone Growth Stimulators, Noninvasive (E0747, E0748, E0760)
- Continuous Passive Motion Device (CPM), Knee (E0935)
- Home Oxygen Therapy (E0424, E0431, E0434, E0439)
- Hospital Beds (E0250, E0255, E0260, E0303, E0304, E0910, E0911,E0912)
- Insulin Pump, Ambulatory (E0784)
- Lymphedema Compression Devices (E0650, E0651, E0652)
- Manual Wheelchairs (K0001, K0002, K0003, K0004, K0006, K0007)
- Manual Wheelchairs, Recliner/Tilt (K0001 + E1226, E1161, E1231, E1232, E1233, E1234)
- Manual Wheelchairs, Specialized (E1231, E1233, E1234, E1235, E1237, E1238, K0005, K0009)
- Negative Pressure Wound Therapy (NPWT) Pump (E2404, A6550)
- Noninvasive Airway Assist Devices (E0470, E0471, E0472, E0601)
- Power Operated Vehicles (POV) (E1230)
- Power Wheelchairs (K0010, K0011, K0012, K0014)
- Secretion Clearance Devices (E0480, E0483, E0484)
- Support Surfaces (E0180 – E0182, E0184, E0185, E0186, E0187, E0196, E0197 – E0199, E0277, E0371)
- Transcutaneous Electrical Nerve Stimulation (TENS) (E0720, E0730)
- Wheelchair Cushions/Seating System (E2603, E2604, E2605, E2606, E2607, E2608, E2609, E2611, E2612, E2617).

Practitioners are required to provide medical necessity documentation via mail, fax or telephonically to WVMI prior to items/services provided. Documentation form for DME PA will be available at www.wvmi.org and www.wvdhhr.org/bms . Items not listed above, will follow DMERC, Region B, medical necessity criteria for covered services. When documentation fails to meet criteria, WVMI may request additional information to be submitted within seven (7) days. If information is not received by WVMI within seven (7) days, the request will be denied for lack of documentation to support medical necessity.

Retrospective authorization is only available under the following certain circumstances: (1) services covered by private insurance; (2) termination of Medicaid coverage; (3) Medicaid retro eligibility; and (4) an apnea monitor seven (7) days post hospital discharge. A request for consideration of retrospective authorization does not guarantee approval or payment.

New Policy: "Maintenance, repair"

Introduction: Section 506.8, 1st paragraph, 7th bullet
Old Policy: N/A
New Policy: "Service calls that do not involve actual labor time for repairs."

SECTION 506.9

Introduction: Sections erroneously numbered in previous manual
Old Policy: Not Applicable
New Policy: Section 506.9 – Billing and Reimbursement
Directions: Replace page

Introduction: Section 506.9; delete paragraphs 1, 2, 3, and 4
Old Policy: "Medicaid payment is made on a rental or purchase basis. The total payment for rental equipment may not exceed the cost of purchasing the equipment and is reimbursed on a cap rental basis depending on the item requested.

Medicaid payment is based, where possible, on a percentage of Medicare fee schedule and is equal to the lesser of the billed charge or the fee schedule amount less any third party payment. This same rule applies to payments for repairs and maintenance.

The general requirements and procedures for billing are identified in Chapter 600. The professional claim form CMS-1500, or ASCX12N837P (004010X098A1) must be used to bill for DME/Medical supplies. Required attachments to the CMS 1500 are: (1) a manufacturer's cost invoice for unlisted or miscellaneous HCPCS codes, (2) a copy of the Medicare EOB for Medicare cross-over, and (3) medical documentation as previously stated in this chapter. The assigned PA number must be documented on the CMS-1500 for consideration of payment.

Repair and replacement of DME requires an RP modifier. Options or accessories that are included in the code for the base item may not be billed separately.
New Policy: "WV Medicaid requires practitioners, DME/medical supply providers and other appropriate individuals/groups to be enrolled as a Medicaid provider to be eligible for reimbursement of services rendered with exception of an emergent/medically necessary circumstance. Billing prior to rendering services/items is prohibited.

Medicaid payment for DME/Medical Supplies is made on a rental or purchase basis. The total payment for rental equipment may not exceed the cost of purchasing the equipment and is reimbursed on a cap-rental basis depending on the item requested. The billing period for rental equipment begins the day equipment is placed in the home to the next month. When submitting the claim for payment consideration the dates should be spanned; e.g. if DME is placed on 1/3/06, the billing period begins on 1/3/06 to 2/2/06; 2/3/06 to 3/2/06; 3/3/06 to 4/2/06, etc. Only dates that the equipment is in use may be billed. If the member becomes ineligible, the billing span is the begin date of the billing period to the last date of eligibility.

When billing for unlisted and/or unpriced HCPCS DME/Medical Supply codes (A4335, A4649, A6215, A6261, A6262, A6450, A6501 – A6513, A6538, A6540-A6543, A7523, A7524, B9998, B9999, E0240, E0247 – E0248, E1239, E1399, E2216-E2218, E2372, E2399, K0009, K0014, K0108, K0669) the description of the item provided must be entered on the claim form. An unaltered cost invoice is to be submitted to WVMI for pricing of unlisted/unpriced codes. Refer to Attachment I for specific codes and special instructions.

The professional claim form, CMS 1500 or ASCX12N837P (004010X098A1 must be used to bill DME/medical supplies. Repair and replacement of DME requires an RP modifier. Options or accessories included in the base item code will not be reimbursed.

Medicaid is payer of last resort. Third-party Liability (TPL) is a method of ensuring that Medicaid is the last payer to reimburse for covered Medicaid services. In particular, Medicaid participating providers must always seek reimbursement from other liable resources, including private or public insurance entities. Federal regulations require that state Medicaid administration identify any third-party resource available to meet the medical expenses of a member. The third-party may be an individual, institution, corporation or a public/private agency liable for all or part of the member's medical costs; e.g., private health insurance, UMWA benefits, Veterans Administration benefits, CHAMPUS, Medicare, Hospice, etc. No Medicaid reimbursement may be made if the service is the responsibility of a public or private Workers Compensation Plan. In those instances where liability cannot be currently established; i.e., accident or injury, Medicaid benefits will not be withheld. Subsequent establishment of liability which provides compensation and payment for the costs of such medical care requires that an on-setting adjustment be made by the provider to the Medicaid agency for benefits paid. Prior authorization is not required for services reimbursed by third-party payers. All claims must be submitted to Unisys at PO Box 3767, Charleston, WV 25337 for reimbursement consideration.

Medicaid payment is based, where possible, on a percentage of the Medicare fee schedule and is equal to the lesser of the billed charge or the fee schedule amount less any third party payment. This same rule applies to payments for repairs and maintenance.

SECTION 506.10

Introduction: Sections erroneously numbered in previous manual
Old Policy: Not Applicable
New Policy: Section 506.10 – Managed Care
Directions: Replace page

Introduction: Section 506.10
Old Policy: "Unless otherwise noted in this manual or appendices, services detailed in this manual are the responsibility of the Managed Care Organization (MCO), if the Medicaid member is enrolled in a WV MCO, MCO requirements must be met for reimbursement and those requirements may be different than BMS'. If a Medicaid member is a member of the PAAS Program, the member's PAAS Primary Care Provider (PCP) must provide a referral for the DME ordered prior to rendering the services. Medicaid will not reimburse for services provided when MCO or PAAS requirements are not met.
New Policy: "Unless otherwise noted in this manual or appendices, services detailed in this manual are the responsibility of the Managed Care Organization (MCO). If the Medicaid member is enrolled in a WV MCO, MCO requirements must be met for reimbursement."

Attachment I

Introduction: ICD 9 Codes and Modifier Changes in Special Instructions
Change: A4362-A4369, A4371-A4373, A4375-A4378, A4384,-A4390, A4394-A4427, A4455 - added ICD-9 V44.6 and V55.6

A4619 -removed ICD-9 codes 591.1 and added code range 519.0 - 519.9

E0424, E0431, E0434, E0439, E1390 added "Arterial Oxygen Saturation"

A4619, A7030, A7031, A7032, A7033, A7034, A7035, A7036, A7037, A7038 A7039, A7045, A7046E0424, E0431. E0434, E0439, E0445, E0450, E0460, E0463, E0464, E0470 E471, E0472, E0561, E0562, E0565, E0601, and E1390 – added "Must have West Virginia Certified Respiratory Therapist on Staff".

E0450 and E0601 – removed "RR" modifier

E0470 – removed "non- reimbursable with A7030, A7031, A7032, A7033, A7034, A7035, A7036, A7037, A7038, A7039, A7046, E0561, E0562"

E0471 and E0472 - removed ICD 9 codes 780.51, 780.53, 780.57 and added ICD- 9 code 518.81

E0565 - removed ICD-9 codes 591.1 and added ICD9 code range 519.0 – 519.1

E0618 closed code effective 4/30/05

E0619, E1020 re-opened with Special Instruction effective 5/1/05

E0650, E0651, E0652, E0655, E0660, E0665, E0666, E0667, E0668, E0669, E0671, E0672, E0673 - Removed ICD-9 codes 547.0 and 547.1 and added ICD-9 codes 457.0 and 457.1

E0747 - removed ICD-9 code 815-55-815.19 and added ICD-9 code 815.00 - 815.19

E0760 - removed ICD-9 codes 809.9 and added ICD9 code 809.1

E0955, E0956, E0957, E0960 – added ICD-9 range 343.0 – 343.9

E1009, E1010 – added ICD-9 range 344.0 – 344.04

E1028 re-opened and added PA and Special Instruction effective 5/1/05
Directions: Replace pages

Attachment I

Introduction: ICD 9 Codes and Modifier Changes in Special Instructions effective 7/01/05
Change: E1015 and E1016 codes opened effective 7/01/05
Directions: Replace pages

Attachment II

Introduction: Removed items from Non-Covered List
Change: Removed "Snug Seat
Directions: Replace page 116

Introduction: Add items to Non-Covered List
Change: Bacterial Filter, Glucowatch, Medical Identification Bracelet, Uplift Seat Assist
Directions: Replace Attachment II

Attachment III
Introduction: DME CMN with Instructions
Change: CMN Form – Section I added Member Medicaid ID # and Servicing Provider ID #
CMN Instructions - Section I added "Completed by Servicing Provider"
CMN Instructions – Section II added "Completed by Practitioner"
CMN Instructions – Section III, 1st, 3rd, 4th, and 5th bullets, added "Completed by Practitioner"
CMN Instructions – Section III, 2nd bullet added "Completed by Servicing Provider"
CMN Instructions – Section IV added "Completed by Practitioner"
Directions: Replace Attachment III

Attachment IV

Introduction: Apnea Monitor – Initial and Request for Extension CMN's
Change: Initial Infant Apnea Monitor CMN added DME Provider Medicaid ID # and Telephone # areas

Initial Infant Apnea Monitor CMN added "Request for prior authorization must be submitted to West Virginia Medical Institute seven (7) calendar days post hospital discharge" at the bottom of the page.

Request for Extension CMN added DME Provider Medicaid ID

CHAPTER 506 COVERED SERVICES, LIMITATIONS, AND EXCLUSIONS FOR DME/MEDICAL SUPPLIES

TABLE OF CONTENTS

TOPIC **PAGE NO.**

CHAPTER 506-COVERED SERVICES, LIMITATIONS, AND EXCLUSIONS FOR DME/MEDICAL SUPPLIES

INTRODUCTION

The West Virginia (WV) Medicaid Program offers a comprehensive scope of medically necessary medical and mental health services to diagnose and treat eligible members. Covered and authorized services must be rendered by enrolled providers within the scope of their license and in accordance with all State and Federal requirements. Any service, procedure, item, or situation not discussed in the manual must be presumed non-covered unless informed otherwise in writing by the Bureau for Medical Services (BMS).

WV Medicaid Program offers a comprehensive scope of Durable Medical Equipment (DME)/Medical Supply services to Medicaid members, subject to medical necessity, appropriateness criteria and prior authorization requirements. DME/Medical Supply covered services are provided by approved DME providers, home IV infusion therapy suppliers, pharmacies and home health agencies in accordance with State and Federal regulations.

The WV Medicaid Program is administered pursuant to Title XIX of the Social Security Act and Chapter 9 of the WV Code. BMS in the WV Department of Health and Human Resources (DHHR) is the single State agency responsible for administering the WV Medicaid Program. This program, therefore, must also function within federally defined parameters.

Durable Medical Equipment/medical supply approved providers are subject to review of individual Medicaid member records by BMS, whether the service/item requires prior authorization (PA) or not. Providers must maintain current and accurate documentation and make available to BMS upon request.

This chapter describes WV Medicaid's major coverage policies for DME/Medical Supplies as noted in the following Sections:

506.1 DEFINITIONS

Definitions governing the provision of all WV Medicaid services will apply pursuant to Chapter 200. In addition, the following definitions also apply to the requirements for payment of the services described in this chapter.

Customized Equipment - Uniquely constructed for a specific member according to the description and order of the member's treating physician. Specific to wheelchairs and wheelchair accessories: A wheelchair which has been (1) measured, fitted or adapted in consideration of the patient's body size, disability, period of need or intended use; (2) ordered from a manufacturer who make available customized features or components for wheelchairs; and (3) is intended for an individual member's use in accordance with instructions from the member's physician would be considered "customized".

DME Provider - An individual or entity approved by WV Medicaid to provide DME /medical supplies, repair and replacement of equipment to Medicaid members. (See Section 506.2 for specifics).

Medical Supplies - Medically necessary non-durable medical or surgical items prescribed by a practitioner that are consumable, expendable and appropriate for use in a member's home.

Mobility Assistive Equipment (MAE) – Items that offer assistance to members who have a physical impairment that results in a mobility deficit. MAE includes, but is not limited to, canes, crutches, walkers, manual wheelchairs, power wheelchairs, power operated vehicles and strollers.

Prescribing Practitioner: Identified as an MD, DO, DPM, Nurse Practitioner (NP), or Physician Assistant (PA) under the supervision of a participating physician. WV Medicaid does not recognize hospital residents as prescribing practitioners.

506.2 PRESCRIBING PRACTITIONER AND PROVIDER PARTICIPATION REQUIREMENTS

506.2.1 Prescribing Practitioner

In addition to Chapter 300 Provider Participation Requirements, MDs, DOs, DPMs, NPs, and PAs under the supervision of a participating physician, prescribing DME/medical supplies and related items must:

(1) be actively enrolled in Medicaid;
(2) inquire if the member has a DME provider of choice;
(3) provide a written prescription to the member;
(4) provide clinical documentation for medical necessity to include diagnosis code, frequency of use, duration, quantity, and any relevant information to WVMI. Documentation may be submitted to
(5) WVMI in writing (with legal signature of prescribing practitioner), fax or telephonically;
(6) maintain all appropriate medical documentation in the Medicaid member's individual file; and,
(7) participate in on-site reviews and/or submission of medical documentation to BMS upon request.

The Bureau's website @ www.wvdhhr.org is the most efficient means of keeping current on updates and information regarding BMS. If you do not have the Internet, you may request a CD or paper copy of manuals or manual updates by calling Unisys Provider Enrollment at 1-888-483-0793.

506.2.2 Durable Medical Equipment/Medical Supply Provider (Includes respective Pharmacies, Home IV Infusion Therapy and Home Health Agencies with DME and/or medical supply provider specialty)

The DME/Medical Supply Provider must:

(1) be actively enrolled in Medicaid;
(2) maintain a retail store open to the public at least forty (40) hours per week with a toll free telephone number and handicapped accessibilities. The store must be located within thirty (30) miles of the WV border;
(3) post a visible sign indicating hours of operation. Hours of operation and availability of

emergency coverage must be stated on the WV Medicaid enrollment form;

(4) maintain inventory of equipment/supplies and display at least one of each item listed on an inventory and made readily available for delivery;

(5) maintain adequate space to store inventory, business and member records;

(6) obtain individual WV Medicaid provider numbers for each physical facility under the same ownership;

(7) provide DME/Medical Supplies per treating practitioner's prescription;

(8) assure the item/service provided is appropriate to the member's needs;

(9) assure the item/service can be used by the member;

(10) provide an appropriate replacement at no extra cost if the member is unable to use the equipment provided;

(11) agree to accept Medicaid's reimbursement as payment in full for all covered items/services;

(12) provide most economical items/services that meets the member's basic health care needs. Expensive items are not covered when less costly items/services are available;

(13) maintain all medical documentation and proof of delivery of all DME/medical supplies in the member's individual file;

(14) participate in on-site reviews and/or provide medical documentation upon request by BMS;

(15) employ current WV licensed respiratory therapist, registered professional nurse OR physician to provide 24 hour coverage if respiratory/related accessory services/items are offered. A maximum call response time is within thirty (30) minutes. Refer to West Virginia Board of Respiratory Care online at www.wvborc.org for additional information;

(16) employ current licensed or credentialed mastectomy, pedorthotist and/or orthotic fitter certified by National Commission for Certifying Agencies (NCCA), if providing orthotic and/or prosthetic services. Certifying Agencies e.g., American Board for Certification in Orthotics and Prosthetics (ABC), or Board for Orthotist/Prosthetist Certification (BOC), or Board for Certification in Pedorthotics; and

(17) provide any changes to original enrollment application (i.e., personnel, licensure, certification, registration, demographics) to Unisys, Provider Services, PO Box 2002, Charleston, WV, 25327-2002 within fifteen (15) days. Copies of updated license, certification and/or registration must be submitted to Unisys annually.

506.2.3 Home Intravenous Infusion Therapy Suppliers

Effective February 16, 2006, Home IV Infusion Therapy equipment and medical supplies provided through DME will not require prior authorization by WVMI. This change includes HCPCS codes A4221, A4222, A4223, B4164-B4224, B5000, B5100, B5200, B9004, B9006, and E0781. Services limits for medical supplies are based on Rational Drug Therapy Program's (RDTP) prior authorization of number(s) of bags or cassettes approved within a specified time frame. For example; if RDTP approves 63 bags or cassettes, the maximum medical supply units is 63; if 10 bags or cassettes are approved, the maximum medical supply units is 10, etc. Service limits for equipment is unchanged. Prior Authorization from RDTP for medications is also unchanged.

RDTP may be contacted at 1-800-847-3859 or fax to 1-800-531-7787.

506.2.4 Home Health Agencies

Refer to Chapter 508, Home Health Manual, Section 508.5, Medical Supplies, for additional information.

506.3 COVERED DURABLE MEDICAL EQUIPMENT AND MEDICAL SUPPLIES

Durable Medical Equipment/medical supplies and other related services/items provided through DME are considered for reimbursement by WV Medicaid when requested by a prescribing practitioner and determined medically necessary to meet the basic health care needs of the member.

A complete list of covered and non-covered DME/medical supplies and other related services/items provided through DME are seen in **Attachments I and II. Attachment I** describes the DME/medical supplies through current HCPCS codes, description of each code, replacement code for closed codes (as appropriate), service limits, prior authorization requirements and special coverage instructions. Dispensing of medical supplies for more than a one (1) month time frame or shipping supplies on an unsolicited or automatic basis is prohibited. **Attachment II** describes DME/medical supply items, without HCPCS codes, that are non-covered by WV Medicaid

Durable Medical Equipment/medical supply coverage is based on product category not specific item, brand or manufacturer. Medical supplies are purchased items, while equipment may be initially purchased or reimbursed on a cap-rental basis. Following the established cap-rental timeframe, DME items are determined purchased and the provider that received the last cap-rental reimbursement maintains responsibility for the item and must provide repairs and/or modification as needed.

The most economical items/services will be provided. Expensive items are not covered when less costly items/services are available.

506.3.1 WARRANTY, REPAIR, AND REPLACEMENT

Durable Medical Equipment and/or accessory repairs and replacements are limited to medically necessary items purchased by BMS or Children with Special Healthcare Needs Program (CSHCN). All DME repairs and replacement require PA through WVMI. Only one (1) MAE of the same category will be maintained or repaired by BMS at any time. Manufacturer's warranty for DME is required for not less than one (1) year.

Medicaid's initial payment for DME includes all adjustments and/modifications needed to make the item functional for delivery to the member. The supplier must provide training and instruction to the member and/or caregiver on the safe, effective and appropriate use of the appliance.

506.3.1. a Warranty

All standard durable medical equipment must have a manufacturer's warranty of at least one year. If the provider supplies equipment that is not covered under a warranty, the provider is responsible for repairs and replacements for the first year. The warranty begins on the date of the delivery (date of service) to the member. The original warranty must be given to the member and a copy is maintained in the member's individual medical record. A copy of the warranty is provided to WV Medicaid or WVMI

upon request.

506.3.1. b Repair

WV Medicaid's coverage for repair of equipment is limited to:

(1) items that have been fully purchased by WV Medicaid or by the Children with Special Healthcare Needs Program (CSHCN);
(2) equipment provided by CSHCN is covered by Medicaid;
(3) items in which the cap-rental timeframe has been exhausted;
(4) the medical need is expected to continue; and
(5) the repair is more economical than replacement.

Durable Medical Equipment providers may be reimbursed for materials necessary to complete the repair; however, providers are not eligible for reimbursement of setup or delivery following repair or service calls that do not involve actual labor time for repairs. Labor services are to be billed separately with the units equal to the number of labor hours.

DME repairs are covered when all of the following conditions are met:

(1) Prior authorization is received before repairs are initiated – appropriate HCPCS Code and RP modifier must be included on the request.

(2) Substitute comparable or like equipment at no additional cost when broken or damaged equipment is being repaired.

(3) No other party is financially liable for the needed repair.

(4) Equipment remains medically necessary.

(5) Damage to the item is not due to the member's abuse or misuse.

506.3.1. c Replacement

Replacement of DME equipment may be covered by WV Medicaid on an as-needed basis due to acute rapid changes in the member's physical condition, wear, theft, irreparable damage, or loss by disasters. For consideration of equipment replacement, the provider must obtain prior authorization. The request must be submitted to WVMI **prior to rendering services.** Documentation to medically justify replacement must accompany all requests. A police or insurance report is required with all requests for replacement of stolen equipment. A report of insurance liability is required with requests for replacement of equipment lost or destroyed. In cases of neglect and/or wrongful misuse of DME, requests for replacement will be denied if such circumstances are confirmed.

506.4 DOCUMENTATION REQUIREMENTS

In addition to the documentation requirements identified in Common Chapter 300, Provider Participation Requirements 320.5, DOCUMENT AND RETAIN RECORDS, providers submitting claims for Medicaid reimbursement must maintain complete, individual, accurate and legible records. Records must include documentation of medical necessity for equipment and/or supplies provided to meet the basic health care needs of the member.

Documentation must include, but is not limited to:

(1) Effective May 1, 2006, formal certificate of medical necessity forms (i.e., the WVMI Medicaid DME Authorization Request Form, the DME/Medical Supply Certificate of Medical Necessity, the Apnea Initial and Recertification Certificates of Medical Necessity) are not required to document medical necessity of items requiring prior authorization. However, as an enrolled participant of WV Medicaid, practitioners and DME providers are required to maintain individual Medicaid member files with documentation to assure that all services provided to Medicaid members are medically necessary and that billing of such services are accurate. **Attachment III** provides forms that may be submitted via fax to 1-304-346-8185 or 1-877-762-4338 or in writing to WVMI Medical Review Department, 3001 Chesterfield Place, Charleston, WV 25304. Telephonic reviews for urgent or emergency requests are available at 1-304-414-2551 or 1-800-296-9849.

(2) Effective May 1, 2006, a written prescription which must include the member's name, date of prescription, description of code, estimated length of need in months, quantity of item(s), frequency of use and prescribing practitioner's signature and given to the member by the prescribing practitioner. A copy of the hospital discharge plan and/or progress notes do not constitute a written prescription for DME/Medical Supplies.

(3) The DME provider must maintain a delivery document signed by the member or caregiver and documentation of education for the DME item provided must be maintained in the individual member's record.

(4) DME Provider must be able to track serial, lot, and product numbers for purposes of recall.

(5) The prescriber's medical documentation submitted for review must not be more than six (6) months old at the time the prescription is written.

506.5 PRIOR AUTHORIZATION

For DME services and items requiring prior authorization review for medical necessity by WVMI, it is the responsibility of the prescribing practitioner to submit the appropriate clinical documentation i.e., ICD-9 code(s), all information required on the written prescription (see 506.4, 2nd paragraph, (2) for clarification) and any other relevant information. Additionally, a licensed physical therapist or licensed occupational therapist who is fiscally, administratively and contractually independent from the DME provider may also submit clinical documentation for review when requested by the prescribing practitioner. PA recertification review is required at the end of the prescription period specified or within one (1) year whichever comes first. It is strongly recommended that DME providers, in partnership with prescribing practitioners, assist in obtaining prior authorizations. Prescribing practitioners must provide clinical information and a written prescription while DME providers may submit the appropriate HCPCS code and billing information. If items and/or services provided before the PA is confirmed, the DME will not be reimbursed. PA does not guarantee payment. Refer to Attachment I for specific DME/medical supplies requiring PA and service limits for covered services.

Effective, January 1, 2006, Medicaid covered services which currently require a PA will no longer require a PA if the primary insurance approves the service. The explanation of benefits (EOB) must

accompany the claim. An EOB documenting the reasons for the denial of TPL for services requested must be provided to WVMI when requesting prior authorization review. If the service is not allowed or covered by the primary insurance, but is a covered service for Medicaid and the service requires a PA from WVMI, Medicaid policy will be enforced. If administrative denials are given by the primary payer, Medicaid will not reimburse for services. Please refer to Chapter 600 – Payment Methodologies for additional information.

Effective March 15, 2006, InterQual General Durable Medical Equipment Criteria, will be utilized by WVMI
for determining medical necessity for DME items. These items include the following:

- Adaptive Strollers (E1232, E1236, E0950, E0966, E0978, E1029, E1030)
- Aerosol Delivery Devices (E0565, E0570)
- Augmentative and Alternative Communication Devices (E2508, E2510) - Refer to Speech/Audiology Manual for additional information
- Bone Growth Stimulators, Noninvasive (E0747, E0748, E0760)
- Continuous Passive Motion Device (CPM), Knee (E0935)
- Home Oxygen Therapy (E0424, E0431, E0434, E0439).
  Effective March 15, 2006, any new oxygen system requested for medical necessity
  must follow InterQual criteria to include documentation of initial lab results. PA recertification review is required at the end of the prescription period specified or within one (1) year whichever comes first. Date of lab results must be within 6 months of the oxygen request.
- Hospital Beds (E0250, E0255, E0260, E0303, E0304, E0910, E0911, E0912)
- Insulin Pump, Ambulatory (E0784)
- Lymphedema Compression Devices (E0650, E0651, E0652)
- Manual Wheelchairs (K0001, K0002, K0003, K0004, K0005 K0006, K0007)
- Manual Wheelchairs, Recliner/Tilt (K0001 + E1226, E1161)
- Negative Pressure Wound Therapy (NPWT) Pump (E2404, A6550)
- Noninvasive Airway Assist Devices (E0470, E0471, E0472, E0601)
- Pediatric Mobility Equipment (E1231, E1232, E1233, E1234, E1235, E1237, E1238, K0890, K0891)
- Power Operated Vehicles (POV) (K0800, K0801, K0802, K0806, K0807, K0808, K0812)
- Power Wheelchairs (K0813, K0814, K0815, K0826, K0820, K0821, K0822,
- K0823, K0824, K0825, K0826, K0827, K0828, K0829, K0830, K0831, K0835, K0836, K0837, K0838, K0839, K0840, K0841, K0842, K0843, K0848, K0849, K0850, K0851, K0852, K0853, K0854, K0855, K0856, K0857, K0858, K0859, K0860, K0861, K0862, K0863, K0864, K0868, K0869, K0870, K0871, K0877, K0878, K0879, K0880, K0884, K0885, K0886)
- Secretion Clearance Devices (E0480, E0483, E0484)
- Support Surfaces (E0181 E0182, E0184, E0185, E0186, E0187, E0196, E0197 – E0199, E0277, E0371)
- Transcutaneous Electrical Nerve Stimulation (TENS) (E0720, E0730)
- Wheelchair Cushions/Seating System (E2603, E2604, E2605, E2606, E2607,

E2608, E2609, E2611, E2612, E2617, K0734, K0735, K0736, K0737)

Items requiring PA not listed above will follow Palmetto, Region C, medical necessity criteria for covered services. When documentation fails to meet criteria, WVMI may request additional information to be submitted within seven (7) days. If information is not received by WVMI within seven (7) days, the request will be denied for lack of documentation to support medical necessity.

Retrospective authorization is available (1) for items denied due to TPL; (2) retrospective Medicaid eligibility; (3) within 7 days post hospital discharge for apnea monitors, oxygen systems, nebulizers; (4) for items other than those referenced here on a case-by-case basis; and (5) the **next** business day following DME placement occurring on weekends and holidays, or at times when the utilization management agency review process is unavailable. A request for consideration of retrospective authorization does not guarantee approval or payment.

506.6 NURSING FACILITIES

Reimbursement to nursing and intermediate care facilities (ICF/MR) is intended to cover the total cost of care provided in the nursing home, including durable medical equipment and supplies.

Durable Medical Equipment and medical supplies may be reported in the nursing home cost report and are subsequently reflected in their per diem rate. Therefore, none of these items will be reimbursed to a DME company/medical supplier as a direct billing to Medicaid if the Medicaid member is a resident of the nursing facility at the time the DME is issued.

506.7 OUT-OF-STATE SERVICES

For WV Medicaid members receiving covered services from an out-of–state facility and requiring DME/medical supplies and other related services/items that are medically necessary at discharge, a written prescription by the respective out-of-state attending physician must be presented to a WV provider for provision of services requested. West Virginia DME policies apply. This process is required for warranty validity and to ensure that repairs and maintenance are provided in the most efficient and cost-effective means for WV Medicaid members.

506.8 NON-COVERED DURABLE MEDICAL EQUIPMENT AND MEDICAL SUPPLIES

In addition to non-covered services listed on Attachments I and II, the following items are not covered by WV Medicaid:

(1) Use of an unlisted code when a national HCPCS code is available

(2) Unbundled HCPCS codes

(3) Services rendered prior to obtaining prior authorization

(4) Routine or periodic maintenance (i.e., testing, cleaning, regulating)

(5) DME travel, set-up or delivery following repairs.

(6) Maintenance, repairs or replacement for equipment not purchased or rented by BMS or CSHCN (i.e., "loan closet", Muscular Dystrophy, Easter Seals, family, friend, yard/rummage sales, etc.)

(7) Service calls that do not involve actual labor time for repairs.

(8) DME/medical supplies and other related services/items provided through DME suppliers to Nursing Facilities (ICF/MR), Hospice

(9) DME/medical supplies and other related services/items provided through DME suppliers to participants enrolled in the Division of Rehabilitative Services and/or Workers Compensation

(10) DME/medical supplies and other related service/items provided through DME suppliers to members enrolled in a Medicaid MCO.

(11) DME/medical supplies and other related service/items provided through DME to members enrolled in the PAAS Program without a referral from the PCP.

506.9 BILLING AND REIMBURSEMENT

WV Medicaid requires practitioners, DME/medical supply providers and other appropriate individuals/groups to be enrolled as a Medicaid provider to be eligible for reimbursement of services rendered with exception of an emergent/medically necessary circumstance. Billing prior to rendering services/items is prohibited.

Medicaid payment for DME/Medical Supplies is made on a rental or purchase basis. The total payment for rental equipment may not exceed the cost of purchasing the equipment and is reimbursed on a cap-rental basis depending on the item requested. The billing period for rental equipment begins the day equipment is placed in the home to the next month. When submitting the claim for payment consideration the dates should be spanned; e.g. if DME is placed on 1/3/06, the billing period begins on 1/3/06 to 2/2/06; 2/3/06 to 3/2/06; 3/3/06 to 4/2/06, etc. Only dates that the equipment is in use may be billed. If the member becomes ineligible, the billing span is the begin date of the billing period to the last date of eligibility.

When billing for unlisted and/or unpriced HCPCS DME/Medical Supply codes (A4335, A4649, A6215, A6261, A6262, A6450, A6501 – A6513, A6538, A6540-A6543, A7523, A7524, B9998, B9999, E0240, E0247 – E0248, E1239, E1399, E2216-E2218, E2372, E2399, K0009, K0108, K0669, K0898, K0899) the description of the item provided must be entered on the claim form. An unaltered cost invoice is to be submitted to WVMI for pricing of unlisted/unpriced codes. Refer to Attachment I for specific codes and special instructions.

The professional claim form, CMS 1500 or ASCX12N837P (004010X098A1 must be used to bill DME/medical supplies. Repair and replacement of DME requires an RP modifier. Options or accessories included in the base item code will not be reimbursed.

Medicaid is payer of last resort. Third-party Liability (TPL) is a method of ensuring that Medicaid is the last payer to reimburse for covered Medicaid services. In particular, Medicaid participating providers must always seek reimbursement from other liable resources, including private or public insurance entities. Federal regulations require that state Medicaid administration identify any third-party resource available to meet the medical expenses of a member. The third-party may be an individual, institution, corporation or a public/private agency liable for all or part of the member's medical costs; e.g., private health insurance, UMWA benefits, Veterans Administration benefits, CHAMPUS, Medicare, Hospice, etc. No Medicaid reimbursement may be made if the service is the responsibility of a public or private Workers Compensation Plan. Subsequent establishment of liability which provides compensation and payment for the costs of such medical care requires that an adjustment be made by the provider to the Medicaid agency for benefits paid. Prior authorization is not required for services reimbursed by third-party payers. All claims must be submitted to Unisys at PO Box 3767, Charleston, WV 25337 for reimbursement consideration.

Medicaid payment is based, where possible, on a percentage of the Medicare fee schedule and is equal to the lesser of the billed charge or the fee schedule amount less any third party payment. This same rule applies to payments for repairs and maintenance.

Certain supplies used by eligible diabetic Medicaid members (ICD-9-CM codes 250.00 – 250.93 or 648.8X**)** are covered through the outpatient pharmacy program. A prescription issued from a qualified practitioner within the scope of his/her practice is required for coverage of these items. Verbal prescriptions which meet federal and state regulations are permitted. Prescriptions must define the number of tests to be performed per day. Co-payments are not required on prescriptions for these items. Needles and syringes dispensed in this program are to be used only for the administration of insulin. Insulin syringe and needle combinations and pen needles are not covered for non-insulin dependent diabetic patients or those patients with other diagnoses through the pharmacy program.

Diabetic testing supplies and syringes/needles are not covered for members residing in skilled nursing or ICF/MR facilities. Blood glucose testing monitors, other types of diabetic testing supplies, insulin pumps and supplies, and/or syringes and needles for other purposes must be submitted as medical claims.

Covered supplies through the pharmacy program include: (See Pharmacy Manual)

- Blood glucose testing strips
- Urine testing tablets and strips
- Lancets
- Insulin syringe and needle combinations for the administration of insulin
- Needles for insulin pen systems

Diabetic medical supplies that include lancets, glucose strips and insulin syringes are covered by Medicaid through a retail pharmacy or through a DME company even if the member is enrolled in an MCO. All other equipment necessary for diabetic members who are members of the MCO is the responsibility of the MCO and the MCO's requirements must be met for reimbursement. If the MCO's requirements are not met, Medicaid will not reimburse for services provided.

506.10 MANAGED CARE

Unless otherwise noted in this manual or appendices, services detailed in this manual are the responsibility of the Managed Care Organization (MCO). If the Medicaid member is enrolled in a WV MCO, MCO requirements must be met for reimbursement. If a Medicaid member is enrolled in the PAAS Program, the member's PAAS Primary Care Provider (PCP) must provide a referral for the DME ordered prior to rendering the services. Medicaid will not reimburse for services provided when MCO or PAAS requirements are not met.

CHAPTER 506

DME/MEDICAL SUPPLIES

MAY 1, 2005

ATTACHMENT I

COVERED/NON-COVERED DME/MEDICAL SUPPLY SERVICES WITH ASSIGNED HCPCS CODES

REVISED JANUARY 1, 2008

WEST VIRGINIA DEPARTMENT OF HEALTH & HUMAN RESOURCES
BUREAU FOR MEDICAL SERVICES
HCPCS CODES FOR DURABLE MEDICAL EQUIPMENT AND SUPPLIES
***PRIOR AUTHORIZATION MUST BE OBTAINED IF SERVICE LIMITS ARE EXCEEDED**

HCPCS CODES	DESCRIPTION	REPLACES	SERVICE LIMIT	SPECIAL INSTRUCTIONS
A4206	SYRINGE WITH NEEDLE, STERILE 1CC **OR LESS**, EACH		100 PER ROLLING MONTH	
A4207	SYRINGE WITH NEEDLE, STERILE 2CC, EACH		100 PER ROLLING MONTH	
A4208	SYRINGE WITH NEEDLE, STERILE 3CC, EACH		100 PER ROLLING MONTH	
A4209	SYRINGE WITH NEEDLE, STERILE 5CC OR GREATER, EACH		100 PER ROLLING MONTH	
A4210	NEEDLE-FREE INJECTION DEVICE, EACH		NON-COVERED	
A4211	SUPPLIES FOR SELF-ADMINISTERED INJECTIONS		NON-COVERED	
A4212	NON-CORING NEEDLE OR STYLET WITH OR WITHOUT CATHETER		NON-COVERED	
A4213	SYRINGE, STERILE, 20 CC OR GREATER, EACH		60 PER ROLLING MONTH	
A4215	NEEDLE, STERILE, ANY SIZE EACH	A4656	100 PER ROLLING MONTH	
A4216	STERILE WATER, SALINE AND/OR DEXTROSE DILUENT/FLUSH, 10 ML			
A4217	STERILE WATER/SALINE, 500 ML			COVERAGE LIMITED TO TRACHEAL SUCTIONING ONLY. REQUIRES ICD-9-CM DIAGNOSIS CODE: 011.50-011.56, 277.02, 494.0, 494.1, 519.1, 748.61, V44.0 OR V55.0
A4218	STERILE SALINE OR WATER, METERED DOSE DISPENSER 10 ML		NON-COVERED	NEW CODE 01/01/2006
A4220	REFILL KIT FOR IMPLANTABLE INFUSION PUMP		NON-COVERED	
A4221	SUPPLIES FOR MAINTENANCE OF DRUG INFUSION CATHETER, PER WEEK (LIST DRUG SEPARATELY)	A4230 A4231	4 PER ROLLING MONTH	SUPPLIES INCLUDE: HEPLOCK START KITS, CENTRAL LINE KITS, INSYTES, ETOH SWABS, HUBER NEEDLES, SUB-Q- NEEDLE, SUB-Q KIT NON-REIMBURSABLE WITH A4230 OR A4231
A4222	INFUSION SUPPLIES FOR EXTERNAL DRUG INFUSION PUMP, PER CASSETTE OR BAG (LIST DRUGS SEPARATELY)	A4230 A4231		SUPPLIES INCLUDE: TUBING, BATTERIES, CLAVE VALVE, CLAVE, VIAL ACCESS, SYRINGES (3CC, 5CC, 10CC) 7" EXTENSION SETS SERVICE LIMIT BASED ON RATIONAL DRUG THERAPY PROGRAM AUTHORIZATION FOR NUMBER OF BAGS OR CASSETTES RDTP AUTHORIZATION FORM MUST BE ATTACHED TO CMS 1500 CLAIM FORM NON-REIMBURSABLE WITH A4230 OR A4231

WEST VIRGINIA DEPARTMENT OF HEALTH & HUMAN RESOURCES

HCPCS CODES FOR DURABLE MEDICAL EQUIPMENT AND SUPPLIES
***PRIOR AUTHORIZATION MUST BE OBTAINED IF SERVICE LIMITS ARE EXCEEDED**

HCPCS CODES	DESCRIPTION	REPLACES	SERVICE LIMIT	SPECIAL INSTRUCTIONS
A4223	INFUSION SUPPLIES NOT USED WITH EXTERNAL INFUSION PUMP, PER CASSETTE OR BAG (LIST DRUGS SEPARATELY)			SUPPLIES INCLUDE: TUBING, CENTRAL LINE KIT, INSYTES PERIPHERAL LINE, HUBER NEEDLES, CLAVE CONNECTOR, CLAVE VALVE, CLAVE VIAL ACCESS, LUMENS (TRIPLE, SINGLE, DOUBLE) SYRINGES (3CC, 5CC, 10CC) 7" EXTENSION SETS, HEPLOCK KITS, IV HOOK/POLE SERVICE LIMIT BASED ON RATIONAL DRUG THERAPY PROGRAM AUTHORIZATION FOR NUMBER OF BAGS OR CASSETTES RDTP AUTHORIZATION FORM MUST BE ATTACHED TO CMS 1500 CLAIM FORM NON-REIMBURSABLE WITH A4230 OR A4231
A4230	INFUSION SET FOR EXTERNAL INSULIN PUMP, NON NEEDLE CANNULA TYPE		12 PER ROLLING MONTH	REQUIRES ICD-9-CM DIAGNOSIS CODES: 250.00 - 250.93
A4231	INFUSION SET FOR EXTERNAL INSULIN PUMP, NEEDLE TYPE		12 PER ROLLING MONTH	REQUIRES ICD-9-CM DIAGNOSIS CODES: 250.00 - 250.93
A4232	SYRINGE WITH NEEDLE FOR EXTERNAL INSULIN PUMP, STERILE, 3CC		12 PER ROLLING MONTH	REQUIRES ICD-9-CM DIAGNOSIS CODES: 250.00 - 250.93
A4233	REPLACEMENT BATTERY, ALKALINE 9 (OTHER THAN T CELL) FOR USE WITH MEDICALLY NCESSARY HOME BLOOD GLUCOSE MONITOR OWNED BY THE PATIENT, EACH	A4254	1 PER 2 ROLLING YEARS	NEW CODE 01/01/2006
A4234	REPLACEMENT BATTERY, ALKALINE, J CELL, FOR USE WITH MEDICALLY NECESSARY HOME BLOOD GLUCOSE MONITOR OWNED BY PATIENT, EACH	A4254	1 PER 2 ROLLING YEARS	NEW CODE 01/01/2006
A4235	REPLACEMENT BATTERY, LITHIUM, FOR USE WITH MEDICALLY NECESSARY HOME BLOOD GLUCOSE MONITOR OWNED BY PATIENT, EACH	A4254	1 PER 2 ROLLING YEARS	NEW CODE 01/01/2006
A4236	REPLACEMENT BATTERY, SILVER OXIDE, FOR USE WITH MEDICALLY NECESSARY HOME BLOOD GLUCOSE MONITOR OWNED BY PATIENT, EACH	A4254	1 PER 2 ROLLING YEARS	NEW CODE 01/01/2006
A4244	ALCOHOL OR PEROXIDE, PER PINT		7 PER ROLLING MONTH	NON-REIMBURSABLE WITH A4245
A4245	ALCOHOL WIPES, PER BOX		4 PER ROLLING MONTH	NON-REIMBURSABLE WITH A4244
A4246	BETADINE OR PHISOHEX SOLUTION, PER PINT		6 PER ROLLING MONTH	NON-REIMBURSABLE WITH A4247
A4247	BETADINE OR IODINE SWABS/WIPES, PER BOX		4 PER ROLLING MONTH	NON-REIMBURSABLE WITH A4246
A4248	CHLOREHXIDINE CONTAINING ANTISEPTIC, 1 ML		NON-COVERED	
A4250	URINE TEST OR REAGENT STRIPS OR TABLETS (100 TABLETS OR STRIPS)		1 EVERY 3 ROLLING MONTHS	

WEST VIRGINIA DEPARTMENT OF HEALTH & HUMAN RESOURCES
BUREAU FOR MEDICAL SERVICES
HCPCS CODES FOR DURABLE MEDICAL EQUIPMENT AND SUPPLIES
***PRIOR AUTHORIZATION MUST BE OBTAINED IF SERVICE LIMITS ARE EXCEEDED**

HCPCS CODES	DESCRIPTION	REPLACES	SERVICE LIMIT	SPECIAL INSTRUCTIONS
A4252	BLOOD KETONE TEST OR REAGENT STRIP, EACH		NON-COVERED	NEW CODE 01/01/2008
A4253 KX	BLOOD GLUCOSE TEST OR REAGENT STRIPS FOR HOME BLOOD GLUCOSE MONITOR, PER 50 STRIPS		3 BOXES PER ROLLING MONTH	REQUIRES ICD-9-CM DIAGNOSIS CODES: 250.00 THRU 250.93 OR 648.8X INSULIN DEPENDENT NON-REIMBURSABLE WITH A4253KS
A4253 KS	BLOOD GLUCOSE TEST OR REAGENT STRIPS FOR HOME BLOOD GLUCOSE MONITOR, PER 50 STRIPS		2 BOXES PER ROLLING MONTH	REQUIRES ICD-9-CM DIAGNOSIS CODES: 250.00 THRU 250.93 OR 648.8X NON-INSULIN DEPENDENT NON-REIMBURSABLE WITH A4253KX
A4254	REPLACEMENT BATTERY, ANY TYPE, FOR USE WITH MEDICALLY NECESSARY HOME BLOOD GLUCOSE MONITOR OWNED BY PATIENT, EACH		NON-COVERED	DISCONTINUED BY CMS 12/31/2005
A4255	PLATFORMS FOR HOME BLOOD GLUCOSE MONITOR, 50 PER BOX		NON-COVERED	
A4256	NORMAL, LOW AND HIGH CALIBRATOR SOLUTION / CHIPS		1 PER 3 ROLLING MONTHS	REQUIRES ICD-9-CM DIAGNOSIS CODES: 250.00 THRU 250.93 OR 648.8X
A4257	REPLACEMENT LENS SHIELD CARTRIDGE FOR USE WITH LASER SKIN PIERCING DEVICE, EACH		NON-COVERED	
A4258	SPRING-POWERED DEVICE FOR LANCET, EACH		1 PER 2 ROLLING YEARS	REQUIRES ICD-9-CM DIAGNOSIS CODES: 250.00 THRU 250.93 OR 648.8X
A4259 KX	LANCETS, PER BOX OF 100		2 BOX PER ROLLING MONTH	REQUIRES ICD-9-CM DIAGNOSIS CODES: 250.00 THRU 250.93 OR 648.8X INSULIN DEPENDENT NON-REIMBURSABLE WITH A4259KS
A4259 KS	LANCETS, PER BOX OF 100		1 BOX PER ROLLING MONTH	REQUIRES ICD-9-CM DIAGNOSIS CODES: 250.00 THRU 250.93 OR 648.8X NON-INSULIN DEPENDENT NON-REIMBURSABLE WITH A4259KX
A4265	PARAFFIN, PER POUND		NON-COVERED	
A4280	ADHESIVE SKIN SUPPORT ATTACHMENT FOR USE WITH EXTERNAL BREAST PROSTHESIS, EACH		NON-COVERED	
A4281	TUBING FOR BREAST PUMP, REPLACEMENT		NON-COVERED	
A4282	ADAPTER FOR BREAST PUMP, REPLACEMENT		NON-COVERED	
A4283	CAP FOR BREAST PUMP BOTTLE, REPLACEMENT		NON-COVERED	
A4284	BREAST SHIELD AND SPLASH PROTECTOR FOR USE WITH BREAST PUMP, REPLACEMENT		NON-COVERED	
A4285	POLYCARBONATE BOTTLE FOR USE WITH BREAST PUMP, REPLACEMENT		NON-COVERED

HCPCS CODES FOR DURABLE MEDICAL EQUIPMENT AND SUPPLIES
***PRIOR AUTHORIZATION MUST BE OBTAINED IF SERVICE LIMITS ARE EXCEEDED**

HCPCS CODES	DESCRIPTION	REPLACES	SERVICE LIMIT	SPECIAL INSTRUCTIONS
A4286	LOCKING RING FOR BREAST PUMP, REPLACEMENT		NON-COVERED	
A4310	INSERTION TRAY WITHOUT DRAINAGE BAG AND WITHOUT CATHETER (ACCESSORIES ONLY)		2 PER ROLLING MONTH	NON-REIMBURSABLE WITH A4332
A4311	INSERTION TRAY WITHOUT DRAINAGE BAG WITH INDWELLING CATHETER, FOLEY TYPE, TWO-WAY LATEX WITH COATING (TEFLON, SILICONE, SILICONE ELASTOMER OR HYDROPHILIC, ETC.)		2 PER ROLLING MONTH	NON-REIMBURSABLE WITH A4310, A4332, A4338
A4312	INSERTION TRAY WITHOUT DRAINAGE BAG WITH INDWELLING CATHETER, FOLEY TYPE, TWO-WAY, ALL SILICONE		2 PER ROLLING MONTH	NON-REIMBURSABLE WITH A4310, A4332, A4344
A4313	INSERTION TRAY WITHOUT DRAINAGE BAG WITH INDWELLING CATHETER, FOLEY TYPE,THREE-WAY, FOR CONTINUOUS IRRIGATION LATEX WITH COATING (TEFLON, SILICONE, SILICONE ELASTOMER OR HYDROPHILIC, ETC.)		1 PER DAY X 14 DAYS	NON-REIMBURSABLE WITH A4310, A4332, A4346
A4314	INSERTION TRAY WITH DRAINAGE BAG WITH INDWELLING CATHETER, FOLEY TYPE, TWO-WAY		2 PER ROLLING MONTH	NON-REIMBURSABLE WITH A4310, A4311, A4331, A4332, A4338, A4354, A4357
A4315	INSERTION TRAY WITH DRAINAGE BAG WITH INDWELLING CATHETER, FOLEY TYPE, TWO-WAY,ALL SILICONE		2 PER ROLLING MONTH	NON-REIMBURSABLE WITH A4310, A4312, A4331, A4332, A4344, A4354, A4357
A4316	INSERTION TRAY WITH DRAINAGE BAG WITH INDWELLING CATHETER, FOLEY TYPE, THREE-WAY, FOR CONTINUOUS IRRIGATION		1 PER DAY X 14 DAYS	NON-REIMBURSABLE WITH A4310, A4313, A4331, A4332, A4346, A4354, A4357
A4320	IRRIGATION TRAY WITH BULB OR PISTON SYRINGE, ANY PURPOSE		2 PER ROLLING MONTH	NON-REIMBURSABLE WITH A4322
A4321	THERAPEUTIC AGENT FOR URINARY CATHETER IRRIGATION		NON-COVERED	
A4322	IRRIGATION SYRINGE, BULB OR PISTON, EACH		2 PER ROLLING MONTH	NON-REIMBURSABLE WITH A4320
A4326	MALE EXTERNAL CATHETER WITH INTEGRAL COLLECTION CHAMBER, ANY TYPE, EACH		2 PER ROLLING MONTH	FOR MALE USE ONLY
A4327	FEMALE EXTERNAL URINARY COLLECTION DEVICE; MEATAL CUP, EACH		1 PER WEEK	FOR FEMALE USE ONLY
A4328	FEMALE EXTERNAL URINARY COLLECTION DEVICE; POUCH, EACH		1 PER DAY	FOR FEMALE USE ONLY
A4330	PERIANAL FECAL COLLECTION POUCH WITH ADHESIVE, EACH		31 PER ROLLING MONTH

***PRIOR AUTHORIZATION MUST BE OBTAINED IF SERVICE LIMITS ARE EXCEEDED**

HCPCS CODES	DESCRIPTION	REPLACES	SERVICE LIMIT	SPECIAL INSTRUCTIONS
A4331	EXTENSION DRAINAGE TUBING, ANY TYPE, ANY LENGTH, WITH CONNECTOR/ADAPTOR, FOR USE WITH URINARY LEG BAG OR UROSTOMY POUCH, EACH		5 PER ROLLING MONTH	NON-REIMBURSABLE WITH A4314, A4315, A4316, A4354, A4357, A4358, A5105; CAN ONLY BE BILLED WITH A5112
A4332	LUBRICANT, INDIVIDUAL STERILE PACKET, EACH		31 PER ROLLING MONTH	NON-REIMBURSABLE FOR CLEAN, NONSTERILE INTERMITTENT CATHETERIZATION
A4333	URINARY CATHETER ANCHORING DEVICE, ADHESIVE SKIN ATTACHMENT, EACH		12 PER ROLLING MONTH	
A4334	URINARY CATHETER ANCHORING DEVICE, LEG STRAP, EACH		1 PER ROLLING MONTH	
A4335	INCONTINENCE SUPPLY; MISCELLANEOUS			PRIOR AUTHORIZATION COST INVOICE REQUIRED
A4338	INDWELLING CATHETER; FOLEY TYPE, TWO-WAY LATEX WITH COATING (TEFLON, SILICONE, ELASTOMER, OR HYDROPHILIC, ETC.), EACH		2 PER ROLLING MONTH	
A4340	INDWELLING CATHETER; SPECIALTY TYPE, EG; COUDE, MUSHROOM, WING, ETC.), EACH		2 PER ROLLING MONTH	
A4344	INDWELLING CATHETER, FOLEY TYPE, TWO-WAY, ALL SILICONE, EACH		2 PER ROLLING MONTH	
A4346	INDWELLING CATHETER; FOLEY TYPE, THREE WAY FOR CONTINUOUS IRRIGATION, EACH		1 PER DAY X 14 DAYS	
A4348	MALE EXTERNAL CATHETER WITH INTEGRAL COLLECTION COMPARTMENT, EXTENDED WEAR, EACH (E.G., 2 PER ROLLING MONTH)		NON-COVERED	
A4349	MALE EXTERNAL CATHETER, WITH OR WITHOUT ADHESIVE, DISPOSABLE, EACH	A4324 A4325 A4347	31 PER ROLLING MONTH	FOR MALE USE ONLY NON-REIMBURSABLE WITH ADHESIVE STRIPS OR TAPE
A4351	INTERMITTENT URINARY CATHETER; STRAIGHT TIP, WITH OR WITHOUT COATING (TEFLON, SILICONE ELASTOMER, OR HYDROPHILIC, ETC.), EACH		31 PER ROLLING MONTH	NON-REIMBURSABLE WITH A4353
A4352	INTERMITTENT URINARY CATHETER; COUDE (CURVED) TIP, WITH OR WITHOUT COATING (TEFLON, SILICONE, SILICONE ELASTOMERIC, OR HYDROPHILIC, ETC.), EACH		8 PER ROLLING MONTH	NON-REIMBURSABLE WITH A4353
A4353	INTERMITTENT URINARY CATHETER, WITH INSERTION SUPPLIES		31 PER ROLLING MONTH	NON-REIMBURSABLE WITH A4310, A4332, A4351, A4352; COVERAGE LIMITED TO STERILE TECHNIQUE ONLY WHEN SPECIFICALLY PRESCRIBED IN WRITING BY PRESCRIBING PRACTITIONER SUPPLIES INCLUDE: TRAY/BAG IN STERILE PACKAGE INCLUDES SINGLE USE CATHETER, LUBICANT, GLOVES, ANTISEPTIC SOLUTION, APPLICATOR AND DRAPE
A4354	INSERTION TRAY WITH DRAINAGE BAG BUT WITHOUT CATHETER		2 PER ROLLING MONTH	NON-REIMBURSABLE WITH A4310, A4331, A4332, A4357

***PRIOR AUTHORIZATION MUST BE OBTAINED IF SERVICE LIMITS ARE EXCEEDED**

HCPCS CODES	DESCRIPTION	REPLACES	SERVICE LIMIT	SPECIAL INSTRUCTIONS
A4355	IRRIGATION TUBING SET FOR CONTINUOUS BLADDER IRRIGATION THROUGH A THREE-WAY INDWELLING FOLEY CATHETER, EACH		1 PER DAY X 14 DAYS	REIMBURSED FOR CONTINUOUS BLADDER IRRIGATION OR HISTORY OF CATHETER OBSTRUCTION
A4356	EXTERNAL URETHRAL CLAMP OR COMPRESSION DEVICE (NOT TO BE USED FOR CATHETER CLAMP), EACH		1 PER 3 ROLLING MONTHS	
A4357	BEDSIDE DRAINAGE BAG, DAY OR NIGHT, WITH OR WITHOUT ANTI-REFLUX DEVICE, WITH OR WITHOUT TUBE, EACH		2 PER ROLLING MONTH	NON-REIMBURSABLE WITH A4331, A5102
A4358	URINARY DRAINAGE BAG, LEG OR ABDOMEN, VINYL, WITH OR WITHOUT TUBE, WITH STRAPS, EACH		2 PER ROLLING MONTH	FOR MEMBERS WHO ARE AMBULATORY OR ARE CHAIR OR WHEELCHAIR BOUND ONLY NON-REIMBURSABLE WITH A5112, A4331, A5113, A5114
A4359	URINARY SUSPENSORY WITHOUT LEG BAG, EACH		1 PER ROLLING MONTH	CLOSED BY CMS 12/31/2006
A4361	OSTOMY FACEPLATE, EACH		3 PER 6 ROLLING MONTHS	REQUIRES ICD-9-CM DIAGNOSIS CODES OF V44.2 V55.2 , V44.3, V55.3, V44.6 OR V55.6 NON-REIMBURSABLE WITH: A4375, A4376, A4377, A4378, A4379, A4380, A4381, A4382, A4383
A4362	SKIN BARRIER; SOLID, 4 X 4 OR EQUIVALENT; EACH		20 PER ROLLING MONTH	REQUIRES ICD-9-CM DIAGNOSIS CODES OF V44.2, V44.3, V44.6, V55.2, V55.3, OR V55.6
A4363	OSTOMY CLAMP, ANY TYPE, REPLACEMENT ONLY, EACH		NON-COVERED	NEW CODE 01/01/2006
A4364	ADHESIVE, LIQUID OR EQUAL, ANY TYPE, PER OZ		4 OZ. PER ROLLING MONTH	REQUIRES ICD-9-CM DIAGNOSIS CODES OF V44.2, V44.3, V44.6, V55.2, V55.3, OR V55.6
A4365	ADHESIVE REMOVER WIPES, ANY TYPE, PER 50		1 BOX PER ROLLING MONTH	REQUIRES ICD-9-CM DIAGNOSIS CODES OF V44.2, V44.3, V44.6, V55.2, V55.3, OR V55.6
A4366	OSTOMY VENT, ANY TYPE, EACH		15 PER ROLLING MONTH	REQUIRES ICD-9-CM DIAGNOSIS CODES OF V44.2, V44.3, V44.6, V55.2, V55.3, OR V55.6 NON-REIMBURSABLE WITH: A4416, A4417, A4418, A4419, A4423, A4424, A4425, and A4427;
A4367	OSTOMY BELT, EACH		2 PER 6 ROLLING MONTHS	REQUIRES ICD-9-CM DIAGNOSIS CODES OF V44.2, V44.3, V44.6, V55.2, V55.3, OR V55.6
A4368	OSTOMY FILTER, ANY TYPE, EACH		1 PER DAY	REQUIRES ICD-9-CM DIAGNOSIS CODES OF V44.2, V44.3, V44.6, V55.2, V55.3, OR V55.6
A4369	OSTOMY SKIN BARRIER, LIQUID (SPRAY, BRUSH, ETC), PER OZ		2 OZ PER ROLLING MONTH	REQUIRES ICD-9-CM DIAGNOSIS CODES OF V44.2, V44.3, V44.6, V55.2, V55.3, OR V55.6 NON-REIMBURSABLE WITH A 5119
A4371	OSTOMY SKIN BARRIER, POWDER, PER OZ		10 OZ. PER 6 ROLLING MONTHS	REQUIRES ICD-9-CM DIAGNOSIS CODES OF V44.2, V44.3, V44.6, V55.2, V55.3, OR V55.6
A4372	OSTOMY SKIN BARRIER, SOLID 4 X 4 OR EQUIVALENT, STANDARD WEAR, WITH BUILT-IN CONVEXITY, EACH		15 PER ROLLING MONTH	REQUIRES ICD-9-CM DIAGNOSIS CODES OF V44.2, V44.3, V44.6, V55.2, V55.3, OR V55.6
A4373	OSTOMY SKIN BARRIER, WITH FLANGE (SOLID, FLEXIBLE OR ACCORDIAN), WITH BUILT-IN CONVEXITY, ANY SIZE, EACH		15 PER ROLLING MONTH	REQUIRES ICD-9-CM DIAGNOSIS CODES OF V44.2, V44.3, V44.6, V55.2, V55.3, OR V55.6

***PRIOR AUTHORIZATION MUST BE OBTAINED IF SERVICE LIMITS ARE EXCEEDED**

HCPCS CODES	DESCRIPTION	REPLACES	SERVICE LIMIT	SPECIAL INSTRUCTIONS
E0445	OXIMETER DEVICE FOR MEASURING BLOOD OXYGEN LEVELS NON-INVASIVELY		1 UNIT PER LIFETIME	PRIOR AUTHORIZATION ITEM IS 10 MONTH CAP RENTAL NON-REIMBURSABLE WITH A4606 DURING THE CAP RENTAL PERIOD (10 MONTHS) MUST HAVE WEST VIRGINIA CERTIFIED RESPIRATORY THERAPIST OR PROFESSIONAL REGISTERED NURSE OR PHYSICIAN ON STAFF
E0450	VOLUME CONTROL VENTILATOR, WITHOUT PRESSURE SUPPORT MODE, MAY INCLUDE PRESSURE CONTROL MODE, USED WITH INVASIVE INTERFACE (E.G., TRACHEOSTOMY TUBE)		1 UNIT PER ROLLING MONTH	PRIOR AUTHORIZATION ITEM IS MONTHLY RENTAL MUST HAVE WEST VIRGINIA CERTIFIED RESPIRATORY THERAPIST OR PROFESSIONAL REGISTERED NURSE OR PHYSICIAN ON STAFF
E0455	OXYGEN TENT, EXCLUDING CROUP OR PEDIATRIC TENTS		NON-COVERED	
E0457	CHEST SHELL (CUIRASS)		NON-COVERED	
E0459	CHEST WRAP		NON-COVERED	
E0460RR	NEGATIVE PRESSURE VENTILATOR; PORTABLE OR STATIONARY		1 UNIT PER ROLLING MONTH	PRIOR AUTHORIZATION ITEM IS MONTHLY RENTAL MUST HAVE WEST VIRGINIA CERTIFIED RESPIRATORY THERAPIST OR PROFESSIONAL REGISTERED NURSE OR PHYSICIAN ON STAFF
E0461	VOLUME CONTROL VENTILATOR, WITHOUT PRESSURE SUPPORT MODE, MAY INCLUDE PRESSURE CONTROL MODE, USED WITH NON-INVASIVE INTERFACE (E.G. MASK)		NON-COVERED	
E0462	ROCKING BED WITH OR WITHOUT SIDE RAILS		NON-COVERED	
E0463RR	PRESSURE SUPPORT VENTILATOR WITH VOLUME CONTROL MODE, MAY INCLUDE PRESSURE CONTROL MODE, USED WITH INVASIVE INTERFACE (E.G. TRACHEOSTOMY TUBE)	E0454	1 UNIT PER ROLLING MONTH	PRIOR AUTHORIZATION ITEM IS MONTHLY RENTAL MUST HAVE WEST VIRGINIA CERTIFIED RESPIRATORY THERAPIST OR PROFESSIONAL REGISTERED NURSE OR PHYSICIAN ON STAFF
E0464RR	PRESSURE SUPPORT VENTILATOR WITH VOLUME CONTROL MODE, MAY INCLUDE PRESSURE CONTROL MODE, USED WITH NON-INVASIVE INTERFACE (E.G. MASK)	E0454	1 UNIT PER ROLLING MONTH	PRIOR AUTHORIZATION ITEM IS MONTHLY RENTAL MUST HAVE WEST VIRGINIA CERTIFIED RESPIRATORY THERAPIST OR PROFESSIONAL REGISTERED NURSE OR PHYSICIAN ON STAFF
E0470RR	RESPIRATORY ASSIST DEVICE, BI-LEVEL PRESSURE CAPABILITY, WITHOUT BACKUP RATE FEATURE, USED WITH NONINVASIVE INTERFACE, E.G., NASAL OR FACIAL MASK (INTERMITTENT ASSIST DEVICE WITH CONTINUOUS POSITIVE AIRWAY PRESSURE DEVICE)	K0532	10 UNITS PER LIFETIME	PRIOR AUTHORIZATION MUST HAVE WEST VIRGINIA CERTIFIED RESPIRATORY THERAPIST OR PROFESSIONAL REGISTERED NURSE OR PHYSICIAN ON STAFF MEDICAL NECESSITY REVIEW WILL BE BASED ON INTERQUAL DME GENERAL CRITERIA

***PRIOR AUTHORIZATION MUST BE OBTAINED IF SERVICE LIMITS ARE EXCEEDED**

HCPCS CODES	DESCRIPTION	REPLACES	SERVICE LIMIT	SPECIAL INSTRUCTIONS
E0471RR	RESPIRATORY ASSIST DEVICE, BI-LEVEL PRESSURE CAPABILITY, WITH BACK-UP RATE FEATURE, USED WITH NONINVASIVE INTERFACE, E.G., NASAL OR FACIAL MASK (INTERMITTENT ASSIST DEVICE WITH CONTINUOUS POSITIVE AIRWAY PRESSURE DEVICE)	K0533	1 UNIT PER ROLLING MONTH	PRIOR AUTHORIZATION MUST HAVE WEST VIRGINIA CERTIFIED RESPIRATORY THERAPIST OR PROFESSIONAL REGISTERED NURSE OR PHYSICIAN ON STAFF MEDICAL NECESSITY REVIEW WILL BE BASED ON INTERQUAL DME GENERAL CRITERIA
E0472RR	RESPIRATORY ASSIST DEVICE, BI-LEVEL PRESSURE CAPABILITY, WITH BACKUP RATE FEATURE, USED WITH INVASIVE INTERFACE, E.G., TRACHEOSTOMY TUBE (INTERMITTENT ASSIST DEVICE WITH CONTINUOUS POSITIVE AIRWAY PRESSURE DEVICE)	K0534	1 UNIT PER ROLLING MONTH	PRIOR AUTHORIZATION MUST HAVE WEST VIRGINIA CERTIFIED RESPIRATORY THERAPIST OR PROFESSIONAL REGISTERED NURSE OR PHYSICIAN ON STAFF MEDICAL NECESSITY REVIEW WILL BE BASED ON INTERQUAL DME GENERAL CRITERIA
E0480	PERCUSSOR, ELECTRIC OR PNEUMATIC, HOME MODEL		1 UNIT PER 5 ROLLING YEARS	PRIOR AUTHORIZATION 10 MONTH CAP RENTAL ITEM MEDICAL NECESSITY REVIEW WILL BE BASED ON INTERQUAL DME GENERAL CRITERIA
E0481	INTRAPULMONARY PERCUSSIVE VENTILATION SYSTEM AND RELATED ACCESSORIES		NON-COVERED	
E0482	COUGH STIMULATING DEVICE, ALTERNATING POSITIVE AND NEGATIVE AIRWAY PRESSURE		1 PER LIFETIME	PRIOR AUTHORIZATION 10 MONTH CAP RENTAL ITEM MEDICAL NECESSITY REVIEW WILL BE BASED ON INTERQUAL DME GENERAL CRITERIA EFFECTIVE 12/01/2007
E0483	HIGH FREQUENCY CHEST WALL OSCILLATION AIR-PULSE GENERATOR SYSTEM, (INCLUDES HOSES AND VEST), EACH		1 PER LIFETIME	PRIOR AUTHORIZATION 10 MONTH CAP RENTAL ITEM MEDICAL NECESSITY REVIEW WILL BE BASED ON INTERQUAL DME GENERAL CRITERIA
E0484	OSCILLATORY POSITIVE EXPIRATORY PRESSURE DEVICE, NON-ELECTRIC, ANY TYPE, EACH		1 PER ROLLING YEAR	PRIOR AUTHORIZATION MEDICAL NECESSITY REVIEW WILL BE BASED ON INTERQUAL DME GENERAL CRITERIA
E0485	ORAL DEVICE/APPLIANCE USED TO REDUCE UPPER AIRWAY COLLAPSIBILITY, ADJUSTABLE OR NON-ADJUSTABLE, PREFABRICATED, INCLUDES FITTING AND ADJUSTMENT		NON-COVERED	
E0486	ORAL DEVICE/APPLIANCE USED TO REDUCE UPPER AIRWAY COLLAPSIBILITY, ADJUSTABLE OR ON-ADJUSTABLE, CUSTOM FABRICATED, INCLUDES FITTING AND ADJUSTMENT		NON-COVERED	
E0500	IPPB MACHINE, ALL TYPES, WITH BUILT-IN NEBULIZATION; MANUAL OR AUTOMATIC VALVES; INTERNAL OR EXTERNAL POWER SOURCE		NON-COVERED	
E0550	HUMIDIFIER, DURABLE FOR EXTENSIVE SUPPLEMENTAL HUMIDIFICATION DURING IPPB TREATMENTS OR OXYGEN DELIVERY		NON-COVERED	
E0555	HUMIDIFIER, DURABLE, GLASS OR AUTOCLAVABLE PLASTIC BOTTLE TYPE, FOR USE WITH REGULATOR OR FLOWMETER		NON-COVERED	

HCPCS CODES	DESCRIPTION	REPLACES	SERVICE LIMIT	SPECIAL INSTRUCTIONS
E0560	HUMIDIFIER, DURABLE FOR SUPPLEMENTAL HUMIDIFICATION DURING IPPB TREATMENT OR OXYGEN DELIVERY		NON-COVERED	
E0561	HUMIDIFIER, NON-HEATED, USED WITH POSITIVE AIRWAY PRESSURE DEVICE	K0268		PRIOR AUTHORIZATION PURCHASED ITEM NON-REIMBURSABLE WITH: A7046, E0471 OR E0472 MUST HAVE WEST VIRGINIA CERTIFIED RESPIRATORY THERAPIST OR REGISTERED PROFESSIONAL NURSE OR PHYSICIAN ON STAFF
E0562	HUMIDIFIER, HEATED, USED WITH POSITIVE AIRWAY PRESSURE DEVICE	K0531		PRIOR AUTHORIZATION PURCHASED ITEM NON-REIMBURSABLE WITH: A7046, E0471 OR E0472 MUST HAVE WEST VIRGINIA CERTIFIED RESPIRATORY THERAPIST OR REGISTERED PROFESSIONAL NURSE OR PHYSICIAN ON STAFF
E0565	COMPRESSOR, AIR POWER SOURCE FOR EQUIPMENT WHICH IS NOT SELF- CONTAINED OR CYLINDER DRIVEN		1 UNIT PER 3 ROLLING YEARS	PRIOR AUTHORIZATION ITEM 10 MONTH CAP RENTAL MUST HAVE WEST VIRGINIA CERTIFIED RESPIRATORY THERAPIST OR REGISTERED PROFESSIONAL NURSE OR PHYSICIAN ON STAFF MEDICAL NECESSITY REVIEW WILL BE BASED ON INTERQUAL DME GENERAL CRITERIA
E0570	NEBULIZER, WITH COMPRESSOR		1 PER 3 ROLLING YEARS	PRIOR AUTHORIZATION PURCHASE ITEM MEDICAL NECESSITY REVIEW WILL BE BASED ON INTERQUAL DME GENERAL CRITERIA
E0571	AEROSOL COMPRESSOR, BATTERY POWERED, FOR USE WITH SMALL VOLUME NEBULIZER		NON-COVERED	
E0572	AEROSOL COMPRESSOR, ADJUSTABLE PRESSURE, LIGHT DUTY FOR INTERMITTENT USE		NON-COVERED	
E0574	ULTRASONIC/ELECTRONIC AEROSOL GENERATOR WITH SMALL VOLUME NEBULIZER		NON-COVERED	
E0575	NEBULIZER, ULTRASONIC, LARGE VOLUME		NON-COVERED	
E0580	NEBULIZER, DURABLE, GLASS OR AUTOCLAVABLE PLASTIC, BOTTLE TYPE, FOR USE WITH REGULATOR OR FLOWMETER		NON-COVERED	
E0585	NEBULIZER, WITH COMPRESSOR AND HEATER		NON-COVERED	
E0590	DISPENSING FEE COVERED DRUG ADMINISTERED THROUGH DME NEBULIZER		NON-COVERED	
E0600	RESPIRATORY SUCTION PUMP, HOME MODEL, PORTABLE OR STATIONARY, ELECTRIC		1 PER 4 ROLLING YEARS	PURCHASED ITEM NON-REIMBURSABLE WITH A7002

***PRIOR AUTHORIZATION MUST BE OBTAINED IF SERVICE LIMITS ARE EXCEEDED**

HCPCS CODES	DESCRIPTION	REPLACES	SERVICE LIMIT	SPECIAL INSTRUCTIONS
E0601	CONTINUOUS AIRWAY PRESSURE (CPAP) DEVICE		10 UNITS PER LIFETIME	PRIOR AUTHORIZATION ITEM IS 10 MONTH CAP RENTAL MUST HAVE WEST VIRGINIA CERTIFIED RESPIRATORY THERAPIST OR PROFESSIONAL REGISTERED NURSE OR PHYSICIAN ON STAFF MEDICAL NECESSITY REVIEW WILL BE BASED ON INTERQUAL DME GENERAL CRITERIA
E0602	BREAST PUMP, MANUAL, ANY TYPE		1 UNIT PER 5 ROLLING YEARS	PURCHASED ITEM
E0603	BREAST PUMP, ELECTRIC (AC AND/OR DC), ANY TYPE		1 UNIT PER ROLLING YEAR	PURCHASE ITEM INCLUDES ALL REQUIRED ACCESSORIES
E0604	BREAST PUMP, HOSPITAL GRADE, ELECTRIC (AC AND / OR DC)		NON-COVERED	
E0605	VAPORIZER, ROOM TYPE		1 PER 2 ROLLING YEARS	PURCHASED ITEM
E0606	POSTURAL DRAINAGE BOARD		1 PER LIFETIME	PURCHASE ITEM
E0607	HOME BLOOD GLUCOSE MONITOR		1 PER 3 ROLLING YEARS	REQUIRES DIAGNOSIS OF 250.00 THRU 250.93 OR 648.8X
E0610	PACEMAKER MONITOR, SELF-CONTAINED, (CHECKS BATTERY DEPLETION, INCLUDES AUDIBLE AND VISIBLE CHECK SYSTEMS)		NON-COVERED	
E0615	PACEMAKER MONITOR, SELF CONTAINED, CHECKS BATTERY DEPLETION AND OTHER PACEMAKER COMPONENTS, INCLUDES DIGITAL/VISIBLE CHECK SYSTEMS		NON-COVERED	
E0616	IMPLANTABLE CARDIAC EVENT RECORDER WITH MEMORY, ACTIVATOR AND PROGRAMMER		NON-COVERED	
E0617	EXTERNAL DEFIBRILLATOR WITH INTEGRATED ELECTROCARDIOGRAM ANALYSIS		NON-COVERED	
E0618	APNEA MONITOR, WITHOUT RECORDING FEATURE	E0608	NON-COVERED	
E0619	APNEA MONITOR, WITH RECORDING FEATURE	E0608	1 PER LIFETIME	PRIOR AUTHORIZATION (REQUEST FOR PA MUST BE SUBMITTED TO WVMI 7 CALENDAR DAYS POST HOSPITAL DISCHARGE) ITEM IS 10 MONTH CAP RENTAL AVAILABLE FOR MEMBERS 1 YEAR OF AGE OR YOUNGER. INCLUDES PNEUMOGRAM
E0620	SKIN PIERCING DEVICE FOR COLLECTION OF CAPILLARY BLOOD, LASER, EACH		NON-COVERED	

HCPCS CODES	DESCRIPTION	REPLACES	SERVICE LIMIT	SPECIAL INSTRUCTIONS
E0621	SLING OR SEAT, PATIENT LIFT, CANVAS OR NYLON		1 PER 2 ROLLING YEARS	NON-REIMBURSABLE WITH: E0630
E0625	PATIENT LIFT, BATHROOM OR TOILET, NOT OTHERWISE CLASSIFIED		NON-COVERED	
E0627	SEAT LIFT MECHANISM INCORPORATED INTO A COMBINATION LIFT-CHAIR MECHANISM		NON-COVERED	
E0628	SEPARATE SEAT LIFT MECHANISM FOR USE WITH PATIENT OWNED FURNITURE-ELECTRIC		NON-COVERED	
E0629	SEPARATE SEAT LIFT MECHANISM FOR USE WITH PATIENT OWNED FURNITURE-NON-ELECTRIC		NON-COVERED	
E0630	PATIENT LIFT, HYDRAULIC **OR MECHANICAL, INCLUDES ANY SEAT, SLING, STRAPS(S), OR PADS**		1 UNIT PER LIFETIME	PRIOR AUTHORIZATION ITEM IS 10 MONTH CAP RENTAL NON-REIMBURSABLE WITH: E0621 WEST VIRGINIA MEDICAID FOLLOWS PALMETTO, REGION C, MEDICAL CRITERIA FOR COVERAGE.
E0635	PATIENT LIFT, ELECTRIC WITH SEAT OR SLING		NON-COVERED	
E0636	MULTIPOSITIONAL PATIENT SUPPORT SYSTEM, WITH INTEGRATED LIFT, PATIENTACCESSIBLE CONTROLS		NON-COVERED	
E0637	COMBINATION SIT TO STAND SYSTEM, ANY SIZE INCLUDING PEDIATRIC, WITH SEATLIFT FEATURE, WITH OR WITHOUT WHEELS		NON-COVERED	
E0638	STANDING FRAME SYSTEM, ONE POSITION (E.G. UPRIGHT, SUPINE OR PRONE STANDER), ANY SIZE INCLUDING PEDIATRIC, WITH OR WITHOUT WHEELS		NON-COVERED	
E0639	PATIENT LIFT, MOVEABLE FROM ROOM TO ROOM WITH DISASSEMBLY AND REASSEMBLY, INCLUDES ALL COMPONENTS/ACCESSORIES		NON-COVERED	
E0640	PATIENT LIFT, FIXED SYSTEM, INCLUDES ALL COMPONENTS/ACCESSORIES		NON-COVERED	
E0641	STANDING FRAME SYSTEM, MULTI-POSITION (E.G. THREE-WAY STANDER), ANY SIZE INCLUDING PEDIATRIC, WITH OR WITHOUT WHEELS		NON-COVERED	
E0642	STANDING FRAME SYSTEM, MOBILE (DYNAMIC STANDER), ANY SIZE INCLUDING PEDIATRIC		NON-COVERED	
E0650	PNEUMATIC COMPRESSOR, NON-SEGMENTAL HOME MODEL		1 PER LIFETIME	PRIOR AUTHORIZATION 10 MONTH CAP RENTAL ITEM MEDICAL NECESSITY REVIEW WILL BE BASED ON INTERQUAL DME GENERAL CRITERIA
E0651	PNEUMATIC COMPRESSOR, SEGMENTAL HOME MODEL WITHOUT CALIBRATED GRADIENT PRESSURE		1 PER LIFETIME	PRIOR AUTHORIZATION 10 MONTH CAP RENTAL ITEM MEDICAL NECESSITY REVIEW WILL BE BASED ON INTERQUAL DME GENERAL CRITERIA

HCPCS CODES	DESCRIPTION	REPLACES	SERVICE LIMIT	SPECIAL INSTRUCTIONS
E0652	PNEUMATIC COMPRESSOR, SEGMENTAL HOME MODEL WITH CALIBRATED GRADIENT PRESSURE		1 PER LIFETIME	PRIOR AUTHORIZATION 10 MONTH CAP RENTAL ITEM MEDICAL NECESSITY REVIEW WILL BE BASED ON INTERQUAL DME GENERAL CRITERIA
E0655	NON-SEGMENTAL PNEUMATIC APPLIANCE FOR USE WITH PNEUMATIC COMPRESSOR, HALF ARM			PRIOR AUTHORIZATION PURCHASE ITEM
E0660	NON-SEGMENTAL PNEUMATIC APPLIANCE FOR USE WITH PNEUMATIC COMPRESSOR, FULL LEG			PRIOR AUTHORIZATION PURCHASE ITEM
E0665	NON-SEGMENTAL PNEUMATIC APPLIANCE FOR USE WITH PNEUMATIC COMPRESSOR, FULL ARM			PRIOR AUTHORIZATION PURCHASE ITEM
E0666	NON-SEGMENTAL PNEUMATIC APPLIANCE FOR USE WITH PNEUMATIC COMPRESSOR, HALF LEG			PRIOR AUTHORIZATION PURCHASE ITEM
E0667	SEGMENTAL PNEUMATIC APPLIANCE FOR USE WITH PNEUMATIC COMPRESSOR, FULL LEG			PRIOR AUTHORIZATION PURCHASE ITEM
E0668	SEGMENTAL PNEUMATIC APPLIANCE FOR USE WITH PNEUMATIC COMPRESSOR, FULL ARM			PRIOR AUTHORIZATION PURCHASE ITEM
E0669	SEGMENTAL PNEUMATIC APPLIANCE FOR USE WITH PNEUMATIC COMPRESSOR, HALF LEG			PRIOR AUTHORIZATION PURCHASE ITEM

HCPCS CODES	DESCRIPTION	REPLACES	SERVICE LIMIT	SPECIAL INSTRUCTIONS
E0671	SEGMENTAL GRADIENT PRESSURE PNEUMATIC APPLIANCE, FULL LEG			PRIOR AUTHORIZATION PURCHASE ITEM
E0672	SEGMENTAL GRADIENT PRESSURE PNEUMATIC APPLIANCE, FULL ARM			PRIOR AUTHORIZATION PURCHASE
E0673	SEGMENTAL GRADIENT PRESSURE PNEUMATIC APPLIANCE, HALF LEG			PRIOR AUTHORIZATION PURCHASE ITEM
E0675	PNEUMATIC COMPRESSION DEVICE, HIGH PRESSURE, RAPID INFLATION/DEFLATION CYCLE, OR ARTERIAL INSUFFICIENCY (UNILATERAL OR BILATERAL SYSTEM)		NON-COVERED	
E0676	INTERMITTENT LIMB COMPRESSION DEVICE (INCLUDES ALL ACCESSORIES), NOT OTHERWISE		NON-COVERED	
E0691	ULTRAVIOLET LIGHT THERAPY SYSTEM PANEL, INCLUDES BULBS/LAMPS, TIMER AND EYE PROTECTION; TREATMENT AREA 2 SQUARE FEET OR LESS		NON-COVERED	
E0692	ULTRAVIOLET LIGHT THERAPY SYSTEM PANEL, INCLUDES BULBS/LAMPS, TIMER AND EYE PROTECTION, 4 FOOT PANEL		NON-COVERED	
E0693	ULTRAVIOLET LIGHT THERAPY SYSTEM PANEL, INCLUDES BULBS/LAMPS, TIMER AND EYE PROTECTION, 6 FOOT PANEL		NON-COVERED	
E0694	ULTRAVIOLET MULTIDIRECTIONAL LIGHT THERAPY SYSTEM IN 6 FOOT CABINET, INCLUDES BULBS/LAMPS, TIMER AND EYE PROTECTION		NON-COVERED	
E0700	SAFETY EQUIPMENT (E.G., BELT, HARNESS OR VEST)		NON-COVERED	
E0701	HELMET WITH FACE GUARD AND SOFT INTERFACE MATERIAL, PREFABRICATED		NON-COVERED	
E0705	TRANSFER DEVICE, ANY TYPE, EACH	E0972		PRIOR AUTHORIZATION PURCHASED ITEM
E0710	RESTRAINTS, ANY TYPE (BODY, CHEST, WRIST OR ANKLE)		NON-COVERED	

HCPCS CODES	DESCRIPTION	REPLACES	SERVICE LIMIT	SPECIAL INSTRUCTIONS
E0720	TRANSCUTANTEOUS ELECTRICAL NERVE STIMULATION (TENS) DEVICE, TWO LEAD, LOCALIZED STIMULATION		1 PER 4 ROLLING YEARS	PRIOR AUTHORIZATION PURCHASED ITEM NON-REIMBURSABLE WITH: A4556, A4557 OR E0730 MEDICAL NECESSITY REVIEW WILL BE BASED ON INTERQUAL DME GENERAL CRITERIA
E0730	TRANSCUTANEOUS ELECTRICAL NERVE STIMULATION (TENS) DEVICE, FOUR OR MORE LEADS, FOR MULTIPLE NERVE STIMULATION		1 PER 4 ROLLING YEARS	PRIOR AUTHORIZATION PURCHASED ITEM NON-REIMBURSABLE WITH: A4556, A4557 OR E0730 MEDICAL NECESSITY REVIEW WILL BE BASED ON INTERQUAL DME GENERAL CRITERIA
E0731	FORM FITTING CONDUCTIVE GARMENT FOR DELIVERY OF TENS OR NMES (WITH CONDUCTIVE IBERS SEPARATED FROM THE PATIENT'S SKIN BY LAYERS OF FABRIC)		NON-COVERED	
E0740	INCONTINENCE TREATMENT SYSTEM, PELVIC FLOOR STIMULATOR, MONITOR, SENSOR AND/OR TRAINER		NON-COVERED	
E0744	NEUROMUSCULAR STIMULATOR FOR SCOLIOSIS		NON-COVERED	
E0745	NEUROMUSCULAR STIMULATOR, ELECTRONIC SHOCK UNIT		NON-COVERED	
E0746	ELECTROMYOGRAPHY (EMG), BIOFEEDBACK DEVICE		NON-COVERED	
E0747	OSTEOGENESIS STIMULATOR, ELECTRICAL, NON-INVASIVE, OTHER THAN SPINAL APPLICATIONS			PRIOR AUTHORIZATION PURCHASED ITEM MEDICAL NECESSITY REVIEW WILL BE BASED ON INTERQUAL DME GENERAL CRITERIA
E0748	OSTEOGENESIS STIMULATOR, ELECTRICAL, NON-INVASIVE, SPINAL APPLICATIONS			PRIOR AUTHORIZATION PURCHASED ITEM MEDICAL NECESSITY REVIEW WILL BE BASED ON INTERQUAL DME GENERAL CRITERIA
E0749	OSTEOGENESIS STIMULATOR, ELECTRICAL, SURGICALLY IMPLANTED		NON-COVERED	
E0752	IMPLANTABLE NEUROSTIMULATOR ELECTRODE, EACH		NON-COVERED	
E0754	PATIENT PROGRAMMER (EXTERNAL) FOR USE WITH IMPLANTABLE PROGRAMMABLE NEUROSTIMULATOR PULSE GENERATOR		NON-COVERED	
E0755	ELECTRONIC SALIVARY REFLEX STIMULATOR (INTRA-ORAL/NON-INVASIVE)		NON-COVERED	
E0756	IMPLANTABLE NEUROSTIMULATOR PULSE GENERATOR		NON-COVERED	
E0757	IMPLANTABLE NEUROSTIMULATOR RADIOFREQUENCY RECEIVER		NON-COVERED	

HCPCS CODES	DESCRIPTION	REPLACES	SERVICE LIMIT	SPECIAL INSTRUCTIONS
E0758	RADIOFREQUENCY TRANSMITTER (EXTERNAL) FOR USE WITH IMPLANTABLE NEUROSTIMULATOR RADIOFREQUENCY RECEIVER		NON-COVERED	
E0759	RADIOFREQUENCY TRANSMITTER (EXTERNAL) FOR USE WITH IMPLANTABLE SACRAL ROOT NEUROSTIMULATOR RECEIVER FOR BOWEL AND BLADDER MANAGEMENT, REPLACEMENT		NON-COVERED	
E0760	OSTEOGENESIS STIMULATOR, LOW INTENSITY ULTRASOUND, NON-INVASIVE			PRIOR AUTHORIZATION PURCHASED ITEM MEDICAL NECESSITY REVIEW WILL BE BASED ON INTERQUAL DME GENERAL CRITERIA
E0761	NON-THERMAL PULSED HIGH FREQUENCY RADIOWAVES, HIGH PEAK POWER ELECTROMAGNETIC ENERGY TREATMENT DEVICE		NON-COVERED	
E0762	TRANSCUTANEOUS ELECTRICAL JOINT STIMULATION DEVICE SYSTEM, INCLUDES ALL ACCESSORIES		NON-COVERED	
E0764	FUNCTIONAL NEUROMUSCULAR STIMULATOR, TRANSCUTANEOUS STIMULATION OF MUSCLES OF AMBULATION WITH COMPUTER CONTROL, USED FOR WALKING BY SPINAL CORD INJURED, ENTIRE SYSTEM, AFTER COMPLETION OF TRAINING PROGRAM	K0600	NON-COVERED	
E0765	FDA APPROVED NERVE STIMULATOR, WITH REPLACEABLE BATTERIES, FOR TREATMENT OF NAUSEA AND VOMITING		NON-COVERED	
E0769	ELECTRICAL STIMULATION OR ELECTROMAGNETIC WOUND TREATMENT DEVICE, NOT OTHERWISE CLASSIFIED		NON-COVERED	
E0776	IV POLE		NON-COVERED	
E0779	AMBULATORY INFUSION PUMP, MECHANICAL, REUSABLE, FOR INFUSION 8 HOURS OR GREATER		NON-COVERED	
E0780	AMBULATORY INFUSION PUMP, MECHANICAL, REUSABLE, FOR INFUSION LESS THAN 8 HOURS		NON-COVERED	
E0781	AMBULATORY INFUSION PUMP, SINGLE OR MULTIPLE CHANNELS, ELECTRIC OR BATTERY OPERATED, WITH ADMINISTRATIVE EQUIPMENT, WORN BY PATIENT		1 UNIT PER LIFETIME	10 MONTH CAP RENTAL ITEM
E0782	INFUSION PUMP, IMPLANTABLE, NON-PROGRAMMABLE (INCLUDES ALL COMPONENTS, E.G., PUMP, CATHETER, CONNECTORS, ETC.)		NON-COVERED	
E0783	INFUSION PUMP SYSTEM, IMPLANTABLE, PROGRAMMABLE (INCLUDES ALL COMPONENTS, E.G., PUMP, CATHETER, CONNECTORS, ETC.)		NON-COVERED

***PRIOR AUTHORIZATION MUST BE OBTAINED IF SERVICE LIMITS ARE EXCEEDED**

HCPCS CODES	DESCRIPTION	REPLACES	SERVICE LIMIT	SPECIAL INSTRUCTIONS
E0784	EXTERNAL AMBULATORY INFUSION PUMP, INSULIN		1 PER 4 ROLLING YEARS	PRIOR AUTHORIZATION ITEM IS 10 MONTH CAP RENTAL. MEDICAL NECESSITY REVIEW WILL BE BASED ON INTERQUAL DME GENERAL CRITERIA
E0785	IMPLANTABLE INTRASPINAL (EPIDURAL/INTRATHECAL) CATHETER USED WITH IMPLANTABLE INFUSION PUMP, REPLACEMENT		NON-COVERED	
E0786	IMPLANTABLE PROGRAMMABLE INFUSION PUMP, REPLACEMENT (EXCLUDES IMPLANTABLE INTRASPINAL CATHETER)		NON-COVERED	
E0791	PARENTERAL INFUSION PUMP, STATIONARY, SINGLE OR MULTI-CHANNEL		NON-COVERED	
E0830	AMBULATORY TRACTION DEVICE, ALL TYPES, EACH		NON-COVERED	
E0840	TRACTION FRAME, ATTACHED TO HEADBOARD, CERVICAL TRACTION		NON-COVERED	
E0849	TRACTION EQUIPMENT, CERVICAL, FREE-STANDING STAND/FRAME, PNEUMATIC, APPLYING TRACTION FORCE TO OTHER THAN MANDIBLE	K0627	NON-COVERED	
E0850	TRACTION STAND, FREE STANDING, CERVICAL TRACTION		NON-COVERED	
E0855	CERVICAL TRACTION EQUIPMENT NOT REQUIRING ADDITIONAL STAND OR FRAME		NON-COVERED	
E0856	CERVICAL TRACTION DEVICE, CERVICAL COLLAR WITH INFLATABLE AIR BLADDER		NON-COVERED	NEW CODE 01/01/2008
E0860	TRACTION EQUIPMENT, OVERDOOR, CERVICAL		1 PER LIFETIME	ITEM PURCHASED WHEN THE FOLLOWING CRITERIA ARE MET: 1) THE PATIENT HAS A MUSCULOSKETAL OR NEUROLOGIC IMPAIRMENT REQUIRING TRACTION EQUIPMENT; AND 2) THE APPROPRIATE USE OF A HOME CERVICAL TRACTION DEVICE HAS BEEN DEMONSTRATED TO THE PATIENT AND THE PATIENT TOLERATED THE SELECTED DEVICE. ABOVE DOCUMENTATION MUST BE CONTAINED IN MEMBER'S FILE.
E0870	TRACTION FRAME, ATTACHED TO FOOTBOARD, EXTREMITY TRACTION, (E.G. BUCK'S)		NON-COVERED	
E0880	TRACTION STAND, FREE STANDING, EXTREMITY TRACTION, (E.G., BUCK'S)		NON-COVERED	
E0890	TRACTION FRAME, ATTACHED TO FOOTBOARD, PELVIC TRACTION		NON-COVERED	
E0900	TRACTION STAND, FREE STANDING, PELVIC TRACTION, (E.G., BUCK'S)		NON-COVERED	

HCPCS CODES	DESCRIPTION	REPLACES	SERVICE LIMIT	SPECIAL INSTRUCTIONS
E0910	TRAPEZE BARS, A/K/A PATIENT HELPER, ATTACHED TO BED, WITH GRAB BAR		1 PER LIFETIME	PRIOR AUTHORIZATION PURCHASED ITEM FOR USE WITH HOSPITAL BED ONLY MEDICAL NECESSITY REVIEW WILL BE BASED ON INTERQUAL DME GENERAL CRITERIA NON-REIMBURSABLE WITH: E0940
E0911	TRAPEZE BAR, HEAVY DUTY, FOR PATIENT WEIGHT CAPACITY GREATER THAN 250 POUNDS, ATTACHED TO BED, WITH GRAB BAR		1 PER LIFETIME	PRIOR AUTHORIZATION PURCHASED ITEM MEDICAL NECESSITY REVIEW WILL BE BASED ON INTERQUAL DME GENERAL CRITERIA NON-REIMBURSABLE WITH E0910, E0912 OR E0940
E0912	TRAPEZE BAR, HEAVY DUTY, FOR PATIENT WEIGHT CAPACITY GREATER THAN 250 POUNDS, FREE STANDING, COMPLETE WITH GRAB BAR		1 PER LIFETIME	PRIOR AUTHORIZATION PURCHASED ITEM MEDICAL NECESSITY REVIEW WILL BE BASED ON INTERQUAL DME GENERAL CRITERIA NON-REIMBURSABLE WITH E0910, E0911 OR E0940
E0920	FRACTURE FRAME, ATTACHED TO BED, INCLUDES WEIGHTS		NON-COVERED	DISCONTINUED BY BMS 04/01/2005
E0930	FRACTURE FRAME, FREE STANDING, INCLUDES WEIGHTS		NON-COVERED	DISCONTINUED BY BMS 04/01/2005
E0935	CONTINUOUS PASSIVE MOTION EXERCISE DEVICE FOR USE ON KNEE ONLY		1 PER DAY NOT TO EXCEED 30 DAYS	PRIOR AUTHORIZATION RENTAL ITEM MEDICAL NECESSITY REVIEW WILL BE BASED ON INTERQUAL DME GENERAL CRITERIA
E0936	CONTINUOUS PASSIVE MOTION EXERCISE DEVICE FOR USE OTHER THAN KNEE		NON-COVERED	
E0940	TRAPEZE BAR, FREE STANDING, COMPLETE WITH GRAB BAR		1 PER LIFETIME	PURCHASED ITEM NOT FOR USE WITH HOSPITAL BED NON-REIMBURSABLE WITH: E0250, E0255, E0260, E0277, E0300, E0303, E0304 OR E0910 WEST VIRGINIA MEDICAID FOLLOWS PALMETTO, REGION C, MEDICAL CRITERIA FOR COVERAGE.
E0941	GRAVITY ASSISTED TRACTION DEVICE, ANY TYPE		NON-COVERED	
E0942	CERVICAL HEAD HARNESS/HALTER		1 PER ROLLING YEAR	PURCHASED ITEM NON-REIMBURSABLE WITH: E0860
E0950	WHEELCHAIR ACCESSORY, TRAY, EACH	K0107		PRIOR AUTHORIZATION PURCHASED ITEM
E0951	HEEL LOOP/HOLDER, ANY TYPE, WITH OR WITHOUT ANKLE STRAP, EACH	K0035		PRIOR AUTHORIZATION PURCHASED ITEM

West Virginia Department of Health and Human Resources
Bureau for Medical Services

NON-COVERED DME/MEDICAL SUPPLIES FOR UNLISTED HCPCS CODES

DESCRIPTION/ITEM
Adaptive feeding tools
Armrest pouch
Backpack, medical necessity bag
Backpack clips
Bacterial Filter
Bath/Commode Transfer System
Bath Mat
Bathtub lift
Battery powered Nebulizer
Bed rail ---padded
Bed wetting monitors (enuresis alarm)
Bowel Management kit
Canopy for Stroller
Carrying case for enteral feeding pump
Ceiling track lift system
Combination standing seat (to stand patient in w/c)
Compression garments/pumps (Lymphedema) not otherwise categorized in E0650-E0673, e.g., Reid sleeves, Solaris etc.
Cotton tipped applicators
Customized power flip up foot plates
Craftmatic bed
Electric Crib Bed
Environmental Control Equipment & Supplies (Air Conditioners, Humidifiers, Dehumidifiers, Electrostatic Filters, Hepa filter, Air Purifier, etc.)
Equipment for nursing home, ICF/MR patients
Equipment for Hospice patients (should be covered by Hospice)
Exercise equipment (deluxe cycle, treadmill, etc.)
Extended warranties for any type of equipment
Fleet enemas
Floor sitters (feeding or positioning chair)
Gait belts
Gait trainers
Gloves-sterile
Glucowatch
Glycerin swabs
Hand held showers
Hip Protector
Hospital bed, institutional type, includes: Oscillating, circulating and stryker frames with mattress, e.g., Air fluidize, KenAir, Clinitron
Hospital gowns

DESCRIPTION/ITEM
Hot tubs
Hydraulic van and car lifts
Incline wedge/therapy wedge
Incontinent supplies for enuresis or toilet training or menses
Isolation masks
Male Vacuum Erection System
Medical Identification Bracelet
Medical necessities bag, backpack, etc.
Medical supplies for nursing home patients
Non-custom strollers
Orthopedic mattress
Padded bed rail
Pelvic support system
Personal Hygiene items (toothbrushes, mouthwash, deodorants, shampoo, etc)
Physical/occupational therapy equipment to be used @ home (e.g., physioball, table for therapy, etc)
Portable feeding pump
Portable room heaters
Positioning pillow/mattress with or without pump
Posture bench
Posture training system
Power adjustable seat kit
Power cord kit and rechargeable batteries for a suction machine
Pro-Time Microcoagulation Machine
Rain Cape for wheelchair
Reacher devices
Remote control (remote pilot/remote box) for power wheelchair
Reid Sleeve (See compression garments/pumps)
Repairs of equipment/accessories not purchased by Medicaid
Shampoo tray
Shower gurney
Sleepsafe Safety Bed
Soft Seat for Rehab Shower Chair
Spare Tires for wheelchairs
Stand and drive legrest assembly
Standers
Stairway elevators
Stools of any kind
Supine Board
Telephone alert systems
Therapeutic Light Box
Toileting System
Toothettes
Turny System
Uplift Seat Assist
Vehicle safety devices, e.g., EZ Vests, Transit systems, car seats and accessories, etc.

DESCRIPTION/ITEM
Vibrators
Water bed and/or mattress
Wheelchair bag (for back of wheelchair to carry items in)
Wheelchair gloves
Wheelchair headlight/light kit
Wheelchair ramp

CHAPTER 507–COVERED SERVICES, LIMITATIONS, AND EXCLUSIONS FOR FREESTANDING AMBULATORY SURGICAL CENTER AND BIRTHING CENTER SERVICES

CHANGE LOG

Replace	Title	Change Date	Effective Date
Section 507.3.1	Services Requiring Prior Authorization	01/06/06	02/15/06
Section 507.3.1	Services Requiring Prior Authorization	10/24/05	Postponed
Section 507.3.1	Services Requiring Prior Authorization	9/28/05	11/01/05

January 06, 2006

Section 507.3.1

Introduction: The Bureau for Medical Services will require prior authorization beginning February 15, 2006. WVMI will begin prior authorizing services on January 16, 2006 for scheduled procedures on or after February 15, 2006.

Old Policy: All surgeries performed in place of services 22 (Outpatient Hospital) and 24 (Ambulatory Surgical Center) will require prior authorization, effective November 1, 2005.

New Policy: Certain surgeries performed in place of services 22 (Outpatient Hospital) and 24 (Ambulatory Surgical Center) will require prior authorization, effective February 15, 2006. These surgeries are listed in Attachment I.

Change: First paragraph to read, certain surgeries performed in place of service 22 (Outpatient Hospital) and 24 (Ambulatory Surgical Center) will require prior authorization, effective February 15, 2006. The selected surgeries that require prior authorization through the BMS review contractor are listed in Attachment I, along with the PA form that may be utilized.

Directions: Change pages.

October 24, 2005

Section 507.3.1

The outpatient surgery prior authorization review through WVMI that was to become effective November 1, 2005 has been postponed until further notice. PA for imaging services is still required as of October 1, 2005.

September 28, 2005

Section 507.3.1

Introduction: Added section for more clarity.

Change: Added all surgeries performed in place of services 22 (Out patient hospital) and 24 (Ambulatory Surgical Center) will require prior authorization, effective November 1, 2005.

Prior authorization must be obtained from West Virginia Medical Institute (WVMI) prior to the provision of the services. Failure to obtain prior authorization will result in denial of the services; the Medicaid member can not be billed for failure to receive authorization for these services.

Prior authorization requirements governing the prevision of all West Virginia Medicaid services will apply pursuant to Chapter 300, General Provider Participation Requirements, and Chapter 400, Section 440 Explanation of the Medicaid Beneficiary ID card, provider manual.

Directions: Replace pages.

CHAPTER 507—COVERED SERVICES, LIMITATIONS AND EXCLUSIONS FOR FREESTANDING AMBULATORY SURGICAL CENTER AND BIRTHING CENTER SERVICES

TABLE OF CONTENTS

TOPIC **PAGE NO.**

CHAPTER 507–COVERED SERVICES, LIMITATIONS, AND EXCLUSIONS FOR FREESTANDING AMBULATORY SURGICAL CENTER AND BIRTHING CENTER SERVICES

INTRODUCTION

The West Virginia (WV) Medicaid Program offers a comprehensive scope of medically necessary medical and mental health services to diagnose and treat eligible beneficiaries. Covered and authorized services must be rendered by enrolled providers within the scope of their license and in accordance with all State and Federal requirements. Any service, procedure, item, or situation not discussed in this manual must be presumed non-covered unless informed otherwise in writing by the Bureau for Medical Services (BMS).

This chapter sets forth requirements of the BMS regarding payment and processing of services provided by Freestanding Ambulatory Surgical Centers and Birthing Centers to eligible WV Medicaid beneficiaries.

The policies and procedures set forth herein are promulgated as regulations governing the provision of services by ASC and birthing centers in the Medicaid Program administered by the WV Department of Health and Human Resources (DHHR) under the provisions of Title XIX of the Social Security Act and Chapter 9 of the Public Welfare Law of West Virginia.

507.1 DEFINITIONS

The following are definitions specific to ASC and Birthing Center services.

Ambulatory Surgery Center (ASC) – Any distinct entity that operates exclusively for the purpose of providing surgical services to patients not requiring hospitalization, and that has an agreement with CMS under Medicare to participate as an ASC and licensed by the appropriate State regulatory agency.

Birthing Center – Any distinct entity which operates exclusively for the purpose of providing birthing services (uncomplicated newborn deliveries) to patients not requiring hospitalization is licensed by the applicable state regulatory agency and has executed a provider enrollment/agreement with the Bureau For Medical Services to provide such services to Medicaid eligible individuals.

Covered ASC Surgical Procedures – Those surgical procedures which may safely be preformed in the ASC setting and which the ASC is authorized by Federal and State law and regulation to perform.

Birthing Center Covered Services – Those newborn deliveries which may safely be performed in the birthing center setting, and which do not require the level of support and medical service available only in the inpatient hospital setting.

Surgical Level – An acuity level assigned by Medicare to procedures covered in ASC facilities. The level includes an allowance for facility costs, e.g. operating room and anesthetic and usual supplies related to the procedure.

Case Reimbursement Birthing Center Service – The per case bundled rate reimbursed to a birthing center includes the facility cost, nursing and other personnel services, and usual supplies related to the uncomplicated newborn delivery. Physician or nurse midwife professional charges are reimbursed directly to the professional practitioner at the applicable reimbursement rates in effect as of the date of service.

507.2 PROVIDER PARTICIPATION

Refer to Chapter 300 for provider requirements. In addition to the basic requirements for participation, an ASC must be an independent freestanding facility that has been surveyed and approved by Medicare and licensed by the appropriate State regulatory agency. The birthing center must be licensed by the appropriate state regulatory agency. A condition of that licensure includes the requirement for transfer agreement between the birthing center and an acute care general hospital for patients who might experience complications in the delivery. The facility must also be a contracted provider within an HMO network if rendering services to HMO members.

507.3 COVERED SERVICES

The WV Medicaid Program covers medically necessary services provided by an ASC to eligible beneficiaries within coverage/benefit limitations in effect on the date of service. Coverage and benefit limitations are subject to change as Federal regulations and State policies dictate. Covered procedures are based on the Medicare designated procedures and their assigned acuity-based surgical levels. The state has opted to cover certain additional procedures based on common local practices and state assigned surgery levels, including minor surgical procedures performed under local anesthesia. Those minor procedures are covered under a state specific level, and reimbursed at a rate of $30.00 per procedure.

Birthing centers are reimbursed by Medicaid only for those services related to uncomplicated newborn delivery, as defined in Section 507.1 of this chapter.

507.3.1 SERVICES REQUIRING PRIOR AUTHORIZATION

Certain surgeries performed in place of services 22 (Outpatient hospital) and 24 (Ambulatory Surgical Center) will require prior authorization, effective February 15, 2006. The selected surgeries that require prior authorization through the BMS review contractor are listed in Attachment I, along with the PA form that may be utilized.

Prior authorization must be obtained from West Virginia Medical Institute (WVMI) prior to the provision of the services. Failure to obtain prior authorization will result in denial of the services; the Medicaid member can not be billed for failure to receive authorization for these services.

Prior authorization requirements governing the prevision of all West Virginia Medicaid services will apply pursuant to Chapter 300, General Provider Participation Requirements, and Chapter 400, Section 440 Explanation of the Medicaid Beneficiary ID card, provider manual.

507.4 NON-COVERED SERVICES

The following is a list of non-covered services for Ambulatory Surgery and Birthing Centers:

- Surgical procedures and deliveries that cannot be safely performed in an outpatient setting or without support of the full array of hospital diagnostic and treatment services and equipment.
- Procedures not covered by Medicaid including, but not limited to, cosmetic surgery.
- Medical equipment or supplies dispensed for use in the patient's home.

- Services provided to HMO members without appropriate prior authorization from the HMO.

507.5 SPECIAL DOCUMENTATION REQUIREMENTS

The following procedures require submission of supporting documentation:

- Sterilization – The individual must complete an Informed Consent Form. The individual to be sterilized must be 21 years of age or older at the time the consent form is signed. Coverage is not provided for mentally incompetent or institutionalized individuals. The physician must obtain and submit the consent. Payment will not be made to any involved providers until the consent is on file.
- Hysterectomy – This procedure requires a signed Acknowledgement Form, and is only covered for medical reasons. An Acknowledgement Form must be completed and submitted by the physician. Payment will not be made to any involved provider until the Acknowledgement Form is on file.

If the sterilization procedure did not render the patient sterile (i.e., a unilateral procedure was done) or the patient was sterile prior to the hysterectomy, documentation of the operative procedure or prior status must accompany the claim.

Detailed billing instructions are included in Chapter 600. In addition, procedure modifiers are required when billing bilateral (modifier 50) and multiple (modifier 51) surgical procedures. The primary procedure (usually the procedure with the highest complexity and therefore highest surgery level) is billed without modifier 51. Subsequent procedures are billed with modifier 51.

507.6 PAYMENT AND LIMITATIONS

Ambulatory Surgery Centers

Payment for services performed in an ASC are based on the Surgery Level assigned to the code by Medicare or BMS. BMS rates are updated periodically based on the rate update published by Medicare. In addition Medicaid assigns a BMS Medicaid specific rate for certain minimal procedures.

Fees for Surgical Levels one (1) through (9) are calculated at ninety percent (90%) of the Medicare fee for the level. Multiple procedures are paid at one hundred percent (100%) of the fee for the primary procedure and fifty percent (50%) of each additional procedure. Bilateral procedures are paid at one hundred and fifty percent (150%) of the single procedure rate. If the beneficiary is a member of an HMO, reimbursement will be made by the HMO based upon the contracted rate between the ASC and the HMO.

For specific information regarding Medicaid ambulatory surgery center fee updates, please refer to the Bureau's web page at www.wvdhhr.org/bms, section: Program Instructions.

Supplies and other items incidental to the surgical procedures performed are not covered for separate payment. The cost of such items is included in the Surgical Level for the procedure.

Birthing Center Services

Birthing Center Services are reimbursed on a per case bundled rate, which is intended to cover the facility's cost, nursing services, and other facility support staff, anesthetic and usual supplies

related to the uncomplicated newborn delivery procedure. Supplies and other items incidental to the delivery are not covered for separate reimbursement, the cost of such items is included in the case payment to the facility. Physician or nurse midwife professional charges are reimbursable to the Medicaid Program participating professional practitioner at RBRVS rates in effect for that particular procedure as of the date of service.

WVMI Medicaid Outpatient Services Authorization Request Form

Fax: 304- 344-2580 **or** 1-800- 891-0016 **Phone:** 304-414-2551 or (Toll Free) 1-800-296-9849

Request Date: _____ Member's Medicaid ID #:_____

A. **Member** Name: _____ Date of Birth: _____
Last First MI
Member Address: _____
Street City State Zip

B. **Surgical Procedure** Requested: _____
CPT Code **(Required)**: _____ ICD-9-CM Code **(Required)**: _____ Assistant surgeon? ☐ Yes ☐ No

Diagnosis Related to Surgical Procedure: _____

C. **Facility** Performing Surgical Procedure: _____
Facility ID # (10 digits): _____ Facility is: □ In WV □ Outside WV

Referring Physician Name: _____
Mailing Address: _____
Street City State Zip
Surgeon Name: _____
Mailing Address: _____
Street City State Zip

Contact Name: _____ Phone# (_____)_____-_____ Ext: _____
Fax # (_____)_____-_____

D. **Clinical Reasons for Surgery:** (e.g. signs and symptoms): _____
_____
_____
_____ Date of Onset: _____

E. **Relative Diagnostic and Outpatient Studies: (Include results of studies and attach photographs if** indicated):_____
_____
_____

F. **Related Medications, Treatments, and Therapies (include duration): _____**
_____
_____
_____

G. If procedure routinely performed in office, please document need for OP surgical setting: _____
_____

*****THIS FORM WILL BE RETURNED TO ORDERING PHYSICIAN WITH DETERMINATION*****

For <u>WVMI Use Only:</u>
Approved: ___ Authorization Number: _____ Date*: _____

***(Authorization expires 90 days from this date)**

Denied: ____ Detailed letter to follow

***** REMINDER: Preauthorization for medical necessity does not guarantee payment***

17283	Destruction of skin lesions	X	
17284	Destruction of skin lesions	X	
17286	Destruction of skin lesions	X	
17304	1 stage mohs, up to 5 spec	X	X
17305	2 stage mohs, up to 5 spec	X	X
17306	3 stage mohs, up to 5 spec	X	X
17307	Mohs addl stage up to 5 spec	X	X
17310	Mohs any stage > 5 spec each	X	X
19140	Mastectomy for gynecomastia	X	
19180	Prophylactic, simple, complete	X	

19182	Mastectomy, subcutaneous	X	
19316	Mastopexy	X	
19318	Reduction mammaplasty	X	
19324	Mammaplasty, augmentation; without prosthetic implant	X	
19325	Mammaplasty, augmentation; with prosthetic implant	X	
19328	Removal intact mammary implant	X	
19330	Removal mammary implant material	X	
19340	Immediate insertion breast prosthesis after reconstruction	X	
19342	Delayed breast prosthesis	X	
19350	Nipple/areola reconstruction	X	
19355	Correction of inverted nipples	X	
19357	Breast reconstruction, immediate or delayed, with tissue expander, including subsequent expansion	X	
19361	Breast reconstruction with lat. flap	X	
19364	Breast reconstruction with free flap	X	
19366	Breast reconstruction other technique	X	
19367	Breast reconsturction with TRAM	X	
19368	with microvascular anastaomosis	X	
19369	with TRAM double pedicle	X	
19370	Open periprosthetic capsulotomy, breast	X	
19371	Periprosthetic capsulectomy, breast	X	
19380	Revision of reconstructed breast	X	
19396	Prep for custom implant	X	
19499	Unlisted procedure, breast	X	
21060	Meniscectomy TMJ (<21)	X	
21141	Reconstruction midface, LeFort I; single piece, segment movement in any direction (e.g., for Long Face Syndrome), without bone graft	X	
21142	Reconstruction midface, LeFort I; two pieces, segment movement in any direction, without bone graft	X	
21143	Reconstruction midface, LeFort I; three or more pieces, segment move in any direction, without bone	X	
21145	Reconstruction midface, LeFort I; single piece, segment movement in any direction, requiring bone grafts (includes obtaining autografts)	X	
21146	Reconstruction midface, LeFort I; two pieces, segment movement in any direction, requiring bone grafts (includes obtaining autografts) (e.g., ungrafted unilateral alveolar cleft)	X	
21147	Reconstruction midface, LeFort I; three or more pieces, segment move in any direction, requiring bone grafts (includes obtaining autografts) (e.g., ungrafted bilateral alveolar cleft or multiple osteotomies)	X	
21150	Reconstruction midface, LeFort II; anterior intrusion (e.g., Treacher-Collins Syndrome)	X	
21151	Reconstruction midface, LeFort II; any direction, requiring bone grafts (includes obtaining autografts)	X	
21154	Reconstruction midface, LeFort III (extracranial), any type, requiring bone grafts (includes obtaining autografts); without LeFort I	X	
21155	Reconstruction midface, LeFort III (extracranial), any type, requiring bone grafts (includes obtaining autografts) with LeFort I	X	
21159	Reconstruction midface, LeFort III (extra and intracranial) with forehead advancement (e.g., mono bloc) requiring bone grafts (includes obtaining autografts); without LeFort I	X	
21160	Reconstruction midface, LeFort III (extra and intracranial) with forehead advancement (e.g., mono bloc) requiring bone grafts (includes obtaining autografts); with LeFort I	X	
21172	Reconstruction superior-lateral orbital rim and lower forehead, advancement or alteration, with or without grafts (includes obtaining autografts)	X	

21175	Reconstruction, bifrontal, superior-lateral orbital rims and lower forehead, advancement or alteration (e.g., plagiocephaly, trigonocephaly, brachycephaly), with or without grafts (includes obtaining autografts)	X	
21179	Reconstruction, entire or majority of forehead and/or supraorbital rims; with grafts (allograft or prosthetic material)	X	
21180	Reconstruction, entire or majority of forehead and/or supraorbital rims; with autograft (includes obtaining grafts)	X	
21188	Reconstruction midface, osteotomies (other than LeFort type) and bone grafts (includes obtaining autografts)	X	
21193	Reconstruction of mandibular rami, horizontal, vertical, C, or L osteotomy; without bone graft	X	
21194	Reconstruction of mandibular rami, horizontal, vertical, C, or L osteotomy; with bone graft (includes obtaining graft)	X	
21195	Reconstruction of mandibular rami and/or body, sagittal split; without internal rigid fixation	X	
21196	Reconstruction of mandibular rami and/or body, sagittal split; with internal rigid fixation	X	
21198	Osteotomy, mandible, segmental	X	
21199	Osteotomy, mandible, segmental; with genioglossus advancement	X	
21206	Osteotomy, maxilla, segmental (e.g., Wassmund or Schuchard)	X	
21208	Osteoplasty, facial bones; augmentation (autograft, allograft, or prosthetic implant)	X	
21209	Osteoplasty, facial bones; reduction	X	
21210	Graft, bone; nasal, maxillary or malar areas (includes obtaining graft)	X	
21215	Graft, bone; mandible (includes obtaining graft)	X	
21235	Graft; ear cartilage, autogenous, to nose or ear (includes obtaining graft)	X	
21240	Arthroplasty, temporomandibular joint (TMJ), with or without autograft (includes obtaining graft) for <21 years.	X	
21240	Reconstruction of jaw joint	X	
21242	Arthroplasty, temporomandibular joint (TMJ), with allograft for <21 years	X	
21242	Reconstruction of jaw joint	X	
21243	Arthroplasty, temporomandibular joint (TMJ), with prosthetic joint replacement for <21 years	X	
21243	Reconstruction of jaw joint	X	
21244	Reconstruction of mandible, extraoral, with transosteal bone plate (e.g., mandibular staple bone plate)	X	
21245	Reconstruction of mandible or maxilla, subperiosteal implant; partial	X	
21246	Reconstruction of mandible or maxilla, subperiosteal implant; complete	X	
21247	Reconstruction of mandibular condyle with bone and cartilage autogra fts (includes obtaining grafts) (e.g. for hemifacial microsomia)	X	
21248	Reconstruction of mandible or maxilla, endosteal implant (e.g., blade, cylinder); partial	X	
21249	Reconstruction of mandible or maxilla, endosteal implant (e.g., blade, cylinder); complete	X	
21270	Malar augmentation, prosthetic material	X	
21280	Medial canthopexy (separate procedure)	X	
21282	Lateral canthopexy	X	
21299	Unlisted craniofacial and maxillofacial procedure	X	
21310	Treatment of nose fracture	X	
21315	Treatment of nose fracture	X	
21320	Treatment of nose fracture	X	
21325	Treatment of nose fracture	X	
21330	Treatment of nose fracture	X	
21335	Treatment of nose fracture	X	
21499	Unlisted musculoskeletal procedure, head	X	

21685	Hyoid myotomy and suspension	X	
21740	Reconstructive repair of pectus excavatum or carinatum; open	X	
21742	Reconstructive repair of pectus excavatum or carinatum; minimally invasive approach (Nuss procedure) without thoracoscopy	X	
21743	Reconstructive repair of pectus excavatum or carinatum; minimally invasive approach (Nuss procedure) with thoracoscopy	X	
22520	Percutaneous vertebroplasty, one vertebral body, unilateral or bilateral injection; thoracic	X	
22521	Percutaneous vertebroplasty, one vertebral body, unilateral or bilateral injection; lumbar	X	
22522	Each additional thoracic or lumbar vertebral body (listed separately in addition to code for primary procedure	X	
22523	Percutaneous vertebroplasty augmentation, including cavity creation (fracture reduction and bone biopsy included when performed) using mechanical device, one vertebral body, unilateral or bilateral cannulation (eg, Kyphoplasty); thoracic	X	
22524	Percutaneous vertebroplasty augmentation, including cavity creation (fracture reduction and bone biopsy included when performed) using mechanical device, one vertebral body, unilateral or bilateral cannulation (eg, Kyphoplasty); lumbar	X	
22525	Percutaneous vertebroplasty augmentation, including cavity creation (fracture reduction and bone biopsy included when performed) using mechanical device, one vertebral body, unilateral or bilateral cannulation (eg, Kyphoplasty); each additional thoracic or lumbar vertebral body (listed separately in addition to code for primary procedure)	X	
22899	Unlisted procedure, spine (to be used for kyphoplasty with dates of service prior to 01/01/2006)	X	
23412	Release shoulder joint	X	
23415	Drain shoulder lesion	X	
23420	Drain shoulder bursa	X	
23450	Exploratory shoulder surgery	X	
23455	Biopsy shoulder tissues	X	
23460	Biopsy shoulder tissues	X	
23462	Removal of shoulder lesion	X	
23470	Reconstruct shoulder joint	X	
23472	Reconstruct shoulder joint	X	
24351	Release elbow joint	X	
24352	Biopsy arm/elbow soft tissue	X	
24354	Biopsy arm/elbow soft tissue	X	
24356	Remove arm/elbow lesion	X	
24360	Reconstruct elbow joint	X	
24361	Reconstruct elbow joint	X	
24362	Reconstruct elbow joint	X	
24363	Replace elbow joint	X	
24365	Reconstruct head of radius	X	
24366	Reconstruct head of radius	X	
25000	Incision of tendon sheath	X	
25001	Incise flexor carpi radialis	X	
25111	Remove wrist tendon lesion	X	
25112	Reremove wrist tendon lesion	X	
25332	Revise wrist joint	X	
25441	Reconstruct wrist joint	X	
25442	Reconstruct wrist joint	X	
25443	Reconstruct wrist joint	X	
25444	Reconstruct wrist joint	X	
25445	Reconstruct wrist joint	X	
25446	Wrist replacement	X	

25447	Repair wrist joint(s)	X	
26010	Drainage of finger abscess		X
26055	Incise finger tendon sheath	X	
26121	Release palm contracture	X	
26123	Release palm contracture	X	
26125	Release palm contracture	X	
26160	Remove tendon sheath lesion	X	
26530	Revise knuckle joint	X	
26531	Revise knuckle with implant	X	
26531	Revise knuckle with implant	X	
26535	Revise finger joint	X	
26535	Revise finger joint	X	
26536	Revise/implant finger joint	X	
26536	Revise/implant finger joint	X	
26560	Repair of web finger	X	
26561	Repair of web finger	X	
26562	Repair of web finger	X	
26568	Lengthen metacarpal/finger	X	
26580	Repair hand deformity	X	
26587	Reconstruct extra finger	X	
26590	Repair finger deformity	X	
26989	Hand/finger surgery	X	
27096	Inject sacroiliac joint	X	
27200	Treat tail bone fracture	X	
27332	Removal of knee cartilage	X	
27333	Removal of knee cartilage	X	
27403	Repair of knee cartilage	X	
27405	Repair of knee ligament	X	
27407	Repair of knee ligament	X	
27409	Repair of knee ligament	X	
27437	Revise kneecap	X	
27437	Revise kneecap	X	
27438	Revise kneecap with implant	X	
27438	Revise kneecap with implant	X	
27440	Revision of knee joint	X	
27440	Revision of knee joint	X	
27441	Revision of knee joint	X	
27441	Revision of knee joint	X	
27442	Revision of knee joint	X	
27442	Revision of knee joint	X	
27443	Revision of knee joint	X	
27443	Revision of knee joint	X	
27445	Arthroplasty of knee	X	
27445	Revision of knee joint	X	
27446	Revision of knee joint	X	
27446	Revision of knee joint	X	
27447	Total knee arthroplasty	X	
27487	Revise/replace knee joint	X	
27613	Biopsy lower leg soft tissue	X	
27700	Arthroplasty, ankle	X	
27700	Ankle arthroplasty	X	
27702	With implant	X	

27703	Revision, total ankle	X	
27704	Removal of ankle implant	X	
28035	Decompression of tibia nerve	X	
28070	Removal of foot joint lining	X	
28072	Removal of foot joint lining	X	
28080	Removal of foot lesion	X	
28108	Removal of foot lesions	X	
28110	Part removal of metatarsal	X	
28111	Part removal of metatarsal	X	
28112	Part removal of metatarsal	X	
28113	Part removal of metatarsal	X	
28114	Removal of metararsal heads	X	
28116	Revision of foot	X	
28118	Removal of heel bone	X	
28119	Removal of heel spur	X	
28190	Removal of foot foreign body	X	
28192	Removal of foot foreign body	X	
28193	Removal of foot foreign body	X	
28238	Revision of foot tendon for medical necessity	X	
28240	Release of big toe	X	
28250	Revision of foot fascia	X	
28280	Fusion of toes	X	
28285	Repair of hammertoe	X	
28286	Repair of hammertoe	X	
28288	Partial removal of foot bone	X	
28289	Repair hallux rigidus	X	
28290	Correction of bunion	X	
28292	Correction of bunion	X	
28293	Correction of bunion	X	
28293	Correction of bunion with implant	X	
28294	Correction of bunion	X	
28296	Correction of bunion	X	
28297	Correction of bunion	X	
28298	Correction of bunion	X	
28299	Correction of bunion	X	
28300	Incision of heel bone	X	
28310	Revision of big toe	X	
28312	Revision of toe	X	
28313	Repair deformity of toe	X	
28315	Removal of sesamoid bone	X	
29800	Jaw arthroscopy/surgery	X	
29806	Shoulder arthroscopy/surgery	X	
29807	Shoulder arthroscopy/surgery	X	
29819	Shoulder arthroscopy/surgery	X	
29822	Shoulder arthroscopy/surgery	X	
29823	Shoulder arthroscopy/surgery	X	
29824	Shoulder arthroscopy/surgery	X	
29826	Shoulder arthroscopy/surgery	X	
29827	Arthroscop rotator cuff repr	X	
29848	Wrist endoscopy/surgery	X	
29855	Tibial arthroscopy/surgery	X	
29856	Tibial arthroscopy/surgery	X	

29870	Knee arthroscopy, dx	X	
29871	Knee arthroscopy/drainage	X	
29873	Knee arthroscopy/surgery	X	
29874	Knee arthroscopy/surgery	X	
29875	Knee arthroscopy/surgery	X	
29876	Knee arthroscopy/surgery	X	
29877	Knee arthroscopy/surgery	X	
29879	Knee arthroscopy/surgery	X	
29880	Knee arthroscopy/surgery	X	
29881	Knee arthroscopy/surgery	X	
29882	Knee arthroscopy/surgery	X	
29883	Knee arthroscopy/surgery	X	
29885	Knee arthroscopy/surgery	X	
29886	Knee arthroscopy/surgery	X	
29887	Knee arthroscopy/surgery	X	
29888	Knee arthroscopy/surgery	X	
29889	Knee arthroscopy/surgery	X	
29893	Scope, plantar fasciotomy	X	
29999	Arthroscopy of joint	X	
30150	Rhinectomy; partial	X	
30400	Rhinoplasty, primary; lateral and alar cartilages and/or elevation of nasal tip	X	
30410	Rhinoplasty, primary; complete, external parts including bony pyramid, lateral and alar cartilages, and/or elevation of nasal tip	X	
30420	Rhinoplasty, primary; including major septal repair	X	
30430	Rhinoplasty, secondary; minor revision (small amount of nasal tip work)	X	
30435	Rhinoplasty, secondary; intermediate revision (bony work with osteotomies)	X	
30460	Rhinoplasty for nasal deformity secondary to congenital cleft lip and/or palate, including columellar lengthening; tip only	X	
30465	Repair of nasal stenosis	X	
30520	Repair of nasal septum	X	
30540	Repair nasal defect	X	
30545	Repar nasal defect	X	
31299	Unlisted procedure, accessory sinuses	X	
31513	Injection into vocal cord	X	
31570	Laryngoscopy with injection	X	
31571	Laryngoscopy with injection	X	
36299	Unlisted procedure, vascular injection	X	
36468	Inj. Sclerosing solution	X	
36469	face	X	
36470	single vein	X	
36471	multiple veins, same leg	X	
37204	Transcatheter occlusion or embolization (e.g., for tumor destruction, to achieve hemostasis, to occlude a vascular malformation), percutaneous, any method, non-central nervous system, non-head or neck	X	
37500	Vascular endoscopy, surgical, with ligation of perforator veins, subfascial (SEPS)	X	
37501	Unlisted vascular endoscopy procedure	X	
37700	Ligation and division long saphenous vein at saphenofemoral junction, or distal interruptions	X	
37718	Ligation division and stripping short saphenous vein	X	
37722	Ligation divisin and stripping , long greater saphenous viens from saphenofemoral junction to knee or below	X	

37735	Ligation and division and complete stripping of long or short saphenous veins with radical excision of ulcer and skin graft and/or interruption of communicating veins of lower leg with excision of deep fascia	X	
37760	Ligation of perforator veins, subfascial, radical (Linton type), with or without skin graft, open	X	
37765	Stab phlebectomy of varicose veins, one extremity; 10-20 stab incisions	X	
37766	Stab phlebectomy of varicose veins, one extremity; more than 20 incisions	X	
37780	Ligation and division of short saphenous vein at saphenopopliteal junction	X	
37785	Ligation, division, and/or excision of varicose vein cluster(s), one leg	X	
37799	Unlisted procedure, vascular surgery	X	
39502	Repair paraesophageal hiatus hernia, transabdominal, with or without fundoplasty, vagotomy, and/or pyloroplasty, exceptional	X	
40806	Incision of lip fold	X	
40819	Excise lip or cheek fold	X	
41520	Reconstruction, tongue fold	X	
42145	Repair palate, pharynx/uvula	X	
42810	Excision of nect cyst	X	
42815	Excision of nect cyst	X	
42820	Remove tonsils and adenoids	X	
42821	Remove tonsils and adenoids	X	
42825	Removal of tonsils	X	
42826	Removal of tonsils	X	
42830	Removal of adenoids	X	
42831	Removal of adenoids	X	
42835	Removal of adenoids	X	
42836	Removal of adenoids	X	
43201	Esophagoscopy with injections	X	
43280	Lap, esophagus	X	
43289	Lap, esophagus	X	
43644	Lap, gastric bypass	X	
43645	Lap, gastric bypass	X	
43651	Lap, vagotomy	X	
43652	Lap, vagotomy	X	
43659	Lap, gastric, unlisted	X	
44970	Lap, appendectomy	X	
44979	Lap, appendix unlisted	X	
46505	Chemodenervation of internal and sphincter if coupled with J0585 pr K0587	X	
47562	Lap cholecystectomy	X	
47563	Lap cholecystectomy	X	
47564	Lap cholecystectomy	X	
47570	Lap cholecystoenterostomy	X	
47579	Lap, unlisted biliary	X	
49250	Umbilectomy, omphalectomy, excision of umbilicus (separate procedure	X	
49329	Lap, abd, peritoneum, omen, unlisted	X	
49560	Repair initial incisional or rentrel hernia	X	
49561	Incarcerated or strangulated	X	
49565	Repair recurrentincisional or rentrel hernia, reducible	X	
49566	Incarcerated or strangulated	X	
49568	Hernia repair with mesh	X	
49569	Lap, hernia, unlisted	X	
49570	Repair epigashric hiernia, reducible	X	
49572	Repair epigashric hiernia, blocked	X	
49585	Repair umbilical hernia, reducible > 5 years	X	

49587	Repair umbilical hernia, blocked+C379+C411 > 5 years	X	
49650	Lap, inguinal hernia	X	
49651	Lap, inguinal hernia	X	
49904	Omental flap, extra-abdominal (e.g., for reconstruction of sternal and chest wall defects)	X	
51999	Lap, bladder, unlisted	X	
51999	Lap, bladder, unlisted	X	
53440	Correct bladder function	X	
53442	Remove perineal prosthesis	X	
53445	Insert uro/ves nck sphincter	X	
53447	Remove/replace ur sphincter	X	
53448	Removal/replacement of sphincter pump	X	
53505	Repair of urethra injury no pa--no pink	X	
54400	Insert semi-rigid prosthesis	X	
54401	Insert self-contd prosthesis	X	
54405	Insert multi-comp penis pros	X	
54406	Removal of inflatable penile prosthesis	X	
54409	Removal of inflatable penile prosthesis	X	
54410	Remove/replace penis prosth	X	
54416	Remv/repl penis contain pros	X	
54699	Lap, testicle unlisted	X	
55550	Lap, ligation spermatic veins	X	
55559	Lap, spermatic cord, unlisted	X	
55866	Lap. Prostatectomy	X	
57265	Extensive repair of vagina	X	
57284	Repair paravaginal defect	X	
57287	Revise/remove sling repair	X	
57288	Repair bladder defect	X	
57425	Lap colpopexy	X	
58150	Hyst and BSO	X	
58180	Hyst and BSO	X	
58200	Hyst and BSO	X	
58260	Vag Hyst	X	
58262	removal of tubes/ovaries	X	
58263	Vag Hyst	X	
58267	Vag Hyst	X	
58270	Vag Hyst	X	
58275	Vag Hyst	X	
58280	Vag Hyst	X	
58285	Vag Hyst	X	
58290	Vag Hyst	X	
58291	Vag Hyst	X	
58292	Vag Hyst	X	
58293	Vag Hyst	X	
58294	Vag Hyst	X	
58550	Laparoscopy, surgical with vaginal hysterectomy	X	
58552	Laparoscopy, surgical with vaginal hysterectomy	X	
58553	Laparoscopy, surgical with vaginal hysterectomy	X	
58554	Laparoscopy, surgical with vaginal hysterectomy	X	
58555	Hysteroscopy, diagnostic	X	
58558	Hysteroscopy, surgical	X	
58559	With lysis of cohesions	X	
58560	With division or resection of intrauterine septum	X	

58561	With removal of leiomyoma	X	
58562	With removal of impacted foreign body	X	
58563	With endometrial ablation	X	
58565	Hysteroscopy, sterilization	X	
58578	Lap, uterus unlisted	X	
58579	Unlisted hysteroscopy procedure, uterus	X	
58679	Lap, ovary unlisted	X	
59898	Lap, unlisted, maternity	X	
61885	Implant neurostim one array	X	
61886	Implant neurostim arrays	X	
62360	Implantation or replacement of device for intrathreal or epidural drug infusion; subcutaneous.	X	
62361	Implant spine infusion pump	X	
62362	Implant spine infusion pump	X	
63650	Implant neuroelectrodes	X	
63655	Implant neuroelectrodes	X	
63685	Implant neuroreceiver	X	
64553	Implant neuroelectrodes	X	
64555	Implant neuroelectrodes	X	
64560	Implant neuroelectrodes	X	
64561	Implant neuroelectrodes	X	
64565	Implant neuroelectrodes	X	
64573	Implant neuroelectrodes	X	
64575	Implant neuroelectrodes	X	
64577	Implant neuroelectrodes	X	
64580	Implant neuroelectrodes	X	
64581	Implant neuroelectrodes	X	
64585	Revision or removal of peripheral stimulator electrodes	X	
64590	Implant neuroreceiver	X	
64612	Chemodenervation of muscle(s); muscle(s) innervated by facial nerve (e.g., for blepharospasm, hemifacial spasm)	X	
64613	Chemodenervation, neck muscles	X	
64614	Extremity or trunk	X	
64650	Chemodenervation of eccrineglands	X	
64653	Other areas when coupled with J0585 or J0587	X	
65772	Corneal relaxing incision for correction of surgically induced astigmatism	X	
65775	Corneal wedge resection for correction of surgically inducted astigmatism	X	
67345	Chemodenervationof extraocular muscle	X	
67900	Repair of brow ptosis (supraciliary, mid-forehead or coronal approach)	X	
67901	Repair of blepharoptosis; frontalis muscle technique with suture or other material	X	
67902	Repair of blepharoptosis; frontalis muscle technique with fascial sling (includes obtaining fascia)	X	
67903	Repair of blepharoptosis; (tarso) levator resection or advancement, internal approach	X	
67904	Repair of blepharoptosis; (tarso) Levator resection or advancement, external approach	X	
67906	Repair of blepharoptosis; superior rectus technique with fascial sling (includes obtaining fascia)	X	
67908	Repair of blepharoptosis; conjunctivo-tarso-Muller's muscle-levator resection (e.g., Fasanella-Servat type)	X	
67909	Reduction of overcorrection of ptosis	X	
67911	Correction of lid retraction	X	

67912	Correction of lagophthalmos, with implantation of upper eyelid lid load (e.g., gold weight)	X	
67914	Repair of ectropion, suture	X	
67915	Repair of ectropion; thermocauterization	X	
67916	Repair of ectropion; excision tarsal wedge	X	
67917	Repair of ectropion; extensive (e.g., tarsal strip operations)	X	
67921	Repair of entropion; suture	X	
67922	Repair of entropion; thermocauterization	X	
67923	Repair of entropion; excision tarsal wedge	X	
67924	Repair of entropion; extensive (e.g., tarsal strip or capsulopalpebral fascia repairs operation)	X	
67950	Canthoplasty	X	
67999	Unlisted eyelid procedure	X	
69300	Otoplasty	Not covered	
69399	Unlisted procedure, external ear	X	
69420	Incision of eardrum	X	
69421	Incision of eardrum	X	
69610	Repair of eardrum	X	
69620	Repair of eardrum	X	
69631	Repair eardrum structures	X	
69632	Rebuild eardrum structures	X	
69633	Rebuild eardrum structures	X	
69635	Rebuild eardrum structures	X	
69636	Rebuild eardrum structures	X	
69637	Rebuild eardrum structures	X	
69650	Release middle ear bone	X	
69660	Revise middle ear bone	X	
69661	Revise middle ear bone	X	
69662	Revise middle ear bone	X	
69930	Cochlear device implantation, with or without mastoidectomy	X	
69949	Unlisted procedure, inner ear	X	
76012	Radiological supervision and interpretation, percutaneous vertebroplasty or vertebroplasty or vertebral augmentation including cavity creation, per vertebral body	X	
76013	Radiological supervision and interpretation, percutaneous vertebroplasty or vertebroplasty or vertebral augmentation including cavity creation, per vertebral body, under CT guidance	X	
76499	Unlisted diagnostic radiographic procedure (to be used for dates of service prior to 01/01/2006 for radiological sueprvision and interpretation, kyphoplasty under fluoroscopic or CT guidance).	X	
91110	GI tract imaging, capsulte endoscopy	X	
95873	Electrical stimulation/chemodenervation	X	
13100-13152	Keloid Revision	X	
21182-21184	Reconstruction of orbital walls, rims, forehead, nasoethmoid complex following intra- and extracranial excision of benign tumor of cranial bone (e.g. fibrous dysplasia), with multiple autografts (includes obtaining grafts); total area of bone grafting less than 40 sq cm	X	
43770-43774	Lap, gastric band	X	
47560-47561	Lap, transhepatic cholangiography	X	
49320-49323	Lap, abd, peritoneium, omentum	X	

51990-51992	Lap, for stress incontinence	X	
54690-54692	Lap, testicle	X	
58545-58546	Lap myomectomy	X	
58550-58554	Lap hysterectomy	X	
58660-58673	Lap, ovary	X	
58970-58976	Lap, in vitro	X	
67971-67975	Reconstruction of eyelid	X	
68320-68340	Conjunctivoplasty	X	
69310-69320	Reconstruction external auditory canal	X

JULY 1, 2010

SECTION 508.4

Introduction: Section 508.4, Covered Services
Old Policy: Home health agencies must obtain authorization when the services are in excess of 124 visits in a calendar year. The total 124 visits includes any combination of the following home health services: skilled nurse visits (SNV), physical therapy (PT), occupational therapy (OT), speech-language pathology (ST), home health aide (HHA), medical social worker (MSW), and the procedures for all-inclusive services.
New Policy: Home health agencies must obtain authorization when the services are in excess of 60 visits in a calendar year. The total 60 visits include any combination of the following home health services: skilled nurse visits (SNV), physical therapy (PT), occupational therapy (OT), speech-language pathology (ST), and home health aide (HHA).

SECTION 508.4.1

Old Policy: REVENUE CODE: 0431(W2140)
New Policy: REVENUE CODE: 0431

SECTION 508.4.6 (FORMERLY SECTION 508.4.8)

Introduction: Renumbering Section Venipuncture Performed in the Home

SECTION 508.4.7 (OLD)

Introduction: Section 508.4.7, All Inclusive Visit
Old Policy: Medicare has identified that certain home health agencies must bill an all inclusive code for any home health service visit. The actual visit may be done by any one of the home health disciplines approved for providing home health services for the specific agency. The disciplines are skilled nurse visit (SNV), physical therapy (PT), speech-language pathology (ST), occupational therapy (OT), and home health aide (HHA). The agencies using this code are usually county health departments and are known as The Family of Home Health Agencies. Service definitions and limitations for each home health discipline are delineated in **Attachment 1.**
New Policy: Delete section.

SECTION 508.4.7 (NEW)

Introduction: Section 508.4.9, Reimbursement Methodology
Old Policy: N/A
New Policy: Medicaid reimbursement of Medicare certified home health services shall be based on 90% of the Medicare established low-utilization payment adjustment (LUPA) per visit rate by discipline or the provider's charge, whichever is less. The calculated LUPA rates will include an applicable Core-Base Statistical Area (CBSA) wage index adjustment for the county in which the provider has its initially assigned physical location. If services are rendered to beneficiaries outside that initially assigned county, payments will be limited to the provider's LUPA rates with no payment recognition for any difference between county wage indexes. The LUPA rate will be adjusted in accordance with Medicare's scheduled adjustments. LUPA per visit payment amounts are considered payment-in-full.

SECTION 508.8

Introduction: Section 508.8, Authorization

Old Policy: Authorizations for Home Health Services in excess of 124 visits per calendar year are no longer required; however, it is the responsibility of the provider to maintain the CMS-485, CMS-486, and OASIS assessments on file. Home Health visits are subject to post-payment audit.
New Policy: Authorizations for Home Health Services in excess of 60 visits per calendar year are no longer required; however, it is the responsibility of the provider to maintain the CMS-485, CMS-486, and OASIS assessments on file. Home Health visits are subject to post-payment audit.

SECTION 508.9

Introduction: Section 508.9, Billing Procedure
Old Policy: Home health claims may be billed using either the HCFA 1500 or the UB 92 until the date of change in the Bureau's fiscal agent. Following the implementation of the new fiscal agent for Medicaid, all claims must be billed using the UB 92 or the 837I electronic format. If the services were provided prior to the implementation date for the new fiscal agent, both the local W codes as well as the revenue codes must be noted on the claim. For services provided after implementation, only the revenue codes are required.
New Policy: All claims must be billed using the UB 04 or the 837I electronic format. If the services were provided prior to the implementation date for the new fiscal agent, only the revenue codes must be noted on the claim. For services provided after implementation, only the revenue codes are required.

CHAPTER 508—COVERED SERVICES, LIMITATIONS AND EXCLUSIONS FOR HOME HEALTH
TABLE OF CONTENTS

TOPIC **PAGE NO.**

Attachment 2: Covered Medical Supplies

CHAPTER 508–COVERED SERVICES, LIMITATIONS, AND EXCLUSIONS, FOR HOME HEALTH

INTRODUCTION

The West Virginia (WV) Medicaid Program offers a comprehensive scope of medically necessary medical and mental health services to diagnose and treat eligible members. Covered and authorized services must be rendered by enrolled providers within the scope of their license and in accordance with all State and Federal requirements. Any service, procedure, item, or situation not discussed in the manual must be presumed non-covered unless informed otherwise in writing by the Bureau for Medical Services (BMS).

This chapter sets forth the BMS requirements for payment of services provided by certified home health agencies to eligible WV Medicaid members.

The policies and procedures set forth herein are regulations governing the provision of home health agency services in the Medicaid Program administered by the WV Department of Health and Human Resources under the provisions of Title XIX of the Social Security Act and Chapter 9 of the West Virginia Code.

508.1 DEFINITIONS

Definitions governing the provision of all WV Medicaid services will apply pursuant to Chapter 200, Definitions, of the Provider Manual.

508.2 PROVIDER PARTICIPATION

In order to participate in the WV Medicaid Program and receive payment from the Bureau, home health agencies must meet the following conditions in addition to requirements set forth in Chapter 300:

- Certification for participation in Title XVIII, Medicare, by the appropriate certifying agency in the State where the agency is located. (In West Virginia, the Office of Health Facility Licensure and Certification in the Department of Health and Human Resources is the certifying agency.)
- A home health agency must be approved for Medicare participation before requesting an application from Medicaid for enrollment as a provider. The home health agency must send a copy of approval as a Medicare provider along with the rate of reimbursement set by Medicare for each service which has been approved by Medicare. A change in the Medicare rate and/or services provided must be submitted on the Medicare letterhead to the Medicaid agency.

508.3 MEMBER ELIGIBILITY

Payment for medically necessary and appropriate home health agency services is available on behalf of all WV eligible Medicaid members subject to the conditions and limitations that apply to

these services. The qualifying criteria are described in Attachment 1 and may be found at the CMS web site www.cms.hhs.gov/manuals.

- The member must meet the qualifying criteria for Medicare coverage as currently published or modified in the future. These criteria include having a need for skilled nursing care on an intermittent basis, physical therapy, speech-language pathology services, or a need for occupational therapy subsequent to the initiation of physical therapy.

- The member may receive skilled nursing visits (SNV) if only a registered nurse or licensed practical nurse can provide the service as certified by a physician thus allowing the individual to be in the community rather than institutionalized.

- Home health services may be provided to a child who would be homebound if the services were not provided as certified by a physician. The home health services must not duplicate services received from other sources.

508.4 COVERED SERVICES

Except for the limitations and exclusions listed below and in attachment 1, the Bureau will pay for medically necessary and appropriate home health agency services provided to eligible Medicaid members by a Medicaid enrolled home health agency.

Home health agencies must obtain authorization when the services are in excess of 60 visits in a calendar year. The total 60 visits include any combination of the following home health services: skilled nurse visits (SNV), physical therapy (PT), occupational therapy (OT), speech-language pathology (ST), and home health aide (HHA).

508.4.1 SKILLED NURSING VISIT

REVENUE CODE: **0551**
SERVICE UNIT: **Visit**
DEFINITION: Service definitions and limitations are delineated in **Attachment 1**

508.4.2 HOME HEALTH AIDE SERVICES

REVENUE CODE: **0571**
SERVICE UNIT: **Visit**
DEFINITION: Service definitions and limitations are delineated in **Attachment 1**

508.4.3 SPEECH-LANGUAGE PATHOLOGY

REVENUE CODE: **0441**
SERVICE UNIT: **Visit**
DEFINITION: Service definitions and limitations are delineated in **Attachment 1**

508.4.4 PHYSICAL THERAPY

REVENUE CODE: **0421**
SERVICE UNIT: **Visit**

DEFINITION: Service definitions and limitations are delineated in **Attachment 1**

508.4.5 OCCUPATIONAL THERAPY
REVENUE CODE: **0431**
SERVICE UNIT: **Visit**
DEFINITION: Service definitions and limitations are delineated in **Attachment 1**

508.4.6 VENIPUNCTURE PERFORMED IN THE HOME
PROCEDURE CODE: **S9529**
SERVICE UNIT: **Visit**
SERVICE LIMIT: **None**
AUTHORIZATION: **None**
DEFINITION: Venipuncture performed in a member's home is a covered service. The member must meet the Medicare definition of home bound and have a physician's order for home based venipuncture. The member can not be receiving Home Health Services. This service includes transportation to the member's home and can not be provided at any other location.

508.4.7 REIMBURSEMENT METHODOLOGY

Medicaid reimbursement of Medicare certified home health services shall be based on 90% of the Medicare established low-utilization payment adjustment (LUPA) per visit rate by discipline or the provider's charge, whichever is less. The calculated LUPA rates will include an applicable Core-Base Statistical Area (CBSA) wage index adjustment for the county in which the provider has its initially assigned physical location. If services are rendered to beneficiaries outside that initially assigned county, payments will be limited to the provider's LUPA rates with no payment recognition for any difference between county wage indexes. The LUPA rate will be adjusted in accordance with Medicare's scheduled adjustments. LUPA per visit payment amounts are considered payment-in-full.

508.5 MEDICAL SUPPLIES

A comprehensive list of covered medical supplies can be found in **Attachment 2**. Unless specified otherwise, Medicaid follows Medicare's guidelines for medical necessity review for medical supplies. Items not listed in **Attachment 2** are presumed non-covered.

Medicare guidelines for medical necessity can be found at www.ngs.medicare.com and/or palmettogba.com web sites. Questions regarding product classification should be directed to Palmetto GBA-SADMERC.

Physician orders and documentation supporting medical necessity for supplies must be present. Home health agencies must use reasonable quantities of the least costly product which will adequately meet the needs of the member. Limited amounts of medical supplies may be left in the home between visits where repeated applications are required and rendered by the member or other caregivers.

Medical supplies are separated into three categories:

- Routine (non-billable): Supplies that are customarily used in small quantities during the usual course of most home visits. They are usually included in the staff's supplies and not designated for a specific member. These supplies are included in the cost per visit of home health care services.
- Non-Routine (billable): Supplies that are needed to treat a member's specific illness or injury in accordance with the physician's plan of care. The item must be directly identifiable to an individual, the cost of the item can be identified and accumulated in a separate cost center, and the item is furnished at the direction of the member's physician and is specifically identified in the plan of care, i.e., the item is needed to treat a member's specific illness. The home health agency must also follow a consistent charging practice for Medicaid and non-Medicaid members receiving the item.
- Non-Covered: Supplies that are not covered under the Medicare home health benefit. Home health agencies can not bill for these supplies and the cost of the supplies can not be included as a part of the "cost of doing business". Comfort and convenience items are non-covered as well as program exclusions such as prescription drugs and biologicals.

508.6 SERVICE LIMITATIONS

Service limitations governing the provision of all WV Medicaid services will apply pursuant to Chapter 100, General Information, of the Provider Manual. In addition, the following limitations also apply to the requirements for payment of home health agency services described in this chapter.

- Home health agency services are covered when provided by Medicare certified/Medicaid enrolled home health agencies only for those services for which they have been approved by Medicare to provide.
- Services and supplies must be provided pursuant to a physician's written order which details the member-specific plan of care.
- Home health aide services will not be covered unless the member requires skilled nursing services, physical therapy services, speech-language pathology services, or occupational therapy services provided subsequent to physical therapy services.
- Newborn home health care will not be covered unless there is a diagnosis and/or condition that require intermittent skilled nursing services.
- Pre-filling of insulin syringes is a covered home health skilled service if there is no pharmacy or person in the home to provide the service.

508.7 SERVICE EXCLUSIONS

In addition to the exclusions listed in Chapter 100, General Information, of the Provider Manual, the Bureau will not pay for the following services as a home health benefit:

- For a dually eligible member (Medicare/Medicaid), any services denied by the Medicare Program

- Services in excess of those deemed medically necessary by the Bureau to treat the member's condition
- Services not directly related to the member's diagnosis, symptoms, or medical history
- Duplicative services provided to members receiving benefits through the Home and Community-Based Aged/Disabled Waiver Program (ADW).
- Duplicative services provided to members receiving benefits through the Home and Community-Based Mental Retardation/Developmental Disability Waiver Program (MR/DDW)
- Services provided to members receiving benefits of the Hospice program
- Services provided to members receiving similar services from a behavioral health or community provider
- Homemaker services
- Respite care
- Custodial care
- Telephone consultations
- Failed appointments, including but not limited to, canceled appointments and appointments not kept
- Time spent in preparation of reports
- Experimental services or drugs

508.8 AUTHORIZATION

Prior authorizations for Home Health Services in excess of 60 visits per calendar year are required; it is the responsibility of the provider to maintain the CMS-485, CMS-486, and OASIS assessments on file. Home Health visits are subject to post-payment audit.

508.9 BILLING PROCEDURE

All claims must be billed using the UB 04 or the 837I electronic format; only revenue codes are required to be submitted on claim form.

508.10 COORDINATION OF CARE REQUIREMENTS AND PAYMENT LIMITS

Home health agency providers must determine whether Medicaid eligible member referred for home health agency services are authorized to receive similar services under other Medicaid programs or benefits. Home health agency providers must coordinate the provision of home health agency services with other Medicaid service providers in order to avoid duplication of similar services and subsequent disallowance of payments.

Requirements for coordination of care and payment limits for specific services are described in this section for the following benefits:

- Hospice
- Home and Community-Based Waiver Program for the Mentally Retarded/Developmentally Disabled
- Home and Community-Based Waiver Program for the Aged and Disabled

- Personal Care Services
- Children's Special Care

508.11 HOSPICE

Members who have elected to receive services through a hospice agency are not eligible to receive services through a home health agency. Medical care and case management of members receiving hospice services are the responsibility of the hospice agency.

508.12 MENTALLY RETARDED/ DEVELOPMENTALLY DISABLED (MR/DD) WAIVER

Members who have been determined eligible for and are enrolled in the Home and Community-Based Waiver Program for the MR/DD may receive services from a home health agency that do not duplicate MR/DD Waiver services. An agreement between the MR/DD Waiver coordination agency and the home health agency must be on record. The need for home health agency services must be documented in the member's Individual Program Plan (IPP). Documentation of the referral must be maintained in the member's records of both the MR/DD Waiver Program coordination agency and the home health agency.

508.13 AGED AND DISABLED WAIVER (ADW)

Members who have been determined eligible for and are enrolled in the Home and Community Based Aged/Disabled Waiver Program may receive services from a home health agency that do not duplicate AD Waiver services. Home health agency services provided to ADW member must be coordinated by the ADW case management agency, and in general may only include skilled nursing care or therapy services for post-hospitalization stays or acute episodes of chronic conditions. The need for home health services must be documented in the member's Plan of Care (POC). Documentation of the referral must be maintained in the member's records of both the AD Waiver agency and the home health agency

508.14 PERSONAL CARE SERVICES

Members who are receiving personal care services provided through behavioral health or community care programs may also receive home health agency services. These services are limited to services which can only be performed by a licensed nurse and/or a licensed therapist. The home health agency must maintain documentation regarding the need for services as well as the plan of care for the member. No payment shall be made to home health agencies for home health aide services provided to members who are also receiving personal care services.

508.15 CHILREN'S SPECIALTY CARE

Staff of the Children's Specialty Care (CSC) program shall authorize all care, including home health services, for children receiving specialized medical services under the auspices of the CSC program. The CSC program evaluates requests for prior authorization of home health

services based on Medicaid policy requirements for such services, regardless of the child's eligibility for the Medicaid program.

Requests for prior authorization of home health services for CSC enrollees should be forwarded to the CSC program as follows:

Children Specialty Care Program
350 Capitol Street
Charleston, West Virginia 25301

508.16 MANAGED CARE

If the Medicaid member is enrolled in an MCO, coverage and prior authorization requirements of the health plan must be followed. If the member is enrolled in the PAAS Program, authorization or a referral must be given by the member's PCP. Medicaid will not reimburse for services if the HMO denies payment because their requirements were not followed.

ATTACHMENT 1
GUIDELINES FOR COVERED SERVICES
PAGE 1 OF 3
REVISED JULY 1, 2010

GUIDELINES FOR COVERED SERVICES

The Medicaid Program uses the Medicare guidelines for covered Home Health services as currently published or amended in the future. These guidelines and future updates may be found at www.cms.gov/manuals.

Since the West Virginia Medicaid population does not always fit the picture of the elderly or disabled Medicare members, exceptions to the Medicare guidelines have been implemented for Medicaid members. These exceptions include, but are not limited to the definition of homebound status when certain skilled medical procedures are necessary and when skilled services for infants and children are necessary.

Skilled nursing visits (SNV) may be provided for Medicaid eligible individuals who do not meet the Medicare defined criteria for homebound if only a registered nurse or licensed practical nurse can provide the service, thus allowing the individual to be deinstitutionalized. Documentation must clearly indicate the need for the service, such as why the individual cannot go to a health care provider for the treatment. Examples of this type of SNV include but are not limited to IV infusions, central line dressing changes, and sterile dressing changes for wounds with the application of a prescribed medication.

Skilled nursing, physical therapy, occupational therapy, and speech-language pathology home health services must be reasonable and necessary for the diagnosis and treatment of the illness or injury within the context of the member's unique medical condition. To determine if the services are reasonable and necessary, the following items will be considered:

- The diagnosis is never to be the sole factor in determining medical necessity.
- The determination of medical necessity of the services should be based upon the member's unique condition, whether it is acute, chronic, terminal, or expected to continue over a long period of time, and in some cases if the condition is stable.
- The services are intermittent.
- Documentation must support the establishment of medical necessity and should clearly define the member's unique circumstance that justifies provision of these services.

Skilled nursing visits for observation are medically necessary when the likelihood of change in a member's condition requires the skills of a registered nurse to identify and evaluate the need for possible modification of treatment or initiation of additional medical procedures. When documentation indicates a reasonable potential for a complication or further acute episode, skilled registered nurse visits for observation and assessment will be covered for a maximum of three weeks from the start of care. Visits may be covered longer if there remains a reasonable potential for such a complication or acute episode. Documentation in the medical record must clearly indicate a change in the health status such as fluctuation of vital signs for observation and assessment to continue as a skilled service.

Teaching and training activities by a skilled nurse are covered when it is necessary to teach a member, family member or care giver how to manage the treatment regimen and the skill being taught is reasonable and necessary to the treatment of the illness, injury or functional loss. There is no requirement that the member, family member or other care giver be taught to provide a service if the member, family member or care giver cannot or chooses not to provide the care.

In all cases, documentation of the member's mental status must clearly indicate why the individual cannot be educated to provide the skilled care. Additionally, if there are others in the household who might be able to provide care, documentation must indicate why these individuals cannot provide the care or are unwilling.

Infants and toddlers are not automatically considered homebound. Infants discharged from a neonatal intensive care unit may receive skilled nurse visits for observation and education as appropriate. Documentation must clearly indicate the need for these visits. This documentation would include the mental status of the care giver as well as the reason the infant is homebound. Other conditions may warrant skilled nurse visits for infants include, but are not limited to, home IVs and infants identified as failure to thrive.

For children, the focus is to main stream the physically challenged individuals as much as possible. Home health services may be provided to a child who would be homebound if the services were not provided or the normal care giver is unavailable to provide the care for a short period of time. The home health visits must not duplicate services received from other sources.

A member with a psychiatric disorder is considered homebound if his/her illness is manifested in part by a refusal to leave the home, or is of such a nature that it would not be considered safe for him/her to leave home unattended, even if he/she has no physical limitations. The diagnosis and rationale for homebound status must be made by a psychiatrist. The following conditions support the homebound determination:

- Agoraphobia, paranoia, or panic disorder;
- Disorders of thought processes wherein the severity of delusions, hallucinations, agitation and/or impairment of thoughts/cognition grossly affect the member's judgment and decision making and therefore the member's safety;
- Acute depression with severe vegetative symptoms; and
- Psychiatric problems associated with medical problems that render the member homebound.

The services of a skilled psychiatric nurse must be required to provide the necessary care. Many members, who require the services of a skilled psychiatric nurse also require skilled nursing care related to a physical illness. Therefore, the psychiatric nurse must also have medical and surgical nursing experience to ensure that all the member's home care needs are met. Counseling services may be provided by either a trained psychiatric nurse. These services should not be duplicative, and concurrent counseling or psychotherapy services by multiple providers are not medically necessary.

For all home health services provided to Medicaid members, the documentation must clearly indicate that the services are reasonable and necessary. The documentation must be clear, specific and measurable. For homebound status, the medical record must indicate exactly why it is a considerable and taxing effort for the individual to leave the home. The lack of transportation is not evidence the individual is homebound. An individual who is physically and mentally capable of driving a car is not considered homebound.

A4208	sterile, 3 cc, each		100 per month	G3, T5, 58	X	
A4209	sterile, 5cc or greater, each		100 per month	G3, T5, 58	X	
A4213	Syringe, sterile, 20cc or greater, each		60 per month	G3, T5, 58	X	
A4215	Needles only, sterile, any size, each		100 per month	G3, T5, 58	X	
A4216	Sterile water/saline, 10 ml		Cost Invoice	G3, T5, 58		
A4217	Sterile water/saline, 500 ml		Cost Invoice	G3, T5, 58		
A4244	Alcohol or peroxide, per pint		15 per month	G3, T5, 58	X	
A4245	Alcohol wipes, per box		2 boxes/month	G3, T5, 58	X	
A4246	Betadine or phisohex solution, per pint		12 per month	G3, T5, 58	X	
A4247	Betadine or iodine swabs/wipes, per box		2 boxes/month	G3, T5, 58	X	
A4253	Blood glucose test or reagent strips for home blood glucose monitor, per 50 strips		3 boxes/month	G3, T5, 58		Requires diagnosis of 250.00 thru 250.93
A4253 KS	Blood glucose test or reagent strips for home blood glucose monitor, per 50 strips (1 box)	W0708	2 boxes per month	G3, T5, 58		Requires diagnosis of 250.00 thru 250.93
A4256	Normal, low and high calibrator solution/chips		1 per 3 months	G3, T5, 58		
A4258	Spring-powered device for lancet, each		1 per 2 years	G3, T5, 58		
A4259	Lancets, per box of 100		2 boxes/month	G3, T5, 58		Requires diagnosis of 250.00 thru 250.93
A4259 KS	Lancets, per box of 100	W0709	1 box per month	G3, T5, 58		Requires diagnosis of 250.00 thru 250.93
A4265	Paraffin, per pound		12 per 3 months	G3, T5, 58		
A4310	Insertion tray without drainage bag; and without catheter (accessories only)		2 per month	G3, T5, 58		
A4311	Insertion tray without drainage bag; with indwelling catheter, foley type, two-way latex with coating (teflon, silicone, silicone elastomer or hydrophilic, etc.)		2 per month	G3, T5, 58		
A4312	with indwelling catheter, foley type, two-way, all silicone		2 per month	G3, T5, 58		

A4313	with indwelling catheter, foley type, three-way, for continuous irrigation	2 per month	G3, T5, 58		
A4314	Insertion tray with drainage bag; with indwelling catheter, foley type, two-way latex with coating (teflon, silicone, silicone elastomer or hydrophilic, etc.)	2 per month	G3, T5, 58		
A4315	with indwelling catheter, foley type, two-way, all silicone	2 per month	G3, T5, 58		
A4316	with indwelling catheter, foley type, three-way, for continuous irrigation	2 per month	G3, T5, 58		
A4320	Irrigation tray with bulb or piston syringe, any purpose	2 per month	G3, T5, 58		
A4322	Irrigation syringe, bulb or piston, each	2 per month	G3, T5, 58		
A4324	Male external catheter, with adhesive coating, each	31 per month	G3, T5, 58		
A4325	Male external catheter, with adhesive strip, each	31 per month	G3, T5, 58		
A4326	Male external catheter specialty type with integral collection chamber, each	31 per month	G3, T5, 58		
A4327	Female external urinary collection device, meatal cup, each	2 per month	G3, T5, 58		
A4328	pouch, each	2 per month	G3, T5, 58		
A4330	Perianal fecal collection pouch with adhesive, each	31 per month	G3, T5, 58		
A4331	Extension drainage tubing, any type, any length, with connector/adaptor, for use with urinary leg bag or urostomy pouch, each	5 per month	G3, T5, 58		
A4332	Lubricant, individual sterile packet, for insertion of urinary catheter, each	31 per month	G3, T5, 58		
A4333	Urinary catheter anchoring device, adhesive skin attached, each	12 per month	G3, T5, 58		
A4334	Urinary catheter anchoring device, leg strap, each	1 per month	G3, T5, 58		
A4335	Incontinence supply; miscellaneous	Prior Authorization	G3, T5, 58		
A4338	Indwelling catheter; foley type, two-way latex with coating (teflon, silicone, silicone elastomer, or hydrophilic, etc.), each	2 per month	G3, T5, 58		
A4340	Indwelling catheter; specialty type, (e.g.; coude, mushroom, wing, etc.), each	2 per month	G3, T5, 58		

A4344	Indwelling catheter, foley type; two-way all silicone; each		2 per month	G3, T5, 58		
A4346	three-way for continuous irrigation, each		2 per month	G3, T5, 58		
A4347	Male external catheter, with or without adhesive, with or without anti-reflux device; per dozen		3 units per month	G3, T5, 58		
A4351	Intermittent urinary catheter; straight tip, with or without coating (teflon, silicone, silicone elastomer, or hydrophilic, etc.), each		31 per month	G3, T5, 58		
A4352	Intermittent urinary catheter; coude (curved) tip, with or without coating (teflon, silicone, silicone elastomer, or hydrophilic, etc.), each		Prior Authorization	G3, T5, 58		
A4353	Intermittent urinary catheter, with insertion supplies		180 per month Sterile Technique **Only**	G3, T5, 58		Coverage limited to Sterile Technique **Only** when specifically prescribed in writing by physician
A4354	Insertion tray with drainage bag, but without catheter		2 per month	G3, T5, 58		
A4355	Irrigation tubing set for continuous bladder irrigation through a three-way indwelling foley catheter, each		10 per month	G3, T5, 58		
A4356	External urethral clamp or compression device (not to be used for catheter clamp), each		Prior Authorization	G3, T5, 58		
A4357	Bedside drainage bag, day or night with or without anti-reflux device, with or without tube, each		2 per month	G3, T5, 58		
A4358	Urinary drainage bag, leg or abdomen, vinyl, with or without tube, with straps, each		4 per month	G3, T5, 58		
A4359	Urinary suspensory without leg bag, each		1 per month	G3, T5, 58		
A4361	Ostomy faceplate, each		3 per 6 months	G3, T5, 58		Not reimbursable when billed with: A4375, A4376, A4377, A4378, A4379, A4380, A4381, A4382, A4383
A4364	Adhesive, liquid or equal, any type, per ounce		6 oz. per month	G3, T5, 58		
A4365	Adhesive remover wipes, any type, per 50		1 box per month	G3, T5, 58		
A4366	Ostomy vent, any type, each		15 per month	G3, T5, 58		Not reimbursable when billed with: A4416, A4417, A4418, A4419, A4423, A4424, A4425, and A4427

A4367	Ostomy belt, each		2 per 6 months	G3, T5, 58		
A4368	Ostomy filter, any type, each		1 per day	G3, T5, 58		
A4371	Ostomy skin barrier, powder, per oz		10 per 6 months	G3, T5, 58		
A4372	Ostomy skin barrier, solid 4 x 4 or equivalent, with built-in convexity, each		15 per month	G3, T5, 58		
A4375	Ostomy pouch, drainable, with faceplate attached, plastic, each		15 per month	G3, T5, 58		Not reimbursable with: A4361, A4377
A4376	Ostomy pouch, drainable, with faceplate attached, rubber, each		15 per month	G3, T5, 58		Not reimbursable with: A4361, A4378
A4377	Ostomy pouch, drainable, for use on faceplate, plastic, each		20 per month	G3, T5, 58		Not reimbursable with: A4361, A4375
A4378	Ostomy pouch, drainable, for use on faceplate, rubber, each		20 per month	G3, T5, 58		Not reimbursable with: A4361, A4376
A4379	Ostomy pouch, urinary, with faceplate attached, plastic, each		20 per month	G3, T5, 58		Not reimbursable with: A4361, A4381, and A4382
A4380	Ostomy pouch, urinary, with faceplate attached, rubber, each		20 per month	G3, T5, 58		Not reimbursable with: A4361, A4383
A4381	Ostomy pouch, urinary, for use on faceplate, plastic, each		30 per month	G3, T5, 58		Not reimbursable with: A4361, A4379, A4382
A4382	Ostomy pouch, urinary, for use on faceplate, heavy plastic, each		30 per month	G3, T5, 58		Not reimbursable with: A4361, A4379, A4381
A4383	Ostomy pouch, urinary, for use on faceplate, rubber, each		30 per month	G3, T5, 58		Not reimbursable with: A4361, A4380
A4384	Ostomy faceplate equivalent, silicone ring, each		2 per month	G3, T5, 58		
A4385	Ostomy skin barrier, solid 4x4 or equivalent, extended wear, without built-in convexity, each		15 per month	G3, T5, 58		
A4387	Ostomy pouch, closed with barrier attached, with built-in convexity (1 piece), each		60 per month	G3, T5, 58		
A4388	Ostomy pouch, drainable, with extended wear barrier attached, (1 piece), each		60 per month	G3, T5, 58		
A4389	Ostomy pouch, drainable, with barrier attached, with built-in convexity (1 piece), each		60 per month	G3, T5, 58		
A4390	Ostomy pouch, drainable, with extended wear barrier attached, with built-in convexity (1 piece), each		60 per month	G3, T5, 58		
A4391	Ostomy pouch, urinary, with extended, wear barrier attached (1 piece), each		30 per month	G3, T5, 58		

A4392	Ostomy pouch, urinary, with standard wear barrier attached, with built-in convexity (1 piece), each		30 per month	G3, T5, 58		
A4393	Ostomy pouch, urinary, with extended wear barrier attached, with built-in convexity (1 piece), each		30 per month	G3, T5, 58		
A4394	Ostomy deodorant for use in ostomy pouch, liquid, per fluid ounce		16 oz. per month	G3, T5, 58		
A4395	Ostomy deodorant for use in ostomy pouch, solid, per tablet		30 per month	G3, T5, 58		
A4397	Irrigation supply; sleeve, each		4 per month	G3, T5, 58		
A4398	Ostomy irrigation supply; bag, each		1 per 6 months	G3, T5, 58		
A4399	cone/catheter, including brush		1 per 6 months	G3, T5, 58		
A4400	Ostomy irrigation set		1 per year	G3, T5, 58		
A4402	Lubricant, per ounce		4 oz per month	G3, T5, 58		
A4404	Ostomy ring, each		2 per month	G3, T5, 58		
A4405	Ostomy skin barrier, non-pectin based, paste, per ounce		4 oz per month	G3, T5, 58		
A4406	Ostomy skin barrier; pectin-based, paste, per ounce		4 oz per month	G3, T5, 58		
A4407	Ostomy skin barrier; with flange (solid, flexible, or accordion), extended wear, with built-in convexity, 4x4 inches or smaller, each		20 per month	G3, T5, 58		
A4408	Ostomy skin barrier; with flange (solid, flexible, or accordion), extended wear, with built-in convexity, larger than 4x4 inches, each		20 per month	G3, T5, 58		
A4409	Ostomy skin barrier; with flange (solid, flexible or accordion), extended wear, without built-in convexity, 4x4 inches or smaller, each		20 per month	G3, T5, 58		
A4410	Ostomy skin barrier; with flange (solid, flexible or accordion), extended wear, without built-in convexity, larger than 4x4 inches, each		20 per month	G3, T5, 58		
A4413	Ostomy pouch, drainable, high output, for use on a barrier with flange (2 piece system), with filter; each		20 per month	G3, T5, 58		
A4414	Ostomy skin barrier, with flange (solid, flexible or accordion), without built-in convexity, 4x4 inches or smaller, each		20 per month	G3, T5, 58		

A4415	Ostomy skin barrier, with flange (solid, flexible or accordion), without built-in convexity, larger than 4x4 inches, each		20 per month	G3, T5, 58		
A4416	Ostomy pouch, closed; with barrier attached, with filter (1 piece), each	K0581	30 per month	G3, T5, 58		Not reimbursable with: A4366
A4417	Ostomy pouch, closed; with barrier attached, with built-in convexity, with filter (1 piece)	K0582	15 per month	G3, T5, 58		Not reimbursable with: A4366
A4418	Ostomy pouch, closed; without barrier attached, with filter (1 piece), each	K0583	60 per month	G3, T5, 58		Not reimbursable with: A4366
A4419	Ostomy pouch, closed; for use on barrier with non-locking flange, with filter (2 piece), each	K0584	15 per month	G3, T5, 58		
A4420	Ostomy pouch, closed; for use on barrier with locking flange (2 piece), each	K0585	15 per month	G3, T5, 58		
A4421	Ostomy supply; miscellaneous		Prior Authorization	G3, T5, 58		
A4422	Ostomy absorbent material (sheet/pad/cyrstal packet) for use in ostomy pouch to thicken liquid stomal output, each		1 per day	G3, T5, 58		
A4423	Ostomy pouch, closed; for use on barrier with locking flange, with filter (2 piece), each	K0586	15 per month	G3, T5, 58		
A4424	Ostomy pouch, drainable; with barrier attached, with filter (1 piece) , each	K0587	15 per month	G3, T5, 58		
A4425	Ostomy pouch, drainable; for use n barrier with non-locking flange, with filter (2 piece system), each	K0588	15 per month	G3, T5, 58		
A4427	Ostomy pouch, drainable; for use on barrier with locking flange, with filter (2 piece system), each	K0590	15 per month	G3, T5, 58		
A4428	Ostomy pouch, urinary; with extended wear barrier, with faucet-type tap with valve (1 piece), each	K0591	15 per month	G3, T5, 58		
A4429	Ostomy pouch, urinary; with barrier attached, with built-in convexity, with faucet-type tap with valve (1 piece), each	K0592	15 per month	G3, T5, 58		
A4430	Ostomy pouch, urinary; with extended wear barrier attached, with built-in convexity, with faucet-type tap with valve (1 piece), each	K0593	15 per month	G3, T5, 58		
A4431	Ostomy pouch, urinary; with barrier attached, with faucet-type tap with valve (1 piece), each	K0594	15 per month	G3, T5, 58		

A4432	Ostomy pouch, urinary; for use on barrier with non-locking flange, with faucet-type tap with valve (2 piece), each	K0595	15 per month	G3, T5, 58		
A4433	Ostomy pouch, urinary; for use on barrier with locking flange (2 piece), each	K0596	15 per month	G3, T5, 58		
A4434	Ostomy pouch, urinary; for use on barrier with locking flange, with faucet-type tap with valve (2 piece), each	K0597	15 per month	G3, T5, 58		
A4450	Tape, non-waterproof, per 18 square inches		60 units per month	G3, T5, 58		
A4452	Tape, waterproof, per 18 square inches		30 units per month	G3, T5, 58		
A4455	Adhesive remover or solvent (for tape, cement or other adhesive), per ounce		4 oz per month	G3, T5, 58		
A4521	Adult-sized incontinence product, diaper, small size; each	W0560	200 per month	G3, T5, 58	X	Available only for members 3 years or older. When billing incontinent supplies (diapers, briefs, underpads, etc.) in combination, the total maximum is 250 items per month
A4522	Adult-sized incontinence product, diaper, medium size, each	W0560	200 per month	G3, T5, 58	X	Available only for members 3 years or older. When billing incontinent supplies (diapers, briefs, underpads, etc.) in combination, the total maximum is 250 items per month
A4523	Adult-sized incontinence product, diaper, large size, each	W0560	200 per month	G3, T5, 58	X	Available only for members 3 years or older. When billing incontinent supplies (diapers, briefs, underpads, etc.) in combination, the total maximum is 250 items per month
A4524	Adult-sized incontinence product, diaper, extra large size, each	W0560	200 per month	G3, T5, 58	X	Available only for members 3 years or older. When billing incontinent supplies (diapers, briefs, underpads, etc.) in combination, the total maximum is 250 items per month

A4525	Adult-sized incontinence product, brief, small size, each	W0560	200 per month	G3, T5, 58	X	Available only for members 3 years or older. When billing incontinent supplies (diapers, briefs, underpads, etc.) in combination, the total maximum is 250 items per month
A4526	Adult-sized incontinence product, brief, medium size, each	W0560	200 per month	G3, T5, 58	X	Available only for members 3 years or older. When billing incontinent supplies (diapers, briefs, underpads, etc.) in combination, the total maximum is 250 items per month
A4527	Adult-sized incontinence product, brief, large size, each	W0560	200 per month	G3, T5, 58	X	Available only for members 3 years or older. When billing incontinent supplies (diapers, briefs, underpads, etc.) in combination, the total maximum is 250 items per month
A4528	Adult-sized incontinence product, brief, extra large size, each	W0560	200 per month	G3, T5, 58	X	Available only for members 3 years or older. When billing incontinent supplies (diapers, briefs, underpads, etc.) in combination, the total maximum is 250 items per month
A4529	Child-sized incontinence product, diaper, small/medium size, each	W0560	200 per month	G3, T5, 58	X	Available only for members 3 years or older. When billing incontinent supplies (diapers, briefs, underpads, etc.) in combination, the total maximum is 250 items per month

A4530	Child-sized incontinence product, large size, each	W0560	200 per month	G3, T5, 58	X	Available only for members 3 years or older. When billing incontinent supplies (diapers, briefs, underpads, etc.) in combination, the total maximum is 250 items per month
A4531	Child-sized incontinence product, brief, small/medium size, each	W0560	200 per month	G3, T5, 58	X	Available only for members 3 years or older. When billing incontinent supplies (diapers, briefs, underpads, etc.) in combination, the total maximum is 250 items per month
A4532	Child-sized incontinence product, brief, large size, each	W0560	200 per month	G3, T5, 58	X	Available only for members 3 years or older. When billing incontinent supplies (diapers, briefs, underpads, etc.) in combination, the total maximum is 250 items per month
A4533	Youth-sized incontinence product, diaper, each	W0560	200 per month	G3, T5, 58	X	Available only for members 3 years or older. When billing incontinent supplies (diapers, briefs, underpads, etc.) in combination, the total maximum is 250 items per month
A4534	Youth-sized incontinence product, brief, each	W0560	200 per month	G3, T5, 58	X	
A4535	Disposable liner/shield for incontinence, each	W0564	150 per month	G3, T5, 58	X	
A4536	Protective underwear, washable, any size, each	W0562	8 per year	G3, T5, 58	X	
A4537	Under pad, reusable/washable, any size, each		2 per year	G3, T5, 58	X	Available only for members 3 years or older. When billing incontinent supplies (diapers, briefs, underpads, etc.) in combination, the total maximum is 250 items per month

A4550	Surgical supply, miscellaneous		15 per month	G3, T5, 58	X

A6254	Specialty absorptive dressing, wound cover, pad size 16 sq. in. or less, with any size adhesive border, each dressing		31 per month	G3, T5, 58		
A6255	Specialty absorptive dressing, wound cover, pad size more than 16sq. In. but less than or equal to 48 sq. in., with any size adhesive border, each dressing.		31 per month	G3, T5, 58		
A6256	Specialty absorptive dressing, wound cover, pad size more than 48 sq. in., with any size adhesive border, each dressing		31 per month	G3, T5, 58		
A6257	Transparent film, 16 sq. in. or less, each dressing		15 per month	G3, T5, 58		

A6258	Transparent film, more than 16 sq. in. but less than or equal to 48 sq. in., each dressing		15 per month	G3, T5, 58		
A6259	Transparent film, more than 48 sq. in., each dressing		15 per month	G3, T5, 58		
A6260	Wound cleansers, any type, any size		1 per month	G3, T5, 58		
A6261	Wound filler, gel/paste, per fluid ounce, not elsewhere classified		Prior Authorization Cost Invoice.	G3, T5, 58		
A6262	Wound filler, dry form, per gram, not elsewhere classified		Prior Authorization Cost Invoice	G3, T5, 58		
A6266	Gauze, impregnated, other than water, normal saline or zinc paste, any width, per linear yard		60 per month	G3, T5, 58		
A6402	Gauze, non-impregnated, sterile, pad size 16 sq. in. or less, without adhesive border, each dressing		60 per month	G3, T5, 58		
A6403	Gauze, non-impregnated, sterile, pad size more than 16 sq. in. but less than or equal to 48 sq. in., without adhesive border, each dressing		60 per month	G3, T5, 58		
A6404	Gauze, non-impregnated, sterile, pad size more than 48 sq. in., without adhesive border, each dressing		31 per month	G3, T5, 58		
A6407	Packing strips, non-impregnated, up to 2 inches in width, per linear yard		31 per month	G3, T5, 58		
A6441	Padding bandage, non-elastic; non-woven/non-knitted, width greater than or equal to three inches and less than five inches, per yard	A6421	4 per month	G3, T5, 58		
A6442	Conforming bandage, non-elastic, knitted/woven, non-sterile, width less than three inches, per yard		4 per month	G3, T5, 58		
A6443	Conforming bandage, non-elastic, knitted/woven, non-sterile, width greater than or equal to three inches and less than five inches, per yard	A6422	4 per month	G3, T5, 58		
A6444	Conforming bandage, non-elastic, knitted/woven, non-sterile, width greater than or equal to 5 inches, per yard	A6424	4 per month	G3, T5, 58		

A6445	Conforming bandage, non-elastic, knitted/woven, sterile, width less than three inches, per yard		4 per month	G3, T5, 58		
A6446	Conforming bandage, non-elastic, knitted/woven, sterile, width greater than or equal to three inches and less than five inches, per yard	A6426	4 per month	G3, T5, 58		
A6447	Conforming bandage, non-elastic, knitted/woven, sterile, width greater than or equal to five inches per yard	A6428	4 per month	G3, T5, 58		
A6448	Light compression bandage, elastic, knitted/woven, width less than three inches, per yard		4 per month	G3, T5, 58		
A6449	Light compression bandage, elastic, knitted/woven, width greater than or equal to three inches and less than five inches, per yard.	A6430	4 per month	G3, T5, 58		
A6450	Light compression bandage, elastic, knitted/woven, width greater than or equal to five inches, per yard	A6432	4 per month Cost Invoice	G3, T5, 58		
A6451	Moderate compression bandage, elastic, knitted/woven, load resistance of 1.25 to 1.34 foot pounds at 50% maximum stretch, width greater than or equal to three inches and less than fives inches, per yard	A6434	4 per month	G3, T5, 58		
A6452	High compression bandage, elastic, knitted/woven, load resistance greater than or equal to 1.35 foot pounds at 50% maximum stretch, width greater than or equal to three inches and less than five inches, per yard	A6436	4 per month	G3, T5, 58		
A6453	Self-adherent bandage, elastic, non-knitted/non-woven, width less than three inches, per yard		4 per month	G3, T5, 58		
A6454	Self-adherent bandage, elastic, non-knitted/non-woven, width greater than or equal to three inches and less than 5 inches, per yard	A6438	4 per month	G3, T5, 58		
A6455	Self-adherent band, elastic, non-knitted/non-woven, width greater than or equal to five inches, per yard		4 per month	G3, T5, 58		

A6456	Zinc paste impregnated bandage, non-elastic, knitted/woven, width greater than or equal to three inches and less than five inches, per yard	A6440	4 per month	G3, T5, 58		
A7524	Tracheostoma stent/stud/button, each		Prior Authorization	G3, T5, 58		
A7525	Tracheostomy mask, each	A4621	4 per month	G3, T5, 58		
A7526	Tracheostomy tube collar/holder, each	A4621 S8181	4 per month	G3, T5, 58		
B4034	Enteral feeding supply kit; syringe, per day -		1 per day Prior Authorization	G3, T5, 58		
B4035	pump fed, per day		1 per day Prior Authorization	G3, T5, 58		
B4081	Nasogastric tubing; with stylet		4 per month	G3, T5, 58		
B4082	without stylet		4 per month	G3, T5, 58		
B4083	Stomach tube - levine type		4 per month	G3, T5, 58		
B4086	Gastrostomy/jejunostomy tube, any material, any type, (standard or low profile), each		2 per 6 months	G3, T5, 58		
B9999	NOC for Parenteral supplies		Prior Authorization Cost Invoice	G3, T5, 58

CHAPTER 509–COVERED SERVICES, LIMITATIONS, AND EXCLUSIONS FOR HOSPICE SERVICES

INTRODUCTION

The West Virginia Medicaid Program is administered pursuant to Title XIX of the Social Security Act and Chapter 9 of West Virginia Code. The Bureau for Medical Services (BMS) in the West Virginia Department of Health and Human Resources (DHHR) is the single State agency responsible for administering the Program. This Program, therefore, must also function within federally defined parameters. Any service, procedure, item, or situation not discussed in the chapter must be presumed non-covered.

Medicaid offers a comprehensive scope of medically necessary medical and mental health services. All covered and authorized services must be provided by enrolled providers practicing within the scope of their license, utilizing professionally accepted standards of care, and in accordance with all State and Federal requirements. Enrolled providers are subject to review of services provided to Medicaid members by BMS whether or not the services require prior authorization. All providers of services must maintain current, accurate, legible and completed documentation to justify medical necessity of services provided to each Medicaid member and made available to BMS or its designee upon request.

Hospice is a continuum of care, directed by professionals, designed to optimize the comfort and functionality of terminally ill members for whom curative medicine has exhausted its possibilities. Hospice emphasizes relief from distress for the member without actively shortening or prolonging life. Relief from distress includes palliation of physical, psychological and psychosocial symptoms of distress and a regular regime for alleviation of physical pain. All efforts are directed to the enrichment of living during the final days of life and to the provision of ongoing opportunities for the member to be involved in life.

Hospice services are defined as reasonable and medically necessary services, palliative and supportive in nature, provided to the terminally ill for the management of the terminal illness and related conditions.

This chapter sets forth requirements of the Bureau for Medical Services regarding payment and processing for Hospice Services provided to eligible West Virginia Medicaid members.

509.1 DEFINITIONS

Definitions governing the provision of all WV Medicaid Services will apply pursuant to **Common Chapter 200, Definitions and Acronyms**. In addition, the following definitions will apply for Hospice services.

Attending physician - ***In accordance with*** **42 CFR 418.3(1)(i),** a doctor of medicine or osteopathy legally authorized to practice medicine and surgery by the State in which he or she performs that function or action; or (ii) **Nurse Practitioner (NP) –** A nurse who meets the

training, education and experience requirements as described in **410.75(b)**. (2) Is identified by the member, at the time he or she elects to receive hospice care, as having the most significant role in the determination and delivery of the member's medical care.

Bereavement Counseling - Emotional, psychosocial, and spiritual support and services provided before and after the death of the member to assist with issues related to grief, loss, and adjustment. ***(See* 42 CFR §418.3)**

Certificate-of Need (CON) - West Virginia issues a Certificate of Need (CON) to indicate a health service's compliance with **W.Va. Code §16-2D-1** ***et seq.***, and to fulfill a need in the community with no duplication of services. In West Virginia, all healthcare providers, unless exempt, must obtain a CON.

Employee (including contractors and volunteers**) -** A person who: (1) Works for the hospice and for whom the hospice is required to issue a W-2 form on his or her behalf; (2) if the hospice is a subdivision of an agency or organization, an employee of the agency or organization who is assigned to the hospice; or (3) is a volunteer under the jurisdiction of the hospice. ***(In accordance with* 42 CFR §418.3)**

Evaluation – An initial and ongoing process to determine service requirements and the effectiveness of plans of care.

Fiscal Agent - An agency contracted by the Bureau for Medical Services to verify coverage, prior authorization requirements, service limitations and practitioner information as well as pay claims.

Home Health Aide - A person specially trained to assist sick, disabled, infirm, or frail persons at home when no family member is fully able to assume this responsibility. Aides are supervised by health professionals, and provided as part of a continuing medical care plan ***in accordance with the West Virginia State Plan on Hospice Services.***

Homemaker Aide - A person specially trained to provide direct care and support services that are necessary in order to enable an individual/client to remain at home rather than enter a nursing facility, or to enable an individual to return home from a nursing facility. Homemaker services include assistance with personal hygiene, nutritional support, and environment maintenance. These aides are supervised by health professionals and provided as part of a continuing medical care plan ***in accordance with the West Virginia State Plan on Hospice Services.***

Hospice - A public agency or private organization or subdivision of either of these that is primarily engaged in providing hospice care. ***(See* 42 CFR §418.3)**

Hospice Care - A comprehensive set of services described in 1861(dd)(1) of the Social Security Act, identified and coordinated by an interdisciplinary group to provide for the physical, psychosocial, spiritual, and emotional needs of a terminally ill member and/or family members, as delineated in a specific patient plan of care. ***(See* 42 CFR §418.3)**

Hospice Discharge – A hospice provider determines that the patient is no longer terminally ill, expires, moves out of the hospice's service area, transfers to another hospice, or the patient (or other persons in the patient's home) behavior is disruptive, abusive, or uncooperative to the extent that delivery of care to the patient or the ability of the hospice to operate effectively is seriously impaired. ***(In accordance with* 42 CFR §418.26)**

Hospice Informed Consent - A written agreement to receive hospice care made by the member which specifies in writing the type of care and services to be provided. The informed consent form shall be signed by the member or their legal representative prior to service.

Hospice Interdisciplinary Team - An interdisciplinary team (IDT) of professionals comprised at minimum, of a physician, a social worker, and nurse who plan and direct the care of each hospice member, along with home health aides and counseling/clergy persons who provide additional services. ***(In accordance with* 42 CFR §418.56)**

Interdisciplinary Team Plan of Care - A group of interdisciplinary professionals (Physician, Nurse, Social worker, Counselor/Clergy) that collaborates continuously with the member's attending physician (if the member has an attending physician) to develop and maintain a member-directed, individualized plan of care. The plan is based on the interdisciplinary team assessments which recognize the member and family's physiological, social, religious, and cultural variables and values. ***(In accordance with* 42 CFR §418.56)**

Legal Representative - An individual who has the authority under State law (whether by statute or pursuant to an appointment by the courts of the State) to authorize or terminate medical care or to elect or revoke the election of hospice care on behalf of a terminally ill member who is mentally or physically incapacitated. This may include a legal guardian. ***(In accordance* with 42 CFR §418.3 *Definitions)***

Palliative Care - Member and family-centered care that optimizes quality of life by anticipating, preventing, and treating suffering. Palliative care throughout the continuum of illness involves addressing physical, intellectual, emotional, social, and spiritual needs and to facilitate member autonomy, access to information, and choice. ***(See* 42 CFR §418.3)**

Physician - An individual who meets the qualification and conditions as defined ***in section 1861(r) of the Social Security Act and implemented at* 42 CFR §410.20 *of this chapter. (See* 42 CFR §418.3)**

Physician Designee - A doctor of medicine or osteopathy designated by the hospice who assumes the same responsibilities and obligations as the medical director when the medical director is not available. ***(See* 42 CFR §418.3)**

Pre-Existing Conditions – The health status existing prior to the diagnosis of the terminal illness arising in organs that are not typically affected by the terminal illness.

Prior Authorization (PA) - A utilization review method used to control certain services which are limited in amount, duration, or scope. The prior approval necessary for specified services to

be delivered for an eligible member by a specified provider before services can be performed, billed, and payment made.

Registered Nurse - A person who has graduated from a college's nursing program or from a school of nursing, passed a national licensing exam, and is professionally licensed by the West Virginia State Board of Nursing as a Registered Nurse (RN). A registered nurse's scope of practice is determined by each state's Nurse Practice Act, which outlines what is legal practice for registered nurses and what tasks they may or may not perform.

Related Condition – A medical condition that arises as a direct logical consequence of the terminal illness.

Revocation - To cancel or withdraw the election of Hospice care. ***(In accordance with* 42 CFR §418.28)**

Social Worker - Must be a WV licensed social worker.

Terminally ill - A medical prognosis that the patient's life expectancy is 6 months or less if the illness runs its normal course. ***(See* 42 CFR §418.3)**

Transfer - Changing the hospice provider from which a member is receiving services to another hospice provider.

Utilization Management Contractor (UMC) - The contracted agent of the Bureau for Medical Services who receives requests for Hospice Services and issues prior authorizations to Hospice Providers.

509.2 PROVIDER PARTICIPATION REQUIREMENTS

In order to participate in the West Virginia Medicaid Program and receive payment from the Bureau for Medical Services (BMS), hospice providers must:

- Meet and maintain applicable licensures, accreditation, and certification requirements, including the Certificate of Need (CON);
- Meet and maintain all BMS enrollment requirements listed in **Chapter 300, Provider Participation Requirements*;***
- Be physically located within the state of WV;
- Meet and maintain Medicare enrollment conditions. ***In accordance with* 42 CFR §418 Hospice Care, West Virginia State Plan Supplement 2 to Attachment 3.1-A & 3.1-B page 6 on Hospice services, §1905 (o) of the Social Security Act.**

Contact the Molina Medicaid Solutions Provider Relations Department at 1-888-483-0793 for enrollment information or visit website at www.wvmmis.com.

509.2.1 Hospice Staff Criminal Investigation Background (CIB) Check Requirements, Restrictions and Medicaid Exclusion List

At a minimum, a state level criminal investigation background check, which includes fingerprints, must be conducted by the West Virginia State Police initially and again every three years for all Hospice provider staff providing direct care services to members including direct-care personnel If a prospective or current employee has lived out of state within the last five years, an FBI fingerprint-based criminal history check must also be conducted.

Prior to providing Hospice services, required fingerprint-based checks must be initiated. Hospice providers **may** do a preliminary check utilizing on-line internet companies and use these results until the fingerprint results are received. An individual who is providing direct care services by a Hospice provider cannot be considered to provide services if ever convicted of the following:

A. Abduction
B. Any violent felony crime including but not limited to rape, sexual assault, homicide, felonious physical assault or felonious battery
C. Child/adult abuse or neglect
D. Crimes which involve the exploitation, including financial exploitation, of a child or an incapacitated adult
E. Any type of felony battery
F. Felony arson
G. Felony or misdemeanor crime against a child or incapacitated adult which causes harm
H. Felony drug related offenses within the last 10 years
I. Felony DUI within the last 10 years
J. Hate crimes
K. Kidnapping
L. Murder/ homicide
M. Neglect or abuse by a caregiver
N. Pornography crimes involving children or incapacitated adults including but not limited to, use of minors in filming sexually explicit conduct, distribution and exhibition of material depicting minors in sexually explicit conduct or sending, distributing, exhibiting, possessing, displaying or transporting material by a parent, legal representative or custodian, depicting a child engaged in sexually explicit conduct
O. Purchase or sale of a child
P. Sexual offenses including but not limited to incest, sexual abuse, or indecent exposure
Q. Healthcare fraud
R. Felony forgery

CIB check results, other than those listed above, which may place a member at risk of personal health and safety or have evidence of a history of Medicaid fraud or abuse must be considered by the licensed Hospice provider before placing an individual in a position to provide services to the member.

If aware of a recent conviction or change in status of an agency staff member providing Hospice services, the Hospice provider must take appropriate action, including notification to the BMS Hospice Program Manager.

The OIG Exclusion List must be checked for every agency employee who provides Medicaid services prior to employment and monthly thereafter. Persons on the OIG Exclusion List cannot provide Medicaid services. This list can be obtained at **http://exclusions.oig.hhs.gov**.

All payments for services provided by excluded providers or employees will be recovered by BMS.

509.2.2 Hospice Staffing Requirements

***In accordance with* 42 CFR §418.62 *and* §418.64, hospice staffing involves employing, contracting and otherwise obtaining the services of the individuals who provide core services, supplemental services and physician services.**

- Federal regulations require that core hospice functions and services be performed only by employees of the hospice or by volunteers under the supervision of hospice employees.

- Supplemental services may be provided by individuals who are either employed, or contracted by the hospice, or who are volunteers.

509.2.3 Hospice Interdisciplinary Team (IDT)

- Each hospice must have an Interdisciplinary Team (IDT) composed of individuals who provide or supervise the care and services offered by the hospice. Each IDT must include at least the following individuals: *(In accordance with* **42 CFR §418.56** *and* **§418.64**).

  1. A doctor of medicine or osteopathy,
  2. A registered nurse
  3. A licensed social worker and
  4. A pastoral or other counselor

- The registered nurse, the licensed social worker and the (pastoral or other) counselor must be employees of the hospice, or volunteers under the supervision of designated employees of the hospice.

- The physician of the IDT may be a volunteer or a hospice employee, or the hospice may contract with the physician.

- The hospice must designate a registered nurse that is a member of the IDT to provide coordination of care and to ensure continuous assessment of each member's and family's needs and implementation of the interdisciplinary plan of care.

- If the hospice has more than one IDT, it must identify a specifically designated IDT to establish policies governing the day-to-day provision of hospice care and services.

- There must be a continuous and identifiable relationship between each member and his or her IDT.

- Efforts must be made to provide consistent IDT membership and assignment of hospice members.

509.3 HOSPICE SERVICE REQUIREMENTS

Services that are covered by the hospice program are those that are reasonable and necessary for the palliation and management of the terminal illness and related conditions. An interdisciplinary plan of care must be established before care begins and must detail the type, scope and frequency of those services to address the needs of the member and the member's family. All care must be planned, delivered and coordinated ***in accordance with*** **42 CFR §418.56** ***and*** **§418.200*.***

Hospice Services Are of Two Types:

I. **Core Hospice Services** are to be provided directly by hospice employees/contractors/volunteers.
These include:

- **Nursing Care:** must be provided by a registered nurse (RN), or by a licensed practical nurse (LPN) under the supervision of a registered nurse.

- **Medical Social Services**: must be provided by a licensed social worker (LSW) working under the direction of a physician.

- **Physician Services**: must be provided by a professional who is acting within the scope of the physician's license, who is either a doctor of medicine (MD), of osteopathy (DO), of podiatry (DPM), of dentistry (DDS), of optometry (OD), or a chiropractor (DC). The medical director of the hospice or the physician member of the IDT must be a licensed doctor of medicine or of osteopathy.

- **Counseling Services**: must be provided to the terminally ill individual and the family members or other persons caring for the individual at home. Counseling, including dietary counseling, may be provided both for the purpose of training the member's family or other caregiver to provide care, and for the purpose of helping the member and those caring for him or her to adjust to the member's approaching death. Bereavement counseling consists of counseling services provided to the individual's family up to one year after the individual's death. **Bereavement counseling is a required hospice service, but it is not reimbursable**. ***(See*** **West Virginia State Plan Hospice Services attachment 3.1 – C).**

II. **Other Hospice Services:** the hospice provider must make available services that are not considered "core" services. These may be provided by the employees of the hospice provider or they may be arranged by contractual agreement. They include:

- **Drugs and Biologicals**: drugs and biologicals must be identified as those documented in the hospice plan of care and provided by the hospice while the member is under hospice care. Hospice covered drugs are those related to the

palliation and management of the terminal illness and related conditions necessary to meet the needs of the member***. In accordance with*** **West Virginia State Plan Attachment 3.1-A & 3.1-B** ***and*** **42 CFR §418.56(c)(4)*, §418.106*, *and* §418.202 (f)*.**

- Management, ordering, dispensing, administration, labeling, disposition, and storing of drugs and biologicals must follow the policies and procedures ***in accordance with*** **42 CFR §418 Hospice Care**;

- Home Health Program services, drugs and biologicals obtained through the West Virginia Medicaid Pharmacy Program for the palliation and management of symptoms related to the member's terminal illness;

- Coverage of medications to control pain and nausea must be provided by the hospice provider unless justified by pre-existing conditions;

- **Durable Medical Equipment and Supplies**: are to be available for comfort or self-help related to the palliation of the terminal illness and related conditions. ***(In accordance with West Virginia State Plan Attachment 3.1-A &3.1-B page 7 and*** **42 CFR §418.56*, §418.202 (f)***, *and* **§418.106*)***.

- **Short term inpatient care:** is to be provided either to provide respite for family or other persons caring for the member at home, or for control of pain or symptoms arising from the terminal illness and related conditions that are not possible in any other setting. ***(In accordance with*** **West Virginia State Plan Attachment 3.1-A** ***&*** **3.1-B page 7** ***and*** **42 CFR §418.202 (e)*)***

- **Home health and homemaker services:** must meet the specifications of **42 CFR 484.36**, and must be provided under the supervision of an RN. Home health aides and homemaker service providers may provide personal care services and household services for safety and sanitation of the member, appropriate for the plan of care.

- **Rehabilitation Services:** include physical and occupational therapies and speech pathology used for symptom control or to maintain activities of daily living and functional skills. ***(In accordance with*** **West Virginia State Plan Attachment 3.1-C pages 2 & 3 on Hospice Services** ***and*** **42 CFR §418.202*).***

When a hospice contracts or arranges for any service, the hospice must maintain professional, financial and administrative responsibility for the services and must ensure that all staff members meet the regulatory qualification requirements.

509.3.1 Hospice Service Exceptions

Hospice services may be provided to children under age 21 concurrently with curative treatment. ***(In accordance with the*** **Affordable Care Act 2302 Concurrent Care for Children*.)***

509.3.2 Hospice Physician Services Staffing

- The following functions may be performed by a physician designee including a physician employee, volunteer physician, or a contracted physician:

    1. Hospice medical director services (must be a doctor of medicine (MD) or osteopathy (DO);

    2. Physician services related to the palliation and management of the member's terminal illness and related conditions;

    3. Care for general medical needs when the attending physician is not available (if the member has an attending physician); and

    4. Physician participation in the IDT (must be a doctor of medicine (MD) or osteopathy (DO).

        The hospice or the physician of the Interdisciplinary Team (IDT) may designate another physician or other physicians to be "on call" during the hours the IDT assigned physician is not on duty.

            1. The on-call physician may assist with urgent, emergency or otherwise unscheduled plan of care revisions.

            2. The hospice or the IDT assigned physician of the IDT may not designate substitute physicians to routinely assist with initial plans of care and scheduled plan of care reviews and revisions.

            3. When the "on call" physician provides a service to a member, it must be documented in that member's health record.

509.3.3 Hospice Volunteers

- A hospice provider uses volunteers in defined roles and under the supervision of designated hospice employees. Volunteers may perform administrative functions or direct care services as outlined in the Federal Regulations. In the Hospice Program, "employee" also refers to a volunteer under the jurisdiction of the hospice. All use of volunteers must be *in accordance with* **42 CFR §418.78** *and* **§418.304 (b)**.

- Volunteer hours of service must equal at least five percent of the hours of direct member care furnished by paid personnel, employed or contracted.

- If a physician volunteers some services and is reimbursed by the hospice for other services, the terms and conditions of such must be described in a written agreement or contract between the physician and the hospice.

- Services provided by volunteers may not be billed to Medicaid when those services are provided at no charge for members who are not eligible for Medicaid.

Examples of equitable ways for a physician to donate or volunteer services may include:

a. A percentage of their time; or

b. A particular service (e.g., treatment of decubitus ulcers or psychotherapy) or a particular occurrence of a service (donate one visit per week/month, etc. to each member in their care).

509.3.4 Hospice Employee Training Requirements

- A hospice must provide orientation that includes the hospice philosophy to all employees, including contracted and volunteer staff that have member and family contact;

- A hospice must provide an initial orientation for each employee, including contracted and volunteer staff that addresses the employee's specific job duties;

- A hospice must assess the skills and competence of all employees furnishing care, including contracted and volunteers furnishing services, and, as necessary, provide in-service training and education programs where required;

- A hospice must provide ongoing educational opportunities for all employees, including contracted and volunteer staff; and

- The hospice must have written policies and procedures describing its method(s) of assessment of competency and maintain a written description of the in-service training provided during the previous 12 months. *(In accordance with* **42 CFR §418.78(a)** *and* **§418.100(g) 1-3, p. 122**.

509.4 BENEFIT PERIODS

***(In accordance with* 42 CFR §418.21)** A member may elect to receive hospice care during one or more of the following election periods:

(1) An initial 90-day period;
(2) A subsequent 90-day period;
(3) An unlimited number of subsequent 60-day periods that will continue as long as the member lives unless he or she revokes hospice care or is discharged from hospice care.

The periods of care are available in the order listed and may be elected separately at different times Having once elected Hospice, it is not necessary for a member to elect hospice again after the initial election unless he or she revokes hospice care or is discharged from hospice care.

- Members enrolled in the West Virginia Medicaid Hospice Services may revoke hospice coverage. In that event, the remainder of that benefit period is forfeited. If the member then re-enrolls, coverage begins immediately under the next benefit period.

- If a member revokes West Virginia Medicaid Hospice Services four times, they are not eligible to enroll again.

Example: A member enrolls in hospice services on January 1. For whatever reason, he revokes his hospice coverage on February 15, after 46 days. The remainder of the 90 days of that first period is forfeited. Should circumstances lead him to enroll again even the next day, February 16, he is now in the second benefit period. If he revokes again before that 90-day period is concluded, he also forfeits the remainder of that second period. A third enrollment will be for the 60-day period. If that period is revoked, the remainder is forfeited and only the unlimited 60-day periods remain. If he elects again during an unlimited 60-day period, it will continue for as long as he lives unless he revokes the fourth time. The member who revokes West Virginia Medicaid Hospice Services four times is not eligible to enroll again.

509.5 HOSPICE ENROLLMENT

Enrollment in the West Virginia Medicaid Hospice Services Program requires the following from the three parties involved:

- **Physician** – must determine that the member has a life expectancy of 6 months or less if the illness runs its normal course and certifies that assessment in writing;

- **Hospice Provider -** must complete a plan of care, inform the enrolling member of what hospice services will be provided, document the member's informed consent, and complete a West Virginia Medicaid Hospice Election Form (HEF-01). ***(See Appendix 1).*** The provider must also inform the member how to dis-enroll from hospice care, change providers, and transfer services to another hospice;

- **Member/Legal Representative -** After explanation of hospice services, by the hospice provider, the member/legal representative must sign and date their consent on the completed HEF-01.

To complete the enrollment of the member in hospice services, the provider must furnish the member with the following:

- A copy of the completed and signed HEF-01;

- A copy of the Plan of Care upon member's and/or the member's legal representative's request, with descriptions of the nature and scope of the services to be provided, and a schedule for providing them. Also a telephone number for contacting the hospice;

- A copy of the conditions of enrollment in West Virginia Medicaid Hospice explained to the member/legal representative by the provider and signed by the member/legal representative;

- A copy of the terms of revocation explained to the member/legal representative by the provider and signed by the member/legal representative.

The member is responsible for reporting other insurance and obtaining health care that is not related to the terminal illness or disease.

509.5.1 Physician Certification

For the first 90-day election period of hospice coverage, the hospice medical director or IDT assigned physician and the attending physician (if the member has an attending physician) must certify and document that the member has a terminal illness which is defined as having a life expectancy of 6 months or less if the illness runs its normal course and their diagnosis. ***(In accordance with* 42 CFR §418.22).**

509.5.2 Physician Certification Timeline

- The hospice must obtain a copy of this written certification no later than 2 calendar days after hospice care is initiated.

  For the initial 90-day period, if the hospice cannot obtain a written certification within 2 calendar days, it must obtain oral certifications within 2 calendar days and written certification no later than 8 calendar days after the period begins *(See* **West Virginia State Plan Attachment 3.1-A** *&* **3.1-B***).*

- If these requirements are not met within the set timeline, the provider is not eligible for reimbursement of hospice services furnished before the date that written certification is obtained.

For Subsequent Recertification Periods:

A hospice physician or hospice nurse practitioner must conduct a face-to-face recertification visit for each hospice member whose total stay across all hospices is anticipated to reach 180 days. The visit must occur no more than 30 calendar days prior to the 180-day recertification. The physician/nurse practitioner must continue to visit that member no more than 30 calendar days prior to every recertification thereafter, to gather clinical findings to determine continued eligibility for hospice care ***(In accordance with* 42 CFR §418.22).**

The written narrative associated with the 180-day recertification and every subsequent recertification must include:

- Date of the member's face-to-face visit with the hospice physician or hospice nurse practitioner;

- Clinical findings to determine whether the member continues to have a life expectancy of 6 months or less.

- The hospice nurse practitioner must document and provide all clinical findings to the certifying hospice physician, signed and dated on a separate and distinct section of, or an addendum to, the recertification form and must be clearly titled.

- All certifications and recertifications must be signed and dated by the hospice physician(s) and must include the benefit period dates to which the certification or recertification applies.

Authorization is required for all hospice certifications and recertifications. Appropriate documentation must be submitted to the Utilization Management Contractor (UMC) within 8 calendar days of the member election of hospice. It is understood that due to the nature of Hospice Services, services may need to commence before the initial authorization is finalized and, in these instances, retrospective authorization will be granted for members who meet the requirements of the program.

If the hospice is not able to complete the face-to-face visit according to the above specifications, the hospice must discharge the member and Medicaid will no longer reimburse the hospice for the member's hospice services. Medicaid is not responsible for reimbursement of hospice services during the period of discharge.

When the face-to-face evaluation is completed by the hospice physician or hospice nurse practitioner, the hospice provider will be able to bill the Medicaid program for services.

509.5.3 Enrolling the Member in Hospice Care

The hospice is responsible for enrolling the member who is certified as eligible for hospice care and who gives consent to enter the program.

The provider must develop a Plan of Care designed to meet the member's individual needs. Members must be informed that by electing West Virginia Hospice Services they must **waive** Medicaid coverage of the following services if they are related to the member's terminal condition:

- Hospice care provided by a hospice other than the hospice designated by the member, unless provided under arrangements made by the designated hospice.

- Any Medicaid services that are related to treatment of the terminal condition for which hospice care was elected or of a related condition; or that are equivalent to hospice care except for services:

    a. Provided (either directly or under arrangement) by the designated hospice;

    b. Provided as room and board by a nursing facility or ICF/IID if the individual is a resident;

    c. Provided by the member's attending physician if that physician is not an employee of the designated hospice or receiving compensation from the hospice for those services; and

d. When an election period ends, the hospice discharges a member according to reasons for discharge under 42 CFR §418.26 (a thru d), or the member's waiver of other Medicaid benefits expires. Also, regular Medicaid coverage is reinstated if the member revokes hospice care for the subsequent election period. ***(In accordance with* 42 CFR §418.24 *&* §418.28*)*.**

Hospice care does not include, but is not limited to the following:

- Services furnished before or after a hospice election period;
- Services of the member's attending physician, if the attending physician is not an employee of or working under the arrangement with the hospice; or
- Medicaid services received for the treatment of an illness or injury not related to the member's terminal condition. ***(See* 42 CFR §418.402*)*.**

Once a member elects to receive West Virginia Hospice services, Medicaid will not reimburse for other Medicaid services that treat the terminal condition. However, Medicaid may reimburse for services that are required to treat conditions that are unrelated to the terminal illness.

Hospice services may be provided to children under age 21 concurrently with curative treatment. ***(In accordance with the* Affordable Care Act 2302 Concurrent Care for Children*).***

509.5.4 Informed Consent of the Member

The hospice provider must assure that the consent to enroll in Hospice Services is informed consent. An informed consent form detailing the type and scope of the care is to be given to the member or the member's representative to be read and signed.

The hospice provider must complete the Hospice Election Form HEF-01 and have the member or the member's legal representative sign and date it.

509.6 NOTIFICATION OF ENROLLMENT

The completed, signed and dated physician certification, the signed and dated HEF-01, and the signed and dated plan of care must be received by the UM Contractor (UMC) within 8 calendar days of the initiation of hospice care.

Authorization by the UMC is required for the initial and subsequent certifications. Authorization will not be approved for hospice services without appropriate enrollment documentation.

509.7 TERMINATION OF HOSPICE SERVICES

In accordance with 42 CFR §418.26, 418.28, 418.30, hospice services may be terminated for any of the following reasons:

- The member chooses to revoke hospice care;
- The hospice chooses to terminate their provision of services;
- The member no longer meets enrollment criteria;
- The member moves out of the hospice's service area;
- The member transfers to another hospice provider;
- The member's environment becomes unsafe for hospice staff; or
- The member dies.

When a member revokes hospice services or is discharged by the hospice provider, the hospice provider must send a copy of the HEF-01, with original member signature and the date of the termination of services written in the box marked Revoked, to the UM Contractor. This must be received by the UM Contractor within 8 calendar days of revocation to allow the member to resume Medicaid benefits waived upon election of hospice care. When a member is being discharged and will be in need to medication and/or medical supplies upon discharge, then the Hospice Provider must expedite the discharge election form to the UM contractor.

Also, the hospice provider must send a copy of the HEF-01 to the UMC following the death of the member with the date of death noted in the appropriate box.

509.7.1 Transfer of Member to another Hospice Provider

A member or legal representative may change the hospice provider from which hospice care is received only once in each election period. A transfer does not constitute a revocation of the election period during which the change is made. Transfers must be conducted ***in accordance with*** 42 CFR § 418.30.

509.8 BILLING AND REIMBURSEMENT

Reimbursement by the West Virginia BMS for covered hospice services will be at rates set by the Centers for Medicare and Medicaid Services (CMS) for the following 4 categories of care:

- Routine Home Care
- Continuous Home Care
- Inpatient Respite Care
- General Inpatient Care

509.8.1 Routine Home Care

Revenue Code: 0651
Service Unit: Unit = 1 Day
Service Limit: 1 unit per day

Definition of Service:

- This level of care consists of providing hospice services as described under Section 509.3, Hospice Service Requirements, except for those referring to Inpatient Care, or when the member's needs are not so intensive as to require continuous care.

- The hospice is paid the Routine Home Care rate for each day the member is under the care of the hospice and not receiving one of the other three more specialized categories of hospice care (Continuous Home Care, Inpatient Respite Care, and General Inpatient Care).

- This rate is paid without regard to the volume or intensity of routine home care services provided on any given day, and is also paid when the member is receiving hospital care for a condition unrelated to the terminal condition.

509.8.2 Continuous Home Care

Revenue Code: 0652
Service Unit: Unit = 1 hour
Service Limit: Minimum of 8 hours, up to a maximum of 24 hours a day.

Definition of Service:

- This code is billable for a minimum of 8 hours on a given day, and up to 24 hours a day. Reimbursement is based on the number of hours provided for the service in a day. Continuous home care is provided to the member during brief periods of crisis.

- Continuous home care may be provided for up to 24 hours, but these services must be predominantly nursing services. Home health aide or homemaker services may be provided in addition to nursing care.

509.8.3 Inpatient Respite Care

Revenue Code 0655
Service Unit: Unit = 1 Day
Service Limit: Up to 5 consecutive days

Definition of Service:

- An inpatient respite care day is a day on which the individual who has elected hospice care receives care in an approved facility (freestanding hospice, hospital or nursing

facility) on a short-term basis to provide respite to family or other persons who are involved in daily care of the member.

- Respite care may be provided only on an occasional basis and may not be reimbursed for more than five consecutive days at a time. ***(In accordance with 42 CFR §418.204).***

509.8.4 General Inpatient Care

Revenue Code: 0656
Service Unit: Unit = 1 Day
Service Limit: 1 unit per day

Definition of Service:

General inpatient care may be provided in an approved freestanding hospice, hospital or nursing facility. This care is usually for pain control or for acute or chronic symptom management which cannot be successfully treated in another setting.

509.9 REIMBURSEMENT PROCEDURES

- Hospice services are billed using the UB-04 paper form or electronic form 837i.
- Only one level of care under one Medicaid Revenue Code may be billed for a given day.
- Reimbursement is made for each day an eligible Medicaid member is under hospice care.
- Inpatient rates for revenue codes 655 and 656 are paid for the date of admission and all subsequent inpatient days with the exception of the date of discharge. The date of discharge will be paid at the Routine Home Care rate.
- If the member dies as an inpatient, then the date of death will be reimbursed at the inpatient rate if the inpatient care was related to the terminal illness.
- Reimbursement will be based upon the county the hospice service is rendered.

509.10 INPATIENT CARE PROVIDED DIRECTLY BY THE HOSPICE

The participating hospice that provides inpatient care directly must comply with all of the following standards for nursing, for member care, and for disaster preparedness:

- Nursing services must be provided 24 hours a day
- Each shift must provide an RN who provides direct member care; and
- Nursing care must be sufficient to meet any Plan of Care

509.11 NURSING FACILITY RESIDENTS

- West Virginia Medicaid maintains a separate program of Hospice Services for members who are residents of nursing facilities.

- West Virginia requires a Pre Admission Screening (PAS) be completed on every individual who enters a Medicaid certified nursing facility (Refer to Chapter 514, Nursing Facility Services). If a member electing hospice care is a resident of a West Virginia Medicaid certified nursing facility, the nursing facility may contract with a Medicare/Medicaid certified hospice agency to provide room and board for dually eligible members and for members who are Medicaid–only who qualify medically for both the hospice benefit and Medicaid nursing facility benefits.

- Medicare certification of a nursing facility is not a requirement of this program.

- The hospice agency must enroll with the Medicaid agency to be a provider of this benefit in nursing facilities.

- The room and board component provided by the nursing facility shall include the provision of a living space, nutrition, and ancillary services normally provided for residents.

- Ancillary services may include, but are not limited to, the basic activities of daily living, social and activity programs, laundry and housekeeping.

- The hospice provider is responsible for specialized services covered by Medicare or Medicaid including, but not limited to, medications associated with the terminal illness, assistance with care planning, and emotional support for the member and the member's family.

- The hospice must bill Medicare/Medicaid for all covered services as well as nursing facility room and board. ***(In accordance with* 42 CFR §418.112*. See* Chapter 514, Nursing Facilities*).***

- A hospice physician or hospice nurse practitioner must visit each hospice member face to face whose total stay across all hospices is anticipated to reach 180 days, no more than 30 calendar days prior to the 180-day recertification, and must continue to visit that member no more than 30 calendar days prior to every recertification thereafter. The provision applies to recertification on and after January 1, 2011. ***(In accordance with* Affordable Care Act, section 3131(b)*).***

- If the hospice is not able to complete the face to face prior to the above specifications, the hospice must discharge the individual and Medicaid will no longer reimburse the hospice for the individual's treatment or room and board. The nursing facility will need to resume billing Medicaid for the care of the individual; and

- Once the face to face evaluation is completed by the hospice physician or hospice nurse practitioner, the hospice provider may bill the Medicaid program for services, including the pass-through payment to the nursing facility for room and board.

- ***In accordance with*** **42 CFR 418.22**, the written narrative associated with the 180-day recertification and every subsequent recertification must include:

    1. Date of the member's face-to-face visit with the hospice physician or hospice nurse practitioner.

    2. Clinical findings to determine whether the member continues to have a life expectancy of 6 months or less; and

    3. The hospice nurse practitioner must document and provide all clinical findings to the certifying hospice physician, signed and dated on a separate and distinct section of, or an addendum to, the recertification form and must be clearly titled.

    4. All certifications and re-certifications must be signed and dated by the hospice physician(s) and must include the benefit period dates to which the certification or recertification applies.

The nursing facility cannot charge Medicaid a bed hold if the resident/member is under the hospice benefit. The bed hold must be contracted between the nursing facility and the approved hospice provider.

509.12 DOCUMENTATION REQUIREMENTS FOR NURSING FACILITY AUTHORIZATION

For each individual who applies for hospice coverage in a nursing facility, election of services and physician certification documentation is required. ***(Refer to*** **Chapter 514, Nursing Facility Services 514.10.8*****).*** The hospice provider must submit the following information to the UM Contractor for review:

- An agreement between the specific nursing facility and the hospice provider specifying the appropriate services each will provide to qualified members;

- Documentation to support the individual's medical necessity for each covered service;

- Financial eligibility documentation for the specific individual regarding the Medicare and the Medicaid programs.

As with hospice services provided in other settings, those provided in nursing facilities apply only to the terminal illness and related conditions. For health needs not related to the terminal diagnosis, additional West Virginia Medicaid policies and procedures are to be followed.

The authorization information must be submitted with the first claim for payment.

509.13 BILLING AND REIMBURSEMENT FOR NURSING FACILITY HOSPICE

Revenue Code: 0658
Service Unit: Unit = 1 Day
Service Limit: 1 unit per day

- The West Virginia Medicaid Program will remit to the hospice provider 95 percent of the daily rate which would have been paid to the nursing facility for care of the member had they not elected hospice coverage.

- The hospice will in turn reimburse the nursing facility for the cost of room and board, as identified in their contract.

- The amount of reimbursement will be based on the nursing facility base per diem rate with the Medicaid adjustment for the acuity of the member.

- Services must be billed on a UB-04 paper form.

- A printout of the computerized report identifying the specific case mix class of the individual must be attached.

- The hospice must mail all of the claim information to the BMS Fiscal Agent.

Providers are responsible for verifying Medicaid eligibility prior to service delivery. Failure to properly verify eligibility may result in claim denial. Hospice providers are strongly encouraged to print electronic eligibility verifications and retain them until paid.

For information concerning procedure codes and diagnosis codes, refer to **Chapter 100, General Information**.

CHAPTER 510 – COVERED SERVICES, LIMITATIONS, AND EXCLUSIONS FOR HOSPITAL SERVICES

JANUARY 12, 2006

SECTION 510.8.1

Introduction: The Bureau for Medical Services will require prior authorization beginning February 15, 2006. WVMI will begin prior authorizing services on January 16, 2006 for scheduled procedures on or after February 15, 2006.

Old Policy: All surgeries performed in place of services 22 (Outpatient Hospital) and 24 (Ambulatory Surgical Center) will require prior authorization, effective November 1, 2005.

New Policy: Certain surgeries performed in place of services 22 (Outpatient Hospital) and 24 (Ambulatory Surgical Center) will require prior authorization, effective February 15, 2006. These surgeries are listed in Attachment 3.

Change: Number 4 should read, certain surgeries performed in place of service 22 (Outpatient Hospital) and 24 (Ambulatory Surgical Center) will require prior authorization, effective February 15, 2006. The selected surgeries that require prior authorization through the BMS review contractor are listed in Attachment 3, along with the PA form that may be utilized.

Directions: Replace pages.

OCTOBER 24, 2005

SECTION 510.8.1

The outpatient surgery prior authorization review through WVMI that was to become effective November 1, 2005 has been postponed until further notice. PA for imaging services is still required as of October 1, 2005.

SEPTEMBER 28, 2005

Section 510.8.1

Introduction: Policy clarification for Critical Access Hospitals regarding diagnostic imaging PA requirements.

Introduction: Prior Authorization required for surgeries preformed in place of service 22 and 24.

Change: Critical Access Hospitals (CAHs) who have chosen encounter, as well as those who bill Fee For Service, must obtain a prior authorization for certain diagnostic imaging testing. Reimbursement for diagnostic imaging services are considered part of the encounter and cannot be billed separately. CAHs will be required to obtain a PA from WVMI and document this information in the patient's medical record for audit purposes.

Change: Effective November 1, 2005, all surgeries performed in place of services 22 (Out patient hospital) and 24 (Ambulatory Surgical Center) will require prior authorization.

Directions: Replace pages.

SEPTEMBER 1, 2005

Section 510.8.1

Introduction: Implementing changes in policy for imaging procedures effective 10/01/05.

Change: Effective 10/01/05, prior authorization will be required on all outpatient radiological services that include Computerized Tomography (CT), Magnetic Resonance Angiography (MRA), Magnetic Resonance Imaging (MRI), Positron Emission Tomography Scans (PET), and Magnetic Resonance Cholangiopancreatography (MRCP). Prior authorization requirements governing the provisions of all West Virginia Medicaid services will apply pursuant to Chapter 300 General Provider Participation Requirements, provider manual. Diagnostic services required during an emergency room episode will not require prior authorization. It is the responsibility of the ordering provider to obtain the prior authorization. Failure to obtain prior authorization will result in denial of the service; the Medicaid member cannot be billed for failure to receive authorization for these services.

Prior authorization must be obtained from West Virginia Medical Institute (WVMI) prior to the provision of the service. Failure to obtain prior authorization will result in denial of the service; the Medicaid member cannot be billed for failure to receive authorization for these services.

Directions: Replace pages.

MAY 1, 2005

Section 510.8.1

Introduction: Corrected the number of physical therapy visits to 20 from 10.

Directions: Replace this section.

Change: Replace page

Section 510.8.2

Introduction: 5th bullet - Corrected the number of physical therapy visits to 20 from 10. Added Enhanced Extracorporeal Counterpulsation (EECP), Stretta, and Cosmetic Surgery to the list of noncovered services.

Directions: Replace this section.

Change: Page

Attachment 1

Introduction: Added section relating to new condition code which allows inpatient admission to be changed to outpatient.

Directions: Insert this section.

CHAPTER 510—COVERED SERVICES, LIMITATIONS AND EXCLUSIONS FOR HOSPITAL SERVICES

TABLE OF CONTENTS

TOPIC **PAGE NO.**

CHAPTER 510–COVERED SERVICES, LIMITATIONS, AND EXCLUSIONS FOR HOSPITAL SERVICES

INTRODUCTION

The West Virginia (WV) Medicaid Program covers a comprehensive range of medically necessary medical and mental health services to diagnose and treat eligible members. Covered and authorized services must be rendered by enrolled providers within the scope of their license and in accordance with all State and Federal requirements. Any service, procedure, item, or situation not discussed in this manual must be presumed non-covered unless informed otherwise in writing by the Bureau for Medical Services (BMS).

This chapter sets forth requirements of the BMS regarding coverage, payment and processing for Hospital Services provided to eligible WV Medicaid members by acute care, psychiatric and medical rehabilitation hospitals.

Inpatient and outpatient hospital services, including tests furnished by participating hospitals, are covered only when ordered by a licensed medical practitioner for the care and treatment indicated in the management of illness, injury, or maternity care, or for the purpose of determining existence of an illness or disease. All Medicaid covered items and services must be medically necessary. The physician's order and appropriate documentation of medical necessity must be on file in the patient's record. The fact that a provider has prescribed, recommended, or approved medical care, goods, or a service, does not in itself make such care, goods or services medically necessary or a covered service. For definition of medically necessary, refer to Chapter 200, Definitions.

There must be documentation in the patient's record for all services billed to the West Virginia Medicaid Program, which substantiates the medical necessity for covered items or services. For Medicaid covered services or items requiring prior authorizations, the physician's order and documentation must be submitted prior to the provision of the service.

This Chapter outlines or describes the allowable services which may be rendered within each of the three categories of hospital providers, acute care, psychiatric, and medical rehabilitation.

510.1 DEFINITIONS

Definitions governing the provision of WV Medicaid services will apply pursuant to Chapter 200, Definitions. In addition, the following definitions apply specifically to the requirements for payment of Hospital Services as described in this chapter.

Critical Access Hospital (CAH) – Critical Access Hospital is defined in the code of federal regulations at CFR 42, Chapter 4, Section 400.2.2, as "a facility designated by the Centers for Medicare and Medicaid Services as meeting the applicable requirements of Section 1820 of the Act and of Subpart F of Part 485 of this chapter. Characteristics of critical access hospitals include:

- Special reimbursement status, consisting of 100 percent cost reimbursement as determined by Medicare fiscal intermediary (for Medicaid reimbursement methodology see Attachment 1.)

- Number of beds: Except as permitted for CAHs having swing bed agreements (with Medicare) under Section 485.645 of this chapter, the CAH maintains no more than 15 inpatient beds.
- Length of stay. The CAH provides acute inpatient care for a period that does not exceed on an annual average basis 96 hours per patient.

Eligible Medicaid Patient – An individual with a valid identification card receiving financial and/or medical assistance from the DHHR and children in foster care under Department supervision.

Regulating Agency – The unit in the Department of Health that is responsible for Medicaid certification of all participating laboratory and radiology providers in accordance with the standards set forth in Title XIX laboratory and radiology services regulations.

510.2 PROVIDER PARTICIPATION

Refer to Chapter 300 for enrollment requirements for Hospital providers.

510.3 MEMBER ELIGIBILITY

Reimbursement for medically necessary Hospital Services is available on behalf of all WV Medicaid-eligible members, subject to the conditions and limitations applicable to these services. Additional information on member eligibility is located in Chapter 400.

510.4 HOSPITAL INPATIENT SERVICES

An inpatient admission is defined as a person who has been admitted to an inpatient facility for bed occupancy for purposes of receiving inpatient hospital facility services. Inpatient care is covered under the Medicaid Program when it is reasonable and medically necessary for the diagnosis or treatment of an illness or injury, or to improve the functioning of a malformed body part. The services must be consistent with the diagnosis or treatment of the patient's condition, and must be rendered in accordance with standards of good medical practice to be considered medically necessary. Inpatient care which does not contribute meaningfully to the treatment of an illness or injury, or to improve the functioning of a malformed body part, is not covered. Nursing and other related services, such as use of hospital facilities, medical and social services, and transportation furnished by the hospital during an inpatient stay are included in the rate of reimbursement. Covered services are limited to those admissions which are certified by the Bureau's utilization management agency in accordance with the procedures and admission criteria utilized by the agency and approved by BMS. Refer to Attachment I for additional information. Additionally, admissions must be effected upon the written order of a physician who is licensed in the practice of medicine and surgery in the state in which he/she is located, and authorized to admit patients to the facility in which the service is rendered.

510.4.1 Acute Care Hospital – Inpatient Services (This category of hospital is intended to include both acute care general and critical access hospitals)

The WV Medicaid Program reimburses hospitals for medically necessary inpatient services provided to eligible members within coverage limitations in effect on the date of service. Coverage and benefit limitations may be revised periodically as necessary due to changes in Federal regulations, fiscal constraints, or WV Medicaid policies.

Covered inpatient services include general acute care admissions and critical access admissions, as well as admissions to Medicare certified distinct part psychiatric and medical

rehabilitation inpatient units. Services rendered in the distinct part psychiatric unit are covered for both children and adults. Coverage for services rendered in the distinct part rehabilitation inpatient unit is limited to children through age 20 or under age 21.

A member admitted to a psychiatric distinct part must have a mental health DSM IV diagnosis as the primary diagnosis. If during the distinct part inpatient stay, the treatment emphasis changes to, or shifts to a physical health diagnosis or condition, the hospital cannot bill the distinct part rate but must bill the appropriate DRG. In these instances the patient must be discharged from the distinct part unit and if medically necessary and appropriate and following medical necessity review and certification by the Bureau's utilization management agency, readmitted as an acute care medical admission.

Inpatient services are primarily for treatment indicated in the management of acute or chronic illness, injury, impairment, or for maternity care. The member's hospital records and the hospital's utilization review mechanism must document that the care and services rendered were medically necessary; that the services rendered could only be provided on an inpatient basis (i.e. could not be provided on an outpatient basis or in a lower level of care facility); and that the services rendered were necessary for each day of inpatient care billed to the program. Outpatient charges including observation services incurred with 24 hours of admission must be made a part of the inpatient claim.

510.4.2 Psychiatric Inpatient Facilities

Members who are admitted to distinct part psychiatric units must have an admission diagnosis of a mental illness. If however, during the course of the stay, treatment changes from psychiatric care to physical care, the hospital shall bill the appropriate DRG. These admissions will be subject to audit and cost settlement.

510.4.2.1 Inpatient Psych Facility Acute Psych Under 21

Services rendered in this setting include inpatient acute care psychiatric services for individuals under 21 (Professional services rendered to members who would be admitted to a psych under 21 facility must be billed separately under the practitioner's provider number. Those charges are not included in the facility's invoice). Such facilities may also render all of the outpatient services for which they meet applicable federal and state regulatory requirements (Outpatient services are reimbursed on a procedure specific fee for service utilizing appropriate HCPCS and CPT codes just as for outpatient services rendered in any other approved setting). Services rendered in the outpatient setting may also include partial hospitalization services in Medicaid approved Partial Hospitalization Programs, as further defined in Attachment 1. These facilities are reimbursed based on costs and are subject to audit and cost settlements.

Services rendered to Medicaid members enrolled in an HMO are not the responsibility of the HMO and must be billed to Medicaid. If the Medicaid recipient is a member of the PAAS Program, PAAS PCP referrals are not required.

510.4.2.2 Inpatient Psychiatric Residential Treatment Facility

Services rendered in this setting are available only to Medicaid eligible individuals under age 21. PRTFs may only render inpatient services, which are inclusive of any medical, pharmaceutical or psychiatric professional services rendered in the facility. PRTFs are not authorized to render

outpatient hospital services. These facilities are reimbursed based on costs and are subject to audit and cost settlements.

Services rendered to Medicaid members enrolled in an HMO are not the responsibility of the HMO and must be billed to Medicaid. If the Medicaid recipient is a member of the PAAS Program, PAAS PCP referrals are not required.

510.4.2.3 Adult Psychiatric Services

Medicaid program coverage for inpatient psychiatric services rendered to adults is limited as follows:

a. Medicaid covers such services when rendered to Medicaid eligible individuals in Medicare certified distinct part psychiatric units of acute care general hospitals when such individuals are admitted following medical necessity review and admission certification by the Bureau's utilization management contractor

b. For those individuals 65 and over who are both Medicare and Medicaid eligible, the Medicaid program provides coverage of coinsurance and deductible payments subject to Medicaid's upper payment limits for individuals admitted to facilities designated as institutes for mental disease (IMD). Psychiatric facilities classified as IMD are defined in federal regulation at CFR 42, Section 435.1009, IMD. In general, this designation includes all JACHO approved psychiatric inpatient facilities

510.4.3 Medical Inpatient Rehabilitation Facility

Services covered in this setting are medical inpatient rehabilitation services for Medicaid eligible individuals under 21, and general medical outpatient services which meet certification requirements of the Office of Facility, Licensure and Certification. These facilities are reimbursed based on costs and are subject to audit and cost settlements.

Medicaid covers inpatient rehabilitation services in facilities that are certified as rehabilitation hospitals or rehabilitation units of a general acute care hospital. The facility must also have a current provider agreement for rehabilitation services.

510.5 SERVICE LIMITS INPATIENT SERVICES

Medicaid Program coverage places limits on certain categories of facilities with regard to admission review procedures and characteristics of members they may serve. The following sections outline those limitations and program exclusions:

510.5.1 Prior Authorization Requirements For Inpatient Services

All inpatient admissions, with the exception of those related to labor and delivery, are subject to medical necessity review and certification of admission by the Bureau for Medical Services Utilization Management Agency. (See Attachment 2 for further information.)

General requirements by category of provider are as follows:

1. Acute Inpatient. Admissions to both general and critical access acute care facilities are subject to medical necessity review and preadmission certification. Retrospective review is available for admissions occurring on weekends and holidays, or at times when the utilization management agency review process is unavailable. Additionally, retrospective

review is permitted for admissions of Medicaid members whose eligibility has been determined retroactively. Retrospective review must be requested within 12 months of discharge date.

2. Admissions to Medicare certified distinct part psychiatric and rehabilitation units of acute care facilities are subject to both preadmission and continued stay review.
3. Psychiatric inpatient facility and PRTF admissions are subject to admission and continued stay review by the Bureau's utilization management contractor.
4. Inpatient Medical Rehabilitation Facility admissions are subject to both admission and continued stay review by the Bureau's utilization management contractor. Members who are inpatients, upon reaching the age of 21, may continue to receive services through age 21, as long as they continue to meet medical necessity criteria for continued stay.

510.5.2 Inpatient Non-Covered Services (Exclusions)

The following inpatient services are excluded from coverage by the West Virginia Medicaid Program:

1. Admissions which are not authorized by the Bureau's utilization management contractor in accordance with Medicaid Program Policy in effect as of the date of service.
2. Admissions other than emergency to out-of-state facilities for services which are available in-state or in border area facilities
3. Admissions for experimental or investigational procedures
4. Admissions and/or continued stays which are strictly for patient convenience and not related to the care and treatment of a patient
5. Inpatient psychiatric or medical rehabilitation facility admissions of individuals age 21 or over
6. Inpatient admission for services which could be performed in an outpatient setting

510.6 REIMBURSEMENT METHODOLOGY FOR INPATIENT SERVICES

Reimbursement methodologies for hospital services vary depending on the type of service at issue. The following describes various inpatient services and their corresponding reimbursement methodologies.

Service	Reimbursement Methodology
Inpatient Acute Care Services – General	Diagnosis related group (DRG)
Acute Care Hospital – Critical Access	Per diem rate established by Medicare fiscal intermediary
Distinct Part	Cost based
Inpatient Psych Facility – Acute Psych Under 21	Interim per diem for in-state facilities and border facilities. Must submit cost reports subject to audit and cost settlement

Inpatient Psychiatric Residential Treatment Facilities (PRTF)	Interim per diem for facilities in-state, out-of-state is percentage of charge. Must submit cost reports subject to audit and cost settlement.
Medical Inpatient Rehabilitation Facility	Per diem

510.7 ACUTE CARE HOSPITAL OUTPATIENT SERVICES

The following outlines those outpatient hospital services which are covered by the West Virginia Medicaid Program. These services are reimbursable for all Medicaid eligible members.

- **Lab, radiology, and other diagnostic procedures including pulmonary function testing**

  Medicaid coverage rules require that lab, radiology, and other diagnostic services rendered in the outpatient department of the hospital must be performed by facilities which meet all applicable professional and regulatory certification. Reimbursement may be made only for medically necessary tests ordered by a physician or other practitioner acting within the scope of his/her license for the care and treatment indicated in the management of illness, injury, impairment, maternity care, or for the purpose of determining the existence of an illness or disease process. Medicaid does not reimburse for clinical laboratory tests or radiology procedures performed for quality assurance, paternity determination, or routine drug screening. Refer to Medicaid Lab and Radiology Services Manual.

- **Emergency room services**

  Medicaid covers five levels of emergency room services. Those levels of service are further defined in Attachment 1. There are five CPT procedure codes available for billing emergency room services. The reimbursement is an all-inclusive fee, which is considered to include the following items:

  - Use of emergency room
  - Routine supplies (such as sterile dressings)
  - Minor supplies (bandages, slings, finger braces, etc.)
  - Pharmacy charges
  - Suture, catheter, and other trays
  - IV fluids and supplies
  - Routine EKG monitoring
  - Oxygen administration and O_2 saturation monitoring

Diagnostic procedures including lab and radiology may be billed separately and in addition to the emergency room services. See Attachment I for further information.

- **Outpatient surgery**

Outpatient surgery procedures are those which can safely be performed in the outpatient department of the hospital or freestanding ambulatory surgery center. Procedures in which both the surgery and recovery can be accomplished on a date of service, do not normally require the nursing services support and care of an inpatient hospital admission.

- **Radiation and cobalt therapy**
- **Chemotherapy**
- **Outpatient physical therapy**
- **Observation Services**

  Observation services are those furnished on a hospital's premises, including use of a bed and periodic monitoring by hospital nurses or other staff. The services must be reasonable and necessary to evaluate an outpatient's condition or determine the need for a possible admission to the hospital as an inpatient. Such services are covered when provided by the order of a physician and within the limitations defined in Medicaid Program policy. (See Attachment 1)

- **Partial hospitalization**

  Partial hospitalization is an outpatient hospital service rendered in a treatment setting, where an interdisciplinary program of medical therapeutic services is provided for the treatment of psychiatric and substance abuse disorders. The interdisciplinary program of medical therapeutic services may be delivered through one of the two following program formats (services may not be provided under both formats concurrently):

  Medicaid Program policy defines partial hospitalization services to include a 4 hour structured treatment program, which may be offered either during the day or evening hours. The second covered service format is a short-term intensive program for those individuals whose needs can be met through an intensive outpatient program consisting of 6 to 10 hours of group therapy per week, delivered in 2 hour per day group therapy sessions. (See Attachment 1 for further details regarding treatment scheduling and reimbursement options.)

- **Infusion Therapy**
- **Transfusion**

510.8 OUTPATIENT SERVICE LIMITATIONS

Partial hospitalization services may only be rendered in settings authorized by the Bureau for Medical Services and subject to all prior authorization requirements and limitations. Physical and occupational therapy rendered in the hospital outpatient setting are also subject to prior authorization by the Bureau's utilization management contractor. All outpatient services must be medically necessary for the diagnosis and/or treatment of an illness or injury and ordered by a physician or other practitioner acting within their licensure and/or scope of practice as defined by state law.

510.8.1 Prior Authorization Requirements For Outpatient Services

Medicaid covered outpatient services which require medical necessity review and prior authorization are:

1. Partial hospitalization
2. Physical therapy exceeding twenty (20) sessions or units per year.

Refer to Medicaid Physical and Occupational Therapy Services Manual at www.wvdhhr.org.

3. Effective 10/01/05, prior authorization will be required on all outpatient radiological services that include Computerized Tomography (CT), Magnetic Resonance Angiography (MRA), Magnetic Resonance Imaging (MRI), Positron Emission Tomography Scans (PET), and Magnetic Resonance Cholangiopancreatography (MRCP). Prior authorization requirements governing the provisions of all West Virginia Medicaid services will apply pursuant to Chapter 300 General Provider Participation Requirements, provider manual. Diagnostic services required during an emergency room episode will not require prior authorization. It is the responsibility of the ordering provider to obtain the prior authorization. Failure to obtain prior authorization will result in denial of the service; the Medicaid member cannot be billed for failure to receive authorization for these services.

   Critical Access Hospitals (CAHs) who have chosen encounter, as well as those who bill Fee For Service, must obtain a prior authorization for certain diagnostic imaging testing. Reimbursement for diagnostic imaging services are considered part of the encounter and cannot be billed separately. CAHs will be required to obtain a PA from WVMI and document this information in the patient's medical record for audit purposes.

   Prior authorization must be obtained from West Virginia Medical Institute (WVMI) prior to the provision of the service. Failure to obtain prior authorization will result in denial of the service; the Medicaid member cannot be billed for failure to receive authorization for these services.

4. Certain surgeries performed in place of service 22 (Outpatient Hospital) and 24 (Ambulatory Surgical Center) will require prior authorization, effective February 15, 2006. The selected surgeries that require prior authorization through the BMS review contractor are listed in Attachment 3 along with the PA form that may be utilized.

   (See **Attachment 2** for utilization management agency information.)

510.8.2 Non-Covered Services (Exclusions) Outpatient

The following are excluded from coverage in the outpatient service department:

- Any charges incurred by a Medicaid member who was not eligible on the date of service
- Charges related to use of hospital facilities by attending physician
- Services which are denied as not medically necessary

- Partial hospitalization services which are not authorized by the Bureau's utilization management contractor
- Physical or occupational therapy services exceeding twenty (20) sessions which are not authorized by the Bureau's utilization management contractor
- Services known as alternative therapies, including but not limited to acupressure, acupuncture, chelation therapy, massage therapy, naturopathy, reflexology, tai chi, and yoga
- Mass screenings for any condition whether for outpatients or inpatients
- Convenience items or services; items or service for the convenience of the patient or caregiver that are not related to medical care or treatment
- Infertility services
- Seat lift chairs and/or comparable items
- Prenatal sex determination services
- Maintenance services provided when a persons highest level of function has been reached and no progress is being made
- Experimental/investigational/research studies on medical or surgical procedures/services, treatment and/or therapies
- Free Service – Medicaid funds cannot be used to reimburse for services that are provided free of charge to other individuals, or groups of individuals
- Outpatient observation on the same date as discharge from inpatient facility
- Observation services billed in conjunction with therapeutic services such as chemotherapy, or labor and delivery
- Observation which extends into hospital admission
- Educational services or nutritional counseling
- Injections or visits solely for the administration of injections unrelated to a medical encounter in emergency room or observation area
- Preoperative testing performed on the same date as surgery in the hospital outpatient department, or preoperative monitoring during a normal recovery period
- Enhanced Extracorporeal Counterpulsion (EEC)
- Stretta
- Cosmetic Surgery

510.9 REIMBURSEMENT METHODOLOGY FOR OUTPATIENT SERVICES

With the exception of services rendered in a critical access hospital setting, outpatient hospital services are all reimbursed fee-for-service specific to the procedure. These services are listed below with the corresponding reimbursement method. (Additional information is in Attachment 1.)

- Lab, radiology, and other diagnostic procedures including pulmonary function testing. Reimbursement is fee-for-service/CPT code.
- Emergency room services – CPT codes, see Attachment 1

  Each of five levels of emergency room services is reimbursed using an all-inclusive fee.
- Day surgery procedures are reimbursed with CPT codes. These are surgical procedures that generally do not require admission. Payment includes usual supplies such as local anesthesia, dressing trays, and other surgical supplies.
- Radiation and cobalt therapy – Reimbursement is CPT codes.
- Chemotherapy use CPT codes
- Outpatient physical therapy – CPT codes – PA after 20 visits
- Observation services – CPT codes, see Attachment 1
- Partial hospitalization – CPT and HCPCS codes, see Attachment 1
- Infusion therapy – Reimbursed CPT codes
- Transfusion – Reimbursed CPT codes
- Casting – Reimbursed CPT codes

510.10 MANAGED CARE

If a Medicaid recipient is a member of an HMO, the HMO is responsible for the services in this manual, excluding the behavioral health services. Prior authorization requirements of the HMO must be followed prior to rendering the service. If the recipient is a member of the PAAS Program, a referral from the PCP must be obtained prior to rendering the service, excluding behavioral health services, and Medicaid prior authorization requirements must be followed. If the requirements of the MCO/PAAS are not followed, Medicaid will not reimburse for services rendered.

510.11 INTERFACILITY TRANSPORTS VIA AMBULANCE

Ambulance transportation from one hospital to a more distant hospital must be for specialized care that is not available at the sending facility. In addition, the patient's current medical condition must meet the medical necessity criteria established in Chapter 524 of the Transportation Services Provider Manual.

Reimbursement for same day, round trip transportation by ambulance for services not available at sending facility is the responsibility of the sending facility, not the Medicaid member or Program. The hospital or Medicaid member requesting ambulance transport is responsible for reimbursing the ambulance agency if the reason for transport does not meet the criteria listed above.

510.12 MATERNITY RELATED SERVICES

A newborn child whose mother is Medicaid eligible at the time of birth, and who resides with the mother, is eligible for Medicaid services up to 1 year from the date of birth. Whether or not the mother is on Medicaid, the service must be billed with the newborn's Medicaid identification number. Payment is determined by DRG for maternity related services.

For managed care members, the managed care entity is responsible for claims incurred by a newborn. The MCO responsible is the one the mother was enrolled in at the time of the birth. The MCO is responsible for the newborn up to 2 months after birth.

SPECIAL COVERAGE CONSIDERATIONS
AND BILLING INSTRUCTIONS
PAGE 1 OF 16

WEST VIRGINIA MEDICAID PROGRAM HOSPITAL REGULATIONS

MEDICAID COVERAGE FOR OUTPATIENT PARTIAL HOSPITALIZATION PROGRAMS

I. SERVICE DESCRIPTION

Partial hospitalization is an outpatient hospital service rendered in a treatment setting, where an interdisciplinary program of medical therapeutic services is provided for the treatment of psychiatric and substance abuse disorders. The interdisciplinary program of medical therapeutic services may be delivered through any one of the following program formats (services may not be provided under multiple program formats concurrently):

1. Day programming, which must provide at a minimum, twenty (20) hours of scheduled treatment, delivered in sessions of 4 hours duration and extending over a minimum of five (5) days per week; or

2. Evening hours programming must provide a minimum of sixteen (16) hours of scheduled programming, extending over a minimum of four (4) days per week; or

3. A short term intensive program for those individuals whose needs can be met through an intensive outpatient program consisting of six to ten hours of group therapy per week, delivered in two (2) hour per day group therapy sessions.

   Some flexibility in billing is made possible through the availability of an abbreviated treatment session procedure code. The abbreviated treatment session is a one (1) hour unit of service limited to a maximum of three (3) units per date of service. This one (1) hour service unit may be billed for individuals who have been approved for either a four (4) hour day or evening programming or the two (2) hour short term intensive program in instances when the patient is unable to complete the full four (4) hour or two (2) hour treatment session. This abbreviated treatment session is not intended to replace either the four (4) hour day or evening program, or the two (2) hour intensive outpatient modality. It is intended only for use in those instances when the patient is unable to complete either a four (4) hour evening or day program, or a two (2) hour intensive outpatient session. It may not be billed in addition to or with either the evening/day program or the intensive outpatient procedure code.

II. PROVIDER ELIGIBILITY

Partial hospitalization programs may be operated by psychiatric acute inpatient facilities and acute care general hospitals with a Medicare certified distinct part substance abuse and/or psychiatric unit, which is accredited by the Joint Commission for Accreditation of Health Care Organizations (JCAHO). Additionally, the partial hospitalization program must meet the standards and guidelines for such programs as defined by a national accreditation or standard setting organization recognized by the West Virginia Medicaid Agency.

III. PROGRAM COVERAGE AND LIMITATIONS

All partial hospitalization services require medical necessity review and prior authorization through the Bureau's utilization management contractor. Services may not exceed 40 units in a calendar year.

IV. REIMBURSEMENT RATES

Both the twenty (20) hour per week day program, and the sixteen (16) hour per week evening program, will be reimbursed on a per diem basis, at the rate of $125.00 per day, thirty (30) days per individual per calendar year. The intensive outpatient Partial Hospitalization Units Program, which consists of three (3) to five (5) two hour group sessions (units) per week, will be reimbursed at the rate of $50.00 per session.

The abbreviated treatment session one (1) hour service unit will be reimbursed at the rate of $25.00 per one (1) hour unit, to a maximum of three (3) units for a date of service. This procedure may not be billed in combination with any other treatment modality for that date of service.

Services must be reported using CPT codes as follows:

Partial Hospitalization, per diem (Minimum - 4 hours)	H0035
Partial Hosp. Intensive Group Therapy (two hour session)	90853
Partial Hosp. Treatment Session, per hour (maximum - 3 hours)	H0015

The Medicaid Program will not be responsible for reimbursement of any services provided prior to issuance of an authorization, nor for any dates of service which exceed the authorization.

WEST VIRGINIA MEDICAID PROGRAM

COVERAGE BARIATRIC SURGERY PROCEDURES

The West Virginia Medicaid Program covers bariatric surgery procedures subject to the following conditions:

- Medical Necessity Review and Prior Authorization

The patient's primary care physician or the bariatric surgeon may initiate the medical necessity review and prior authorization by submitting a request, along with all the required information, to the West Virginia Medical Institute (WVMI), 3001 Chesterfield Place, Charleston, West Virginia 25304. The West Virginia Medical Institute (WVMI) will perform medical necessity review and prior authorization based upon the following criteria:

1. A Body Mass Index (BMI) greater than 40 must be present and documented for at least the past 5 years. Submitted documentation must include height and weight.

2. The obesity has incapacitated the patient from normal activity, or rendered the individual disabled. Physician submitted documentation must substantiate inability to perform activities of daily living without considerable taxing effort, as evidenced by needing to use a walker or wheelchair to leave residence.

3. Must be between the ages of 18 and 65. (Special considerations apply if the individual is not in this age group. If the individual is below the age of 18, submitted documentation must substantiate completion of bone growth.)

4. The patient must have a documented diagnosis of diabetes that is being actively treated with oral agents, insulin, or diet modification. The rationale for this criteria is taken from the Swedish Obese Subjects (SOS) study, *International Journal of Obesity and Related Metabolic Disorders*, May, 2001.

5. Patient must have documented failure at two attempts of physician supervised weight loss, attempts each lasting six months or longer. These attempts at weight loss must be within the past two years, as documented in the patient medical record, including a description of why the attempt failed.

6. Patient must have had a preoperative psychological and/or psychiatric evaluation within the six months prior to the surgery. This evaluation must be performed by a psychiatrist or psychologist, independent of any association with the bariatric surgery facility, and must be specifically targeted to address issues relative to the proposed surgery. A diagnosis of active psychosis; hypochondriasis; obvious inability to comply with a post operative regimen; bulimia; and active alcoholism or chemical abuse will preclude approval.

7. The patient must demonstrate ability to comply with dietary, behavioral and lifestyle changes necessary to facilitate successful weight loss and maintenance of weight loss. Evidence of adequate family participation to support the patient with the necessary lifelong lifestyle changes is required.

8. Patient must be tobacco free for a minimum of six months prior to the request.

9. Contraindications: Three (3) or more prior abdominal surgeries; history of failed bariatric surgery; current cancer treatment; Crohn's disease; End Stage Renal Disease (ESRD); prior bowel resection; ulcerative colitis; history of cancer within prior 5 years that is not in remission; prior history of non-compliance with medical or surgical treatments.

10. Documentation of a current evaluation for medical clearance of this surgery performed by a cardiologist or pulmonologist, must be submitted to ensure the patient can withstand the stress of the surgery from a medical standpoint.

PHYSICIAN CREDENTIALING REQUIREMENTS

In order to be eligible for reimbursement for bariatric surgery procedures, physicians must:

- Provide evidence of credentials at an accredited facility to perform gastrointestinal and biliary surgery.
- Provide documentation that the physician is working within an integrated program for the care of the morbidly obese that provides ancillary services such as specialized nursing care, dietary instruction, counseling, support groups, exercise training and psychological/psychiatric assistance as needed.
- Provide assurances that surgeons performing these procedures will follow the guidelines established by the American Society for Bariatric Surgery including:
    - Credentials to perform open and laporoscopic bariatric surgery
    - Document at least 25 open and/or laporoscopic bariatric surgeries within the last three years

PHYSICIAN PROFESSIONAL SERVICES

Professional services which will be required of the physician performing bariatric surgery include the surgical procedure, the 90-day global post-operative follow-up, and a 12 month assessment period which includes the following: medical management of the patient's bariatric care, nutritional and personal lifestyle counseling, and a written report at the end of the 12 month period consisting of: an assessment of the patient's weight loss to date, current health status and prognosis, and recommendations for continuing treatment. That 12 month assessment report must be submitted to the patient's attending or primary care physician, as well as to the Bureau for Medical Services.

While the bariatric surgeon's association with the patient may end following the required 12 month follow-up, the patient's continuing care should be managed by the primary care or attending physician throughout the patient's lifetime.

REIMBURSEMENT:

Hospital

Participating hospitals will be reimbursed for approved admissions through the DRG reimbursement methodology.

The hospital must be a facility in which the procedures are performed on a regular basis, and that has the proper equipment and appropriately trained staff for this specialized surgery, as outlined by the American College of Surgeons for facilities performing bariatric surgery . WVMI reserves the right to deny the request based on the appropriateness of the facility involved.

Physicians

The physician performing the bariatric surgery procedure will be reimbursed through the existing RBRVS payment methodology for the surgical procedure. Reimbursement includes

a post-operative follow-up for the global period of 90 days. For the remainder of the required 12 month follow-up period and assessment, the bariatric surgeon may submit claims using the appropriate evaluation and management procedure code. After completion of the required 12 month evaluation period, the patient may be followed-up and medically managed either by the surgeon or primary care physician utilizing appropriate E & M procedure codes.

CPT Codes/Covered Procedures

43842 Gastric restrictive procedure, without gastric bypass, for morbid obesity; vertical-banded gastroplasty.

43843 Gastric restrictive procedure, without gastric bypass, for morbid obesity; other than vertical-banded gastroplasty.

43846 Gastric restrictive procedure, with gastric bypass for morbid obesity; with short limb (less than 100 cm) Roux-en-Y gastroenterostomy.

43847 Gastric restrictive procedure, with gastric bypass for morbid obesity; with small intestine reconstruction to limit absorption.

43848 Revision of gastric restrictive procedure for morbid obesity (separate procedure). (This is only for correction of serious complications caused by the procedure within the first 6 months postoperatively, and is not meant to indicate that a patient can have a second procedure due to failure to lose weight from a prior procedure.)

Only one procedure will be covered per lifetime. Those failing to lose weight from a prior procedure will not be approved for a second one.

Non-Covered Procedures

The following procedures will not be covered by West Virginia Medicaid Program:

A. Mini-gastric bypass surgery

B. Gastric balloon for treatment of obesity

C. Laparoscopic adjustable gastric banding

INPATIENT ADMISSION CHANGED TO OUTPATIENT

I. General Information

A. Background

The Center for Medicare and Medicaid Services (CMS) has issued directions on how to bill when a physician orders a member to be admitted to an inpatient bed, but upon reviewing the case later, the hospital's utilization review committee determines that an inpatient level of care does not meet the hospital's or State Medicaid Utilization Management's admission criteria.

For these purposes, CMS implemented a condition code obtained from the National Uniform Billing Committee (NUBC):

> Condition Code 44 - - Inpatient admission changed to outpatient – For use on outpatient claims only, when the physician ordered inpatient services, but upon internal utilization review performed before the claim was originally submitted, the hospital determined that the services did not meet its or Medicaid's Utilization Management inpatient criteria.

B. Policy

1. In cases where a hospital utilization review committee determines that an inpatient admission does not meet inpatient criteria, the hospital may change the member's status from inpatient to outpatient and submit an outpatient claim (TOBs 13x, 85x) for medically necessary Medicaid covered services that were furnished to the member, provided all of the following conditions are met:

   a. The hospital has not submitted a claim to Medicaid for the inpatient admission;

   b. A physician concurs with the utilization review committee's decision; and

   c. The physician's concurrence with the utilization review committee's decision is documented in the patient's medical record.

2. When the hospital has determined that it may submit an outpatient claim according to the conditions described above, the <u>entire</u> episode of care should be treated as though the inpatient admission never occurred and should be billed as an outpatient episode of care.

3. When the hospital submits a 13x or 85x bill for services furnished to a member whose status was changed from inpatient to outpatient, the hospital is required to report Condition Code 44 in one of Form Locators 24-30, or in the ANSIX12N 837 I in Loop 2300, HI segment, with qualifier BG, on the outpatient claim.

OUTPATIENT BILLING
SURGERY, RECOVERY, OBSERVATION,
AND EMERGENCY DEPARTMENT

The following information defines the billing methodology for hospital based outpatient surgery, recovery, observation, partial hospitalization and Emergency Department visits.

BACKGROUND:

Surgical procedures must be billed with the appropriate CPT or HCPCS code and revenue code. Surgical procedures previously reported using W1546, W1547 and W1548 must now be reported using the specific CPT Code for the service. Units are reported in fifteen (15) minute time increments. Charges and total time units for the procedure(s) must be rolled to the primary, most complex procedure and billed on one line. If you wish to report multiple procedures, bill all additional lines with zero units and zero charges. The maximum number of payable units is 16, but several procedures, including those previously billed with W codes, allow fewer units. The maximum rate is one hundred ninety-six dollars ($196.00) per unit.

Appropriate Revenue codes for billing out patient surgical procedures (procedure codes 10021 through 69979) are:

- 036X Operating Room Services
- 0391 Blood Administration (36430 – 36460)
- 045X Emergency Room
- 049X Ambulatory Surgical Care
- 051X Clinic
- 072X Labor Room/Delivery (59400 – 59899)
- 075X Gastro – Intestinal Services (Endoscope Procedures)
- 079X Extra Corporeal Shock Therapy

Some procedures in the surgical range are divided into technical and professional components (e.g. 59025 Fetal non-stress test) and must be billed with the TC modifier.

Recovery must be billed with Revenue Code 710. Payment will be made based on the combination of Revenue Code and units billed. Units are reported in fifteen (15) minute time increments. The maximum units allowed are twenty-four (24). For minor procedures and those not requiring anesthesia the billing of recovery is not appropriate. The rate is sixty dollars and ninety cents ($60.90) per unit. No procedure code is required.

Observation

Observation is billed using Revenue Codes 760 and 762 and time units reported in one (1) hour increments. The maximum number of units allowed for an episode of care is 48. The rate is ten dollars ($10.00) per unit (hour).

Observation is defined as, “The use of a bed and periodic monitoring, by hospital nursing or other staff which are reasonable and necessary, to evaluate an outpatient’s condition to determine the need for inpatient admission.”

The criteria for observation services include the following basic provisions:

- Observation services are covered only upon written order of a physician. This order must document the medical necessity for the services and is retained as part of the patient’s medical record. Documentation requirements for admission to observation are essentially the same as for inpatient admission; however the medical necessity criteria are less stringent.
- Observation does not require prior authorization.
- Coverage of observation may not exceed 48 hours.
- Charges for observation services which result in an inpatient admission are deemed to be part of the admission and not separately billable.
- Ancillary services, laboratory, x-ray and other diagnostic procedures, performed during the observation period, may be billed separately.
- Observation services are appropriate for labor and delivery monitoring when the medical necessity criteria are met.

Emergency Department Services

Emergency Department services must be reported using CPT codes as follows:

Minimal ER Service	99281
Brief ER Service	99282
Intermediate ER Service	99283
Extended ER Service	99284
Emergent ER Service	99285

The following definitions and descriptions are representative of the treatment provided at various levels within the Emergency Department. The specific criteria are intended as guidelines for the determination of charges.

Minimal

General Description:

The individual’s chief complaint upon presentation is minimal. That is, the individual requires only the most minimal treatment or could go without treatment and present little affect to his/her general health.

Specific Requirements:

1. Multiple Trauma/Surgical

    A. Cleansing of the wound or band-aide therapy
    B. Sprains or strains requiring only advice or elastic wrap
    C. No instrument trays required

2. Medical

    A. Medication orders received by telephone prior to patient's arrival
    B. Minimal physician examination
    C. No instrument trays required

3. OB-GYN

    A. Individual arrives in the Emergency Department for a consultation with their private physician
    B. No instrument trays required

4. Behavioral Medicine

    A. Individual requires a simple interview only (no medication)

Brief

General Description:

This individual requires treatment; however, treatment could possibly be delayed 24 hours with little effect to his/her general condition. Individuals in this classification rarely require admission to the hospital.

Specific Requirements:

1. Multiple Trauma/Surgical

    A. Simple orthopedic injuries requiring splints, slings, crutches, etc.
    B. Simple lacerations not requiring sutures

C. First degree burns

D. Minor eye injuries, including corneal abrasions

E. Post operative complications not requiring hospital admission

2. Medical

A. Medical evaluation without intravenous therapy or medication

B. Urinary tract infections requiring catheterization

C. Evaluation of sore throat with medication dispensed

D. Evaluation of headache with medication

E. Evaluation of neck vein distention without intravenous therapy/medication administration

F. Allergic reaction requiring only oral or injectable medication

G. Evaluation of conjunctivitis

3. OB-GYN

A. Obstetrical evaluation which may include urinary catheterization or vaginal exam

B. Evaluation of simple pelvic inflammatory disease

4. Behavioral Medicine

A. Individual requires a simple interview with medication administration

Intermediate

General Description:

This individual requires medical intervention today in order to prevent an impact on his/her general well-being. Oxygen and/or intravenous therapy may be required; however, hospital admission is indeterminate. Extensive monitoring is not required.

Specific Requirements:

1. Multiple Trauma/Surgical:

A. Minor lacerations requiring suturing

B. Simple fractures reduced and cast within the confines of the Emergency Department

C. Orthopedic injuries requiring major splinting

D. Partial thickness burns less than 20% body surface are that do not require follow-up

E. Removal of foreign body requiring incision

2. Medical

A. Evaluation of renal calculus requiring intravenous therapy

B. Dehydration requiring fluid replacement

C. Evaluation of simple chest pain not requiring cardiac monitoring or intravenous therapy

D. General medical evaluation requiring medication administration and/or intravenous therapy

E. Evaluation of minor GI bleeding requiring aspiration of gastric contents

F. Evaluation and monitoring of potential seizure activity

3. OB-GYN

A. Evaluation of pelvic inflammatory disease requiring multiple vaginal examinations and/or intravenous therapy and medication administration

B. Incision and drainage of Bartholin cyst

C. Removal of foreign body

4. Behavioral Medicine

A. Drug overdosage requiring induced emesis and not more than one liter of intravenous fluid administration

B. Evaluation and uncomplicated admission to a state psychiatric or other similar facility

Extended

General Description:

The individual presents to the Emergency Department with an injury or illness/disease process requiring prompt medical evaluation and intervention, the result of which is usually admission to the hospital.

Specific Requirements:

1. Multiple Trauma/Surgical

A. Requires periodic vital signs, neurological evaluations, or cardiac monitoring

B. Lacerations requiring major suturing

C. Partial thickness burns greater than 20% body surface area

D. Motor vehicle crash requiring evaluation but on invasive diagnosis or therapeutic measures except intravenous fluid administration

2. Medical

A. G.I. Bleeding requiring fluid replacement

B. Medical evaluation requiring cardiac monitoring

C. Evaluation and treatment of epiglottitis

D. Lumbar puncture for diagnostics

E. Evaluation and treatment of altered states of consciousness without other injury

3. OB-GYN

A. Evaluation and treatment of the following:

1) Profuse vaginal bleeding

2) Ectopic pregnancy

3) Placenta previa

4) Septic shock

B. Delivery in the Emergency Room

C. Rape examination

4. Behavioral Medicine

A. Individuals requiring suicidal or homicidal precautions

B. Individuals presenting as disruptive enough to require physical restraint and/or observation by the security department

C. Drug overdose requiring gastric lavage and intravenous therapy

Emergent

General Description:

The individual presents with an injury or disease process significant enough as to require immediate evaluation and intervention in order to prevent continued deterioration.

Specific Requirements:

1. Multiple Trauma Surgery
   - A. Individuals presenting with moderate shock requiring intravenous fluid and/or blood replacement
   - B. Trauma team activations that require no invasive therapeutic and/or diagnostic procedures (excluding urinary catheterization)
   - C. Individuals presenting with significant neurologic insult or injury

2. Medical
   - A. G.I. Bleeding requiring blood replacement and/or endoscopy performed in the Emergency Department for evaluation
   - B. Evaluation of chest pain requiring cardiac monitoring and intravenous nitroglycerin therapy
   - C. Cardiac arrest requiring CPR of less than 30 minute duration
   - D. Individuals presenting with chronic obstructive pulmonary disease requiring endotracheal intubation and complex intravenous and medication therapy

3. Behavioral Medicine
   - A. Drug overdose or suicide attempt requiring resuscitation but without CPR

Payment for two (2) Emergency Department visits on the same day, to the same facility, for the same problem is not allowed. When more than one visit occurs in a day, the charges must be rolled to the highest level appropriate to the visits. To request special consideration, submit the claim on paper with documentation to support the uniqueness of the visits for review to:

BMS Exception Review

350 Capitol Street, Room 251

Charleston, WV 25301-3707

Charges for surgical procedures, diagnostic procedures, casting supplies and certain drugs may be billed separately. Unusual and/or high cost drugs and supplies may be covered by exception following review of documentation. Such requests should be addressed as above.

ORGAN TRANSPLANT SERVICES

WV Medicaid covers certain types of organ transplants performed in a Medicare-approved transplant facility.

Organ transplant services are covered when generally considered safe, effective, and medically necessary when no alternative medical treatment as recognized by the medical community is

available. The intended transplant must be performed to manage a disease consistent with recognized standards in the medical community Investigational, research, or experimental procedures are not covered.

Member selection criteria are based on critical medical need for transplantation and a maximum likelihood of successful clinical outcome. All other medical and surgical therapies that might be expected to affect short-and long-term survival must have been tried or considered. At a minimum, member selection criteria include the following:

- Current medical therapy has failed and the member has failed to respond to appropriate therapeutic management
- The member is not in an irreversible terminal state
- The transplant is likely to prolong life and restore a range of physical and social function to activities of daily living

Prior authorization is required for all transplants. BMS' contracted agent reviews requests for prior authorization.

The following types of transplants are covered with prior authorization:

- Heart Transplant
- Bone Marrow Transplant
- Adult Liver Transplant
- Pediatric Liver Transplant
- Kidney Transplant
- Pancreas/Kidney Transplant
- Lung Transplant – single and double
- Heart/Lung Transplant
- Small Intestine Transplant
- Cornea

Transplants are not covered when two of them are performed together, except under the following circumstances:

- If the primary organ defect caused damage to a second organ and transplant of the primary organ will eliminate the disease process
- If the damage to the second organ will compromise the outcome of the transplant of the primary organ, multiple organ transplantation may be considered

Reimbursement for the hospital admission in which the transplant is performed is standard DRG reimbursement with a maximum or a cap of $75,000. Additionally, the hospital will be reimbursed the organ procurement cost at the CORE standard organ procurement cost for each category of organ plus any additional transportation cost associated with the organ acquisition. Donor cost, if not reimbursed by the donors insurance, may be reimbursed by the Medicaid Program under the Medicaid eligible members ID number.

CRITICAL ACCESS HOSPITAL OUTPATIENT REIMBURSEMENT

The outpatient component of critical access reimbursement is per diem as determined by Medicare fiscal intermediary. Claims must be filed on the UB-92 claim form or the ASC X12N 837 (004010X096A1) electronic claim format utilizing procedure code T1015, bill type 851, and appropriate revenue code.

CAH/Medicaid Reimbursement of Title XVIII Medicare Crossovers:

Medicare crossover claims must be submitted on paper with a copy of the Medicare EOB attached. It is necessary that CAHs submit claims to Medicaid, because the Medicare fiscal intermediaries which process CAH claims do not cross over those claims automatically to Medicaid.

Cost Reporting:

Critical Access Hospital (CAH) reimbursement is subject to audit and year-end reconciliation to cost. The reconciliation is performed by an accounting firm, employed by the Bureau for Medical Services. The information utilized in the calculation of cost settlements are the Medicare cost report and Medicaid Program encounter data from claims history.

PRIOR AUTHORIZATION
PAGE 1 OF 2

PRIOR AUTHORIZATION

The utilization management contractor which performs medical necessity review and prior authorization of services for the Bureau for Medical Services is the West Virginia Medical Institute (WVMI).

The West Virginia Medical Institute maintains a website, http://www.wvmi.org/Priorauthcriteria.asp, which contains information regarding procedures for requesting prior approval, as well as criteria for all the different services for which they perform review for the Bureau for Medical Services. It also includes contact names and telephone numbers for key individuals and functions performed for BMS by WVMI.

If you have problems accessing the website or for some reason are unable to obtain information needed electronically, you may contact WVMI by telephone at (304) 346-9167 or 1-800-982-6334.

17310	Mohs any stage > 5 spec each	X	X
19140	Mastectomy for gynecomastia	X	
19180	Prophylactic, simple, complete	X	
19182	Mastectomy, subcutaneous	X	
19316	Mastopexy	X	
19318	Reduction mammaplasty	X	
19324	Mammaplasty, augmentation; without prosthetic implant	X	
19325	Mammaplasty, augmentation; with prosthetic implant	X	
19328	Removal intact mammary implant	X	

19330	Removal mammary implant material	X	
19340	Immediate insertion breast prosthesis after reconstruction	X	
19342	Delayed breast prosthesis	X	
19350	Nipple/areola reconstruction	X	
19355	Correction of inverted nipples	X	
19357	Breast reconstruction, immediate or delayed, with tissue expander, including subsequent expansion	X	
19361	Breast reconstruction with lat. flap	X	
19364	Breast reconstruction with free flap	X	
19366	Breast reconstruction other technique	X	
19367	Breast reconsturction with TRAM	X	
19368	with microvascular anastaomosis	X	
19369	with TRAM double pedicle	X	
19370	Open periprosthetic capsulotomy, breast	X	
19371	Periprosthetic capsulectomy, breast	X	
19380	Revision of reconstructed breast	X	
19396	Prep for custom implant	X	
19499	Unlisted procedure, breast	X	
21060	Meniscectomy TMJ (<21)	X	
21141	Reconstruction midface, LeFort I; single piece, segment movement in any direction (e.g., for Long Face Syndrome), without bone graft	X	
21142	Reconstruction midface, LeFort I; two pieces, segment movement in any direction, without bone graft	X	
21143	Reconstruction midface, LeFort I; three or more pieces, segment move in any direction, without bone	X	
21145	Reconstruction midface, LeFort I; single piece, segment movement in any direction, requiring bone grafts (includes obtaining autografts)	X	
21146	Reconstruction midface, LeFort I; two pieces, segment movement in any direction, requiring bone grafts (includes obtaining autografts) (e.g., ungrafted unilateral alveolar cleft)	X	
21147	Reconstruction midface, LeFort I; three or more pieces, segment move in any direction, requiring bone grafts (includes obtaining autografts) (e.g., ungrafted bilateral alveolar cleft or multiple osteotomies)	X	
21150	Reconstruction midface, LeFort II; anterior intrusion (e.g., Treacher-Collins Syndrome)	X	
21151	Reconstruction midface, LeFort II; any direction, requiring bone grafts (includes obtaining autografts)	X	
21154	Reconstruction midface, LeFort III (extracranial), any type, requiring bone grafts (includes obtaining autografts); without LeFort I	X	
21155	Reconstruction midface, LeFort III (extracranial), any type, requiring bone grafts (includes obtaining autografts) with LeFort I	X	
21159	Reconstruction midface, LeFort III (extra and intracranial) with forehead advancement (e.g., mono bloc) requiring bone grafts (includes obtaining autografts); without LeFort I	X	
21160	Reconstruction midface, LeFort III (extra and intracranial) with forehead advancement (e.g., mono bloc) requiring bone grafts (includes obtaining autografts); with LeFort I	X	
21172	Reconstruction superior-lateral orbital rim and lower forehead, advancement or alteration, with or without grafts (includes obtaining autografts)	X	
21175	Reconstruction, bifrontal, superior-lateral orbital rims and lower forehead, advancement or alteration (e.g., plagiocephaly, trigonocephaly, brachycephaly), with or without grafts (includes obtaining autografts)	X	
21179	Reconstruction, entire or majority of forehead and/or supraorbital rims; with grafts (allograft or prosthetic material)	X	
21180	Reconstruction, entire or majority of forehead and/or supraorbital rims; with autograft (includes obtaining grafts)	X	

21188	Reconstruction midface, osteotomies (other than LeFort type) and bone grafts (includes obtaining autografts)	X	
21193	Reconstruction of mandibular rami, horizontal, vertical, C, or L osteotomy; without bone graft	X	
21194	Reconstruction of mandibular rami, horizontal, vertical, C, or L osteotomy; with bone graft (includes obtaining graft)	X	
21195	Reconstruction of mandibular rami and/or body, sagittal split; without internal rigid fixation	X	
21196	Reconstruction of mandibular rami and/or body, sagittal split; with internal rigid fixation	X	
21198	Osteotomy, mandible, segmental	X	
21199	Osteotomy, mandible, segmental; with genioglossus advancement	X	
21206	Osteotomy, maxilla, segmental (e.g., Wassmund or Schuchard)	X	
21208	Osteoplasty, facial bones; augmentation (autograft, allograft, or prosthetic implant)	X	
21209	Osteoplasty, facial bones; reduction	X	
21210	Graft, bone; nasal, maxillary or malar areas (includes obtaining graft)	X	
21215	Graft, bone; mandible (includes obtaining graft)	X	
21235	Graft; ear cartilage, autogenous, to nose or ear (includes obtaining graft)	X	
21240	Arthroplasty, temporomandibular joint (TMJ), with or without autograft (includes obtaining graft) for <21 years.	X	
21240	Reconstruction of jaw joint	X	
21242	Arthroplasty, temporomandibular joint (TMJ), with allograft for <21 years	X	
21242	Reconstruction of jaw joint	X	
21243	Arthroplasty, temporomandibular joint (TMJ), with prosthetic joint replacement for <21 years	X	
21243	Reconstruction of jaw joint	X	
21244	Reconstruction of mandible, extraoral, with transosteal bone plate (e.g., mandibular staple bone plate)	X	
21245	Reconstruction of mandible or maxilla, subperiosteal implant; partial	X	
21246	Reconstruction of mandible or maxilla, subperiosteal implant; complete	X	
21247	Reconstruction of mandibular condyle with bone and cartilage autogra fts (includes obtaining grafts) (e.g. for hemifacial microsomia)	X	
21248	Reconstruction of mandible or maxilla, endosteal implant (e.g., blade, cylinder); partial	X	
21249	Reconstruction of mandible or maxilla, endosteal implant (e.g., blade, cylinder); complete	X	
21270	Malar augmentation, prosthetic material	X	
21280	Medial canthopexy (separate procedure)	X	
21282	Lateral canthopexy	X	
21299	Unlisted craniofacial and maxillofacial procedure	X	
21310	Treatment of nose fracture	X	
21315	Treatment of nose fracture	X	
21320	Treatment of nose fracture	X	
21325	Treatment of nose fracture	X	
21330	Treatment of nose fracture	X	
21335	Treatment of nose fracture	X	
21499	Unlisted musculoskeletal procedure, head	X	
21685	Hyoid myotomy and suspension	X	
21740	Reconstructive repair of pectus excavatum or carinatum; open	X	
21742	Reconstructive repair of pectus excavatum or carinatum; minimally invasive approach (Nuss procedure) without thoracoscopy	X	
21743	Reconstructive repair of pectus excavatum or carinatum; minimally invasive approach (Nuss procedure) with thoracoscopy	X	
22520	Percutaneous vertebroplasty, one vertebral body, unilateral or bilateral injection; thoracic	X	

22521	Percutaneous vertebroplasty, one vertebral body, unilateral or bilateral injection; lumbar	X	
22522	Each additional thoracic or lumbar vertebral body (listed separately in addition to code for primary procedure	X	
22523	Percutaneous vertebroplasty augmentation, including cavity creation (fracture reduction and bone biopsy included when performed) using mechanical device, one vertebral body, unilateral or bilateral cannulation (eg, Kyphoplasty); thoracic	X	
22524	Percutaneous vertebroplasty augmentation, including cavity creation (fracture reduction and bone biopsy included when performed) using mechanical device, one vertebral body, unilateral or bilateral cannulation (eg, Kyphoplasty); lumbar	X	
22525	Percutaneous vertebroplasty augmentation, including cavity creation (fracture reduction and bone biopsy included when performed) using mechanical device, one vertebral body, unilateral or bilateral cannulation (eg, Kyphoplasty); each additional thoracic or lumbar vertebral body (listed separately in addition to code for primary procedure)	X	
22899	Unlisted procedure, spine (to be used for kyphoplasty with dates of service prior to 01/01/2006)	X	
23412	Release shoulder joint	X	
23415	Drain shoulder lesion	X	
23420	Drain shoulder bursa	X	
23450	Exploratory shoulder surgery	X	
23455	Biopsy shoulder tissues	X	
23460	Biopsy shoulder tissues	X	
23462	Removal of shoulder lesion	X	
23470	Reconstruct shoulder joint	X	
23472	Reconstruct shoulder joint	X	
24351	Release elbow joint	X	
24352	Biopsy arm/elbow soft tissue	X	
24354	Biopsy arm/elbow soft tissue	X	
24356	Remove arm/elbow lesion	X	
24360	Reconstruct elbow joint	X	
24361	Reconstruct elbow joint	X	
24362	Reconstruct elbow joint	X	
24363	Replace elbow joint	X	
24365	Reconstruct head of radius	X	
24366	Reconstruct head of radius	X	
25000	Incision of tendon sheath	X	
25001	Incise flexor carpi radialis	X	
25111	Remove wrist tendon lesion	X	
25112	Reremove wrist tendon lesion	X	
25332	Revise wrist joint	X	
25441	Reconstruct wrist joint	X	
25442	Reconstruct wrist joint	X	
25443	Reconstruct wrist joint	X	
25444	Reconstruct wrist joint	X	
25445	Reconstruct wrist joint	X	
25446	Wrist replacement	X	
25447	Repair wrist joint(s)	X	
26010	Drainage of finger abscess		X
26055	Incise finger tendon sheath	X	
26121	Release palm contracture	X	
26123	Release palm contracture	X	
26125	Release palm contracture	X	
26160	Remove tendon sheath lesion	X	
26530	Revise knuckle joint	X	
26531	Revise knuckle with implant	X	

26531	Revise knuckle with implant	X	
26535	Revise finger joint	X	
26535	Revise finger joint	X	
26536	Revise/implant finger joint	X	
26536	Revise/implant finger joint	X	
26560	Repair of web finger	X	
26561	Repair of web finger	X	
26562	Repair of web finger	X	
26568	Lengthen metacarpal/finger	X	
26580	Repair hand deformity	X	
26587	Reconstruct extra finger	X	
26590	Repair finger deformity	X	
26989	Hand/finger surgery	X	
27096	Inject sacroiliac joint	X	
27200	Treat tail bone fracture	X	
27332	Removal of knee cartilage	X	
27333	Removal of knee cartilage	X	
27403	Repair of knee cartilage	X	
27405	Repair of knee ligament	X	
27407	Repair of knee ligament	X	
27409	Repair of knee ligament	X	
27437	Revise kneecap	X	
27437	Revise kneecap	X	
27438	Revise kneecap with implant	X	
27438	Revise kneecap with implant	X	
27440	Revision of knee joint	X	
27440	Revision of knee joint	X	
27441	Revision of knee joint	X	
27441	Revision of knee joint	X	
27442	Revision of knee joint	X	
27442	Revision of knee joint	X	
27443	Revision of knee joint	X	
27443	Revision of knee joint	X	
27445	Arthroplasty of knee	X	
27445	Revision of knee joint	X	
27446	Revision of knee joint	X	
27446	Revision of knee joint	X	
27447	Total knee arthroplasty	X	
27487	Revise/replace knee joint	X	
27613	Biopsy lower leg soft tissue	X	
27700	Arthroplasty, ankle	X	
27700	Ankle arthroplasty	X	
27702	With implant	X	
27703	Revision, total ankle	X	
27704	Removal of ankle implant	X	
28035	Decompression of tibia nerve	X	
28070	Removal of foot joint lining	X	
28072	Removal of foot joint lining	X	
28080	Removal of foot lesion	X	
28108	Removal of foot lesions	X	
28110	Part removal of metatarsal	X	
28111	Part removal of metatarsal	X	
28112	Part removal of metatarsal	X	
28113	Part removal of metatarsal	X	

28114	Removal of metararsal heads	X	
28116	Revision of foot	X	
28118	Removal of heel bone	X	
28119	Removal of heel spur	X	
28190	Removal of foot foreign body	X	
28192	Removal of foot foreign body	X	
28193	Removal of foot foreign body	X	
28238	Revision of foot tendon for medical necessity	X	
28240	Release of big toe	X	
28250	Revision of foot fascia	X	
28280	Fusion of toes	X	
28285	Repair of hammertoe	X	
28286	Repair of hammertoe	X	
28288	Partial removal of foot bone	X	
28289	Repair hallux rigidus	X	
28290	Correction of bunion	X	
28292	Correction of bunion	X	
28293	Correction of bunion	X	
28293	Correction of bunion with implant	X	
28294	Correction of bunion	X	
28296	Correction of bunion	X	
28297	Correction of bunion	X	
28298	Correction of bunion	X	
28299	Correction of bunion	X	
28300	Incision of heel bone	X	
28310	Revision of big toe	X	
28312	Revision of toe	X	
28313	Repair deformity of toe	X	
28315	Removal of sesamoid bone	X	
29800	Jaw arthroscopy/surgery	X	
29806	Shoulder arthroscopy/surgery	X	
29807	Shoulder arthroscopy/surgery	X	
29819	Shoulder arthroscopy/surgery	X	
29822	Shoulder arthroscopy/surgery	X	
29823	Shoulder arthroscopy/surgery	X	
29824	Shoulder arthroscopy/surgery	X	
29826	Shoulder arthroscopy/surgery	X	
29827	Arthroscop rotator cuff repr	X	
29848	Wrist endoscopy/surgery	X	
29855	Tibial arthroscopy/surgery	X	
29856	Tibial arthroscopy/surgery	X	
29870	Knee arthroscopy, dx	X	
29871	Knee arthroscopy/drainage	X	
29873	Knee arthroscopy/surgery	X	
29874	Knee arthroscopy/surgery	X	
29875	Knee arthroscopy/surgery	X	
29876	Knee arthroscopy/surgery	X	
29877	Knee arthroscopy/surgery	X	
29879	Knee arthroscopy/surgery	X	
29880	Knee arthroscopy/surgery	X	
29881	Knee arthroscopy/surgery	X	
29882	Knee arthroscopy/surgery	X	
29883	Knee arthroscopy/surgery	X	
29885	Knee arthroscopy/surgery	X	

29886	Knee arthroscopy/surgery	X	
29887	Knee arthroscopy/surgery	X	
29888	Knee arthroscopy/surgery	X	
29889	Knee arthroscopy/surgery	X	
29893	Scope, plantar fasciotomy	X	
29999	Arthroscopy of joint	X	
30150	Rhinectomy; partial	X	
30400	Rhinoplasty, primary; lateral and alar cartilages and/or elevation of nasal tip	X	
30410	Rhinoplasty, primary; complete, external parts including bony pyramid, lateral and alar cartilages, and/or elevation of nasal tip	X	
30420	Rhinoplasty, primary; including major septal repair	X	
30430	Rhinoplasty, secondary; minor revision (small amount of nasal tip work)	X	
30435	Rhinoplasty, secondary; intermediate revision (bony work with osteotomies)	X	
30460	Rhinoplasty for nasal deformity secondary to congenital cleft lip and/or palate, including columellar lengthening; tip only	X	
30465	Repair of nasal stenosis	X	
30520	Repair of nasal septum	X	
30540	Repair nasal defect	X	
30545	Repar nasal defect	X	
31299	Unlisted procedure, accessory sinuses	X	
31513	Injection into vocal cord	X	
31570	Laryngoscopy with injection	X	
31571	Laryngoscopy with injection	X	
36299	Unlisted procedure, vascular injection	X	
36468	Inj. Sclerosing solution	X	
36469	face	X	
36470	single vein	X	
36471	multiple veins, same leg	X	
37204	Transcatheter occlusion or embolization (e.g., for tumor destruction, to achieve hemostasis, to occlude a vascular malformation), percutaneous, any method, non-central nervous system, non-head or neck	X	
37500	Vascular endoscopy, surgical, with ligation of perforator veins, subfascial (SEPS)	X	
37501	Unlisted vascular endoscopy procedure	X	
37700	Ligation and division long saphenous vein at saphenofemoral junction, or distal interruptions	X	
37718	Ligation division and stripping short saphenous vein	X	
37722	Ligation divisin and stripping , long greater saphenous viens from saphenofemoral junction to knee or below	X	
37735	Ligation and division and complete stripping of long or short saphenous veins with radical excision of ulcer and skin graft and/or interruption of communicating veins of lower leg with excision of deep fascia	X	
37760	Ligation of perforator veins, subfascial, radical (Linton type), with or without skin graft, open	X	
37765	Stab phlebectomy of varicose veins, one extremity; 10-20 stab incisions	X	
37766	Stab phlebectomy of varicose veins, one extremity; more than 20 incisions	X	
37780	Ligation and division of short saphenous vein at saphenopopliteal junction	X	
37785	Ligation, division, and/or excision of varicose vein cluster(s), one leg	X	
37799	Unlisted procedure, vascular surgery	X	
39502	Repair paraesophageal hiatus hernia, transabdominal, with or without fundoplasty, vagotomy, and/or pyloroplasty, exceptional	X	
40806	Incision of lip fold	X	
40819	Excise lip or cheek fold	X	
41520	Reconstruction, tongue fold	X	
42145	Repair palate, pharynx/uvula	X	

42810	Excision of nect cyst	X	
42815	Excision of nect cyst	X	
42820	Remove tonsils and adenoids	X	
42821	Remove tonsils and adenoids	X	
42825	Removal of tonsils	X	
42826	Removal of tonsils	X	
42830	Removal of adenoids	X	
42831	Removal of adenoids	X	
42835	Removal of adenoids	X	
42836	Removal of adenoids	X	
43201	Esophagoscopy with injections	X	
43280	Lap, esophagus	X	
43289	Lap, esophagus	X	
43644	Lap, gastric bypass	X	
43645	Lap, gastric bypass	X	
43651	Lap, vagotomy	X	
43652	Lap, vagotomy	X	
43659	Lap, gastric, unlisted	X	
44970	Lap, appendectomy	X	
44979	Lap, appendix unlisted	X	
46505	Chemodenervation of internal and sphincter if coupled with J0585 pr K0587	X	
47562	Lap cholecystectomy	X	
47563	Lap cholecystectomy	X	
47564	Lap cholecystectomy	X	
47570	Lap cholecystoenterostomy	X	
47579	Lap, unlisted biliary	X	
49250	Umbilectomy, omphalectomy, excision of umbilicus (separate procedure	X	
49329	Lap, abd, peritoneum, omen, unlisted	X	
49560	Repair initial incisional or rentrel hernia	X	
49561	Incarcerated or strangulated	X	
49565	Repair recurrentincisional or rentrel hernia, reducible	X	
49566	Incarcerated or strangulated	X	
49568	Hernia repair with mesh	X	
49569	Lap, hernia, unlisted	X	
49570	Repair epigashric hiernia, reducible	X	
49572	Repair epigashric hiernia, blocked	X	
49585	Repair umbilical hernia, reducible > 5 years	X	
49587	Repair umbilical hernia, blocked+C379+C411 > 5 years	X	
49650	Lap, inguinal hernia	X	
49651	Lap, inguinal hernia	X	
49904	Omental flap, extra-abdominal (e.g., for reconstruction of sternal and chest wall defects)	X	
51999	Lap, bladder, unlisted	X	
51999	Lap, bladder, unlisted	X	
53440	Correct bladder function	X	
53442	Remove perineal prosthesis	X	
53445	Insert uro/ves nck sphincter	X	
53447	Remove/replace ur sphincter	X	
53448	Removal/replacement of sphincter pump	X	
53505	Repair of urethra injury no pa--no pink	X	
54400	Insert semi-rigid prosthesis	X	
54401	Insert self-contd prosthesis	X	
54405	Insert multi-comp penis pros	X	
54406	Removal of inflatable penile prosthesis	X	

54409	Removal of inflatable penile prosthesis	X	
54410	Remove/replace penis prosth	X	
54416	Remv/repl penis contain pros	X	
54699	Lap, testicle unlisted	X	
55550	Lap, ligation spermatic veins	X	
55559	Lap, spermatic cord, unlisted	X	
55866	Lap. Prostatectomy	X	
57265	Extensive repair of vagina	X	
57284	Repair paravaginal defect	X	
57287	Revise/remove sling repair	X	
57288	Repair bladder defect	X	
57425	Lap colpopexy	X	
58150	Hyst and BSO	X	
58180	Hyst and BSO	X	
58200	Hyst and BSO	X	
58260	Vag Hyst	X	
58262	removal of tubes/ovaries	X	
58263	Vag Hyst	X	
58267	Vag Hyst	X	
58270	Vag Hyst	X	
58275	Vag Hyst	X	
58280	Vag Hyst	X	
58285	Vag Hyst	X	
58290	Vag Hyst	X	
58291	Vag Hyst	X	
58292	Vag Hyst	X	
58293	Vag Hyst	X	
58294	Vag Hyst	X	
58550	Laparoscopy, surgical with vaginal hysterectomy	X	
58552	Laparoscopy, surgical with vaginal hysterectomy	X	
58553	Laparoscopy, surgical with vaginal hysterectomy	X	
58554	Laparoscopy, surgical with vaginal hysterectomy	X	
58555	Hysteroscopy, diagnostic	X	
58558	Hysteroscopy, surgical	X	
58559	With lysis of cohesions	X	
58560	With division or resection of intrauterine septum	X	
58561	With removal of leiomyoma	X	
58562	With removal of impacted foreign body	X	
58563	With endometrial ablation	X	
58565	Hysteroscopy, sterilization	X	
58578	Lap, uterus unlisted	X	
58579	Unlisted hysteroscopy procedure, uterus	X	
58679	Lap, ovary unlisted	X	
59898	Lap, unlisted, maternity	X	
61885	Implant neurostim one array	X	
61886	Implant neurostim arrays	X	
62360	Implantation or replacement of device for intrathreal or epidural drug infusion; subcutaneous.	X	
62361	Implant spine infusion pump	X	
62362	Implant spine infusion pump	X	
63650	Implant neuroelectrodes	X	
63655	Implant neuroelectrodes	X	
63685	Implant neuroreceiver	X	
64553	Implant neuroelectrodes	X	

64555	Implant neuroelectrodes	X	
64560	Implant neuroelectrodes	X	
64561	Implant neuroelectrodes	X	
64565	Implant neuroelectrodes	X	
64573	Implant neuroelectrodes	X	
64575	Implant neuroelectrodes	X	
64577	Implant neuroelectrodes	X	
64580	Implant neuroelectrodes	X	
64581	Implant neuroelectrodes	X	
64585	Revision or removal of peripheral stimulator electrodes	X	
64590	Implant neuroreceiver	X	
64612	Chemodenervation of muscle(s); muscle(s) innervated by facial nerve (e.g., for blepharospasm, hemifacial spasm)	X	
64613	Chemodenervation, neck muscles	X	
64614	Extremity or trunk	X	
64650	Chemodenervation of eccrineglands	X	
64653	Other areas when coupled with J0585 or J0587	X	
65772	Corneal relaxing incision for correction of surgically induced astigmatism	X	
65775	Corneal wedge resection for correction of surgically inducted astigmatism	X	
67345	Chemodenervation of extraocular muscle	X	
67900	Repair of brow ptosis (supraciliary, mid-forehead or coronal approach)	X	
67901	Repair of blepharoptosis; frontalis muscle technique with suture or other material	X	
67902	Repair of blepharoptosis; frontalis muscle technique with fascial sling (includes obtaining fascia)	X	
67903	Repair of blepharoptosis; (tarso) levator resection or advancement, internal approach	X	
67904	Repair of blepharoptosis; (tarso) Levator resection or advancement, external approach	X	
67906	Repair of blepharoptosis; superior rectus technique with fascial sling (includes obtaining fascia)	X	
67908	Repair of blepharoptosis; conjunctivo-tarso-Muller's muscle-levator resection (e.g., Fasanella-Servat type)	X	
67909	Reduction of overcorrection of ptosis	X	
67911	Correction of lid retraction	X	
67912	Correction of lagophthalmos, with implantation of upper eyelid lid load (e.g., gold weight)	X	
67914	Repair of ectropion, suture	X	
67915	Repair of ectropion; thermocauterization	X	
67916	Repair of ectropion; excision tarsal wedge	X	
67917	Repair of ectropion; extensive (e.g., tarsal strip operations)	X	
67921	Repair of entropion; suture	X	
67922	Repair of entropion; thermocauterization	X	
67923	Repair of entropion; excision tarsal wedge	X	
67924	Repair of entropion; extensive (e.g., tarsal strip or capsulopalpebral fascia repairs operation)	X	
67950	Canthoplasty	X	
67999	Unlisted eyelid procedure	X	
69300	Otoplasty	Not covered	
69399	Unlisted procedure, external ear	X	
69420	Incision of eardrum	X	
69421	Incision of eardrum	X	
69610	Repair of eardrum	X	
69620	Repair of eardrum	X	
69631	Repair eardrum structures	X	

69632	Rebuild eardrum structures	X	
69633	Rebuild eardrum structures	X	
69635	Rebuild eardrum structures	X	
69636	Rebuild eardrum structures	X	
69637	Rebuild eardrum structures	X	
69650	Release middle ear bone	X	
69660	Revise middle ear bone	X	
69661	Revise middle ear bone	X	
69662	Revise middle ear bone	X	
69930	Cochlear device implantation, with or without mastoidectomy	X	
69949	Unlisted procedure, inner ear	X	
76012	Radiological supervision and interpretation, percutaneous vertebroplasty or vertebroplasty or vertebral augmentation including cavity creation, per vertebral body	X	
76013	Radiological supervision and interpretation, percutaneous vertebroplasty or vertebroplasty or vertebral augmentation including cavity creation, per vertebral body, under CT guidance	X	
76499	Unlisted diagnostic radiographic procedure (to be used for dates of service prior to 01/01/2006 for radiological sueprvision and interpretation, kyphoplasty under fluoroscopic or CT guidance).	X	
91110	GI tract imaging, capsulte endoscopy	X	
95873	Electrical stimulation/chemodenervation	X	
13100-13152	Keloid Revision	X	
21182-21184	Reconstruction of orbital walls, rims, forehead, nasoethmoid complex following intra- and extracranial excision of benign tumor of cranial bone (e.g. fibrous dysplasia), with multiple autografts (includes obtaining grafts); total area of bone grafting less than 40 sq cm	X	
43770-43774	Lap, gastric band	X	
47560-47561	Lap, transhepatic cholangiography	X	
49320-49323	Lap, abd, peritoneium, omentum	X	
51990-51992	Lap, for stress incontinence	X	
54690-54692	Lap, testicle	X	
58545-58546	Lap myomectomy	X	
58550-58554	Lap hysterectomy	X	
58660-58673	Lap, ovary	X	
58970-58976	Lap, in vitro	X	
67971-67975	Reconstruction of eyelid	X	
68320-68340	Conjunctivoplasty	X	
69310-69320	Reconstruction external auditory canal	X	

CHAPTER 511—COVERED SERVICES, LIMITATIONS AND EXCLUSIONS FOR ICF/MR SERVICES

TABLE OF CONTENTS

TOPIC **PAGE NO.**

CHAPTER 511–COVERED SERVICES, LIMITATIONS, AND EXCLUSIONS FOR ICF/MR SERVICES

INTRODUCTION

The West Virginia (WV) Medicaid Program offers a comprehensive scope of medically necessary medical and mental health services to diagnose and treat eligible participants. Covered and authorized services must be rendered by enrolled providers within the scope of their license and in accordance with all State and Federal requirements. Any service, procedure, item, or situation not discussed in the manual must be presumed non-covered unless informed otherwise in writing by the Bureau for Medical Services (BMS).

The policies and procedures set forth herein are the regulations governing the provision of Intermediate Care Facility for the Mentally Retarded Services (ICF/MR) in the Medicaid Program administered by the WV Department of Health and Human Resources (DHHR) under the provisions of Title XIX of the Social Security Act and Chapter 9, of the Public Welfare Law of WV.

This chapter sets forth the Bureau for Medical Services (BMS) requirements for payment of services provided by ICF's/MR to eligible West Virginia (WV) Medicaid members.

PROGRAM DESCRIPTION

Intermediate Care Facilities for the Mentally Retarded (ICFs/MR) are part of the long term care continuum that provides care for individuals with mental retardation and/or developmental disabilities. The services provided are based on each member's needs, which vary according to age and level of mental retardation and developmental disabilities. In order for a facility to participate in the program, it must meet federal and state standards in the areas of client protection, facility staffing, active treatment, client behavior, health care services, physical environment, and dietetic services. ICF's /MR services in West Virginia are provided in small facilities throughout the state. Commonly, four (4) to eight (8) members reside in each of the ICF's/MR.

511.1 DEFINITIONS

Definitions governing the provision of all WV Medicaid services will apply pursuant to Chapter 200, Definitions of the Provider Manual. The following definitions also apply to the requirements for services described in this chapter.

Active Treatment - aggressive, consistent implementation of a program of specialized and generic training, treatment, and health services. Active treatment does not include services to maintain generally independent members who are able to function with little supervision or in the absence of a continuous active treatment program.

Individual Program Plan (IPP) (DD-5) is an outline of proposed activities that primarily focus on establishment of a potentially life-long, person-centered, goal-oriented process for coordinating the range of services, instruction and assistance needed by persons with developmental disabilities and their families. It is designed to ensure accessibility, accountability, and continuity

of support and services. This service also ensures that persons with developmental disabilities have opportunities to make meaningful choices with regard to their life, and inclusion in the community. The IPP (DD-5) is the critical document that combines all information from the evaluations to guide the service delivery process. The completion of the IPP must be a joint effort among all parties involved in the member's life.

Individual Service Plan (ISP) is a specific breakdown of the service plan based upon assessments and needs which have been outlined.

Individual Habilitation Plan (IHP) establishes goals and identifies the discrete, measurable, criteria-based objectives the individual is to achieve; and the specific individualized program of specialized and generic strategies, supports, and techniques necessary to allow the individual to function with as much self-determination and independence as possible.

Interdisciplinary Team (IDT) is a group of professionals, paraprofessionals, and non-professionals who possess the knowledge, skill, and expertise necessary to accurately identify the comprehensive array of services required to meet the individual's needs and design appropriate services and specialized programs responsive to those needs.

Inventory for Client & Agency Planning (ICAP) assesses adaptive and maladaptive behavior and gathers additional information to determine the type and amount of special assistance that people with disabilities may need. The level of care an individual needs is based upon the results of the ICAP assessment. The service level determines the rate of reimbursement for the member.

511.2 PROVIDER PARTICIPATION: GENERAL REQUIREMENTS

In order to participate in the WV Medicaid Program and receive payment from the Bureau for Medical Services, the ICF/MR must:

- Meet and maintain all applicable licensing, accreditation, and certification requirements
- Meet and maintain all Bureau for Medical Services enrollment requirements
- Maintain a valid provider agreement on file that is signed by the provider and BMS upon application for enrollment into the WV Medicaid Program

511.2.1 SPECIFIC REQUIREMENTS

In addition to the provider requirements as set forth in Chapter 300, Provider Participation Requirements, the ICF/MR provider agencies must:

- Meet and maintain the standards established by the Secretary of the U.S. Department of Health and Human Services (DHHS), and all applicable Federal laws governing the provision of these services. This includes but is not limited to the Code of Federal Regulations and Federal Survey Procedures and Interpretative Guidelines for ICF's/MR .
- Be in compliance with all applicable state and local laws and regulations affecting the health and safety of the individuals, including fire prevention, building codes,

sanitation, medical practice acts, nurse practice acts, laws governing the procurement, storage, packaging, administration and accounting for drugs and other supplies, laws licensing professional clinical staff; communicable and reportable diseases, postmortem procedures, and all other applicable laws and regulations.

- Be certified by the Office of Health Facilities Licensure and Certification, (OHFLAC) as meeting the requirement of an ICF/MR and in compliance with relevant State and Federal Regulations. The ICF/MR must maintain standards necessary for licensure and certification. Reviews will be conducted at a minimum annually by OHFLAC. After completion of a certification survey, OHFLAC will report any deficiencies found during the survey to the ICF/MR and to the Office of Behavior and Alternative Health Care. The facility shall be responsible for the development and implementation of a plan of correction of any identified deficiency.

511.2.2 DOCUMENTATION AND RECORD RETENTION REQUIREMENTS

An ICF/MR must comply with the documentation and maintenance of records requirements described in Chapter 100, General Information, Chapter 300, Provider Participation, and Chapter 800, General Administration of the Provider Manual. In addition to the documentation requirements described in this chapter, the following requirements also apply to payment of ICF/MR services:

- All required documentation must be maintained for at least five (5) years in the provider's file subject to review by authorized OHFLAC personnel, BMS personnel or contracted agents.
- Ensure that all required documentation is maintained by the provider on behalf of the State of West Virginia and is accessible for State and Federal audits
- Ensure that all documentation meets standards before the claim is submitted for payment

MEMBER RECORDS

- The ICF/MR must develop and implement policies and procedures governing the release of member information, including consents necessary from the member, or parents (if the member is a minor) or legal guardian.
- The ICF/MR must develop and maintain a record-keeping system that includes a separate record for each member and documents the member's health care, active treatment, social information, and protection of the member's rights.
- The ICF/MR must keep confidential all information contained in the members' records, regardless of the form or storage method of the records.
- Data relative to accomplishment of the criteria specified in the member's Individual Program Plan objectives must be documented in measurable terms. Data must be collected in the form and frequency required by the plan. Data must accurately reflect the member's actual individual performance.

- The ICF/MR must legibly document, date and sign significant events that are related to the member's Individual Program Plan and assessments that contribute to an overall understanding of the member's ongoing level and quality of functioning.
- Required documentation includes, but is not limited to, the member's functional status, health condition, accomplishments, activities or needs which affect the Comprehensive Functional Assessment, Individual Program Plan (Individual Service Plan – Individual Habilitation Plan). It also includes any occurrence(s) inside or outside the ICF/MR which provides information about the member's interactions, responses, progress, or problems beyond the specific parameters of the Individual Program Plan.
- The ICF/MR must provide a legend to explain any symbol or abbreviation used in a member's record.
- The ICF/MR must provide each identified residential living unit with appropriate aspects of each member's record.
- The ICF/MR must keep an up- to- date picture of the member in the record.
- Providers that wish to computerize any of the DD forms utilized by the ICF/MR program may do so, however, all basic components must be included and the name/number indicated on the form.
- Records must comply with HIPAA regulations.

PERSONNEL RECORDS

Written job descriptions shall be developed for each category of personnel, to include qualifications, line of authority, and specific duty assignments.

Current employee records shall be maintained and shall include:

- A resume of each employee's training and experience
- Evidence of required licensure, certification and/or registration.
- Evidence of education
- Records of in-service training and continuing education
- Documentation that staff has received the training outlined in Federal Code of Regulations and ICF Interpretive Guidelines.
- Documentation that the employee does not have a conviction of or prior employment history of child or adult abuse, neglect or mistreatment

511.3 SERVICE COVERAGE

The Bureau for Medical Services will pay an all-inclusive per diem rate. This rate represents an inclusive payment for all services and items that are required to be provided by the ICF/MR. This includes but is not limited to active treatment, individual program planning, health care services, dietetic service, routine adaptive equipment, routine durable medical equipment, etc.

Covered services that are part of the per diem rate include room and board, nursing services, non-covered drugs, medical supplies, accessories and equipment, rehabilitation services, such as

physical therapy and speech therapy, regular, special, or supplemental diets, day habilitation or day treatment, transportation and all other prescribed care necessary to meet the current health needs of the member**.**

Nursing Services include the handling of the individual by the nursing and attendant staff, the provision of restorative and/or rehabilitative services, medical supplies and treatment, personal hygiene, and the administration of medication and/or medical gases (such as oxygen) prescribed by the physician as part of the plan of care. The facility must provide such items as dressings, bandages, disposable diapers, catheters, bed pans, medicine chest supplies, wheelchairs (unless specialized), walkers, crutches, syringes, needles, etc. Supplies and equipment which are customarily provided by the ICF/MR facility for the care and treatment of members are covered services and are included in the facility costs for rate setting as part of the per diem rate.

No charges will be permitted by the facility to the ICF/MR member/patient or his family, guardian or to any other source over and above the established rate of payment to the facility for those services covered under the Medicaid program. Reimbursement by the program for the ICF/MR facility services determined to be medically necessary and appropriate constitutes payment in full for services.

511.3.1 SERVICE LIMITATIONS

Service limitations governing the provision of all WV Medicaid services will apply pursuant to Chapter 300, Provider Participation of the Provider Manual.

511.3.2 SERVICE EXCLUSIONS

In addition to the exclusions listed in Chapter 100 General Information of the Provider Manual, the Bureau for Medical Services will apply the following:

- Payment for services provided by an ICF/MR is available only on behalf of members who have been determined to be in need of ICF/MR services.
- Reimbursement will be based on the results of the ICAP.

511.3.3 CODES

The following revenue codes are to the utilized:

REVENUE CODE	CODE DESCRIPTION
0191	ICAP - Level 1
0192	ICAP - Level 2
0193	ICAP - Level 3
0194	ICAP - Level 4
0183	Leave of Absence - Therapeutic
0185	Leave of Absence - Hospitalization

511.3.4 SERVICES PROVIDED BY OUTSIDE SOURCES:

If an ICF/MR does not provide a required service, it may enter into a written agreement with an outside service, program, or resource to do so. The agreement must state clearly the following:

- The responsibilities, functions, objectives, and other terms agreed to by both parties
- Provide that the ICF/MR is responsible for assuring that the outside services meet the standards for quality of services
- The ICF/MR must assure that outside services meet the needs of each individual
- If living quarters are not provided in a facility owned by the ICF/MR, the ICF/MR remains directly responsible for the standards relating to the physical facility.

Required services provided by outside sources are included in the ICF/MR per diem, and cannot be billed separately.

511.4 BIILLING PROCEDURES

An ICF/MR must comply with the billing procedures and requirements described in Chapter 600, Reimbursement of the Provider Manual.

511.4.1 BILLING REQUIREMENTS

The ICF/MR must furnish the Bureau for Medical Services, Behavioral and Alternative Health Care Division with such information regarding any payments claimed for individuals under the program as the Bureau for Medical Services may request

Collect no more than the established rate of payment for the services rendered and billed to the program; i.e., the ICF/MR may not bill anyone for supplemental payments.

The ICF/MR must have a record-keeping capability sufficient for determining the cost of services.

511.4.2 PAYMENT LIMITATIONS

Reimbursement rates are based upon the cost report submitted by the ICF/MR provider and outcomes of the ICAP instrument. The ICAP must be administered by qualified staff with the competencies to administer the assessment.

511.4.3 MEDICAL LEAVES OF ABSENCE

Reimbursement will be paid for an ICF/MR resident who must be transferred to an inpatient hospital for care and treatment that can only be provided on an inpatient basis.

The maximum bed reservation for such authorized absences shall be limited to fourteen (14) consecutive days, provided the resident is scheduled to return to the ICF/MR facility following discharge from the hospital. If the bed is used during the member's absence for emergency or respite care, it will in no way jeopardize or delay the return of the hospitalized member to the facility. However, such short-term use of the bed is not encouraged and when utilized the bed in such a manner will count these days in addition to reservation days in reporting the total census.

511.4.4 NON-MEDICAL LEAVES OF ABSENCE

Reimbursement will be paid to an ICF/MR facility for a non-medical leave of absence for therapeutic home visits and for trial visits to other facilities. Such visits are encouraged, and the policies of the ICF/MR should facilitate rather than inhibit such absences. Non-medical absences shall be initiated as part of the member's individual plan of care at the request of the member, his parent(s), or his guardian with the approval of the QMRP. The Medicaid agency will pay to reserve a bed for up to twenty one (21) days per calendar year for a member residing in an ICF/MR when the resident is absent for therapeutic home visits or for trial visits to another community residential facility. If the member's bed is used during the member's absence for short-term emergency or respite care – which in no way would jeopardize or delay the member's return to the ICF/MR – no additional payment is allowed for such short-term use of the bed for emergency or respite care. The facility will count these days in addition to bed reservation days in reporting the total census.

511.5 MEMBER ELIGIBILITY

Medical Eligibility is determined by submitting an application packet to the Bureau for Medical Services, Office of Behavioral and Alternative Health Care for member consideration.

511.5.1 DOCUMENTS REQUIRED FOR DETERMINING MEDICAL ELIGIBILITY

The DD-1 (Identification and Demographic Information Face Sheet), DD-2A (Medical Evaluation), DD-3 (Psychological Evaluation), DD-4 (Social History) and DD-5 (Individual Program Plan) need to be submitted to the Bureau for Medical Services, Division of Behavioral and Alternative Health Care, for approval for each member for whom payment is requested. The DD-1, DD-2A, DD-3, DD-4, and DD-5 must be current and received by the Bureau for Medical Services, Division of Behavioral and Alternative Health within ninety (90) days of admission to the ICF/MR or authorization of payment.

511.5.2 ELIGIBILITY DETERMINATION OF MEMBERS PRIOR TO ADMITTANCE

Individuals seeking ICF/MR services may have their eligibility determined prior to their admittance to an ICF/MR facility.

To establish prior eligibility, a complete packet of required information must be submitted within thirty (30) days prior to placement in the ICF/MR facility. Packets may be submitted to the eligibility determination section of the Bureau for Medical Services. All submitted information must be clinically current.

The prior eligibility packet of information includes the DD-2A, DD-3, and DD-4 and must be submitted to the Bureau for Medical Services, Office of Behavioral and Alternative Health, to establish eligibility for each member for whom payment is requested.

Current is defined as

- DD-2A (Medical Evaluation) must be current within the past six months. Any Medical Evaluation dated in excess of 180 days upon receipt by the Bureau for Medical Services shall be considered out of date.

- DD-3 (Psychological Report) must have been completed within 90 days of the placement date. Any date of a psychological report in excess of 90 days upon recipient by the Bureau for Medical Services shall be considered out of date
- DD-4 (Social History) must have been completed within 180 days of the placement date. Any social history in excess of 180 days upon receipt by the Bureau for Medical Services shall be considered out of date,

When current information is received in its entirety an eligibility determination will be made as quickly as possible (maximum of 45 days) and the decision communicated to the recipient and to the provider that submitted the packet.

511.5.3 ELIGIBILITY DETERMINATION OF MEMBERS POST ADMISSION

Individuals seeking ICF's/MR services can have their eligibility determined after their admittance to an ICF/MR. To establish eligibility, a complete packet of required information must be submitted within thirty (30) days after placement in the ICF/MR facility. Packets must be submitted to the eligibility determination section of the Bureau for Medical Services. All submitted information must be clinically current. The post eligibility packet of information includes the DD-2A, DD-3, DD-4, and DD-5. Documents must be submitted to the Office of Behavior and Alternative Health Care of the WV Bureau for Medical Services.

Current is defined as

- DD-2A (Medical Evaluation) must be current within the past six months. Any Medical Evaluation dated in excess of 180 days upon receipt by the Bureau for Medical Services shall be considered out of date.
- DD-3 (Psychological Report) must have been completed within 90 days of the placement date. Any date of a psychological report in excess of 90 days upon recipient by the Bureau for Medical Services shall be considered out of date
- DD-4 (Social History) must have been completed within 180 days of the placement date. Any social history in excess of 180 days upon receipt by the Bureau for Medical Services shall be considered out of date,

When current information is received in its entirety an eligibility determination will be made as quickly as possible (maximum of 45 days) and the decision communicated to the recipient and to the provider that submitted the packet.

The initial DD-5 (IPP) must be developed within seven (7) days of intake (initial DD-5), and completed within thirty 30 days after the intake and submitted to the Bureau for Medical Services, Office of Behavioral and Alternative Health. Payment shall be delayed until the receipt of the DD- 5 (IPP).

The provider will assume the financial risk of providing services during the period that eligibility is being considered. In the event an individual is determined not to meet ICF's/MR eligibility there is no mechanism to reimburse the provider.

511.5.4 MEDICAL ELIGIBILITY CRITERIA

BMS through its contracted agent determines the medical eligibility for an applicant in the MR/DD Waiver Program. In order to be eligible to receive MR/DD Waiver Program Services, an applicant must have both a diagnosis of mental retardation or a related condition and also manifest concurrent substantial adaptive deficits.

1. Persons with **related conditions** means individuals who have a severe, chronic disability which is attributable to:

- cerebral palsy or epilepsy: or
- any other condition, other than mental illness, found to be closely related to mental retardation because this condition results in impairment of general intellectual functioning or adaptive behavior similar to that of mentally retarded persons, and requires treatment or services similar to those required for these persons; and the severe chronic disability
  - the mental retardation or related condition is manifested (both diagnosis and substantial deficits) before a person reaches twenty two (22) years of age and
  - the mental retardation or related condition is likely to continue indefinitely

2. The applicant must have substantial limits in three (3) or more of the following major life areas:
   - self care,
   - receptive and/or expressive language, (communication)
   - learning, (functional academics)
   - mobility,
   - self direction,
   - capacity for independent living, (home living, social skills, employment, health and safety, community use, leisure)
     - Substantial adaptive deficits is defined as scores on standardized measures of adaptive behavior three (3) standard deviations below the mean or less than one (1) percentile when derived from non MR normative populations or in the average range or below the seventy fifth (75^{th}) percentile when derived from MR normative populations.
     - The presence of substantial deficits must be supported by the additional documentation submitted for review (e.g. IEP, OT evaluations, narrative descriptions, etc.).

3. The applicant must have a need for an ICF/MR level of care that:
   - is certified by a physician (DD-2A) and,
   - is recommended by the evaluating psychologist (DD-3) and,

- Is identified by a licensed social worker (DD-4)

The applicant requires and would benefit from active treatment. Evaluations of the applicant must demonstrate a need for intensive instruction, services, assistance, and supervision in order to learn new skills and increase independence in activities of daily living.

511.6 OTHER ADMISSION REQUIREMENTS

An initial Inventory for Client and Agency Planning (ICAP) must be administered to a member within ninety (90) days of admission to an ICF/MR.

If a referred member already has an existing, clinically-current ICAP from another facility, the admitting ICF/MR has the option to use the current ICAP or complete one of its own.

The admitting ICF/MR provider must submit ICAP scores to the Bureau for Medical Services.

The rate of payment for the first 90 days will be the lowest of the currently used rates until the ICAP score is received. If the ICAP score results in a higher rate, payments will be adjusted.

511.7 ANNUAL RE-CERTIFICATION OF ELIGIBILITY

All members residing in an ICF/MR must be recertified for continued need. Recertification of the need for continued services must be made every twelve (12) months after certification. The ICF/MR is responsible for obtaining recertification documentation by the physician for each member for whom payment is requested under the Medicaid Program.

The ICF/MR must submit a copy of the current Annual DD-2A that provides the physician's certification of the continued need for ICF/MR level of care. The DD-2A must be current within the past 12 months. The subsequent DD-2A must be completed by the anniversary date of the previous DD-2A and be submitted within 30 days of completion. For example, if the submitted copy of the DD-2A is dated 09/15/03, then a new DD-2A will have to be completed no later than 09/15/04 and submitted by 10/15/04 for annual recertification.

Additional information may be requested as necessary which may include the DD-3, DD-4, DD-5 or other pertinent information .

This procedure is required annually. After review by the Office of Behavior and Alternative Care of the WV Bureau for Medical Services, notification of recertification will be submitted to the ICF/MR provider. The recertification date will be based on the actual date the DD-2A was completed by the physician and will extend for a period not to exceed one calendar year.

The ICF/MR provider will be responsible for maintaining the documentation of recertification in the member's chart.

511.8 ANNUAL SUBMISSION OF THE ICAP

From the admission date forward, an annual re-administration of the ICAP is required. The anniversary date for an annual re-administration of the ICAP will be (1) one year after the first submission of an ICAP. Providers may also administer an ICAP at a significant life change or juncture. The significant change shall not be acute in nature and if the condition will likely ameliorate in fewer than 6 months, then a resubmission of the ICAP would not be appropriate.

Any rate change would become effective the first day of the next calendar month after the administration of the ICAP.

511.9 TRANSFERS OF MEMBERS TO OTHER SITES

Transfers of members to other places are to be for good cause and completed in a time frame that allows the member and the member's family or guardian ample time to prepare for the transfer, unless there is an emergency.

Transfers should only occur when the ICF/MR cannot meet the member's needs, the member no longer requires an active treatment program in an ICF/MR setting, the member/guardian chooses to reside elsewhere, or when a determination is made that another level of service or living situation, either internal or external would be more beneficial.

Transfer between facilities within the same provider agency must be reported to the Bureau for Medical Services, Office of Behavior and Alternative Health Care Policy Units on the ICF/MR Discharge/Transfer Tracking Form (refer to form in Attachment) within 10 working days of the date of discharge/transfer from the facility.

511.10 DISCHARGE REQUIREMENTS FOR THE MEMBER

Upon discharging a member, an ICF/MR must:

- Prepare a final summary of the member's health, nutritional, social, behavioral, and functional status. This summary is to become a part of the member's permanent record.

  The summary can be presented to authorized agencies and persons with the consent of the member, the member's guardian or parent if the member is minor.

- Provide a post-discharge plan of care that will help the member adjust to the new living environment. Information must be sufficient to allow the receiving facility to provide the services and supports needed by the individual in order to adjust to the new placement.

The Office of Behavior and Alternative Health Care of the WV Bureau for Medical Services must be notified within ten (10) working days of discharge by utilizing the ICF/MR Discharge/Transfer Tracking Form.

511.11 HOW TO OBTAIN INFORMATION: CPT, HCPCS, ICD-9, ETC.

For information on how to obtain information concerning procedure codes and diagnosis codes, please refer to Chapter 100, General Information of the Provider Manual. Additional information on the use of forms required by the ICF/MR program of services are found in the Attachments, as follows:

- DD-1 Identification and Demographic Information Fact Sheet
- DD-2A Medical Evaluation
- DD-3 Psychological Evaluation
- DD-4 Social History
- DD-5 Individual Program Plan

- ICF/MR Admittance/Discharge/Transfer Tracking Form

511.20 MANAGED CARE

West Virginia ICF/MR Program participants are exempt from managed care coverage. All services covered must follow guidelines set forth by Medicaid for reimbursement.

SOCIAL HISTORY
PAGE 1 OF 4

WEST VIRGINIA DEPARTMENT OF HEALTH AND HUMAN RESOURCES

SOCIAL HISTORY

PARTICIPANT NAME:_____ DATE:_____

I. DEVELOPMENTAL HISTORY: Provide information summarizing personal growth from infancy through adolescence with attention to the development of his/her physical, social, and emotional competencies. As outlined below, if development is delayed, describe the circumstances or conditions associated with the delay and date of onset. If more space is needed, use back of this sheet and identify information by Roman Numeral and Letter.

a) Physical

b) Social

c) Emotional

II. FAMILY: List parents, spouse, children, siblings, significant others, and type of relationships, i.e., are they an available source of support and/or resources. Include description of family's socio-economic circumstances, and family composition. Past and current living arrangements, special problems, such as alcohol, substance abuse, and mental illness should be included.

III. EDUCATION/TRAINING: Describe education and training experiences, identify schools and programs attended, relationships with peers and teachers, any adjustment problems, levels of accomplishment and any other pertinent information.

IV. FUNCTIONAL STATUS: Describe levels of functioning relating to employment capabilities, work-related experiences, and assessment of skills relevant to the activities of daily living and self-care skills. Is applicant/participant now, or ever been gainfully employed? Indicate level of care recommendation.

V. RECREATION/LEISURE ACTIVITIES: Identify and describe recreational and leisure time activities, frequencies, accessibility, and degree of involvement.

VI. HOSPITALIZATIONS: List medical and psychiatric hospital dates and reason for admissions.

512.2 PROGRAM DESCRIPTION

Federal regulations governing Medicaid coverage of home and community-based services under an approved waiver specify that services provided under waiver authority must be targeted to individuals who would otherwise be eligible for placement in a long-term care facility.

The TBI Waiver Program is a long-term care alternative which provides services that enable individuals to live at home rather than receiving nursing facility care. The program provides home and community-based services to West Virginia residents who are medically and financially eligible to participate in the program. Members must be at least 22 years of age and be inpatient in a licensed nursing facility, inpatient hospital, or in a licensed rehabilitation facility to treat TBI at the time of application. The goals and objectives of this program are focused on providing services that are person-centered, that promote choice, independence, participant-direction, respect, and dignity and community integration. All members are offered and have a right to freedom of choice of providers for services. BMS contracts with APS Healthcare to implement the administrative functions of the Program.

TBI Waiver services, eligible for reimbursement by Medicaid, are to be provided exclusively to the member, for necessary activities as listed in the Service Plan. They are not to be provided for the convenience of the household or others. Although informal supports are not mandatory in the TBI Waiver Program, the program is designed to provide formal support services to supplement, rather than replace, the member's existing informal support system.

TBI Waiver services include Case Management, Personal Attendant Services, Cognitive Rehabilitation Therapy, and Participant-Directed Goods and Services.

TBI Waiver members may choose from either the Traditional (Agency) Model or the Participant-Directed Model known as Personal Options for service delivery. In the Traditional Model, members receive their services from employees of a certified provider agency or an independent professional qualified to provide Cognitive Rehabilitation Therapy. In Personal Options, members are able to hire, supervise and terminate their own employees.

New Policy

512.2 PROGRAM DESCRIPTION

Federal regulations governing Medicaid coverage of home and community-based services under an approved waiver specify that services provided under waiver authority must be targeted to individuals who would otherwise be eligible for placement in a long-term care facility.

The TBI Waiver Program is a long-term care alternative which provides services that enable individuals to live at home rather than receiving nursing facility care. The program provides home and community-based services to West Virginia residents who are medically and financially eligible to participate in the program. Members must be at least 22 years of age and have a documented traumatic brain injury, defined as a non-degenerative, non-congenital insult to the brain caused by an external physical force resulting in total or partial functional disability and/or psychosocial impairment. The goals and objectives of this program are focused on providing services that are person-centered, that promote choice, independence, participant-direction, respect, and dignity and community integration. All members are offered and have a right to freedom of choice of providers for services. BMS contracts with APS Healthcare to implement the administrative functions of the program.

TBI Waiver services, eligible for reimbursement by Medicaid, are to be provided exclusively to the member, for necessary activities as listed in the Service Plan. They are not to be provided for the convenience of the household or others. Although informal supports are not mandatory in the TBI Waiver Program, the program is designed to provide formal support services to supplement, rather than replace, the member's existing informal support system.

TBI Waiver services include Case Management, Personal Attendant Services, Cognitive Rehabilitation Therapy, and Participant-Directed Goods and Services.

TBI Waiver members may choose from either the Traditional (Agency) Model or the Participant-Directed Model known as Personal Options for service delivery. In the Traditional Model, members receive their services from employees of a certified provider agency or an independent professional qualified to provide Cognitive Rehabilitation Therapy. In Personal Options, members are able to hire, supervise and terminate their own employees.

Old Policy

512.3.8 Criminal Investigation Background Checks and Restrictions and Medicaid Exclusion List

At a minimum, a state level criminal investigation background check, which includes fingerprints, must be conducted by the West Virginia State Police initially and again every three years for all TBI Waiver provider staff with direct access to members including direct-care personnel (agency and Personal Options), Case Managers, and Cognitive Rehabilitation Therapists. If a prospective or current employee has lived out of state within the last five years, an FBI fingerprint-based criminal history check must also be conducted.

Prior to providing TBI Waiver services, required fingerprint-based checks must be initiated. TBI Waiver providers **may** do a preliminary check utilizing on-line internet companies and use these results until the fingerprint results are received. An individual who is providing services or is employed by a provider agency cannot be considered to provide services nor can be employed if ever convicted of:

A. Abduction
B. Any violent felony crime including but not limited to rape, sexual assault, homicide, felonious physical assault or felonious battery
C. Any type of felony battery
D. Child/adult abuse or neglect
E. Crimes which involve the exploitation of a child or an incapacitated adult, including financial exploitation
F. Felony arson
G. Felony or misdemeanor crime against a child or incapacitated adult which causes harm
H. Felony drug related offenses within the last 10 years
I. Felony DUI within the last 10 years
J. Hate crimes
K. Kidnapping
L. Murder/ homicide
M. Neglect or abuse by a caregiver
N. Pornography crimes involving children or incapacitated adults including but not limited to, use of minors in filming sexually explicit conduct, distribution and exhibition of material depicting minors in sexually explicit conduct or sending, distributing, exhibiting, possessing, displaying or transporting material by a parent, guardian or custodian, depicting a child engaged in sexually explicit conduct
O. Purchase or sale of a child
P. Sexual offenses including but not limited to incest, sexual abuse, or indecent exposure
Q. Healthcare fraud
R. Felony forgery

If aware of a recent conviction or change in status, appropriate action must be taken by the agency (or PPL for Personal Options direct-care workers) and BMS notified about the change.

The OIG Exclusion List must be checked for every agency employee and Personal Options direct-care worker who provides Medicaid services prior to employment and monthly thereafter.

Persons on the OIG Exclusion List cannot provide Medicaid services. This list can be obtained at http://exclusions.oig.hhs.gov.

All payments for services provided by excluded providers or employees will be recovered by BMS.

New Policy

512.3.8 Criminal Investigation Background Checks and Restrictions and Medicaid Exclusion List

At a minimum, a state level criminal investigation background check, which includes fingerprints, must be conducted by the West Virginia State Police initially and again every three years for all TBI Waiver provider staff providing direct care services to members including direct-care personnel (agency and Personal Options), Case Managers, and Cognitive Rehabilitation Therapists. If a prospective or current employee has lived out of state within the last five years, an FBI fingerprint-based criminal history check must also be conducted.

Prior to providing TBI Waiver services, required fingerprint-based checks must be initiated. TBI Waiver providers **may** do a preliminary check utilizing on-line internet companies and use these results until the fingerprint results are received. An individual who is providing direct-care services by a TBI Waiver provider cannot be considered to provide services if ever convicted of:

A. Abduction
B. Any violent felony crime including but not limited to rape, sexual assault, homicide, felonious physical assault or felonious battery
C. Child/adult abuse or neglect
D. Crimes which involve the exploitation, including financial exploitation, of a child or an incapacitated adult
E. Any type of felony battery
F. Felony arson
G. Felony or misdemeanor crime against a child or incapacitated adult which causes harm
H. Felony drug related offenses within the last 10 years
I. Felony DUI within the last 10 years
J. Hate crimes
K. Kidnapping
L. Murder/ homicide
M. Neglect or abuse by a caregiver
N. Pornography crimes involving children or incapacitated adults including but not limited to, use of minors in filming sexually explicit conduct, distribution and exhibition of material depicting minors in sexually explicit conduct or sending, distributing, exhibiting, possessing, displaying or transporting material by a parent, legal representative or custodian, depicting a child engaged in sexually explicit conduct
O. Purchase or sale of a child
P. Sexual offenses including but not limited to incest, sexual abuse, or indecent exposure
Q. Healthcare fraud
R. Felony forgery

CIB check results, other than those listed above, which may place a member at risk of personal health and safety or have evidence of a history of Medicaid fraud or abuse must be considered by the licensed TBI Waiver provider before placing an individual in a position to provide services to the member.

If aware of a recent conviction or change in status of an agency staff member providing TBI Waiver services, the TBI Waiver provider (or PPL for Personal Options direct-care workers) must take appropriate action, including notification to BMS TBI Program Manager.

The OIG Exclusion List must be checked for every agency employee and Personal Options direct-care worker who provides Medicaid services prior to employment and monthly thereafter. Persons on the OIG Exclusion List cannot provide Medicaid services. This list can be obtained at http://exclusions.oig.hhs.gov.

All payments for services provided by excluded providers or employees will be recovered by BMS.

Old Policy

512.8 MEMBER ELIGIBILITY

Applicants for the TBI Waiver Program must meet all of the following criteria to be eligible for the program:

A. Be 22 years of age or older.
B. Be a permanent resident of West Virginia.
C. Have a traumatic brain injury defined as a non-degenerative, non-congenital insult to the brain caused by an external physical force resulting in total or partial functional disability and/or psychosocial impairment.
D. Be approved as medically eligible for nursing facility level of care.
E. Score at a Level VII or below on the Rancho Los Amigos Levels of Cognitive Functioning Scale.
F. Be inpatient in a licensed nursing facility, inpatient hospital, or in a licensed rehabilitation facility to treat TBI at the time of application.
G. Meet the Medicaid Waiver financial eligibility criteria for the program as determined by the county DHHR office, or the Social Security Administration (SSA), if an active SSI (Supplemental Security Income) recipient.
H. Choose to participate in the TBI Waiver Program as an alternative to nursing facility care.

If an individual meets eligibility requirements, a slot must be available for him/her to participate in the program. If no slots are available, applicants determined medically eligible for the Program will be placed on the Managed Enrollment List. As slots become available, applicants on the Managed Enrollment List will be notified and provided detailed instructions on continuing the application process.

New Policy

512.8 MEMBER ELIGIBILITY

Applicants for the TBI Waiver Program must meet all of the following criteria to be eligible for the program:

A. Be 22 years of age or older.
B. Be a permanent resident of West Virginia.
C. Have a traumatic brain injury, defined as a non-degenerative, non-congenital insult to the brain caused by an external physical force resulting in total or partial functional disability and/or psychosocial impairment.
D. Be approved as medically eligible for nursing facility level of care.
E. Score at a Level VII or below on the Rancho Los Amigos Levels of Cognitive Functioning Scale.
F. Be inpatient in a licensed nursing facility, inpatient hospital, or in a licensed rehabilitation facility to treat TBI or living in a community setting at the time of application.
G. Meet the Medicaid Waiver financial eligibility criteria for the program as determined by the county DHHR office, or the Social Security Administration (SSA), if an active SSI (Supplemental Security Income) recipient.
H. Choose to participate in the TBI Waiver Program as an alternative to nursing facility care.

If an individual meets eligibility requirements, a slot must be available for him/her to participate in the program. If no slots are available, applicants determined medically eligible for the Program will be placed on the Managed Enrollment List. As slots become available, applicants on the Managed Enrollment List will be notified and provided detailed instructions on continuing the application process.

Old Policy

512.8.1.2 Initial Medical Evaluation

Following is an outline of the initial medical evaluation process:

A. An applicant shall initially apply for the TBI Waiver by having his/her treating physician (M.D. or D.O.) or specially trained neuropsychologist submit a Medical Necessity Evaluation Request form to APS Healthcare. The physician's/neuropsychologist's signature is valid for sixty (60) days. The referral source for the request may be from the applicant/applicant's representative, hospital or nursing facility, DHHR, the physician, social services agencies, or others.

B. The Medical Eligibility Evaluation Request form asks that the physician/neuropsychologist submit the applicant's identifying information including, but not limited to, the following:

    1. A statement that the individual's condition meets the entry level definition of TBI: a non-degenerative, non-congenital insult to the brain caused by an external physical force resulting in total or partial functional disability and/or psychosocial impairment;
    2. A description of the functional deficits directly attributable to the TBI,
    3. The applicant is currently inpatient in a licensed nursing facility, inpatient hospital, or licensed rehabilitation facility for TBI, and;
    4. other pertinent medical diagnoses.

C. Once a referral is received, APS Healthcare will send a letter of verification of its receipt to the applicant and/or their legal representative and the referring physician or neuropsychologist. If the Medical Eligibility Evaluation Request form is incomplete it will

be returned to the referring physician or neuropsychologist for completion and resubmission, and the applicant will be notified. APS Healthcare will attempt to contact the applicant and/or their legal representative to schedule an assessment. APS Healthcare will make up to three attempts to contact the applicant. If it is determined that the applicant is not available, the referring physician or neuropsychologist and applicant and/or their legal representative will be notified that no contact could be made. If the referral is closed because of an inability to contact the applicant, a new referral will be required to re-initiate the process.

D. If contact is made, a letter will be sent to the applicant and contact person noting the contact was made and the date of the scheduled evaluation. If the applicant has identified a guardian or legal representative, no assessment shall be scheduled without presence of the guardian, legal representative or contact person. If the Medical Eligibility Evaluation Request form indicates that the applicant has severe dementia, no visit will be scheduled without the guardian, legal representative or contact person present to assist the applicant during the evaluation.

E. APS Healthcare completes the Pre-Admission Screening (PAS) and the Ranchos Los Amigos Scale. APS Healthcare staff will record observations and findings regarding the applicant's level of function. In those cases where there is a medical diagnosis question, APS Healthcare will attempt to clarify the information with the referring physician. In the event that APS Healthcare cannot obtain the information, it will be documented, and noted that supporting documentation from the referring physician was not received.

F. If it is determined that the applicant does not meet medical eligibility, the applicant, the referring physician or neuropsychologist, and applicant's representative, if applicable, will be notified by a Potential Denial letter. This letter will advise the applicant of the reason for the potential denial, listing the areas in which deficiencies were found and notice that the medical eligibility standard has not been met. A copy of the PAS, Rancho Los Amigos Scale, and relevant TBI Waiver policy will also be included with the "Potential Denial" letter. The applicant will be given two weeks to submit supplemental medical information to APS Healthcare. Information submitted after the two-week period will not be considered.

G. If the review of the supplemental information by APS Healthcare determines that there is still no medical eligibility, the applicant and/or their legal representative (if applicable), and the referring physician or neuropsychologist will be notified by a Final Denial letter. The "Final Denial" letter will provide the reason for the denial. It will also include the applicable TBI Waiver policy manual section(s), a copy of the PAS and Rancho Los Amigos Scale, supplemental information documentation (if it has been supplied), notice of resources for free legal services, and a Request for Fair Hearing form to be completed if the applicant wishes to contest the decision.

H. If the applicant's medical eligibility is denied and the applicant is subsequently found medically eligible after the fair hearing process, the date of eligibility can be no earlier than the effective date of the hearing decision.

I. If the applicant is determined medically eligible and a TBI Waiver slot is available, a notice of approved medical eligibility is sent to the applicant, the referring physician or neuropsychologist, and the applicant's legal representative, if applicable. Copies of the applicant's PAS and Rancho Los Amigos Scale are also sent at this time to the applicant and/or their legal representative (if applicable).

J. If the applicant is determined medically eligible and a slot is not available, a notice of approved medical eligibility will be sent to the applicant and/or their legal representative (if applicable) and the referring entity informing them that a slot is not currently available. The applicant will be notified that they have been placed on the Managed Enrollment List.

K. When a TBI Waiver slot is available, APS Healthcare sends a Service Delivery Model Selection form advising the applicant to choose either Traditional or Personal Options. If the member chooses the Traditional Model, a Freedom of Choice Case Management Selection Form and a Freedom of Choice Personal Attendant Selection Form are also provided to the applicant and/or their legal representative (if applicable), advising him/her to choose a Case Management Agency and a Personal Attendant Service Agency. The forms are to be returned to APS Healthcare once selections are made.

L. APS Healthcare will notify both of the agencies selected, and provide them with a copy of the applicant's PAS and Ranchos Los Amigos Scale. The Case Manager must use the Initial Contact Log at this point. It provides the Case Manager with the ability to document their initial contact to assist with financial eligibility (Refer to *Section* **512.8.2**), Member Enrollment (Refer to Section 512.9) and the required seven day contact (Refer to *Section 512.10* **MEMBER ASSESSMENT**). If Personal Options has been selected APS Healthcare will notify PPL and provide them with a copy of the PAS and Ranchos Los Amigos Scale.

New Policy

512.8.1.2 Initial Medical Evaluation

Following is an outline of the initial medical evaluation process:

A. An applicant shall initially apply for the TBI Waiver by having his/her treating physician(M.D. or D.O.) or specially trained neuropsychologist submit a Medical Necessity Evaluation Request form to APS Healthcare. The physician's/neuropsychologist's signature is valid for sixty (60) days. The referral source for the request may be from the applicant/applicant's representative, hospital or nursing facility, DHHR, the physician, social services agencies, or others.

B. The Medical Eligibility Evaluation Request form asks that the physician/neuropsychologist submit the applicant's identifying information including, but not limited to, the following:

1. A statement that the individual's condition meets the entry level definition of TBI: a non-degenerative, non-congenital insult to the brain caused by an external physical force resulting in total or partial functional disability and/or psychosocial impairment;
2. A description of the functional deficits directly attributable to the TBI,
3. If the applicant is currently inpatient in a licensed nursing facility, inpatient hospital, or licensed rehabilitation facility for TBI,(does not apply if living in the community), and;
4. other pertinent medical diagnoses.

C. Once a referral is received, APS Healthcare will send a letter of verification of its receipt to the applicant and/or their legal representative and the referring physician or neuropsychologist. If the Medical Eligibility Evaluation Request form is incomplete it will be returned to the referring physician or neuropsychologist for completion and resubmission, and the applicant will be notified. APS Healthcare will attempt to contact the applicant and/or their legal representative to schedule an assessment. APS Healthcare will make up to three attempts to contact the applicant. If it is determined that the applicant is not available, the referring physician or neuropsychologist and applicant and/or their legal representative will be notified that no contact could be made. If the referral is closed because of an inability to contact the applicant, a new referral will be required to re-initiate the process.

D. If contact is made, a letter will be sent to the applicant and contact person noting the contact was made and the date of the scheduled evaluation. If the applicant has identified a guardian or legal representative, no assessment shall be scheduled without presence of the guardian, legal representative or contact person. If the Medical Eligibility Evaluation Request form indicated that the applicant has severe dementia, no visit will be scheduled without the guardian, legal representative or contact person present to assist the applicant during the evaluation.

E. APS Healthcare completes the Pre-Admission Screening (PAS) and the Ranchos Los Amigos Scale. APS Healthcare staff will record observations and findings regarding the applicant's level of function. In those cases where there is a medical diagnosis question, APS Healthcare will attempt to clarify the information with the referring physician. In the event that APS Healthcare cannot obtain the information, it will be documented, and noted that the supporting documentation from the referring physician was not received.

F. If it is determined that the applicant does not meet medical eligibility, the applicant, the referring physician or neuropsychologist, and applicant's representative, if applicable, will be notified by a Potential Denial letter. This letter will advise the applicant of the reason for the potential denial, listing the areas in which deficiencies were found and notice that the medical eligibility standard has not been met. A copy of the PAS, Rancho Los Amigos Scale, and relevant TBI Waiver policy will also be included with the "Potential Denial" letter. The applicant will be given two weeks to submit supplemental medical information to APS Healthcare. Information submitted after the two-week period will not be considered.

G. If the review of the supplemental information by APS Healthcare determines that there is still no medical eligibility, the applicant and/or their legal representative (if applicable),

and the referring physician or neuropsychologist will be notified by a Final Denial letter. The "Final Denial" letter will provide the reason for the denial. It will also include the applicable TBI Waiver policy manual section(s), a copy of the PAS and Rancho Los Amigos Scale, supplemental information documentation (if it has been supplied), notice of resources for free legal services, and a Request for Fair Hearing form to be completed if the applicant wishes to contest the decision.

H. If the applicant's medical eligibility is denied and the applicant is subsequently found medically eligible after the fair hearing process, the date of eligibility can be no earlier than the effective date of the hearing decision.

I. If the applicant is determined medically eligible and a TBI Waiver slot is available, a notice of approved medical eligibility is sent to the applicant, the referring physician or neuropsychologist, and the applicant's legal representative, if applicable. Copies of the applicant's PAS and Rancho Los Amigos Scale are also sent at this time to the applicant and/or their legal representative (if applicable).

J. If the applicant is determined medically eligible and a slot is not available, a notice of approved medical eligibility will be sent to the applicant and/or their legal representative(if applicable) and the referring entity informing them that a slot is not currently available. The applicant will be notified that they have been placed on the Managed Enrollment List.

K. When a TBI Waiver slot is available, APS Healthcare sends a Service Delivery Model Selection Form advising the applicant to choose either Traditional or Personal Options. If the member chooses the Traditional Model, a Freedom of Choice Case Management Selection Form and a Freedom of Choice Personal Attendant Selection Form are also provided to the applicant and/or their legal representative if applicable), advising him/her to choose a Case Management Agency and a Personal Attendant Service Agency. The forms are to be returned to APS Healthcare once selections are made.

L. APS Healthcare will notify both of the agencies selected, and provide them with a copy of the applicant's PAS and Ranchos Los Amigos Scale. The Case Manager must use the Initial Contact Log at this point. It provides the Case Manager with the ability to document their initial contact to assist with financial eligibility (Refer to *Section* **512.8.2**), Member Enrollment (Refer to Section 512.9) and the required seven day contact (Refer to *Section 512.10* **MEMBER ASSESSMENT**). If Personal Options has been selected APS Healthcare will notify PPL and provide them with a copy of the PAS and Ranchos Los Amigos Scale.

CHAPTER 512–COVERED SERVICES, LIMITATIONS, AND EXCLUSIONS FOR TRAUMATIC BRAIN INJURY (TBI) WAIVER SERVICES

TABLE OF CONTENTS

CHAPTER 512–COVERED SERVICES, LIMITATIONS, AND EXCLUSIONS FOR TRAUMATIC BRAIN INJURY WAIVER SERVICES

INTRODUCTION

The West Virginia Medicaid Program is administered pursuant to Title XIX of the Social Security Act and Chapter 9 of West Virginia Code. The Bureau for Medical Services (BMS) in the West Virginia Department of Health and Human Resources (DHHR) is the single State agency responsible for administering the Program. This Program, therefore, must also function within federally defined parameters. Any service, procedure, item, or situation not discussed in the manual must be presumed non-covered.

Medicaid offers a comprehensive scope of medically necessary medical and mental health services. All covered and authorized services must be provided by enrolled providers practicing within the scope of their license, utilizing professionally accepted standards of care, and in accordance with all State and Federal requirements. Enrolled providers are subject to review of services provided to Medicaid members by BMS whether or not the services require prior authorization. All providers of services must maintain current, accurate, legible and completed documentation to justify medical necessity of services provided to each Medicaid member and made available to BMS or its designee upon request.

This chapter sets forth the BMS requirements for the Traumatic Brain Injury (TBI) Waiver Program provided to eligible West Virginia Medicaid members. Requirements and details for other West Virginia Medicaid covered services can be found in other chapters of the provider manual.

All forms for this program can be found at http://www.dhhr.wv.gov/bms

512.1 DEFINITIONS

Definitions governing the provision of all West Virginia Medicaid services will apply pursuant to *Common Chapter 200, Acronyms and Definitions*, of the Provider Manual. In addition, the following definitions apply to the TBI Waiver Program described in this chapter.

Abuse: the infliction or threat to inflict bodily injury on or the imprisonment of any child or incapacitated adult.

Activities of Daily Living (ADL): activities that a person ordinarily performs during the ordinary course of a day, such as mobility, personal hygiene, bathing, dressing, eating, and skills required for community living.

Administrative Services Organization (ASO): the contract vendor, currently APS Healthcare, responsible for day-to-day operations and oversight of the TBI Waiver Program including conducting the medical evaluations and determining medical eligibility for applicants and members of the program

Community Integration: the opportunity to live in the community, and participate in a meaningful way to obtain valued social roles as other citizens without disabilities.

Competency Based Curriculum: a training program which is designed to give participants the skills they need to perform certain tasks and/or activities. The curriculum must have goals, objectives and an evaluation system to demonstrate competency in training areas.

Emergency Plan: a written plan which details who is responsible for specific activities in the event of an emergency, whether it is a natural or man-made incident.

Environmental Maintenance: activities such as light housecleaning, making and changing the member's bed, dishwashing, and member's laundry.

Felony: a serious criminal offense punishable by imprisonment in a penitentiary for a period of at least one year.

Financial Exploitation: illegal or improper use of an elder's or incapacitated adult's resources. Examples of financial exploitation include cashing a person's checks without authorization; forging a person's signature; or misusing or stealing a person's money or possessions. Another example is deceiving a person into signing any contract, will, or other legal document.

Fiscal Agent: the contract vendor, currently Molina Medicaid Solutions, responsible for claims processing and provider relations/enrollment.

Fiscal Employer/ Agent (FE/A): the contract agent, currently Public Partnerships, LLC (PPL), under Personal Options, which receives, disburses, and tracks funds based on participants' approved service plans and budgets; assists participants with completing participant enrollment and worker employment forms; conducts criminal background checks of prospective workers; and verifies workers' information (i.e., social security numbers, citizenship or legal alien verification documentation). The FE/A also prepares and distributes payroll including the withholding, filing, and depositing of federal and state income tax withholding and employment taxes and locality taxes; processes and pays vendor invoices for approved goods and services, as applicable; generates reports for state program agencies, and participants; and may arrange and process payment for workers' compensation and health insurance, when appropriate.

Home and Community Based Services (HCBS): services which enable individuals to remain in the community setting rather than being admitted to a Long Term Care Facility (LTCF).

Informal Supports (Informals): Family, friends, neighbors or anyone who provides support and assistance to a member but is not reimbursed.

Instrumental Activities of Daily Living (IADL): skills necessary to live independently, such as abilities used to shop for groceries, handle finances, perform housekeeping tasks, prepare meals, and take medications.

Legal Representative: a personal representative with legal standing (as by power of attorney, medical power of attorney, guardian, etc.).

Misdemeanor: a less serious criminal offense than a felony which is punishable by a fine or imprisonment in jail for less than a year

Neglect: "Failure to provide the necessities of life to an incapacitated adult" or "the unlawful expenditure or willful dissipation of the funds or other assets owned or paid to or for the benefit of an incapacitated adult"(See WV Code §9-6-1). Neglect would include inadequate medical care by the service provider or inadequate supervision resulting in injury or harm to the incapacitated member. Neglect also includes, but is not limited to: a pattern of failure to establish or carry out a member's individualized program plan or treatment plan that results in negative outcome or places the member in serious jeopardy; a pattern of failure to provide adequate nutrition, clothing, or health care; failure to provide a safe environment resulting in negative outcome; and/or failure to maintain sufficient, appropriately trained staff resulting in negative outcome or serious jeopardy. This may also include medication errors and dietary errors resulting in a need for treatment for the member.

Participant-Direction: the member, or his/her representative, has decision-making authority over certain services and takes direct responsibility to manage their services with the assistance of a system of available supports. Participant-Direction promotes personal choice and control over the delivery of services, including who provides the services and how services are provided.

Person-Centered Planning: a process-oriented approach which focuses on the person and his/her needs by putting him/her in charge of defining the direction for his/her life, not on the systems that may or may not be available.

Quality Management Plan: a written document which defines the acceptable level of quality, for a waiver agency and describes how plan implementation will ensure this level of quality through documented deliverables and work processes.

Remediation: act of correcting an error or a fault.

Representative Sample: a small quantity of a targeted group such as customers, data, people, products, whose characteristics represent (as accurately as possible) the entire batch, lot, population, or universe.

Resource Consultant: an employee of PPL who assists members who choose Personal Options with the responsibilities of self-direction, such as developing a plan and budget to meet their needs; providing information and resources to help hire, train and manage employees; developing and maintaining a directory of eligible employees; providing information and resources to help purchase goods and services; connecting with a network of peer supports; helping to complete required paperwork for Personal Options; and helping the member select a representative to assist them, as needed.

Scope of Services: the range of services deemed appropriate and necessary for an individual member. Such services may include but are not limited to prevention, intervention, outreach, information and referral, detoxification, inpatient or outpatient services, extended care, transitional living facilities, etc.

Sexual Abuse: any of the following acts toward an incapacitated adult in which an individual engages in, attempts to engage in, or knowingly procures another person to engage in such act, notwithstanding the fact that the incapacitated individual may have suffered no apparent physical injury as a result of such conduct:

1) Sexual intercourse/intrusion/contact; and
2) Any conduct whereby an individual displays his/her sex organs to an incapacitated adult for the purpose of gratifying the sexual desire of that individual, of the person making such display, or of the incapacitated adult, or for the purpose of affronting or alarming the incapacitated adult.

Sexual Exploitation: when an individual, whether for financial gain or not, persuades, induces, entices, or coerces an incapacitated adult to display his/her sex organs for the sexual gratification of that individual or third person, or to display his/her sex organs under circumstances in which that individual knows such display is likely to be observed by others who would be affronted or alarmed.

512.2 PROGRAM DESCRIPTION

Federal regulations governing Medicaid coverage of home and community-based services under an approved waiver specify that services provided under waiver authority must be targeted to individuals who would otherwise be eligible for placement in a long-term care facility.

The TBI Waiver Program is a long-term care alternative which provides services that enable individuals to live at home rather than receiving nursing facility care. The program provides home and community-based services to West Virginia residents who are medically and financially eligible to participate in the program. Members must be at least 22 years of age and have a documented traumatic brain injury, defined as a non-degenerative, non-congenital insult to the brain caused by an external physical force resulting in a total or partial functional disability and/or psychosocial impairment. The goals and objectives of this program are focused on providing services that are person-centered, that promote choice, independence, participant-direction, respect, and dignity and community integration. All members are offered and have a right to freedom of choice of providers for services. BMS contracts with APS Healthcare to implement the administrative functions of the Program.

TBI Waiver services, eligible for reimbursement by Medicaid, are to be provided exclusively to the member, for necessary activities as listed in the Service Plan. They are not to be provided for the convenience of the household or others. Although informal supports are not mandatory in the TBI Waiver Program, the program is designed to provide formal support services to supplement, rather than replace, the member's existing informal support system.

TBI Waiver services include Case Management, Personal Attendant Services, Cognitive Rehabilitation Therapy, and Participant-Directed Goods and Services.

TBI Waiver members may choose from either the Traditional (Agency) Model or the Participant-Directed Model known as Personal Options for service delivery. In the Traditional Model, members receive their services from employees of a certified provider agency or an independent professional qualified to provide Cognitive Rehabilitation Therapy. In Personal Options, members are able to hire, supervise, and terminate their own employees.

512.3 PROVIDER AGENCY CERTIFICATION

TBI Waiver provider agencies must be certified by APS Healthcare. A Certification Application must be completed and submitted to:

APS Healthcare, Inc.
100 Capitol Street, Suite 600
Charleston, WV 25301

An agency may provide Case Management, Personal Attendant Services and/or Cognitive Rehabilitation Therapy provided they maintain:

A. A separate certification and WV Medicaid provider number for each service;
B. Separate staffing; and,
C. Separate member files for Case Management, Personal Attendant and Cognitive Rehabilitation Therapy Services.

Conflicts of interest and self-referral are prohibited.

Certified TBI Waiver Case Management and Personal Attendant Service provider agencies must meet and maintain the following requirements:

A. A business license issued by the State of West Virginia.
B. A federal tax identification number (FEIN).
C. A competency based curriculum for required training areas for Personal Attendant direct care staff.
D. An organizational chart
E. A list of the Board of Directors (if applicable)
F. A list of all agency staff, which includes their qualifications.
G. A Quality Management Plan that is consistent with the Centers for Medicare & Medicaid Services' (CMS) quality framework and assurances.
(Refer to http://www.hcbs.org/files/28/1377/QFramework.pdf).
H. A physical office that meets ADA standards.
I. Written policies and procedures for processing member grievances.
J. Written policies and procedures for processing member and staff complaints.
K. Written policies and procedures for member transfers.
L. Written policies and procedures for the discontinuation of member services.
M. Written policies and procedures to avoid conflict of interest (if agency is providing both Case Management and Personal Attendant Services).
N. Office space that allows for member confidentiality.
O. An Agency Emergency Plan (for members and office operations).
P. Policy for maintaining 24 hour contact availability. (Personal Attendant Agencies Only)

Provider agencies will be reviewed by APS Healthcare within six months of initial agency certification, and annually thereafter. (Refer to *Section 512.3.2* **Initial/Continuing Certification of Provider Agencies**).

Agencies wishing to provide Cognitive Rehabilitation Therapy services to TBI Waiver members must maintain a current behavioral health provider license by the Office of Health Facilities and Certification (OHFLAC).

More information regarding provider participation requirements in Medicaid services can be found in *Common Chapter 300, Provider Participation Requirements*.

512.3.1 Office Criteria

TBI Waiver Case Management and Personal Attendant Service provider agencies must designate and staff at least one physical office within West Virginia. A post office box or commercial mailbox will not suffice. Each designated office must meet the following criteria:

A. An agency office site can serve no more than eight contiguous counties in WV as designated in the application. (TBI Waiver providers wishing to make changes in the approved counties they serve **must** make the request in writing to APS Healthcare. APS Healthcare will make a determination on the request and inform the provider in writing. No changes in counties served can be made unless approved by APS Healthcare).
B. Meet ADA requirements for physical accessibility. (Refer to 28 CFR 36, as amended)
C. Be readily identifiable to the public.
D. Maintain a primary telephone number that is listed with the name and local address of the business. (Note: Exclusive use of a pager, answering service, a telephone line shared with another business/individual, facsimile machine, cell phone, or answering machine does not constitute a primary business telephone.)
E. Maintain an agency secure (HIPAA compliant) e-mail address for communication with BMS and APS Healthcare.
F. Be open to the public at least 40 hours per week. Observation of state and federal holidays is at the provider's discretion.
G. Contain space for securely maintaining member and personnel records. (Refer to *Common Chapter 800*, *General Administration*, and *Common Chapter 300*, *Provider Participation Requirements*, for more information on maintenance of records).
H. Maintain a 24-hour contact method (Personal Attendant Agencies only).

512.3.2 Initial/Continuing Certification of Provider Agencies

Following the receipt of a completed Certification Application, APS Healthcare will conduct an onsite review, if required, to verify that the applicant meets certification requirements. This requirement may be waived if the prospective provider is a current Licensed Behavioral Health Center or is enrolled as an Aged and Disabled Waiver, Personal Care, or Intellectual/Developmental Disabilities (I/DD) Waiver provider at the time of application. APS Healthcare will notify Molina, BMS' fiscal agent, upon satisfactory completion of the onsite review or verification of LBHC, Aged and Disabled Waiver, Personal Care or I/DD waiver status.

Molina will provide the applicant with an enrollment packet which includes the TBI Provider Agreement. Once this process has been completed, Molina will assign a provider number. A letter informing the agency that it may begin providing and billing for TBI Waiver services will be sent to the agency and to APS Healthcare.

Persons employed by Medicaid members choosing Personal Options enter into a simplified provider agreement facilitated and signed by Public Partnerships, LLC (PPL) which acts as BMS' Fiscal Employer/Agent.

When a Case Management or Personal Attendant Service provider agency is physically going to move to a new location or open a satellite office, they must notify APS Healthcare **prior** to the move. APS Healthcare will schedule an on-site review of the new location to verify the site meets certification requirements. Medicaid services cannot be provided from an office location that has not been certified by APS Healthcare.

Once certified and enrolled as a Medicaid provider, TBI Waiver Case Management and Personal Attendant Service provider agencies must continue to meet the requirements listed in this chapter as well as the following:

A. Employ adequate, qualified, and appropriately trained personnel who meet minimum standards for providers of the TBI Waiver Program.
B. Provide services based on each member's individual assessed needs, including evenings and weekends.
C. Maintain records that fully document and support the services provided.
D. Furnish information to BMS, or its designee, as requested. (Refer to *Common Chapter 800, General Administration*, and *Common Chapter 300, Provider Participation Requirements*, for more information on maintenance of records).
E. Maintain a current list of members receiving TBI Waiver services.

Licensed Behavioral Health Centers providing Cognitive Rehabilitation Therapy must maintain a current licensure with OHFLAC.

512.3.3 Record Requirements

TBI Waiver providers must meet the following record requirements:

Member records:

A. The provider must keep a file on each Medicaid member.
B. Member files must contain all original documentation for services provided to the member by the provider responsible for development of the document (for example the Case Management Agency should have the original Service Plan, the complete Member Assessment, Contact Notes, Member Enrollment Confirmation, etc.)
C. Original documentation on each member must be kept by the Medicaid provider for five years, with any and all exceptions having been declared resolved by BMS, in the designated office that represents the county where services were provided.

Personnel Records:

A. Original or legible copies of personnel documentation including training records, licensure, confidentiality agreements, criminal investigation background checks (CIB) etc. must be maintained on file by the provider.
B. Minimum credentials for professional staff must be verified upon hire and thereafter based upon their individual professional license requirements.
C. All documentation on each staff member must be kept by the provider in the designated office that represents the county where services were provided.
D. Verification that federal and state Exclusion Lists were checked as appropriate for the position.

TBI Waiver providers must agree to abide by all applicable federal and state laws, policy manuals, and other documents that govern the Waiver program. Providers must also agree to make themselves, Board Members, their staff, and any and all records pertaining to member services available to any audit, desk review, or other service evaluation that ensures compliance with billing regulations and program goals.

512.3.4 Provider Certification Reviews

TBI Waiver provider agencies are required to submit designated evidence to APS Healthcare every 12 months to document continuing compliance with all Certification requirements as specified in this Chapter. This evidence must be attested to by an appropriate official of the provider agency (e.g., Executive Director or Board Chair). If appropriate documentation is not provided within 30 days of expiration of current certification, a Provisional Certification may apply. Provider agencies who receive a Provisional Certification will be required to have an onsite review by APS Healthcare prior to full re-certification. If deficiencies are found by APS Healthcare during document review, the provider must submit a corrective action plan within 30 days of notice of deficiency. If an approved corrective action plan and required documentation is not submitted within the required time frame, BMS may hold provider reimbursement until an approved corrective action plan is in place.

A percentage of providers will be randomly selected annually for an onsite review to validate certification documentation. Record selection will include a statewide representative sample of member records. The monitoring tools used by APS Healthcare to review member charts will be made available at www.apshealthcare.com The West Virginia Participant Experience Survey (PES) will also be conducted with those members whose charts are selected for review. A proportionate random sample will also be implemented to ensure that at least one member record from each provider site is reviewed.

Targeted onsite certification reviews may also be conducted based on Incident Management Reports and complaint data. In some instances, when member's health and safety are in question, a full review of all records will be conducted.

Completed reports will be made available to the provider agency or PPL within 30 calendar days of the Certification review. Providers must respond to any corrective action within 30 calendar days after receipt of the completed report.

512.3.5 Personal Attendant Service Staff Requirements

Medicaid prohibits the spouse of a TBI Waiver member from providing Waiver services for purposes of reimbursement.

Personal Attendant Service staff and Personal Options direct care staff must be at least 18 years of age and must have completed the following competency based training before providing services to TBI Waiver members:

A. Cardiopulmonary Resuscitation (CPR) – must be provided by an agency nurse, or a certified trainer from the American Heart Association, American Red Cross, or other organizations approved by BMS. First Aid – must be provided by an agency nurse, a certified trainer or an approved internet provider.
B. Occupational Safety and Health Administration (OSHA) training – must use the current training material provided by OSHA.
C. Personal Attendant Skills – training focused on assisting individuals with Traumatic Brain Injuries with ADL's – must be provided by a Registered Nurse, social worker/counselor, a documented specialist in this content area or an approved internet training provider.
D. Abuse, Neglect and Exploitation - must be provided by a Registered Nurse, social worker/counselor, a documented specialist in this content area, or an approved internet training provider.
E. HIPAA – training must include agency staff responsibilities regarding securing Protected Health Information - must be provided by a Registered Nurse, social worker/counselor, a documented specialist in this content area or an approved internet training provider.
F. Direct Care Ethics – training on ethics such as promoting physical and emotional well-being, respect, integrity and responsibility, justice, fairness and equity - must be provided by a Registered Nurse, social worker/counselor, a documented specialist in this content area, or an approved internet training provider.
G. Member Health and Welfare – training must include emergency plan response, fall prevention, home safety and risk management and training specific to any member with special needs must be provided by a Registered Nurse, social worker/counselor, a documented specialist in this content area or an approved internet training provider.
H. Crisis Intervention Training.

Prior to using an internet provider for training purposes TBI Waiver providers must submit the name, web address, and course name(s) to APS Healthcare for review. APS Healthcare will respond in writing whether this internet training meets the training criteria.

Personal Options members may access their PPL Resource Consultant for training materials and assistance.

512.3.5.1 Annual Direct Care Staff Training

CPR, First Aid, OSHA, Abuse, Neglect, Exploitation and HIPAA training must be kept current.

A. CPR is current as defined by the terms of the certifying entity.

B. First Aid, if provided by an agency RN, must be renewed within 12 months or less. If provided by a nationally recognized organization, current is defined by the terms of the certifying agency. Training will be determined current in the month it initially occurred. (Example: if First Aid training was conducted May 10, 2010, it will be valid through May 31, 2011.
C. OSHA, Abuse, Neglect and Exploitation, and HIPAA must be renewed within 12 months or less. Training will be determined current in the month it initially occurred. (See example above.)
D. 4 hours of training focusing on enhancing direct care service delivery knowledge and skills for people with traumatic brain injuries must be provided annually. Member specific on-the-job-training may be counted toward this requirement.

512.3.5.2 Training Documentation

Documentation for training conducted by an agency RN, social worker/counselor, or a documented specialist in the content area must include the training topic, date, beginning time of the training, ending time of the training, location of the training and the signature of the instructor and the trainee or for Personal Options, the member and/or their legal representative (if applicable). Training documentation for internet based training must include the employee's name, the name of the internet provider/trainer and either a certificate or other documentation proving successful completion of the training.

512.3.6 Case Manager Qualifications

A Case Manager must be licensed in West Virginia as a Social Worker, Counselor, or Registered Nurse and employed by a TBI Waiver Case Management Agency enrolled with Medicaid. Licensure documentation must be maintained in the employee's file. Documentation that covers all of the employee's employment period must be present (Example - if an employee has been with your agency for three years – documentation of licensure must be present for all three years).

512.3.7 Cognitive Rehabilitation Therapist Qualifications

Cognitive Rehabilitation Therapy (CRT) must be provided by Licensed Behavioral Health Centers (LBHCs) or independent Physicians, Neuropsychologists, Psychologists, Occupational Therapist, Speech Therapists, or Physical Therapists licensed to practice in the State of West Virginia. LBHC staff providing CRT can be licensed professionals from a wide range of disciplines including, but not limited to, counseling, education, medicine, neuropsychology, occupational therapy, physical therapy, psychology, recreation therapy, social work, special education and speech-language pathology. LBHC staff and independent professionals providing CRT to members must be certified or be in the process of attaining necessary credentials and/or experience for certification by the Society for Cognitive Rehabilitation (SCR). Staff in the process of attaining certification will have up to three years to finalize the certification process.

All documented evidence of staff qualifications such as licenses, transcripts, certificates, signed confidentiality agreements (Refer to *Common Chapter 100, General Information*,), and

references shall be maintained on file by the provider. Provider agencies shall have an internal review process to ensure that employees providing TBI Waiver services meet the minimum qualifications.

512.3.8 Criminal Investigation Background Checks and Restrictions and Medicaid Exclusion List

At a minimum, a state level criminal investigation background check (CIB), which includes fingerprints, must be conducted by the West Virginia State Police initially and again every three years for all TBI Waiver provider staff providing direct-care services to members including direct-care personnel (agency and Personal Options), Case Managers, and Cognitive Rehabilitation Therapists. If a prospective or current employee has lived out of state within the last five years, an FBI fingerprint-based criminal history check must also be conducted.

Prior to providing TBI Waiver services, required fingerprint-based checks must be initiated. TBI Waiver providers **may** do a preliminary check utilizing on-line internet companies and use these results until the fingerprint results are received. An individual who is providing direct-care services by a TBI Waiver provider cannot be considered to provide services if ever convicted of:

A. Abduction
B. Any violent felony crime including but not limited to rape, sexual assault, homicide, felonious physical assault or felonious battery
C. Any type of felony battery
D. Child/adult abuse or neglect
E. Crimes which involve the exploitation of a child or an incapacitated adult, including financial exploitation
F. Felony arson
G. Felony or misdemeanor crime against a child or incapacitated adult which causes harm
H. Felony drug related offenses within the last 10 years
I. Felony DUI within the last 10 years
J. Hate crimes
K. Kidnapping
L. Murder/ homicide
M. Neglect or abuse by a caregiver
N. Pornography crimes involving children or incapacitated adults including but not limited to, use of minors in filming sexually explicit conduct, distribution and exhibition of material depicting minors in sexually explicit conduct or sending, distributing, exhibiting, possessing, displaying or transporting material by a parent, guardian or custodian, depicting a child engaged in sexually explicit conduct
O. Purchase or sale of a child
P. Sexual offenses including but not limited to incest, sexual abuse, or indecent exposure
Q. Healthcare fraud
R. Felony forgery

CIB check results, other than those listed above, which may place a member at risk of personal health and safety or have evidence of a history of Medicaid fraud or abuse, must be considered by the licensed TBI Waiver provider before placing an individual in a position to provide services to the member.

If aware of a recent conviction or change in status of an agency staff member providing TBI Waiver services, the TBI Waiver provider (or PPL for Personal Options direct-care workers) must take appropriate action, including notification to the BMS TBI Program Manager.

The OIG Exclusion List must be checked for every agency employee and Personal Options direct-care worker who provides Medicaid services prior to employment and monthly thereafter. Persons on the OIG Exclusion List cannot provide Medicaid services. This list can be obtained at http://exclusions.oig.hhs.gov.

All payments for services provided by excluded providers or employees will be recovered by BMS.

512.4 Voluntary Agency Closure

A provider agency may terminate participation in the TBI Waiver Program with 30 calendar day's written notification of voluntary termination. The written termination notification must be submitted to the BMS claims agent and to APS Healthcare. The provider must provide APS Healthcare with a complete list of all current TBI Waiver members that will need to be transferred.

APS Healthcare will provide selection forms to each of the agency's members, along with a cover letter explaining the reason a new selection must be made.

If at all possible, a joint visit with the member will be made by both the agency ceasing participation and the new one selected in order to explain the transfer process. Services must continue to be provided until all transfers are completed by APS Healthcare.

The agency terminating participation must ensure that the transfer of the member is accomplished as safely, orderly and expeditiously as possible.

Personal Options members must notify PPL within 24 hours when an employee terminates their employment.

512.5 Involuntary Agency Closure

BMS may administratively terminate a provider agency from participation in the TBI Waiver program for violation of the rules, regulations, or for the conviction of any crime related to health care delivery. If the provider is a corporation, its owners, officers, or employees who have violated said rules and/or regulations or have been convicted of a crime related to health care delivery, may likewise be excluded from further participation in the TBI Waiver program. After notice of intention to suspend or terminate enrollment under his/her authority, the provider may request a document/desk review. Refer to *Common Chapter 800, General Administration,* for more information on this procedure.

Prior to closure, the provider will be required to provide APS Healthcare with a complete list of all current TBI Waiver members that will need to be transferred. APS Healthcare will provide selection forms to each of the agency's members, along with a cover letter explaining the

reason a new selection must be made. APS HealthCare will ensure that the transfer of all members is accomplished as safely, orderly and expeditiously as possible.

512.6 Additional Sanctions

If BMS or APS Healthcare receives information that clearly indicates a provider is unable to serve new members due to staffing issues, member health and safety risk, etc. or has a demonstrated inability to meet recertification requirements, BMS may remove the agency from the Provider Selection Forms and from the provider information on the APS Healthcare website until the issues/concerns are addressed to the satisfaction of BMS. Health and Safety deficiencies deemed critical may include other sanctions including involuntary agency closure.

512.7 INCIDENT MANAGEMENT

TBI Waiver providers shall have policies and procedures for thoroughly reviewing, investigating, and tracking all incidents involving the risk or potential risk to the health and safety of the members they serve. The provider is responsible for taking appropriate action on both an individual and systemic basis in order to identify potential harms, or to prevent further harm, to the health and safety of all members served. Incidents shall be classified by the provider as one of the following:

Abuse, Neglect, or Exploitation:

Anyone providing services to a TBI Waiver member who suspects an incidence of abuse or neglect, as defined in Section 512.1 of this Chapter, must report the incident to the local DHHR office in the county where the person who is allegedly abused lives. Reports of abuse and/or neglect may be made anonymously to the county DHHR office or by calling 1-800-352-6513, 7 days a week, 24 hours a day. This initial report must then be followed by a written report, submitted to the local Department of Health and Human Resources, within forty-eight (48) hours following the verbal report. An Adult Protective Services (APS) Worker may be assigned to investigate the suspected or alleged abuse.

Critical Incidents:

Critical incidents are incidents with a high likelihood of producing real or potential harm to the health and welfare of the TBI Waiver member. These incidents might include, but are not limited to, the following:

- Attempted suicide, or suicidal threats or gestures.
- Criminal activity that is suspected or observed by members themselves, members' families, health care providers, concerned citizens, or public agencies that does not compromise the health or safety of the member.
- An unusual event such as a fall or injury of unknown origin requiring medical intervention if abuse and neglect is not suspected.
- A significant interruption of a major utility, such as electricity or heat in the member's residence, but does not compromise the health or safety of the member.
- Environmental/structural problems with the member's home, including inadequate sanitation or structural damage that does not compromise the health or safety of the member.

- Fire in the home resulting in relocation or property loss that does not compromise the health or safety of the member.
- Unsafe physical environment in which the Personal Attendant and/or other agency staff are threatened or abused, and the staff's welfare is in jeopardy.
- Disruption of the delivery of TBI Waiver services, due to involvement with law enforcement authorities by the member and/or others residing in the member's home that does not compromise the health or safety of the member.
- Medication errors by a member or his/her family caregiver that do not compromise the health or safety of the member, such as medication taken that was not prescribed or ordered for the member, and failure to follow directions for prescribed medication, including inappropriate dosages, missed doses, or doses administered at the wrong time.
- Disruption of planned services for any reason that does not compromise the health or safety of the member, including failure of member's emergency backup plan.
- Any other incident judged to be significant and potentially having a serious negative impact on the member, but does not compromise the health or safety of the member.
- Any incident attributable to the failure of TBI Waiver provider staff to perform his/her responsibilities that compromises the health or safety of the member is considered to be neglect and must be reported to Adult Protective Services (APS).

Simple Incidents:

Simple incidents are any unusual events occurring to a member that cannot be characterized as a critical incident and does not meet the level of abuse or neglect. Examples of simple incidents include, but are not limited to, the following:

- Minor injuries of unknown origin with no detectable pattern
- Dietary errors with minimal or no negative outcome

512.7.1 Incident Management Documentation and Investigation Procedures

Any incident involving a TBI Waiver member must be entered into the West Virginia Incident Management System (WVIMS) within 24 hours of learning of the incident. The Agency Director or Case Manager will immediately review each incident report. All Critical Incidents must be investigated. As noted in Section 512.7, all incidents involving abuse, neglect and/or exploitation must be reported to Adult Protective Services, but also must be noted in WVIMS.

An Incident Report documenting the outcomes of the investigation must be completed and entered into the WVIMS within 14 calendar days of the incident. Each Incident Report must be printed, reviewed and signed by the Director and placed in an administrative file.

Personal Attendant Service provider agencies must report to WVIMS monthly the number of hospitalizations which occurred during the month. In addition, providers are to report if there were no incidents.

For Personal Options, PPL must report any incidents in the WVIMS within 24 hours of learning of the incident. As noted in Section 512.7, all incidents involving abuse, neglect and/or exploitation must be reported to Adult Protective Services, but also must be noted in WVIMS. APS Healthcare reviews each incident, investigates and enters outcomes of the investigation within 14 calendar days of the incident.

The WVIMS does not supersede the reporting of incidents to Adult Protective Services. At any time during the course of an investigation should an allegation or concern of abuse or neglect arise, the provider, or APS HealthCare investigating Personal Options related incidents, shall immediately notify Adult Protective Service (W.Va. Code §9-6-9a).

An agency is responsible to investigate all incidents, including those reported to Adult Protective Service. If requested by Adult Protective Service, a provider shall delay its own investigation and document such request in the online WVIMS.

512.7.2 Incident Management Tracking and Reporting

Provider agencies must review and analyze incident reports to identify health and safety trends. Identified health and safety concerns and remediation strategies must be incorporated into the agency Quality Management Plan. The Quality Management Plan must be made available to APS Healthcare monitoring staff at the time of the provider monitoring review or upon request.

PPL has a tracking/reporting responsibility defined in their contract with BMS

512.8 MEMBER ELIGIBILITY

Applicants for the TBI Waiver Program must meet all of the following criteria to be eligible for the program:

A. Be 22 years of age or older.
B. Be a permanent resident of West Virginia.
C. Have a traumatic brain injury defined as a non-degenerative, non-congenital insult to the brain caused by an external physical force resulting in total or partial functional disability and/or psychosocial impairment.
D. Be approved as medically eligible for nursing facility level of care.
E. Score at a Level VII or below on the Rancho Los Amigos Levels of Cognitive Functioning Scale.
F. Be inpatient in a licensed nursing facility, an inpatient hospital, a licensed rehabilitation facility to treat TBI, or living in a community setting at the time of application.
G. Meet the Medicaid Waiver financial eligibility criteria for the program as determined by the county DHHR office, or the Social Security Administration (SSA), if an active SSI (Supplemental Security Income) recipient.
H. Choose to participate in the TBI Waiver Program as an alternative to nursing facility care.

If an individual meets eligibility requirements, a slot must be available for him/her to participate in the program. If no slots are available, applicants determined medically eligible for the Program will be placed on the Managed Enrollment List. As slots become available, applicants on the Managed Enrollment List will be notified and provided detailed instructions on continuing the application process.

512.8.1 Medical Eligibility

APS Healthcare is responsible for evaluating medical eligibility, conducting assessments and determining if medical eligibility requirements for the TBI waiver program are met.

The purpose of the medical eligibility review is to ensure the following:

A. New applicants and existing members are medically eligible based on current and accurate evaluations.
B. The medical eligibility determination process is fair, equitable, and consistently applied throughout the State.

512.8.1.1 Medical Eligibility Criteria

An individual must have five deficits as described on the Pre-Admission Screening Form (PAS) to qualify for nursing facility level of care. These deficits are derived from a combination of the following assessment elements on the PAS.

Section	Description of Deficits	
#24	Decubitus; Stage 3 or 4	
#25	In the event of an emergency, the individual is c) mentally unable or d) physically unable to vacate a building. a) Independently and b) With Supervision are not considered deficits.	
#26	Functional abilities of individual in the home	
a.	Eating	Level 2 or higher (physical assistance to get nourishment, not preparation)
b.	Bathing	Level 2 or higher (physical assistance or more)
c.	Dressing	Level 2 or higher (physical assistance or more)
d.	Grooming	Level 2 or higher (physical assistance or more)
e. f.	Continence, bowel Continence, Bladder	Level 3 or higher; must be incontinent.
g.	Orientation	Level 3 or higher (totally disoriented, comatose).
h.	Transfer	Level 3 or higher (one-person or two-person assistance in the home)
i.	Walking	Level 3 or higher (one-person assistance in the home)
j.	Wheeling	Level 3 or higher (must be Level 3 or 4 on walking in the home to use Level 3 or 4 for wheeling in the home. Do not count outside the home.)
#27	Individual has skilled needs in one or more of these areas: (g) suctioning, (h) tracheostomy, (i) ventilator, (k) parenteral fluids, (l) sterile dressings, or (m) irrigations.	
#28	Individual is not capable of administering his/her own medications.	

Applicants must also score at a Level VII or lower on the Ranchos Los Amigos Scale. Information on the Ranchos Scale can be found on the APS HealthCare web site at http://apshealthcare.com/publicprograms/west_virginia/WV_Participating_Providers.htm.

512.8.1.2 Initial Medical Evaluation

Following is an outline of the initial medical evaluation process:

A. An applicant shall initially apply for the TBI Waiver by having his/her treating physician(M.D. or D.O.) or specially trained neuropsychologist submit a Medical Necessity Evaluation Request form to APS Healthcare. The physician's/neuropsychologist's signature is valid for sixty (60) days. The referral source for the request may be from the applicant/applicant's representative, hospital or nursing facility, DHHR, the physician, social services agencies, or others.

B. The Medical Eligibility Evaluation Request form asks that the physician/neuropsychologist submit the applicant's identifying information including, but not limited to, the following:

1. A statement that the individual's condition meets the entry level definition of TBI: a non-degenerative, non-congenital insult to the brain caused by an external physical force resulting in total or partial functional disability and/or psychosocial impairment;
2. A description of the functional deficits directly attributable to the TBI;
3. If the applicant is currently inpatient in a licensed nursing facility, inpatient hospital, or licensed rehabilitation facility for TBI, (does not apply if residing in the community) and;
4. other pertinent medical diagnoses.

C. Once a referral is received, APS Healthcare will send a letter of verification of its receipt to the applicant and/or their legal representative and the referring physician or neuropsychologist. If the Medical Eligibility Evaluation Request form is incomplete it will be returned to the referring physician or neuropsychologist for completion and resubmission, and the applicant will be notified. APS Healthcare will attempt to contact the applicant and/or their legal representative to schedule an assessment. APS Healthcare will make up to three attempts to contact the applicant. If it is determined that the applicant is not available, the referring physician or neuropsychologist and applicant and/or their legal representative will be notified that no contact could be made. If the referral is closed because of an inability to contact the applicant, a new referral will be required to re-initiate the process.

D. If contact is made, a letter will be sent to the applicant and contact person noting the contact was made and the date of the scheduled evaluation. If the applicant has identified a guardian or legal representative, no assessment shall be scheduled without presence of the guardian, legal representative or contact person. If the Medical Eligibility Evaluation Request form indicates that the applicant has severe dementia, no visit will be scheduled without the guardian, legal representative or contact person present to assist the applicant during the evaluation.

E. APS Healthcare completes the Pre-Admission Screening (PAS) and the Ranchos Los Amigos Scale. APS Healthcare staff will record observations and findings regarding the applicant's level of function. In those cases where there is a medical diagnosis question, APS Healthcare will attempt to clarify the information with the referring physician. In the event that APS Healthcare cannot obtain the information, it will be documented, and noted that supporting documentation from the referring physician was not received.

F. If it is determined that the applicant does not meet medical eligibility, the applicant, the referring physician or neuropsychologist, and applicant's representative, if applicable, will be notified by a Potential Denial letter. This letter will advise the applicant of the reason for the potential denial, listing the areas in which deficiencies were found and notice that the medical eligibility standard has not been met. A copy of the PAS, Rancho Los Amigos Scale, and relevant TBI Waiver policy will also be included with the "Potential Denial" letter. The applicant will be given two weeks to submit supplemental medical information to APS Healthcare. Information submitted after the two-week period will not be considered.

G. If the review of the supplemental information by APS Healthcare determines that there is still no medical eligibility, the applicant and/or their legal representative (if applicable), and the referring physician or neuropsychologist will be notified by a Final Denial letter. The "Final Denial" letter will provide the reason for the denial. It will also include the applicable TBI Waiver policy manual section(s), a copy of the PAS and Rancho Los Amigos Scale, supplemental information documentation (if it has been supplied), notice of resources for free legal services, and a Request for Fair Hearing form to be completed if the applicant wishes to contest the decision.

H. If the applicant's medical eligibility is denied and the applicant is subsequently found medically eligible after the fair hearing process, the date of eligibility can be no earlier than the effective date of the hearing decision.

I. If the applicant is determined medically eligible and a TBI Waiver slot is available, a notice of approved medical eligibility is sent to the applicant, the referring physician or neuropsychologist, and the applicant's legal representative, if applicable. Copies of the applicant's PAS and Rancho Los Amigos Scale are also sent at this time to the applicant and/or their legal representative (if applicable).

J. If the applicant is determined medically eligible and a slot is not available, a notice of approved medical eligibility will be sent to the applicant and/or their legal representative (if applicable) and the referring entity informing them that a slot is not currently available. The applicant will be notified that they have been placed on the Managed Enrollment List.

K. When a TBI Waiver slot is available, APS Healthcare sends a Service Delivery Model Selection Form advising the applicant to choose either Traditional or Personal Options. If the member chooses the Traditional Model, a Freedom of Choice Case Management

Selection Form and a Freedom of Choice Personal Attendant Selection Form are also provided to the applicant and/or their legal representative if applicable), advising him/her to choose a Case Management Agency and a Personal Attendant Service Agency. The forms are to be returned to APS Healthcare once selections are made.

L. APS Healthcare will notify both of the agencies selected, and provide them with a copy of the applicant's PAS and Ranchos Los Amigos Scale. The Case Manager must use the Initial Contact Log at this point. It provides the Case Manager with the ability to document their initial contact to assist with financial eligibility (Refer to *Section* **512.8.2**), Member Enrollment (Refer to Section 512.9) and the required seven day contact (Refer to *Section 512.10* **MEMBER ASSESSMENT**). If Personal Options has been selected APS Healthcare will notify PPL and provide them with a copy of the PAS and Ranchos Los Amigos Scale.

512.8.1.3 Medical Re-evaluation

Annual re-evaluations for medical eligibility for each TBI Waiver member must be conducted. The process is as follows:

A. APS Healthcare will schedule an annual re-evaluation of the member's medical eligibility screening 12 months after initiation of services.
B. APS Healthcare will visit the member in his/her home or at an agreed location in order to complete the evaluation. C.APS Healthcare will evaluate the findings of the annual functional assessment to determine whether the member continues to meet medical eligibility for the TBI Waiver.
D. If the member has identified a guardian or legal representative, no visit shall be scheduled without presence of the guardian, legal representative or contact person.
E. Once an evaluation time is arranged, APS Healthcare shall send a letter to the member and/or their legal representative (if applicable), Case Management Agency and PPL (if applicable), noting the contact and date of the visit.
F. If APS Healthcare is unable to contact the member, a letter will be sent to the member and/or their legal representative (if applicable), Case Management Agency, and referring physician or neuropsychologist stating that the member's eligibility is in jeopardy if the evaluation cannot be performed and requesting that the member and/or their legal representative or Case Manager contact APS Healthcare to schedule an evaluation.
G. If the member meets the medical eligibility criteria, a Notice of Approved Continued Medical Eligibility is sent to the member and/or their legal representative (if applicable), the Case Management Agency and PPL (if applicable). This notice includes the approved budget, a notice of resources for free legal services, and a Request for Hearing form.
H. If it is determined that the member does not meet medical eligibility, the member and/or their legal representative (if applicable), the referring physician or neuropsychologist, the Case Manager and PPL (if applicable) will be notified by a Potential Denial letter. This letter will advise the member of the reason(s) for the potential denial, listing the areas in which deficiencies were found and notice that the medical eligibility standard has not been met. A copy of the functional assessment and TBI Waiver policy will also be included with the "Potential Denial" Letter. The member will be given two weeks to submit supplemental medical information to APS Healthcare. Information submitted after the two-week period will not be considered.

I. If the review of the supplemental information determines that there is still no medical eligibility, the member and/or their legal representative (if applicable) and Case Manager will be notified with a Final Denial letter. The "Final Denial" letter will provide the reason for the denial. It will also include the applicable policy manual section(s), a copy of the functional assessment, supplemental information documentation (if it has been supplied), notice of resources for free legal services, and a Request for Hearing to be completed if the member wishes to contest the decision. If the member elects to appeal any adverse decision, services shall continue at the current level only if the appeal is submitted within thirteen (13) days of the receipt of the notice, and only until a final decision is rendered by the administrative Hearing Officer.

The Case Management Agency is responsible for sending the Notice of Approved Continued Medical Eligibility to the Personal Attendant provider agency.

Medicaid will not pay for services provided to a medically ineligible member.

512.8.2 Financial Eligibility

The financial eligibility process starts once an applicant is determined to be medically eligible for TBI Waiver services and has returned the Service Delivery Model Selection Form to APS Healthcare. If the applicant selects the Traditional Model they must also return the Freedom of Choice Provider Selection Forms to APS Healthcare.

If the applicant has chosen the Traditional Model, the Case Management Agency that has been selected by the applicant will be notified, and a copy of the PAS and Ranchos Los Amigos Scale will be provided. Within three business days of receipt of this notification, the Case Manager must make an initial contact by telephone or face-to-face with the applicant. The applicant and/or Case Manager must submit a DHS-2 form to the county DHHR office to determine financial eligibility based on TBI Waiver criteria. A copy of the TBI Waiver Medical Eligibility Letter must be attached to the DHS-2 form. Financial eligibility cannot be initiated without this documentation.

Factors such as income and assets are taken into consideration when determining eligibility. An applicant/member's gross monthly income may not exceed 300% of the current maximum SSI payment per month for participation in the TBI Waiver Program. Some assets of a couple are protected for the spouse who does not need nursing facility or home and community based care and these assets are not counted to determine eligibility for the individual who needs care in the home.

The financial eligibility process must be initiated within 60 calendar days from the date the Case Management Agency receives the notification of selection letter. Case Managers must notify APS Healthcare when the financial eligibility process has been initiated. If the financial eligibility process is not initiated within the 60 calendar days, APS Healthcare will close the referral. If the applicant wants TBI Waiver services after the closure, a new Medical Eligibility Evaluation Request Form must be submitted to APS Healthcare. TBI Waiver services cannot be paid until an applicant's financial eligibility is established (or verified) and the enrollment process has been completed with APS Healthcare. (Refer to *Section* **512.9 MEMBER ENROLLMENT**).

If the member has been a member of another waiver program, no services can be reimbursed prior to an applicant's closure from the other waiver program. The only exception is Case Management which may be provided 30 days prior to closure.

Termination of the Medicaid benefit itself (e.g., the medical card) always requires a 13 calendar day advance notice prior to the first of the month Medicaid stops. Coverage always ends the last day of a month unless otherwise dictated by policy. Examples: 1) Advance notice for termination is dated January 27, Medicaid would end February 28. 2) Advance notice is dated January 16, Medicaid ends January 31. This is true regardless of when TBI Waiver services end.

512.9 MEMBER ENROLLMENT

Once an applicant has been found medically and financially eligible, the Case Manager must request Member Enrollment from APS Healthcare by completing a Member Enrollment Request Form. APS Healthcare will complete the Member Enrollment and provide a Confirmation Notice to the Case Management Agency and the Personal Attendant Service provider agency. The member's Waiver case will be closed if services are not provided within 180 days of the date of enrollment in the Program.

No Medicaid reimbursed TBI Waiver services can be provided until the Case Management Agency is in receipt of the Member Confirmation Notice.

The Case Management Agency is responsible for maintaining a copy of the Member Enrollment Request Form and the Member Enrollment Confirmation Notice in the member file. The Personal Attendant Service provider agency (and LBHC if providing Cognitive Rehabilitation Therapy) is responsible for maintaining a copy of the Member Enrollment Confirmation Notice in the member file.

512.10 MEMBER ASSESSMENT

Assessment is the structured process of interviews which is used to identify the member's abilities, needs, preferences and supports; determine needed services or resources; and provide a sound basis for developing the Service Plan. A secondary purpose of the assessment is to provide the member a good understanding of the program, services, and expectations. Once Member Enrollment has been completed, the Case Manager will schedule a home visit within (7) seven calendar days to complete the Member Assessment.

The Case Manager must work with all service providers to ensure that the program meets the member's needs.

A new Member Assessment must be completed when a member's needs change. Changes in a member's needs are to be incorporated into the Service Plan. Case Managers are to share any changes in a member's assessment with all service providers listed on the members Service Plan. The Personal Attendant Service provider agency (and LBHC if providing Cognitive Rehabilitation Therapy) is to share any changes observed in the member with the case manager. A copy of all Member Assessments must be provided to the member and/or their legal representative (if applicable).

512.11 SERVICE PLAN DEVELOPMENT

The Case Manager is responsible for development of the person-centered Service Plan in collaboration with the member and/or their legal representative (if applicable). Participation in the development of the Initial Service Plan is mandatory for the member and/or their legal representative if applicable) and Case Manager. The member and/or their legal representative (if applicable) may choose to have whomever else they wish to participate in the process (Personal Attendant Service provider agency staff, other service providers, informal supports, etc.).

The Service Plan meeting must be scheduled within seven (7) calendar days of the Member Assessment.

The Service Plan must detail all services (service type, provider of service, frequency) the member is receiving, including any informal supports that provide assistance (family, friends, etc.) and address all needs identified in the PAS, the Member Assessment, etc. The Service Plan must also address the member's preferences and goals. It is the Case Manager's responsibility to ensure that all assessments are reviewed with the member and considered in the development of the Service Plan.

A copy of all Service Plans must be provided to the member and/or their legal representative if applicable) and the Personal Attendant Service provider agency. The Case Management Agency must have the original document in the member's file.

The member's Service Plan must contain reference to any other service(s) received by the member, regardless of the source of payment. A TBI Waiver provider agency that provides private-pay services to a member must ensure that documentation is maintained separately.

512.11.1 Six-Month and On-Going Service Plan Development

Participation in the six (6) month Service Plan and Annual Service Plan development is mandatory for the member and/or their legal representative if applicable), the Case Manager, and the Personal Attendant Service provider agency. The member and/or their legal representative (if applicable) may choose to have whomever else they wish to participate in the process (Cognitive Rehabilitation Therapist, direct care staff, family members, other service providers, informal supports, etc.).

512.11.2 Interim Service Plan Development

In order to begin services immediately to address any health and safety concerns, an Interim Service Plan may be developed and implemented upon the completion of Member Enrollment. The Interim Service Plan can be in effect up to 21 calendar days from the date of Member Enrollment Confirmation to allow time for assessments to be completed, the Service Plan meeting to be scheduled and the Service Plan to be developed.

If the Case Management Agency develops an Interim Service Plan, the Personal Attendant Service provider agency must initiate direct care services within three (3) business days.

512.12 COVERED SERVICES

The following services are available to TBI Waiver members if they are deemed necessary and appropriate during the development of their Service Plan:

A. Case Management
B. Personal Attendant Services
   i. Direct Care support
   ii. Transportation
C. Cognitive Rehabilitation Therapy
D. Participant-Directed Goods and Services

512.12.1 CASE MANAGEMENT

Case management activities are indirect services that assist the member in obtaining access to needed TBI Waiver services, other State Plan services, as well as medical, social, educational and other services, regardless of the funding source. Case management responsibilities also include the development of the member's Service Plan, the ongoing monitoring of the provision of services included in the member's Service Plan, monitoring member's continuing eligibility, member health and welfare, and advocacy.

Case management includes the coordination of services that are individually planned and arranged for members whose needs may be life-long. The practice of case management helps to avoid duplication and provision of unnecessary services, and to ensure a balance of services. The Case Manager takes an active role in service delivery; although services are not provided directly by the Case Management Agency, the Case Manager serves as an advocate and coordinator of care for the member. This involves collaboration with the TBI Waiver member, family members, friends, informal supports, and health care and social service providers. Case Managers are to:

A. Evaluate social, environmental, service, and support needs of the individual.
B. In collaboration with the member and/or their legal representative (if applicable), develop and write an individualized Service Plan which details all services that are to be provided including both formal and informal (if available) services that will assist the member to achieve optimum function.
C. Coordinate the delivery of care, eliminate fragmentation of services, and assure appropriate use of resources.
D. Proactively identify problems and coordinate services that provide appropriate high quality care to meet the individualized and often complex needs of the member.
E. Provide advocacy on behalf of the member to ensure continuity of services, system flexibility, integrated services, proper utilization of facilities and resources, and accessibility to services.
F. Ensure that a member's wishes and preferences are reflected in the development of the Service Plan by working directly with the member and/or their legal representative if applicable) and all service providers.

G. Inform members and/or their legal representatives (if applicable) of their rights, including information about grievance and Fair Hearing processes.
H. Assure that a member's legal and human rights are protected.

Case Management activities specific to Participant Direction include, but are not limited to:

A. Informing members of the availability of the Participant-Directed option.
B. Explaining general rights, risks, responsibilities and the member's right to choose the Participant-Directed Model.
C. Assist in determining if a legal/non-legal representative is desired and/or needed by the member.
D. Providing or linking members with program materials in a format that they can use and understand.
E. Explaining person-centered planning and philosophy to members.
F. Linking members with PPL for completion of the necessary paper work for Participant-Direction.
G. Explaining to the member the roles and supports that will be available.
H. Reviewing and discussing the member's budget, including the budget available for Participant-Direction.
I. Ensuring that members know how and when to notify the Case Manager about any operational or support concerns or questions.
J. Monitoring the members risk management activities.
K. Ensuring a seamless transition into the Participant-Directed Model if chosen.
L. Coordinating services provided by traditional provider agencies.
M. Notifying APS Healthcare and PPL of concerns regarding potential issues which could lead to member disenrollment.
N. Notifying APS Healthcare of concerns about the status of the health and welfare of participants.
O. Follow-up with the member regarding the submission of critical incidents.

512.12.1.1 Case Management Code, Unit, Limit and Documentation Requirements

Procedure Code: T1016 UB

Service Unit: **15 minutes**

Service Limit: **192 15 minute units annually**

Prior Authorization Required: **Yes**

Documentation Requirements: All contacts with, or on behalf of a member, must be documented within the member's record, including date and time of contact, a description of the contact, and the signature of the Case Manager. At a minimum, the Case Manager must make contact with the member and/or their legal representative if applicable) once per month and document the contact on the Case Management Monthly Contact Form. Case Management Agencies may not bill for transportation services.

All documented evidence of Case Management staff qualifications such as licenses, transcripts, certificates, CIB checks, signed confidentiality statements and references shall be maintained on file by the provider agency. The agency must have an internal review process to ensure that Case Management staff providing TBI Waiver services meets the minimum qualifications as required by policy (Refer to Section **512.3.6 Case Manager Qualifications**).

512.12.1.2 Ongoing Case Management Services

The Case Manager is responsible for follow-up with the member to ensure that services are being provided as described in the Service Plan. Initial contact, via telephone or face-to-face, must be made within seven (7) calendar days after direct care services have begun by the Personal Attendant Service provider agency. At a minimum, a monthly telephone contact with the member and/or their legal representative (if applicable) and a home visit every six (6) months must be conducted to ensure services are being provided and to identify any potential issues. Monthly telephone contact must be documented on the Case Management Monthly Contact Form and include detailed information on the status of the member. If a member and/or their legal representative (if applicable) cannot be reached by telephone for the monthly contact, a home visit must be made. At a minimum, the Case Manager must complete a six (6) month Member Assessment and Service Plan. This must be a face-to-face home visit with the member.

Specific activities to assure that needs are being met also include:

A. Assure financial eligibility remains current.
B. Assure the health and welfare of the member.
C. Address changing member needs as reported by the member and/or their legal representative (if applicable), Personal Attendant direct care staff, or informal support.
D. Address changing needs determined by the monthly member contact.
E. Refer and procure any additional services the member may need that are not services the Personal Attendant Service provider agency can provide.
F. Coordinate with all current service providers to develop the six (6) month Service Plan and the Annual Service Plan (or more often as necessary). It is mandatory that the member and/or their legal representative (if applicable), the Case Manager and the Personal Attendant Service provider agency be present at the six (6) month Service Plan meeting and the Annual Service Plan meeting.
G. Provide the Service Plan to all applicable service providers that are providing services to the member.
H. Provide copies of all necessary documents to the Personal Attendant Service provider agency such as Member Enrollment, PAS, Assessments, etc.
I. Annually submit a Medical Necessity Evaluation Request to APS Healthcare.

512.12.1.3 Reporting

The Case Management Agency will complete and submit required administrative and program reports as requested by either BMS or APS Healthcare. Monthly reports must be submitted by Case Management Agencies to APS Healthcare by the sixth (6^{th}) business day of every month.

512.12.2 PERSONAL ATTENDANT SERVICES

Personal Attendant Services are defined as long-term direct care and support services that are necessary in order to enable a member to remain at home rather than enter a nursing facility, or to enable an individual to return home from a nursing facility. The components of the Personal Attendant Service include Personal Attendant Direct Care Services and Transportation.

The functions of the Personal Attendant Service direct care staff include providing direct care services as defined by the member's Service Plan or the Spending Plan for Personal Options members, recording services and time spent with the member, communicating any member changes and completing all TBI Waiver training requirements.

Personal Attendant Service direct care staff duties and responsibilities as described in the Service Plan may include:

A. Assist member with ADLs.
B. Assist member with environmental tasks necessary to maintain the member in the home.
C. Assist member with completion of errands that are essential for the member to remain in the home (IADLs) — Examples: grocery shopping, medical appointments, Laundromat, and trips to the pharmacy. The member may accompany the Personal Attendant Service direct care staff on these errands.
D. Assist member in community activities. Activities provided in the community are limited to 30 hours per month. (Examples of community activities--visiting friends/relatives, going to a local community activity, etc.) Community activities must be documented on the Service Plan or Personal Options Spending Plan.
E. Report significant changes in members' condition to the Personal Attendant Service agency (or PPL if member is enrolled in Personal Options) and member's Case Manager.
F. Report any incidents to the Personal Attendant Service agency (or PPL if member is enrolled in Personal Options) and the member's Case Manager. (Examples: member falls (whether direct care staff was present or not), bruises (whether direct staff knows origin or not), etc.)
G. Report any environmental hazards to the Personal Attendant Service agency (or PPL if member is enrolled in Personal Options) and the member's case Manager. (Examples: no heat, no water, pest infestation or home structural damage).
H. Prompt for self-administration of medications.
I. Maintain records as instructed by the Personal Attendant Service agency (or PPL if member is. enrolled in Personal Options).
J. Perform other duties as assigned by the Personal Attendant Service agency (or member if enrolled in Personal Options) within program guidelines.
K. Accurately complete Personal Attendant Service worksheet and other records as instructed by the Personal Attendant Service agency.

Personal Attendant Service agency staff and employees of Personal Options participants cannot perform any service that is considered to be a professional skilled service or any service that is not on the member's Service Plan or for members enrolled in Personal Options the member's approved Spending Plan. Functions/tasks that cannot be performed include, but are not limited to, the following:

A. Care or change of sterile dressings.
B. Colostomy irrigation.
C. Gastric lavage or gavage.
D. Care of tracheostomy tube.
E. Suctioning.
F. Vaginal irrigation.
G. Give injections, including insulin.
H. Administer any medications, prescribed or over-the-counter.
I. Perform catheterizations, apply external (condom type) catheter.
J. Tube feedings of any kind.
K. Make judgments or give advice on medical or nursing questions.
L. Application of heat.

If at any time a Personal Attendant is witnessed to be, or suspected of, performing any prohibited tasks, the Personal Attendant Service agency or PPL must be notified immediately.

More than one Personal Attendant Service provider agency can provide direct care services to a member. The agency the member selected on their Freedom of Choice Personal Attendant Service Selection Form is the primary agency and is responsible for coordinating services. The Service Plan must indicate which agency is the primary agency. There cannot be a duplication of services.

512.12.2.1 Personal Attendant Service (Direct Care support) Code, Unit, Limit and Documentation Requirements

Procedure Code: S5125 UB

Service Unit: 15 minutes

Service Limits: **Personal Attendant Services are limited by the member's budget.**

Prior Authorization Required: Yes

Documentation Requirements: All services provided to a member must be documented on the Personal Attendant Worksheet and maintained within the member's record.

All documented evidence of Personal Attendant Service direct care staff qualifications such as licenses, transcripts, certificates, CIB checks, signed confidentiality statements and references shall be maintained on file by the provider agency. The agency must have an internal review process to ensure that Personal Attendant Service direct care staff providing TBI Waiver services meets the minimum qualifications as required by policy (Refer to *Section* **512.3 Personal Attendant Service Staff Requirements**).

In Personal Options, all documented evidence of staff qualifications such as licenses, transcripts, certificates, signed confidentiality statements, and references shall be maintained on file by PPL.

512.12.2.2 Transportation

Transportation is a component of the Personal Attendant Service and provides reimbursement for Personal Attendant direct care staff that performs essential errands for or with a member or community activities with a member.

The member may be transported by Personal Attendant Service agency direct-care staff in order to gain access to services and activities as specified in the Service Plan. Family, neighbors, friends, or community agencies that can provide this service, without charge, must be utilized first. However, if free transportation is not readily available and/or reliable, services must not be delayed and the provider must provide the transportation as specified in the member's Service Plan. Mileage can be charged for essential errands, activities related to the Service Plan and community activities (Refer to *Section* **512.12.2.2Transportation)**.

512.12.2.3 Transportation Code, Unit, Limit and Documentation Requirements

Procedure Code: A0160 UB

Service Unit: 1 unit - 1 mile

Service Limit: N/A

Prior Authorization: Yes

Documentation Requirements: All transportation with, or on behalf of, a member must be included on the member's Service Plan and documented by the Personal Attendant Service agency and include the date, miles driven, travel time, destination, purpose of travel and type of travel (essential errand or community activity).

512.12.3 COGNITIVE REHABILITATION THERAPY

Cognitive Rehabilitation Therapy is therapy utilized for the development of cognitive skills to improve functional attention, memory, and problem solving including compensatory training in a context of direct one-to-one participant contact with the therapist.

512.12.3.1 Cognitive Rehabilitation Therapy Code, Unit, Limit and Documentation Requirements

Procedure Code: 97532 UB

Service Unit: **15 minutes**

Service Limit: **192 15 minute units annually**

Prior Authorization Required: **Yes**

Documentation Requirements: All contacts with, or on behalf of a member, must be documented within the member's record, including date and time of contact, a description of the

contact, and the signature of the Cognitive Rehabilitation Therapist. Cognitive Rehabilitation Therapists may not bill for transportation services.

All documented evidence of Cognitive Rehabilitation Therapists qualifications such as licenses, transcripts, certificates, CIB checks, signed confidentiality statements and references shall be maintained on file. Provider agencies must have an internal review process to ensure that staff providing TBI Waiver services meets the minimum qualifications as required by policy (Refer to *Section* **512.3.7 Cognitive Rehabilitation Therapist Qualifications**).

512.12.4 PARTICIPANT-DIRECTED GOODS AND SERVICES

Participant-Directed Goods and Services are equipment, services or supplies not otherwise provided through the Medicaid State Plan that address an identified need in the Service Plan. The member must budget for their approved good or service within their allocated budget.

The following are non-allowable services, equipment or supplies: gifts for staff/family/friends, payments to someone to serve as a representative, clothing, food and beverages, electronic entertainment equipment, utility payments, swimming pools and spas, costs associated with travel, comforters, linens, drapes, furniture, vehicle expenses including routine maintenance and repairs, insurance and gas money, medications, vitamins, herbal supplements, monthly internet service, yard work, illegal drugs or alcohol, household cleaning supplies, home maintenance and repair, pet care, respite services, spa services, experimental or prohibited treatments, education, personal hygiene, discretionary cash, and any other good or service that does not address an identified need in the Service Plan, decrease the need for other Medicaid services, and/or increase the person's safety in the home and /or improve and maintain the member's opportunities for full membership in the community.

512.12.4.1 Participant-Directed Goods and Services Code, Unit, Limit and Documentation Requirements

Procedure Code: T2028 UB

Service Unit: As specified on member's Service Plan

Service Limit: $1000 Annually

Prior Authorization Required: **No**

Documentation Requirement: Participant Directed Goods and Services receipts and other approved documentation per the PPL contract with BMS must be maintained on file with PPL. Must be in the member's Spending Plan.

512.13 MEMBER RIGHTS AND RESPONSIBILITIES

At a minimum, Case Management Agencies must communicate in writing to each member and/or their legal representative (if applicable)

Their right to:

A. Transfer to a different provider agency, from traditional services to Personal Options, or from Personal Options to traditional services.
B. Address dissatisfaction with services through the provider agency's or PPL's grievance procedure.
C. Access the West Virginia DHHR Fair Hearing process.
D. Considerate and respectful care from their provider(s).
E. Freedom from abuse, neglect, and exploitation.
F. Take part in decisions about their services.
G. Confidentiality regarding TBI Waiver services.
H. Access to all of their files maintained by agency providers.

And their responsibility to:

I. Notify the TBI Waiver Personal Attendant Service Agency or PPL within 24 hours prior to the day services are to be provided if services are not needed.
J. Notify providers or PPL promptly of changes in Medicaid coverage.
K. Comply with their Service Plan and their Personal Options Spending Plan (if applicable).
L. Cooperate with all scheduled in-home visits
M. Notify their Case Management Agency and PPL (if applicable) of a change in residence or an admission to a hospital, nursing facility or other facility.
N. Notify their Case Management Agency and PPL (if applicable) of any change of medical status or direct care need.
O. Maintain a safe home environment.
P. Verify services were provided.
Q. Communicate any problems with services to the provider agency or PPL (if applicable).
R. Report any suspected fraud to the provider agency or the Medicaid Fraud Unit at (304)558-1858.
S. Report any incidents of abuse, neglect or exploitation to the provider agency, PPL (if applicable) or the APS hotline at 1-800-352-6513.
T. Report any suspected illegal activity to their local police department or appropriate authority.

512.14 MEMBER GRIEVANCE PROCESS

Members who are dissatisfied with the services they receive from a provider agency have a right to file a grievance. All TBI Waiver provider agencies will have a written member grievance procedure. APS Healthcare will explain the grievance process to all applicants/members at the time of initial application/re-evaluation. Applicants/members and/or their legal representative If applicable) will be provided with a Member Grievance Form at that time. Service providers will only afford members a grievance procedure for services that fall under the particular service provider's authority; for example, a Case Management Agency will not conduct a grievance procedure for Personal Attendant Service Agency activities, nor will a Personal Attendant Service Agency conduct a grievance procedure for Case Management Agency activities.

A member may by-pass the level one grievance and file a level two grievance with APS Healthcare if he/she chooses. The grievance process is not utilized to address decisions regarding medical or financial eligibility, a reduction in services or case closure. These issues must be addressed through the fair hearing process.

The grievance procedure consists of two levels:

A. Level One: TBI Waiver Provider

A TBI Waiver provider has 10 business days from the date they receive a Member Grievance Form to hold a meeting, in person or by telephone. The meeting will be conducted by the agency director or their designee with the member and/or their legal representative (if applicable). The agency has five days from the date of the meeting to respond in writing to the grievance. If the member is dissatisfied with the agency decision, he/she may request that the grievance be submitted to APS Healthcare for a Level Two review and decision.

B. Level Two: APS Healthcare

If a TBI Waiver provider is not able to address the grievance in a manner satisfactory to the member and the member requests a Level Two review, APS Healthcare will, within 10 business days of the receipt of the Member Grievance Form, contact the member and/or their legal representative (if applicable) and the TBI Waiver provider to review the Level One decision. Level Two decisions will be based on Medicaid policy and/or health and safety issues.

512.15 TRANSFERS

A TBI Waiver member may request a transfer to another agency at any time. If a member wishes to transfer to a different agency a Member Request to Transfer form must be completed and signed by the member and/or their legal representative (if applicable). The form may be obtained from the current provider, the new provider, APS Healthcare or other interested parties. Once completed and signed by the member, the form must be submitted to APS Healthcare. APS Healthcare will then coordinate the transfer and set the effective date based on when required transfer documents are received.

At no time should the transfer take more than 45 calendar days from the date that the member signed transfer request is received at APS Healthcare, unless there is an extended delay caused by the member in returning necessary documents.

Transferring Agency Responsibilities:

A. To continue providing services until APS Healthcare notifies them that the transfer has been completed.
B. If it is a Case Management transfer, to provide the receiving agency, on the day of the transfer, a copy of the current PAS, the Service Plan, a copy of the Member Enrollment Confirmation and any other pertinent documentation.
C. If it is a Personal Attendant Service transfer, to provide the receiving agency, on the day of the transfer, with a copy of the current PAS, the member's Service Plan and any other pertinent documentation.

D. To maintain all original documents for monitoring purposes.

Receiving Agency Responsibilities:

A. Personal Attendant Service Agencies must meet with the member and/or their legal representative (if applicable) within 7 business days to review the Service Plan.
B. If it is a Case Management transfer, a Member Assessment must be conducted within seven (7) business days of the transfer effective date.
C. Develop the Service Plan within seven (7) business days of the transfer effective date.

The Service Plan from the transferring agency must continue to be implemented until such time that the receiving agency can develop and implement a new plan to prevent a gap in services.

Member transfers from traditional services to Personal Options, as well as, from Personal Options to traditional services are processed by APS Healthcare and will include both the Case Manager and Resource Consultant from PPL to ensure that all necessary documentation is shared and that there is no gap in the delivery of service.

512.15.1 Emergency Transfers

A request to transfer that is considered an emergency, such as when a member suffers abuse, neglect, or harm, will be reviewed by APS Healthcare and APS Healthcare will take appropriate action. The Case Management Agency, the Personal Attendant Service Agency that the member is transferring from or the Personal Options member and/or their legal representative (if applicable) must submit supporting documentation that explains why the member is in emergency status. APS Healthcare will expedite the request as necessary, coordinating with the member and agencies involved.

512.16 DISCONTINUATION OF SERVICES

The following require a Request for Discontinuation of Services Form be submitted and approved by APS Healthcare:

A. No services have been provided for 180 continuous days – example, an extended placement in long-term care or rehabilitation facility.
B. Unsafe Environment – an unsafe environment is one in which the personal Attendant Service and/or other agency staff are threatened or abused and the staff's welfare is in jeopardy. This may include, but is not limited to, the following circumstances:
    1) The member or other household members demonstrate sexually inappropriate behavior; display verbally and/or physically abusive behavior; and/or threaten a personal Attendant Service Agency staff or other agency staff with guns, knives, or other potentially dangerous weapons, including menacing animals.
    2) The member or other household members display an abusive use of alcohol and/or drugs.

When APS Healthcare receives an unsafe closure request, they will obtain documentation from the provider to support the request. If documentation supports the request, APS Healthcare will first attempt to process the request as a transfer. To do so, APS Healthcare will require the member and/or their legal representative (if applicable) to sign a Consent for Release of

Information Form. This will permit all information regarding the alleged unsafe circumstances to be disclosed to any agency the member wishes to transfer to. If the agency selected by the member is not willing to accept the member due to unsafe circumstances, the case will be closed. If at any time, the member removes the perceived threat from the service environment, services may continue. Referrals to Adult Protective Service will be made as required.

C. Member no longer desires services

The Request for Discontinuation of Services Form must be submitted to APS Healthcare for review. If APS Healthcare approves the discontinuation, APS Healthcare will send notification of discontinuation of services to the member and/or their legal representative (if applicable) with a copy to the Case Management Agency and PPL (if applicable). The notice shall include the reason and justification for the discontinuation of services. Fair hearing rights will also be provided except if the member no longer desires services. The effective date for the discontinuation of services is 13 calendar days from the receipt of the notification letter, if the member (or legal representative) does not request a hearing. If it is an unsafe environment services may be discontinued immediately.

All discontinuation of services (closures) must be reported on the Case Management Monthly Report.

The following do not require a Request for Discontinuation of Services Form but must be reported on the Case Management Monthly Report:

A. Death
B. Moved Out of State
C. Medically Ineligible
D. Financially Ineligible

512.17 DUAL PROVISION OF TBI WAIVER AND PERSONAL CARE (PC) SERVICES

Approval of the provision of both TBI and PC services to the same person will be considered if the following criteria are met:

A. Any PC services provided to an active TBI Waiver member must be approved by the reviewing agencies (Refer to H below), including the initial 60 hours. The Dual Service Provision Request must be completed.

B. The reviewing agency must document that the member has direct-care needs that cannot be met by the TBI Waiver.
C. All policy set forth in *Chapter 517, Personal Care Services*, must be followed. PC policy supersedes TBI Waiver policy for this request.
D. There must be a PC Plan of Care that reflects the TBI Waiver services provided and the additional Personal Care services to be provided. Personal Care services must also be

reflected on the member's TBI Waiver Service Plan. These plans must be coordinated to ensure that services are not duplicated. PC and Personal Attendant services cannot be provided during the same hours on the same day. A service planning meeting between the Case Manager and Personal Care provider must be held with the member and/or their legal representative (if applicable) in the member's residence and documented on the Request for Dual Service Provision. For members participating in Personal Options, the meeting must include PPL and the member.

E. There must be a valid PAS and a valid PC Medical Eligibility Assessment (PCMEA) that documents the need for both services.
F. The Case Manager is responsible for the coordination of the two services.
G. Dual Service Provision Request Forms must be signed by the Case Manager, PC RN and the member and/or their legal representative (if applicable). Original signatures are required; i.e., "signature of member on file" is not acceptable.
H. All PC providers should submit requests to:

APS Healthcare
100 Capitol Street
Suite 600
Charleston, WV 25301

Documentation submitted must include a copy of the PAS and the PCMEA, TBI Waiver Service Plan and PC RN Plan of Care, and any documentation that supports the request. Additionally, a narrative describing how services will be utilized and verification that TBI Waiver and PC services will not be duplicated must be submitted. Approvals/denials will be based on the documentation submitted, appropriate program policy manuals, PC standards, and professional judgments. The member and/or their legal representative (if applicable), Personal Care and Personal Attendant Service providers, and the member's Case Manager will receive notification of denial or approval from the reviewing agency. If the request is denied or the hours approved are less than requested, the notification will include fair hearing information.

I. BMS will conduct post-payment review of these combined services for duplication or inappropriate services. APS Healthcare and BMS will review compliance during the agency monitoring process.

512.18 EXCLUDED SERVICES AND NON-REIMBURSABLE SITUATIONS

Medicaid will only reimburse for TBI Waiver services that are defined as required services on the member's Service Plan (Refer to *Common Chapter 300, Provider Participation Requirements*, for more information about reimbursement.) The following services are not reimbursable:

A. Services provided for other member(s) of the TBI Waiver member's household or to anyone who is not a TBI Waiver Program member.
B. Services provided by a Case Management Agency, Personal Attendant Service Agency or Cognitive Rehabilitation Therapy provider that are not included in the Service Plan.
C. Services provided to an individual who is not medically and financially eligible on the date(s) that service is provided.

513.1 Definitions:

Old Policy:
Intensively Supported Setting (ISS): a residential home setting that is not licensed by the Office of Health Facility and Licensure with one to 3 people living in the home. The member's name is either on the lease or the member pays rent. No biological, adoptive or other family members or natural supports reside in the home setting with the member.

New Policy:
Intensively Supported Setting (ISS): a residential home setting that is not licensed by the Office of Health Facility and Licensure with one to 3 adults living in the home. The member's name is either on the lease or the member pays rent. No biological, adoptive or other family members reside in the home setting with the member. An exception would be when siblings who are also I/DD Waiver members reside in a setting without any other family members.

513.2.1 Bureau for Medical Services Contractual Relationships

Old Policy:
The Bureau for Medical Services (BMS) contracts with an Administrative Services Organization (ASO). The ASO acts as an agent of BMS and administers the operation of the I/DD Waiver Program. The ASO processes initial eligibility determination packets and conducts the annual functional assessment to establish re-determination of medical eligibility. The ASO conducts education for I/DD Waiver providers, members, advocacy groups, and DHHR. The ASO provides a framework and a process for the purchase of waiver services.

New Policy:
The Bureau for Medical Services (BMS) contracts with an Administrative Services Organization (ASO). The ASO acts as an agent of BMS and administers the operation of the I/DD Waiver Program. The ASO processes initial eligibility determination packets and conducts the annual functional assessment to establish re-determination of medical eligibility. The ASO conducts education for I/DD Waiver providers, members, advocacy groups, and DHHR. The ASO provides a framework and a process for the purchase of waiver services. At times, the ASO, in collaboration with BMS will provide answers to policy questions which will serve as policy clarifications. These policy clarifications will be posted on the BMS I/DD Waiver website located at: http://www.dhhr.wv.gov/bms/hcbs/IDD/Pages/default.aspx under POLICY CLARIFICATIONS.

513.2.2 Traditional and Agency with Choice Provider Enrollment and Responsibilities

Old Policy:
In addition to provider enrollment requirements in *Chapter 300, Provider Participation Requirements*, I/DD Waiver Program providers must meet all the requirements listed below.

- Receive a Certificate of Need (CON) approval from the West Virginia Health Care Authority through the full length CON process or through the Summary Review process.
- Obtain and maintain a behavioral health license through OHFLAC.
- Meet and maintain all BMS enrollment requirements including a valid provider agreement on file that is signed by the I/DD Waiver provider and BMS as well as a valid Medicaid enrollment agreement.
- Ensure that a member or agency staff are not discharged, discriminated or retaliated against in any way if they have been a complainant, on whose behalf a complaint has been submitted or who has participated in an investigation process that involves the I/DD Waiver provider.
- Ensure that a member is not discharged unless a viable discharge/transfer plan is in place that effectively transfers all services the member needs to another provider(s) and is agreed upon by the member and/or their legal representative and the receiving provider(s).
- Meet and maintain the standards established by the Secretary of the U. S. Department of Health and Human Services (DHHS), and all applicable state and federal laws governing the provision of these services.
- Ensure that services are delivered and documentation meets regulatory and professional standards before the claim is submitted.
- Ensure that all required documentation is maintained at the agency on behalf of the State of West Virginia and accessible for state and federal audits.
- Begin the mandatory I/DD Waiver Program training for all agency staff on the first day of employment and document all mandatory training on the Certificate of Training Form (WV-BMS-I/DD-06).
- Ensure that all agency staff providing direct care services are fully trained in the proper care of the member to whom they will be providing services prior to billing for services. Fully trained agency staff must be available until newly hired Agency Staff or Qualified Support Workers are fully trained.
- Hires and retains a qualified workforce.
- Subcontracts with licensed individuals or group practices of the behavioral health profession as defined by the Office of Health Facility and Licensure, if contracting occurs.
- Maintain evidence of implementing a utilization review and quality improvement process which includes verification that services have been provided and the quality of those services meets the standards of the I/DD Waiver Program and all other applicable licensing and certification bodies.
- Provide an assigned agency I/DD Waiver Contact Person whose duties include:
    - Review of Home and Day Program visits to assure compliance with Waiver policy (service coordination provider agencies only);

  - Oversight of agency staff implementing the IPPs of all members in the I/DD Waiver Program; and
  - Communicating with BMS and the ASO.
- Implement the I/DD Waiver Quality Improvement System as further defined in Section 513.2.4.
- Provide each member with maximum choice of I/DD Waiver services within their individualized budgets available in each of the service delivery options.
- Employ or contract with agency staff who meet all the training and credentialing requirements listed under Sections 513.2.2.1, 513.2.2.1.1, 513.2.2.1.2 and 513.2.2.1.3 as well as the individual service definitions of this chapter
- Maintain a record of the training verification or recertification on each agency staff.
- Participate in quarterly training sessions and routine conference calls provided by the ASO.
- Ensure that all residential sites (leased or rented by the I/DD Waiver provider) provide a safe environment for the members and agency staff.
- Provide appropriate auxiliary aids and services when necessary to ensure effective communication with members and/or legal representatives when natural or other supports are not available. This includes the use of qualified sign language interpreters, documents in Braille or large print, audio recordings, etc.
- Complies with all American with Disabilities Act (ADA) requirements if applicable.

New Policy:
In addition to provider enrollment requirements in *Chapter 300, Provider Participation Requirements*, I/DD Waiver Program providers must meet all the requirements listed below.

- Receive a Certificate of Need (CON) approval from the West Virginia Health Care Authority through the full length CON process or through the Summary Review process.
- Obtain and maintain a behavioral health license through OHFLAC.
- Meet and maintain all BMS enrollment requirements including a valid provider agreement on file that is signed by the I/DD Waiver provider and BMS as well as a valid Medicaid enrollment agreement.
- Ensure that a member or agency staff are not discharged, discriminated or retaliated against in any way if they have been a complainant, on whose behalf a complaint has been submitted or who has participated in an investigation process that involves the I/DD Waiver provider.
- Ensure that a member is not discharged unless a viable discharge/transfer plan is in place that effectively transfers all services the member needs to another provider(s) and is agreed upon by the member and/or their legal representative and the receiving provider(s).
- Meet and maintain the standards established by the Secretary of the U. S. Department of Health and Human Services (DHHS), and all applicable state and federal laws governing the provision of these services.

- Ensure that services are delivered and documentation meets regulatory and professional standards before the claim is submitted.
- Ensure that all required documentation is maintained at the agency on behalf of the State of West Virginia and accessible for state and federal audits.
- Begin the mandatory I/DD Waiver Program training for all agency staff on the first day of employment and document all mandatory training on the Certificate of Training Form (WV-BMS-I/DD-06).
- Ensure that all agency staff providing direct care services are fully trained in the proper care of the member to whom they will be providing services prior to billing for services. Health and Safety training may be conducted by personnel deemed qualified by IDT members and documented on the member's IPP. Fully trained agency staff must be available until newly hired Agency Staff or Qualified Support Workers are fully trained.
- Hires and retains a qualified workforce.
- Subcontracts with licensed individuals or group practices of the behavioral health profession as defined by the Office of Health Facility and Licensure, if contracting occurs.
- Maintain evidence of implementing a utilization review and quality improvement process which includes verification that services have been provided and the quality of those services meets the standards of the I/DD Waiver Program and all other applicable licensing and certification bodies.
- Provide an assigned agency I/DD Waiver Contact Person whose duties include:
    - Review of Home and Day Program visits to assure compliance with Waiver policy (service coordination provider agencies only);
    - Oversight of agency staff implementing the IPPs of all members in the I/DD Waiver Program; and
    - Communicating with BMS and the ASO.
- Implement the I/DD Waiver Quality Improvement System as further defined in Section 513.2.4.
- Provide each member with maximum choice of I/DD Waiver services within their individualized budgets available in each of the service delivery options.
- Employ or contract with agency staff who meet all the training and credentialing requirements listed under Sections 513.2.2.1, 513.2.2.1.1, 513.2.2.1.2 and 513.2.2.1.3 as well as the individual service definitions of this chapter
- Maintain a record of the training verification or recertification on each agency staff.
- Participate in quarterly training sessions and routine conference calls provided by the ASO.
- Ensure that all residential sites (leased or rented by the I/DD Waiver provider) provide a safe environment for the members and agency staff.
- Provide appropriate auxiliary aids and services when necessary to ensure effective communication with members and/or legal representatives when natural or other supports are not available. This includes the use of qualified sign language interpreters, documents in Braille or large print, audio recordings, etc.
- Complies with all American with Disabilities Act (ADA) requirements if applicable.

513.2.2.1 Additional Qualifications for Traditional Option Agency Staff and Participant-Directed Option Agency with Choice Model Staff

Old Policy:
All agency staff, except contracted extended professional staff, having direct contact with members must meet the qualifications listed below.

- Approved Criminal Investigation Background (CIB) checks as defined in Section 513.2.2.1.1.
- Approved Protective Services Record Check as defined in Section 513.2.2.1.2
- Are not on the list of excluded individuals maintained by the Office of the Inspector General as defined in Section 513.2.2.1.3.
- Be over the age of 18.
- Have the ability to perform the tasks.
- Documentation of training initially and annually as mandated by OHFLAC including:
    - Training on treatment policies and procedures, including confidentiality training;
    - Training on Consumer Rights;
    - Training on Emergency Procedures, such as Crisis Intervention and restraints;
    - Training on Emergency Care to include Crisis Plans or Emergency Disaster Plans;
    - Training on Infectious Disease Control;
    - Documented training on First Aid by a certified trainer from the American Heart Association (AHA) or the American Red Cross (ARC) to include always having current First Aid certification upon hire and as indicated per expiration date on the AHA or ARC card;
    - Documented training in Cardiopulmonary resuscitation (CPR) by a certified trainer from the American Heart Association (AHA) or the American Red Cross (ARC) to include always having current CPR certification upon hire and as indicated per expiration date on the AHA or ARC card (This training, including refresher trainings, must include manual demonstration and be specific to the ages of the members supported by the Agency Staff);
    - Training on the Heimlich maneuver;
    - Training on Member-specific needs (including special needs, health and behavioral health needs); and
    - Training on Recognition of, Documentation of and Reporting of suspected Abuse/Neglect and Exploitation, including injuries of unknown origin.
- Qualifications must be verified initially as current and updated as necessary.
- Agency staff who function as Approved Medication Assistive Personnel (AMAP) must have high school diplomas or the equivalent and be certified AMAPs.

New Policy:

All agency staff, except contracted extended professional staff, having direct contact with members must meet the qualifications listed below.

- Approved Criminal Investigation Background (CIB) checks as defined in Section 513.2.2.1.1.
- Approved Protective Services Record Check as defined in Section 513.2.2.1.2
- Are not on the list of excluded individuals maintained by the Office of the Inspector General as defined in Section 513.2.2.1.3.
- Be over the age of 18.
- Have the ability to perform the tasks.
- Documentation of training initially and annually as mandated by OHFLAC and the I/DD Waiver manual. For all trainings but CPR/First Aid (which expire as indicated by the date on the card), annually is defined as within the month the training expires. These trainings include:
    - Training on treatment policies and procedures, including confidentiality training;
    - Training on Consumer Rights;
    - Training on Emergency Procedures, such as Crisis Intervention and restraints must be provided if the IDT deems necessary based on member assessed needs;
    - Training on Emergency Care to include member-specific Crisis Plans and Emergency Disaster Plans;
    - Training on Infectious Disease Control;
    - Documented training on First Aid by a certified trainer from an approved agency listed on the BMS I/DD Waiver website (http://www.dhhr.wv.gov/bms/hcbs/IDD/Pages/Training.aspx) to include always having current First Aid certification upon hire and as indicated per expiration date on the card;
    - Documented training in Cardiopulmonary resuscitation (CPR) by an approved agency listed on the BMS I/DD Waiver website (http://www.dhhr.wv.gov/bms/hcbs/IDD/Pages/Training.aspx) to include always having current CPR certification upon hire and as indicated per expiration date on the card (This training, including refresher trainings, must include manual demonstration and be specific to the ages of the members supported by the Agency Staff);
    - Training on Member-specific needs (including special needs, health and behavioral health needs); and
    - Training on Recognition of, Documentation of and Reporting of suspected Abuse/Neglect and Exploitation, including injuries of unknown origin.
- Qualifications must be verified initially as current and updated as necessary.
- Agency staff who function as Approved Medication Assistive Personnel (AMAP) must have high school diplomas or the equivalent and be certified AMAPs.

513.2.2.1.1 Criminal Investigation Background Check for Traditional Option Agency Staff and Participant-Directed Option Agency with Choice Model Staff

Old Policy:
All I/DD Waiver provider agency staff, except contracted extended professional staff, having direct contact with members must, at a minimum, have results from a state level CIB check which includes fingerprints. This check must be conducted initially and again every 3 years. If the current or prospective employee has lived out of state within the last 5 years, the agency must conduct an additional federal background check utilizing fingerprints through the National Crime Information Database (NCID) also upon hire. I/DD Waiver providers may do an on-line preliminary check and use these results for a period of 3 months while waiting for state and/or federal fingerprint results to be received. Providers may only use on-line companies to complete these checks that meet OHFLAC standards. I/DD Waiver provider must contact OHFLAC at (304) 558-0050 to verify that a company meets these standards. An individual who is providing services or is employed by an I/DD Waiver provider cannot be considered to provide services nor can be employed if ever convicted of:

- Abduction;
- Any violent felony crime including but not limited to rape, sexual assault, homicide, or felonious battery;
- Child/adult abuse or neglect;
- Crimes which involve the exploitation, including financial exploitation, of a child or an incapacitated adult;
- Any type of felony battery;
- Felony arson;
- Felony or misdemeanor crime against a child or incapacitated adult which causes harm;
- Felony drug related offenses within the last 10 years;
- Felony DUI within the last 10 years;
- Hate crimes;
- Kidnapping;
- Murder/ homicide;
- Neglect or abuse by a caregiver;
- Pornography crimes involving children or incapacitated adults including but not limited to, use of minors in filming sexual explicit conduct, distribution and exhibition of material depicting minors in sexually explicit conduct or sending, distributing, exhibiting, possessing, displaying or transporting material by a parent, legal representative or custodian, depicting a child engaged in sexually explicit conduct;
- Purchase or sale of a child;
- Sexual offenses including but not limited to incest, sexual abuse, or indecent exposure;
- Healthcare fraud; and
- Felony forgery.

CIB check results, other than those listed above, which may place a member at risk of personal health and safety or have evidence of a history of Medicaid fraud or abuse must be considered by the licensed I/DD Waiver provider before placing an individual in a position to provide services to the member.

If aware of recent convictions or change in status of an agency staff member providing I/DD Waiver services, the I/DD Waiver provider must take appropriate action, including notification to the BMS I/DD Program Manager.

New Policy:
All I/DD Waiver provider agency staff, except contracted extended professional staff, having direct contact with members must, at a minimum, have results from a state level CIB check which includes fingerprints. This check must be conducted initially and again every 3 years. If the current or prospective employee, within the past 5 years, has lived or worked out of state or currently lives or works out of state, the agency must conduct an additional federal background check utilizing fingerprints through the National Crime Information Database (NCID) also upon hire and every 3 years of employment. I/DD Waiver providers may do an on-line preliminary check and use these results for a period of 3 months while waiting for state and/or federal fingerprint results to be received. Providers may only use on-line companies that check counties in which the applicant has lived and worked within the last 5 years. An individual who is providing services or is employed by an I/DD Waiver provider cannot be considered to provide services nor can be employed or continue to be employed if ever convicted of:

- Abduction;
- Any violent felony crime including but not limited to rape, sexual assault, homicide, or felonious battery;
- Child/adult abuse or neglect;
- Crimes which involve the exploitation, including financial exploitation, of a child or an incapacitated adult;
- Any type of felony battery;
- Felony arson;
- Felony or misdemeanor crime against a child or incapacitated adult which causes harm;
- Felony drug related offenses within the last 10 years;
- Felony DUI within the last 10 years;
- Hate crimes;
- Kidnapping;
- Murder/ homicide;
- Neglect or abuse by a caregiver;
- Pornography crimes involving children or incapacitated adults including but not limited to, use of minors in filming sexual explicit conduct, distribution and exhibition of material depicting minors in sexually explicit conduct or sending, distributing, exhibiting, possessing, displaying or transporting material by a parent, legal representative or custodian, depicting a child engaged in sexually explicit conduct;
- Purchase or sale of a child;

- Sexual offenses including but not limited to incest, sexual abuse, or indecent exposure;
- Healthcare fraud; and
- Felony forgery.

CIB check results, other than those listed above, which may place a member at risk of personal health and safety or have evidence of a history of Medicaid fraud or abuse must be considered by the licensed I/DD Waiver provider before placing an individual in a position to provide services to the member.

If aware of recent convictions or change in status of an agency staff member providing I/DD Waiver services, the I/DD Waiver provider must take appropriate action, including notification to the BMS I/DD Program Manager.

513.2.2.1.2 Protective Services Record Check for Traditional Option Agency Staff and Participant-Directed Option Agency with Choice Model Staff

Old Policy:
All I/DD Waiver provider agency staff hired after January 1, 2009, except for contracted Extended Professional Staff, having direct contact with members must have a WVDHHR Protective Services Record Checks. These must be initiated on each individual upon hire and the results must be considered by the I/DD Waiver provider before continuing employment. The Authorization and Release for Protective Services Record Check (BCF-PSRC 6/2005) is the official form available through the DHHR Bureau for Children and Families, Division of Children and Adult Services or at www.wvdhhr.org/bcf. An individual who has direct contact with a member cannot continue to be employed if the check discloses previous substantiated child or adult maltreatment by the individual. Documentation of the date the form is submitted to BCF for processing must be in the Agency Staff's personnel file.

New Policy:

No change made, policy remains the name.

513.2.2.1.3 Federal Office of the Inspector General (OIG) Medicaid Exclusion List Check for Traditional Option Agency Staff and Participant-Directed Option Agency with Choice Model Staff

Old Policy:
The Office of the Inspector General (OIG) Medicaid Exclusion List must be checked by the I/DD Waiver provider for every agency staff who provides Medicaid services prior to employment and monthly. Persons on the OIG Exclusion List cannot provide Medicaid services. The list can be checked at http://exclusions.oig.hhs.gov/. A form may be printed from this website to verify that the check occurred

New Policy:
The Federal Office of the Inspector General (OIG) List of Excluded Individuals and Entities must be checked by the I/DD Waiver provider for every agency staff who provides Medicaid services prior to employment and monthly. Persons on the OIG Exclusion List cannot provide Medicaid services. The list can be checked at http://exclusions.oig.hhs.gov/. A form may be printed from this website to verify that the check occurred. Any document that has multiple staff names may be kept in a separate file and made available to staff as needed and during agency audits.

513.2.4.4 Self-Reviews

Old Policy:
The ASO prepares and disseminates electronically an I/DD Waiver Self-Review Tool which measures the CMS Quality Assurances. This self-review tool allows providers to incorporate into their Quality Assurance and Improvement processes a method to ensure quality services occur and CMS quality assurances are met. I/DD Waiver providers must use the approved format for submitting self-reviews so that data related to the CMS quality assurance standards can be tracked and analyzed. Failure to submit the self-reviews may jeopardize the future status of the I/DD Waiver provider as a West Virginia Medicaid provider.

I/DD providers are required to conduct self-reviews and submit to the ASO via electronic format on a quarterly basis. The reporting period is as follows:

- January 1 to March 31 self-reviews submitted by April 15
- April 1 to June 30 self-reviews submitted by July 15
- July 1 to September 30 self-reviews submitted by October 15
- October 1 to December 31 self-reviews submitted by January 15

New Policy:
The ASO prepares and disseminates electronically an I/DD Waiver Self-Review Tool which primarily measures the CMS Quality Assurances. This self review tool allows providers to incorporate into their Quality Assurance and Improvement processes a method to ensure quality services occur and CMS quality assurances are met. I/DD Waiver providers must use the approved format for submitting self reviews so that data related to the CMS quality assurance standards can be tracked and analyzed. Failure to submit the self reviews may jeopardize the future status of the I/DD Waiver provider as a West Virginia Medicaid provider.

I/DD providers are required to conduct self reviews, complete an affidavit attesting to the accuracy of the self-review, and submit to the ASO via electronic format every-other-year. The reporting periods will be based on the quarter during which the provider's on-site review take place on alternate years and will be communicated to providers via email.

513.2.4.7 Utilization Guidelines for I/DD Waiver Providers

Old Policy:
None, this is a new section

New Policy:
Each agency must put into place a set of Utilization Guidelines (UG) to ensure that each I/DD Waiver member receives the appropriate services and supports at the right time, in the right amount, and for as long as the member needs the services. Utilization guidelines are a person-centered process that starts with person-centered planning. The purpose of UG is to monitor claims submission and ensure that services provided are in compliance with the I/DD Waiver Manual and existing authorizations.

Agencies providing services must have UG in place that track units of services utilized/billed. It is the expectation that each agency be able to report units used and units still available at the IDT meetings (if not earlier). This is not only necessary for transfer/authorization purposes, but is also necessary for IDTs to make good decisions about purchasing services. Each agency is to have and adhere to a UG policy. With the exception of Crisis Services, agencies must receive prior-authorization for each service provided, as outlined in section 513.11 and specified in each service definition under "Prior Authorization."

The internal policy of each agency must minimally address the following:

- Staff training
- Provider education on how services will be delivered throughout the member's service year. This education should minimally include the following:
    - Schedule of the member
    - Units of service authorized
    - Averages of usage (daily/monthly)
    - Individualized Training (as needed)
    - Requirements and limitations of the particular service provided
- Empowering and educating members and families so that they are able to make informed choices about their services and supports;
- Assessing member's needs:
    - Purchase requests are based on identified need for the coming service year, therefore additional units may not be requested for contingency purposes;
- Choosing services based on member's assessed needs;
- Monitoring service utilization throughout the member's service year;
- Monitoring member's needs and updating services as needed;
- All services delivered must be delivered based on:
    - Assessed need

- Agreement by the IDT
- I/DD Waiver service caps and limitations
- Documentation on the member's IPP

513.3.2.2 Functionality

Old Policy:
The applicant must have substantial deficits in at least 3 of the 6 identified major life areas listed below:

- Self-care;
- Receptive or expressive language (communication);
- Learning (functional academics);
- Mobility;
- Self-direction; and,
- Capacity for independent living (home living, social skills, employment, health and safety, community and leisure activities).

New Policy:
The applicant must have substantial deficits in at least 3 of the 6 identified major life areas listed below:

- Self-care;
- Receptive or expressive language (communication);
- Learning (functional academics);
- Mobility;
- Self-direction; and,
- Capacity for independent living which includes the following 6 sub-domains: home living, social skills, employment, health and safety, community and leisure activities. At a minimum, 3 of these sub-domains must be substantially limited to meet the criteria in this major life area.

513.3.4 Slot Allocation Referral and Selection Process

Old Policy:
Provided a funded I/DD Waiver slot is available, the allocation process is based on:

- The chronological order by date of the ASO's receipt of the fully completed initial application (WV-BMS I/DD-1) which includes approval of eligibility from the MECA **or**
- The date of a fair hearing decision if medical eligibility is established as a result of a Medicaid fair hearing.

Once a I/DD Waiver slot is available, the enrollee will receive an informational packet up to 90 days prior to the slot being awarded. A Freedom of Choice form (WV-BMS-I/DD-2) on which the enrollee must indicate the wish to receive home and community based services as opposed to services in an ICF/MR, his/her chosen service option (Traditional or Traditional and Participant-Directed) as well as the chosen Service Coordination provider will be included and must be returned to the ASO within 30 days of receipt of the informational packet.

New Policy:
Provided a funded I/DD Waiver slot is available, the allocation process is based on:

- The chronological order by date of the ASO's receipt of the fully completed initial application (WV-BMS I/DD-1) which includes approval of eligibility from the MECA **or**
- The date of a fair hearing decision if medical eligibility is established as a result of a Medicaid fair hearing.

Once an I/DD Waiver slot is available, the enrollee will receive an informational packet up to 90 days prior to the slot being awarded. A Freedom of Choice form (WV-BMS-I/DD-2) on which the enrollee must indicate the wish to receive home and community based services as opposed to services in an ICF/IID, his/her chosen service option (Traditional or Traditional and Participant-Directed) as well as the chosen Service Coordination provider will be included and must be returned to the ASO within 30 days of receipt of the informational packet.

The enrollee must access I/DD Waiver services within 180 days when the funded slot becomes available or the enrollee will be discharged from the program.

513.4 MEMBER ANNUAL RE-DETERMINATION OF ELIGIBILITY PROCESS

Old Policy:
In order for a member to be re-determined eligible, the member must:

- Meet medical eligibility;
- Meet financial eligibility;
- Be a resident of West Virginia; and
- Have chosen Home and Community-Based Services over services in an institutional setting (ICF/MR).

The member must also have substantial deficits in at least 3 of the 6 identified major life areas listed below:

- Self-care;
- Receptive or expressive language (communication);
- Learning (functional academics);
- Mobility;

- Self-direction; and
- Capacity for independent living (home living, social skills, employment, health and safety, community and leisure activities).

New Policy:
In order for a member to be re-determined eligible, the member must:

- Meet medical eligibility;
- Meet financial eligibility;
- Be a resident of West Virginia; and
- Have chosen Home and Community-Based Services over services in an institutional setting (ICF/IID).

The member must also have substantial deficits in at least 3 of the 6 identified major life areas listed below:

- Self-care;
- Receptive or expressive language (communication);
- Learning (functional academics);
- Mobility;
- Self-direction; and
- Capacity for independent living which includes the following 6 sub-domains: home living, social skills, employment, health and safety, community and leisure activities. At a minimum, 3 of these sub-domains must be substantially limited to meet the criteria in this major life area.

513.4.1 Annual Re-determination of Medical Eligibility

Old Policy:
In accordance with federal law, re-determination of medical eligibility must be completed at least annually. The anchor date of the member's medical re-determination is the anniversary date of the first month after the initial medical eligibility was established by the MECA.

At a minimum, annual redetermination of eligibility will include 1 annual functional assessment which includes standardized measures of adaptive behavior in the 6 major life areas completed by the ASO and the results provided to the MECA. The MECA will determine medical eligibility annually based on this assessment of functioning as defined in Section 513.3.

Substantial deficits are defined as standardized scores of 3 standard deviations below the mean or less than 1 percentile when derived from a normative sample that represents the general population of the United States, or the average range or equal to or below the 75 percentile when derived from MR normative populations when mental retardation has been diagnosed and the scores are derived from a standardized measure of adaptive behavior. The scores submitted must be obtained from using an appropriate standardized test for measuring adaptive

behavior that is administered and scored by an individual properly trained and credentialed to administer the test.

The ASO will conduct the functional assessment up to 90 days prior to each member's anchor date. At the time of the annual functional assessment by the ASO, each member or legal representative must complete the Freedom of Choice Form (WV-BMS-I/DD-2) indicating their choice of level of care settings, service coordination agency and service delivery options. If determined medically eligible, the member and Service Coordination provider will also receive the individual budget allocation that was calculated by the ASO based upon the member's assessed needs.

If a member is determined not to be medically eligibility a written Notice of Decision, a Request for Hearing form and the results of the functional assessment are sent by certified mail by the ASO to the member or their legal representative. The member's service coordinator is also notified by the ASO. The denial of medical eligibility may be appealed through the Medicaid Fair hearing process if the Request for Hearing form is submitted by the member or their legal representative to the Board of Review within 90 days of receipt of the Notice of Decision. The Notice of Decision letter also allows the member or their legal representative to request a second medical evaluation.

The second medical evaluation is completed within 60 days by a member of the IPN at the expense of BMS.

If the member's medical eligibility is terminated and the member or legal representative wishes to continue existing services throughout the appeal process, the Request for Hearing form must be submitted within 13 days of the member or their legal representative's receipt of the Notice of Decision.

If the member is determined to be medically eligible as a result of a Medicaid Fair Hearing, then services will continue if the member or their legal representative requested this within 13 days of the receipt of the Notice of Decision Letter. If services were terminated due to the member or their legal representative not requesting their continuance within 13 days of the receipt of the Notice of Decision letter, then services will begin again on the date of the Hearing Officer's decision.

At any time prior to the Medicaid Fair hearing, the member or legal representative may request a pre-hearing conference. At the pre-hearing conference, the member and/or their legal representative, the ASO and a representative from the MECA will review the information submitted for the medical eligibility determination and the basis for the termination.

More information on appealing medical eligibility can be found in Section 513.5.4 Member Appeals.

New Policy:
In accordance with federal law, re-determination of medical eligibility must be completed at least annually. The anchor date of the member's medical re-determination is the anniversary date of the first month after the initial medical eligibility was established by the MECA.

At a minimum, annual redetermination of eligibility will include 1 annual functional assessment which includes standardized measures of adaptive behavior in the 6 major life areas completed by the ASO and the results provided to the MECA. The MECA will determine medical eligibility annually based on this assessment of functioning as defined in Section 513.3.

Substantial deficits are defined as standardized scores of 3 standard deviations below the mean or less than 1 percentile when derived from a normative sample that represents the general population of the United States, or the average range or equal to or below the 75 percentile when derived from MR normative populations when mental retardation has been diagnosed and the scores are derived from a standardized measure of adaptive behavior. The scores submitted must be obtained from using an appropriate standardized test for measuring adaptive behavior that is administered and scored by an individual properly trained and credentialed to administer the test.

The ASO will conduct the functional assessment up to 90 days prior to each member's anchor date. At the time of the annual functional assessment by the ASO, each member or legal representative must complete the Freedom of Choice Form (WV-BMS-I/DD-2) indicating their choice of level of care settings, service coordination agency and service delivery options. If the member has a legal representative that did not attend the Annual Functional Assessment and complete the Freedom of Choice Form (WV-BMS-I/DD-2), then it is the responsibility of the Service Coordinator to obtain the signature of the Legal Representative prior to or at the Annual IPP. If determined medically eligible, the member and Service Coordination provider will also receive the individual budget allocation that was calculated by the ASO based upon the member's assessed needs.

If a member is determined not to be medically eligibility a written Notice of Decision, a Request for Hearing form and the results of the functional assessment are sent by certified mail by the ASO to the member or their legal representative. The member's service coordinator is also notified by the ASO. The denial of medical eligibility may be appealed through the Medicaid Fair hearing process if the Request for Hearing form is submitted by the member or their legal representative to the Board of Review within 90 days of receipt of the Notice of Decision. The Notice of Decision letter also allows the member or their legal representative to request a second medical evaluation.

The second medical evaluation is completed within 60 days by a member of the IPN at the expense of BMS.

If the member's medical eligibility is terminated and the member or legal representative wishes to continue existing services throughout the appeal process, the Request for Hearing form must

be submitted within 13 days of the member or their legal representative's receipt of the Notice of Decision.

If the member is determined to be medically eligible as a result of a Medicaid Fair Hearing, then services will continue if the member or their legal representative requested this within 13 days of the receipt of the Notice of Decision Letter. If services were terminated due to the member or their legal representative not requesting their continuance within 13 days of the receipt of the Notice of Decision letter, then services will begin again on the date of the Hearing Officer's decision.

At any time prior to the Medicaid Fair hearing, the member or legal representative may request a pre-hearing conference. At the pre-hearing conference, the member and/or their legal representative, the ASO and a representative from the MECA will review the information submitted for the medical eligibility determination and the basis for the termination.

More information on appealing medical eligibility can be found in Section 513.5.4 Member Appeals.

513.8 INDIVIDUAL PROGAM PLAN (IPP)

Old Policy:
Central to the services that a member receives through the I/DD Waiver program is the member's IPP. Developing the IPP is the process by which the member is assisted by their Interdisciplinary Team which consists of their legal representative (when applicable), their advocate (when applicable) other natural supports the member chooses to invite as well as attendees required by the I/DD Waiver program policy manual. This team meets to decide what needs to be done, by whom, when and how and to document the decisions made by this planning team. The content of the IPP must be guided by the member's needs, wishes, desires, and goals but based upon assessed needs. All IPP meetings should be scheduled at a time and location that takes into consideration the schedule and availability of the member and the other members of the team.

If the member is their own legal representative, then the member must attend the IPP. If the member has a legal representative, the legal representative must attend the IPP in person or by teleconferencing in extenuating circumstances and the member must also attend if medically and behaviorally able. If the member does not attend due to medical or behavioral issues, the service coordinator must ensure that the member understands the services outlined in their IPP to the best of their ability and is given an opportunity to sign the IPP within 10 days.

Individual Program Planning includes the Initial IPP which must be developed within 7 days of intake/admission to a new provider agency, the annual IPP and subsequent reviews or revisions of the IPP, Critical Juncture, Transfer and Discharge IPPs. Any activity that occurs prior to the meeting or after the meeting is **not** considered Individual Program Planning.

Activities conducted before or after the meeting may meet the criteria for Service Coordination activities.

The IPP should minimally include:

- All components in the WV-BMS-I/DD-05

    - Cover/Demographics
    - Meeting Minutes
    - Circle of Support/Goals and Dreams
    - Summary of Assessment and Evaluation Results
    - Medications
    - Individual Service Plan
        - I/DD Waiver Services
        - Non-I/DD Waiver Services and Natural Supports
    - Individual Habilitation Plan and Task Analysis
    - Tentative Weekly Schedule
    - Signature Sheet (and rationale for disagreement if necessary)
    - Behavior Support Plan or Protocol, if applicable, with signatures of developer and member/legal representative (must indicate consent by member/legal representative)
        - Dates that plan was approved, initiated and will be reviewed. If the plan includes restrictive measures, then approval by the I/DD Waiver Provider's Human Rights Committee must be attached. HRC must monitor plans with adverse procedures at least annually.
    - Crisis Plan
    - Individual Spending Plan if member is self-directing any of the Participant-Directed Services available

A Crisis Plan must be completed for each I/DD Waiver member. This shall be considered an attachment and part of the member's IPP. A Crisis Plan must be personalized and discuss any foreseeable issues which might put the member's health, safety or well-being in jeopardy. A Crisis Plan should incorporate the level of supports which would likely be required for unforeseen circumstances. A Crisis Plan should minimally cover the following events:

- No call/no show of support staff
- Primary caregiver becomes unavailable or unable to provide continued support
- Weather-related/environmental issues (transportation, inability to get to scheduled location, etc.)
- Disaster-related issues (flood, fire, etc.)
- Health/medical issues (medication administration, serious allergies, seizure protocol, if applicable, etc.)
- Termination from I/DD Waiver services
- Any other member-specific issues

The IPP serves as documentation of the IDT team meeting. A team member's signature on the IPP constitutes participation in the team meeting; however a progress note is still required to document the team member's participation in the meeting. Team meeting minutes must be maintained with the IPP to expand discussion of the meeting, record critical issues from the meeting and identify the active participation of each IDT member. The IPP must include the signature of all members who attended and should indicate agreement/disagreement with the IPP, date of the meeting and the total time spent in the meeting for each team member. The member or their legal representative must agree with the plan for it to be considered a valid IPP. A copy of the IPP is maintained in all participating provider agency records and distributed to all team members within 14 days of the date of the IDT team meeting by the Service Coordinator.

In extenuating circumstances (i.e. legal representative living out of state or inclement weather), IDT members may participate by teleconferencing, however they may not bill for the time spent in the IDT if participating by teleconference and the Service Coordinator must note on the signature sheet that they attended by phone, If the legal representative attends by telephone, the service coordinator must obtain their signature within 10 days. When a member has been admitted to a crisis respite site, then the Service Coordinator may attend and bill for their services while conducting the IPP over the telephone.

An IPP includes the completed IPP (WV-BMS-I/DD-5) and the following attachments: Crisis Response Plan, Behavior Support Plan/Protocols (if applicable), tentative weekly schedule, budgeted cost of planned services, spending plans if the member self directs eligible services and meeting minutes.

The IPP must be developed on an annual basis. The IPP must be reviewed and approved by the IDT at least every 90 days unless otherwise specified in the plan, but shall not exceed 180 days. The IPP must be updated at critical juncture meetings to include IDT recommendations. All Medley Class Members must have IDT meetings every quarter, but the Medley Advocate may choose to only attend the 6-month and the annual IDT.

MEDICAID CANNOT REIMBURSE FOR SERVICES RENDERED WHEN THE IPP HAS EXPIRED, HAS NOT BEEN REVIEWED WITHIN REQUIRED TIMELINES AND/OR DOES NOT INCLUDE REQUIRED SIGNATURES OR SERVICES.

New Policy:
Central to the services that a member receives through the I/DD Waiver program is the member's IPP. Developing the IPP is the process by which the member is assisted by their Interdisciplinary Team which consists of their legal representative (when applicable), their advocate (when applicable) other natural supports the member chooses to invite as well as attendees required by the I/DD Waiver program policy manual. This team meets to decide what needs to be done, by whom, when and how and to document the decisions made by this planning team. The content of the IPP must be guided by the member's needs, wishes, desires, and goals but based upon assessed needs. All IPP meetings should be scheduled at a time and

location that takes into consideration the schedule and availability of the member and the other members of the team.

If the member is their own legal representative, then the member must attend the IPP. If the member has a legal representative, the legal representative must attend the IPP in person or by teleconferencing in extenuating circumstances and the member must also attend if medically and behaviorally able. If the member does not attend due to medical or behavioral issues, the service coordinator must ensure that the member understands the services outlined in their IPP to the best of their ability and is given an opportunity to sign the IPP within 10 days.

Individual Program Planning includes the Initial IPP which must be developed within 7 days of intake/admission to a new provider agency, the annual IPP and subsequent reviews or revisions of the IPP, Critical Juncture, Transfer and Discharge IPPs. Any activity that occurs prior to the meeting or after the meeting is **not** considered Individual Program Planning. Activities conducted before or after the meeting may meet the criteria for Service Coordination activities.

All IPPs must be disseminated to all team members within 14 days and must minimally include:

- All components in the WV-BMS-I/DD-05
    - Cover/Demographics
    - Meeting Minutes
    - Circle of Support/Goals and Dreams
    - Summary of Assessment and Evaluation Results
    - Medications
    - Individual Service Plan
        - I/DD Waiver Services
        - Non-I/DD Waiver Services and Natural Supports
    - Individual Habilitation Plan and Task Analysis if the member receives formal training
    - Tentative Weekly Schedule
    - Signature Sheet (and rationale for disagreement if necessary)
    - Behavior Support Plan or Protocol, if applicable, with signatures of developer and member/legal representative (must indicate consent by member/legal representative)
        - Dates that plan was approved, initiated and will be reviewed. If the plan includes restrictive measures, then approval by the I/DD Waiver Provider's Human Rights Committee must be attached. HRC must monitor plans with adverse procedures at least annually.
    - Crisis Plan to include Emergency Disaster Plans
    - Individual Spending Plan if member is self-directing any of the Participant-Directed Services available

A Crisis Plan must be completed for each I/DD Waiver member. This shall be considered an attachment and part of the member's IPP. A Crisis Plan must be personalized and discuss any foreseeable issues which might put the member's health, safety or well-being in jeopardy. A

Crisis Plan should incorporate the level of supports which would likely be required for unforeseen circumstances. A Crisis Plan should minimally cover the following events:

- No call/no show of support staff
- Primary caregiver becomes unavailable or unable to provide continued support
- Weather-related/environmental issues (transportation, inability to get to scheduled location, etc.)
- Disaster-related issues (flood, fire, etc.)
- Health/medical issues (medication administration, serious allergies, seizure protocol, if applicable, etc.)
- Termination from I/DD Waiver services
- Any other member-specific issues

The IPP serves as documentation of the IDT team meeting. A team member's signature on the IPP constitutes participation in the team meeting; however a progress note is still required to document the team member's participation in the meeting. Team meeting minutes must be maintained with the IPP to expand discussion of the meeting, record critical issues from the meeting and identify the active participation of each IDT member. The IPP must include the signature of all members who attended and should indicate agreement/disagreement with the IPP, date of the meeting and the total time spent in the meeting for each team member. The member or their legal representative must agree with the plan for it to be considered a valid IPP. A copy of the IPP is maintained in all participating provider agency records and distributed to all team members within 14 days of the date of the IDT team meeting by the Service Coordinator.

In extenuating circumstances (i.e. legal representative living out of state or inclement weather), IDT members may participate by teleconferencing, however they may not bill for the time spent in the IDT if participating by teleconference and the Service Coordinator must note on the signature sheet that they attended by phone, If the legal representative attends by telephone, the service coordinator must obtain their signature within 10 days. When a member has been admitted to a crisis respite site, then the Service Coordinator may attend and bill for their services while conducting the IPP over the telephone.

An IPP includes the completed IPP (WV-BMS-I/DD-5) and the following attachments: Crisis Response Plan, Behavior Support Plan/Protocols (if applicable), tentative weekly schedule, budgeted cost of planned services, spending plans if the member self directs eligible services and meeting minutes.

The IPP must be developed on an annual basis. The IPP must be reviewed and approved by the IDT at least every 90 days unless otherwise specified in the plan, but shall not exceed 180 days. The IPP must be updated at critical juncture meetings to include IDT recommendations.

All Medley Class Members must have IDT meetings every quarter, but the Medley Advocate may choose to only attend the 6-month and the annual IDT.

MEDICAID CANNOT REIMBURSE FOR SERVICES RENDERED WHEN THE IPP HAS EXPIRED, HAS NOT BEEN REVIEWED WITHIN REQUIRED TIMELINES AND/OR DOES NOT INCLUDE REQUIRED SIGNATURES OR SERVICES.

513.8.2.4 Critical Juncture IDT Meeting

Old Policy:
This meeting is held as soon as possible when there is a significant change in the member's assessed needs and/or planned services. A Critical Juncture may be the result of a change in the member's medical/physical status, behavioral status or availability of natural supports. The IPP must be updated to include IDT recommendations.

See Section 513.6 for appropriate reasons for discharge of a member from I/DD Waiver Services.

New Policy:
This meeting is held as soon as possible when there is a significant change in the member's assessed needs and/or planned services. A Critical Juncture may be the result of a change in the member's medical/physical status, behavioral status or availability of natural supports. The IPP must be updated to include IDT recommendations, minutes and signatures of all IDT members indicating their attendance and agreement or disagreement.

A face-to-face meeting must be held under any of the following circumstances:

- All team members do not agree with services or service mix;
- When a new goal will be implemented for the member;
- The team is discussing implementation of a Positive Behavior Support plan, where one was not previously required;
- The member changes residential setting (example: moves from Natural Family to ISS);
- The member who lives in an ISS, Group Home or Specialized Family Care Home moves;
- The member goes into crisis placement;
- The member has a change in legal representative status;
- The primary caregiver changes or passes away;
- The member elects to change Service Delivery Model;
- The member receives a new service not previously received.

See Section 513.6 for appropriate reasons for discharge of a member from I/DD Waiver Services.

513.9.1.1 Behavior Support Professional: Traditional Option

Definition of Service:

Old Policy:
This service is provided to members with identified maladaptive behaviors and documented social behavior skill deficits documented through 1 of the following conditions:

- Member must currently exhibit maladaptive behaviors so severe that the adaptive functioning and ability to receive adaptive training is limited or impossible unless maladaptive behaviors are reduced or eliminated.
- Member may have a history of behaviors beyond 1 year that have resulted in severe life threatening situations such as fire setting or arson or sexual assault or offending behaviors that result in bodily harm to others or self.
- Member must have identified behaviors on the IPP that require tracking of behavioral data for the functional assessment.
- Member must have a functional assessment that outlines 1 or more specific target behaviors that are currently or will be addressed in a behavioral protocol or a positive behavior support plan.

The BSP is responsible to identify targeted maladaptive behaviors; develop hypotheses and Positive Behavior Support plans; develop habilitation plans and provide training in the person-specific aspects and method of a plan of intervention to the direct care staff (i.e. family, person-centered support workers, facility-based day habilitation workers, supportive employment providers, crisis workers and respite workers). The BSP also provides evaluation/monitoring of the effectiveness of the Positive Behavior Support plan through analysis of programming results.

I/DD Waiver provider agencies who submit their curriculum for approval to the West Virginia Positive Behavior Support (WV-PBS) Network may allow their agency staff who was formerly credentialed as Therapeutic Consultant Behavior Analysts or Therapeutic Consultant Behavior Specialists before October 1, 2011 to bill the BSP code as long as they meet all other requirements listed below. The WV-PBS Network approves all curriculums that meet the Association of Positive Behavior Support (PBS) standards of practice within 6 months of submission and the West Virginia I/DD Waiver provider completes training of agency staff within 6 months of approval of the curriculum. All curriculums submitted must include a minimum of 20 hours of training in APBS standards of practice and 10 hours of mentoring. This mentoring training is not member-specific and is not billable.

All newly hired agency staff must be either completely trained in a curriculum which has been approved by the WV-PBS Network or meet other requirements below before being allowed to bill the BSP code.

The Behavior Support Professional may perform the activities listed below:

- Take responsibility for all aspects of Positive Behavior Support services.
- Complete behavioral assessment or evaluation consisting of activities such as functional assessment of targeted behavior or analysis of behavioral data.

- Facilitate the development of Positive Behavior Support plans addressing behavioral protocols and behavioral guidelines.
- Train direct care staff to implement Positive Behavior Support plans.
- Develop behavioral protocols and behavioral guidelines for direct care staff or families.
- Develop methodology for intervention with the individual.
- Assess, evaluate and monitor the effectiveness of Positive Behavior Support plans.
- Develop adaptive habilitation plans based upon the member's assessed adaptive and maladaptive needs.
- Collaborate with Therapeutic Consultant(s) (when applicable) to ensure that positive behavior support strategies are consistently applied within all training strategies.
- Train direct care staff, model training strategies and observe staff to ensure that proper implementation of training strategies are imbedded across all aspects of habilitation. This may include training on members' health and safety needs as well as speech, physical and occupational therapy treatment activities.
- Facilitate person-centered planning as a component of the Positive Behavior Support Plan.
- Present proposed member's restrictive measures to the I/DD Waiver provider's Human Rights Committee if no other professional is presenting the same information.
- May attend and participate in IDT meetings and the annual assessment of functioning for eligibility conducted by ASO if requested by the member or their legal representative.

Definition of Service:
New Policy:
This service is **ONLY** provided to members who exhibit 1 or more of the following:

- Member must exhibit documented maladaptive behaviors on the current Inventory for Client and Agency Planning (ICAP) with severity level of "very serious," or "extremely serious" in at least 1 of the following categories: Hurtful to Self, Hurtful to Others, and/or Destructive to Property; AND/OR

- Member must have current documented severe maladaptive behaviors that are Hurtful to Self, Hurtful to Others, and/or Destructive to Property, that have occurred since last ICAP was administered. These behaviors must be documented through a current Functional Assessment, current behavior data documentation, and/or WV IMS incident reports; AND/OR

- Member must have a documented history of maladaptive behaviors within the past year that have resulted in severe outcomes (i.e.-possible incarceration, life-threatening to member/others, arson/fire-setting, sexual assault). These behaviors must be documented through a current Positive Behavior Support Plan, current Functional Assessment, or other documentation that supports the maladaptive behavior(s) have occurred within the past year.

A Positive Behavior Support Plan can only be written by an individual who has met the Agency Staff Qualifications as a Behavior Support Professional.

In order to qualify to train others using an approved curriculum, an individual must meet 1 of the following 3 criteria:

- Be the developer of an approved training as indicated on the submitted application;
- Be able to provide documentation that certifies completion of an approved training course (though not necessarily the course for which they are the trainer);
- Be a Board Certified Behavior Analyst or Assistant and have documentation certifying completion of the facilitated Overview of Positive Behavior Support.

The Behavior Support Professional must perform the following activities for those members who meet the criteria in section 513.9.1.1 and who are prior-authorized for this service:

- Complete a Functional Assessment to identify targeted maladaptive behaviors;
- Create Positive Behavior Support plans to meet Association for Positive Behavior Support standards of practice;
- Provide training to direct care staff who will implement the plan (i.e. family, person-centered support workers, facility-based day habilitation workers, supported employment providers, crisis workers, and respite workers);
- Evaluate/monitor the effectiveness of the Positive Behavior Support plan through analysis of programming results.

The BSP may perform all of the services listed under the Therapeutic Consultant definition, as well as the following services for those members who meet the criteria in section 513.9.1.1 and who are prior-authorized for this service:

- Train direct care workers in all aspects of PBSPs implementation(i.e., person- centered support workers, facility-based day habilitation workers, supported employment and respite workers);
- Assess, evaluate and monitor the effectiveness of PBSPs;
- Collect and evaluate data and completes a functional assessment around targeted behaviors to generate a recommendation for a Positive Behavior Support plan or to generate a Positive Behavior Support plan;
- Collaborate with Therapeutic Consultant(s) from other agency(s) to ensure that positive behavior support strategies are consistently applied across all environments;
- Facilitate person-centered planning as a component of the Positive Behavior Support plan;
- Present proposed restrictive measures to the I/DD Waiver provider's Human Rights Committee if no other professional is presenting the same information regarding the member;

- Attend and participate in IDT meetings and the annual assessment of functioning for eligibility conducted by ASO if requested by the member or their legal representative.
- May provide on-site training to the support staff in behavior/crisis situations.
- May bill for phone consultation during behavioral crisis situations.
- May bill for developing/updating the behavioral crisis section of the member's crisis plan if a Therapeutic Consultant is not performing this function.
- May verify data compiled by all Person-Centered Support staff for accuracy.
- May bill for attendance of and contribution to Futures Planning sessions, including PATHs and MAPs.

A Positive Behavior Support Plan can only be written by an individual who has met the Agency Staff Qualifications as a Behavior Support Professional.

Limitations/Caps:
Old Policy:

- The amount of service is limited by the member's individualized budget.
- The annual budget allocation may be adjusted (increased or decreased) only if changes have occurred regarding the member's assessed needs.
- 960 units/240 hours per member's annual IPP year in combination with Therapeutic Consultant Services.
- Member is limited to 1 BSP.
- If the member receives all direct care services from a single I/DD Waiver provider, the member is limited to 1 BSP or TC.
- If the member receives direct care services from more than 1 I/DD Waiver provider, the member/legal representative is responsible for choosing which provider will provide BSP services.
- Agency staff providing BSP services may not be an individual who lives in the member's own residence or family residence.
- If the assigned BSP is unavailable due to an emergency or illness another BSP or TC may provide services in their absence.
- Direct care services provided by the BSP must be billed utilizing the appropriate direct care service code.
- BSP services may only be billed 30 days prior to discharge for a member or applicant being discharged from a state institution, a medical hospital, rehabilitation hospital, a psychiatric facility, nursing home, ICF/MR or another WV waiver program for planning purposes.
- BSP services cannot be billed for completing administrative activities to include these listed below.
    - Human Resources activities such as staff supervision, monitoring and scheduling.
    - Routine review of a member's file for quality assurance purposes.
    - Staff meetings for groups or individuals.

- Monitoring of group home (fire drills, hot water heater temperature checks, etc.).
- Filing, collating, writing notes to staff.
- Phone calls to staff.
- Observing staff while training individuals without a clinical reason.
- Administering assessments not warranted or requested by the member or their legal representative.
- Making plans for a parent for a weekend visit.
- Working in the home with providing direct care staff coverage.
- Sitting in the waiting room for a doctor or medical appointment.
- Conducting a home visit routinely and without justification – only service coordinators are required to make monthly home visits.

Limitations/Caps:
New Policy:

- The amount of service is limited by the member's individualized budget**.**
- The annual budget allocation may be adjusted (increased or decreased) only if changes have occurred regarding the member's assessed needs.
- 960 units/240 hours per member's annual IPP year in combination with Therapeutic Consultant services.
- Member is limited to 1 BSP.
- If the member receives direct care services from more than 1 I/DD Waiver provider, the member/legal representative is responsible for choosing which provider will provide BSP services.
- Agency staff providing BSP services may not be an individual who lives in the member's own residence or family residence.
- If the assigned BSP is unavailable due to an emergency or illness another BSP or TC may provide services in their absence.
- Direct care services provided by the BSP must be billed utilizing the appropriate direct care service code.
- BSP services may only be billed 30 days prior to discharge for a member or applicant being discharged from a state institution, a medical hospital, rehabilitation hospital, a psychiatric facility, nursing home, ICF/IID or another WV waiver program for planning purposes.
- BSP services may not be billed for traveling to complete BSP activities.
- BSP services cannot be billed for completing administrative activities to include these listed below.
    - Human Resources activities such as staff supervision, monitoring, and scheduling.
    - Routine review of a member's file for quality assurance purposes.
    - Staff meetings for groups or individuals.
    - Monitoring of group home (fire drills, hot water heater temperature checks, etc.).
    - Filing, collating, writing notes to staff.

- Phone calls to staff.
- Observing staff while training individuals without a clinical reason.
- Administering assessments not warranted or requested by the member or their legal representative.
- Making plans for a parent for a weekend visit.
- Working in the home with providing direct care staff coverage.
- Sitting in the waiting room for a doctor or medical appointment.
- Conducting a home visit routinely and without justification—only service coordinators are required to make monthly home visits.

Agency Staff Qualifications:
Old Policy:
In addition to meeting all the requirements in Section 513.2.2.1, 513.2.2.1.1, 513.2.2.1.2 and 513.2.2.1.3, agency staff providing BSP services must meet at least 1 of the standards listed below.

- Be a Board Certified Assistant Behavior Analyst (BCaBA) Certificate- Bachelor's degree, 1 year professional experience working with individuals with I/DD and completion of the West Virginia Positive Behavior Support (WV-PBS) Network's 3-hour overview of Positive Behavior Support; or
- Be a Board Certified Behavior Analyst (BCBA) Certificate-Master's degree, 1 year professional experience working with individuals with I/DD and completion of the WV-PBS Network's 3 hour overview of Positive Behavior Support; or
- Have a Bachelor of Arts (BA) or Bachelor of Science (BS) degree or a Masters of Arts (MA) or Masters of Science (MS) in a human services field and 2 years professional experience in the I/DD field and documented evidence of enrollment in the APBS standards of practice coursework/training as evidenced by: Enrollment in an approved BCBA or BCaBA university training course or enrollment in a specific curriculum training program that is pre-approved as meeting the APBS standards of practice by the WV-PBS Network or by an approved state agency. Agency staff must also be credentialed as a Therapeutic Consultant Behavior Analyst or a Therapeutic Consultant Behavior Specialist before October 1, 2011.

By January 1, 2013, the BSP must have 1 of the minimum acceptable credentials listed below.

- Be a Board Certified Assistant Behavior Analyst (BCaBA) Certificate-Bachelor's degree, 1 year professional experience working with individuals with I/DD and completion of the 3-hour overview of Positive Behavior Support; or
- Be a Board Certified Behavior Analyst (BCBA) Certificate-Master's degree, 1 year professional experience working with individuals with I/DD and completion of the 3-hour overview of Positive Behavior Support; or
- Have a Bachelor of Arts (BA) or Bachelor of Science (BS) degree or a Masters of Arts (MA) or Masters of Science (MS) in a human services field and 2 years professional experience in the I/DD field and documented evidence of completion of APBS standards

of practice coursework/training as evidenced by documentation of successful completion of an approved BCBA or BCaBA university training course or completion of agency specific curriculum based on the APBS standards of practice that have been approved by the WV-PBS Network or by an approved state agency.

Agency Staff Qualifications:
New Policy:

In addition to meeting all requirements in Section 513.2.2.1, 513.2.2.1.1, 513.2.2.1.2 and 513.2.2.1.3, agency staff providing BSP services must meet at least 1 of the standards listed below.

- Be a Board Certified Assistant Behavior Analyst (BCaBA) Certificate-Bachelor's degree, 1 year professional experience working with individuals with I/DD and completion of the facilitated 3-hour overview of Positive Behavior Support created by the West Virginia – Association for Positive Behavior Support (WV-APBS) Network; or
- Be a Board Certified Behavior Analyst (BCBA) Certificate-Master's degree, 1 year professional experience working with individuals with I/DD and completion of the facilitated 3-hour overview of Positive Behavior Support created by the West Virginia – Association for Positive Behavior Support (WV-APBS) Network; or
- Have a Bachelor of Arts (BA) or Bachelor of Science (BS) degree and 2 years professional experience in the I/DD field or a Master of Arts (MA) or Master of Science (MS) in a human services field and 1 year professional experience in the I/DD field and documented evidence of successful completion coursework/training as evidenced by completion of a training curriculum approved by the WV- APBS Network or by an approved state agency.

A Positive Behavior Support Plan can only be written by an individual who has met the Agency Staff Qualifications as a Behavior Support Professional.

513.9.1.2 Crisis Services: Traditional Option:

Definition of Service:
Old Policy:
The goal of this service is to respond to a crisis immediately, assess and stabilize the situation as quickly as possible. Crisis services provided are to be used if there is an extraordinary circumstance requiring a short-term, acute service that utilizes positive behavioral support planning, interventions, strategies and direct care. Except in emergent situations, this service requires prior authorization. This service is a 2:1 ratio (agency staff to member ratio). The additional agency staff person is available for assurance of health and safety in the respective setting. Crisis services include formal training, informal training and behavioral support.

Definition of Service:
New Policy:
The goal of this service is to respond to a crisis immediately, assess and stabilize the situation as quickly as possible. Crisis services provided by awake and alert staff are to be used if there is an extraordinary circumstance requiring a short-term, acute service that utilizes positive behavioral support planning, interventions, strategies and direct care. Except in emergent situations, this service requires prior authorization. This service is a 2:1 ratio (agency staff to member ratio). The additional agency staff person is available for assurance of health and safety in the respective setting. Crisis services include formal training, informal training and behavioral support.

Limitations/Caps
Old Policy:

- The amount of service is limited by the member's individualized budget.
- The annual budget allocation may be adjusted (increased or decreased) only if changes have occurred regarding the member's assessed needs.
- 336 units/336 hours per member's annual IPP year.
- May be provided concurrently with Service Coordination, Therapeutic Consultant, BSP Transportation and up to 2 hours of LPN nursing services per day.
- Person-Centered Supports, Facility-Based Day Habilitation, LPN when provided more than 2 hours a day, Respite and Supported Employment services may not be provided concurrently with this service.
- This service is not intended for use as emergency response for ongoing behavioral challenges.
- The agency staff to member ratio is 2:1.
- Agency staff providing Crisis services may not be an individual who lives in the member's own or family residence.

Limitations/Caps:
New Policy:

- The amount of service is limited by the member's individualized budget.
- The annual budget allocation may be adjusted (increased or decreased) only if changes have occurred regarding the member's assessed needs.
- 336 units/336 hours per member's annual IPP year.
- May be provided concurrently with Service Coordination, Therapeutic Consultant, BSP Transportation and up to 2 hours of LPN nursing or RN nursing services per day.
- Person-Centered Supports, Facility-Based Day Habilitation, LPN when provided more than 2 hours a day, Respite and Supported Employment services may not be provided concurrently with this service.
- This service is not intended for use as emergency response for ongoing behavioral challenges.
- The agency staff to member ratio is 2:1.

- Agency staff providing Crisis services may not be an individual who lives in the member's own or family residence.

513.9.1.5.1 Environmental Accessibility Adaptations: Home: Traditional Option, Limitations/Caps:

Old Policy:

- The amount of service is limited by the member's individualized budget.
- The annual budget allocation may be adjusted (increased or decreased) only if changes have occurred regarding the member's assessed needs.
- EAA-Home is not intended to replace the member's, member's family or landlord's responsibility for routine maintenance and upkeep of the home. These include but are not limited to cleaning, painting, repair/replacement of roof, windows or flooring, structural repairs, air conditioning and heating, plumbing and electrical maintenance, fences, security systems, adaptations that add to the square footage of the home except when necessary to complete an approved adaptation. (e.g., in order to improve entrance/egress to a residence or to configure a bathroom to accommodate a wheelchair). Computers, communication devices, palm pilots, and other technologies are not considered eligible for this service.
- Adaptations made to rental residences must be portable.
- $1000 available per member's annual IPP year in combination with Environmental Accessibility Adaptations - Vehicle and/or Participant-Directed Goods and Services.

New Policy:

- The amount of service is limited by the member's individualized budget.
- The annual budget allocation may be adjusted (increased or decreased) only if changes have occurred regarding the member's assessed needs.
- EAA-Home is not intended to replace the member's, member's family or landlord's responsibility for routine maintenance and upkeep of the home. These include but are not limited to cleaning, painting, repair/replacement of roof, windows or flooring, structural repairs, air conditioning and heating, plumbing and electrical maintenance, fences, security systems, adaptations that add to the square footage of the home except when necessary to complete an approved adaptation. (e.g., in order to improve entrance/egress to a residence or to configure a bathroom to accommodate a wheelchair). Computers, communication devices, palm pilots, and other technologies are not considered eligible for this service.
- Adaptations made to rental residences must be portable.
- $1000 available per member's annual IPP year in combination with Environmental Accessibility Adaptations - Vehicle and/or Participant-Directed Goods and Services.

- The service coordination agency must not pay EAA funds to the member, staff, or family/legal representative. Payment for cost of services must be issued to the vendor of the EAA service.

513.9.1.5.2 Environmental Accessibility Adaptations: Vehicle: Traditional Option, Limitations/Caps:

Old Policy:

- The amount of service is limited by the member's individualized budget.
- The annual budget allocation may be adjusted (increased or decreased) only if changes have occurred regarding the member's assessed needs.
- $1000 available per member's annual IPP year in combination with Environmentally Accessibility Adaptations - Home and/or Participant-Directed Goods and Services.
- Adaptations or improvements to the vehicle that are of general utility, and are not of direct medical or remedial benefit to the individual.
- This service may not be used to purchase or lease a vehicle.
- This service may not be used for regularly scheduled upkeep, maintenance and repairs of a vehicle except upkeep and maintenance of the modifications.

New Policy:

- The amount of service is limited by the member's individualized budget.
- The annual budget allocation may be adjusted (increased or decreased) only if changes have occurred regarding the member's assessed needs.
- $1000 available per member's annual IPP year in combination with Environmentally Accessibility Adaptations - Home and/or Participant-Directed Goods and Services.
- Adaptations or improvements to the vehicle that are of general utility, and are not of direct medical or remedial benefit to the individual.
- This service may not be used to purchase or lease a vehicle.
- This service may not be used for regularly scheduled upkeep, maintenance and repairs of a vehicle except upkeep and maintenance of the modifications.
- The service coordination agency must not pay EAA funds to the member, staff, or family/legal representative. Payment for cost of services must be issued to the vendor of the EAA service.

513.9.1.6 Facility-Based Day Habilitation: Traditional Option

Definition of Service:
Old Policy:
Facility-Based Day Habilitation is a structured program that use meaningful and productive activities designed to promote the acquisition of skills or maintenance of skills for the member outside the residential home. The services must be based on assessment, be person-

centered/goal oriented, and be meaningful/productive activities that are guided by the member's strengths, needs, wishes, desires, and goals.

Facility-Based Day Habilitation activities in the plan must be developed exclusively to address the habilitation and support needs of the member. Activities must consist of programs of instruction/training, supervision and assistance, specialist services and evaluations provided by or under the direct supervision of a Therapeutic Consultant or BSP (if applicable).

Facility-Based Day Habilitation activities must be based at the licensed site, but the member may access community services and activities from the licensed site.

Meals provided as part of this service shall not constitute a full nutritional regimen of 3 meals per day.

Facility-Based Day Habilitation Program services include, but are not limited to:

- Development of self-care skills;
- Use of community services and businesses;
- Emergency skills training;
- Mobility skills training;
- Nutritional skills training;
- Social skills training;
- Communication and speech instruction (prescribed by a Speech Language Pathologist ;)
- Therapy objectives (prescribed by Physical Therapist, Occupational Therapist, etc.)
- Interpersonal skills instruction;
- Functional academic training such as recognizing emergency and other public signs, independent money management skills, etc.
- Citizenship, rights and responsibilities, self-advocacy, voting training;
- Self-administration of medication training;
- Independent living skills training;
- Training the individual to follow directions and carry out assigned duties;
- Assistance to acquire appropriate attitudes and work habits, such as socially appropriate behaviors on the work site;
- Assistance to adjust to the production and performance standards of the workplace;
- Compliance training in workplace rules or procedures;
- Compliance with attendance to work activity training;
- Assistance with workplace problem solving; and
- Instruction in the appropriate use of work-related facilities (e.g., rest rooms, cafeteria/lunch rooms, and break areas.).

Facility-based Day Habilitation staff may attend and participate in IDT meetings and the annual functional assessment for eligibility conducted by the ASO and IDT meetings if requested by the member or their legal representative.

New Policy:
Facility-Based Day Habilitation is a structured program that use meaningful and productive activities designed to promote the acquisition of skills or maintenance of skills for the member outside the residential home. The services must be provided by awake and alert staff and based on assessment, be person-centered/goal oriented, and be meaningful/productive activities that are guided by the member's strengths, needs, wishes, desires, and goals.

Facility-Based Day Habilitation activities in the plan must be developed exclusively to address the habilitation and support needs of the member. Activities must consist of programs of instruction/training, supervision and assistance, specialist services and evaluations provided by or under the direct supervision of a Therapeutic Consultant or BSP (if applicable).

Facility-Based Day Habilitation activities must be based at the licensed site, but the member may access community services and activities from the licensed site.

Meals provided as part of this service shall not constitute a full nutritional regimen of 3 meals per day.

Facility-Based Day Habilitation Program services include, but are not limited to:

- Development of self-care skills;
- Use of community services and businesses;
- Emergency skills training;
- Mobility skills training;
- Nutritional skills training;
- Social skills training;
- Communication and speech instruction (prescribed by a Speech Language Pathologist ;)
- Therapy objectives (prescribed by Physical Therapist, Occupational Therapist, etc.)
- Interpersonal skills instruction;
- Functional academic training such as recognizing emergency and other public signs, independent money management skills, etc.
- Citizenship, rights and responsibilities, self-advocacy, voting training;
- Self-administration of medication training;
- Independent living skills training;
- Training the individual to follow directions and carry out assigned duties;
- Assistance to acquire appropriate attitudes and work habits, such as socially appropriate behaviors on the work site;
- Assistance to adjust to the production and performance standards of the workplace;
- Compliance training in workplace rules or procedures;
- Compliance with attendance to work activity training;
- Assistance with workplace problem solving; and
- Instruction in the appropriate use of work-related facilities (e.g., rest rooms, cafeteria/lunch rooms, and break areas).

- Facility-based Day Habilitation staff may attend and participate in IDT meetings and the annual functional assessment for eligibility conducted by the ASO and IDT meetings if requested by the member or their legal representative.

Limitations/Caps
Old Policy:

- The amount of service is limited by the member's individualized budget.
- The annual budget allocation may be adjusted (increased or decreased) only if changes have occurred regarding the member's assessed needs.
- The maximum annual units of Facility-Based Day Habilitation cannot exceed 6.240 units/1560 hours (Average 6 hours/day) per member's IPP year. When the member accesses other direct care services, these units are counted toward the daily cap of all direct care services listed in the Person-Centered Supports sections in the Traditional Option., excluding Respite.
- This service may not be billed concurrently with any other direct care services.
- Up to 48 units/12hours of Facility Day Habilitation services every 3 months per member may be billed, if necessary, for the purpose of training in member-specific instruction (i.e. behavioral intervention plans, medical plans of care, specific instructional activities, etc.) and/or service objectives. Only TCs, BSPs or Registered Nurses (RN) may bill for providing training to facility-based day habilitation staff.
- Agency staff to member ratios for this service are 1:1-2, 1:3-4, and 1:5-6.
- Agency staff providing Facility-Based Day Habilitation services may not be an individual who lives in the member's home.

New Policy:

- The amount of service is limited by the member's individualized budget.
- The annual budget allocation may be adjusted (increased or decreased) only if changes have occurred regarding the member's assessed needs.
- The maximum annual units of Facility-Based Day Habilitation cannot exceed 6.240 units/1560 hours (Average 6 hours/day) per member's IPP year. When the member accesses other direct care services, these units are counted toward the daily cap of all direct care services listed in the Person-Centered Supports sections in the Traditional Option., excluding Respite.
- This service may not be billed concurrently with any other direct care services.
- Up to 48 units/12hours of Facility Day Habilitation services every 3 months per member may be billed, if necessary, for the purpose of training in member-specific instruction (i.e. behavioral intervention plans, medical plans of care, specific instructional activities, etc.) and/or service objectives. Only TCs, BSPs or Registered Nurses (RN) may bill for providing training to facility-based day habilitation staff.
- Agency staff to member ratios for this service are 1:1-2, 1:3-4, and 1:5-6.

- Agency staff providing Facility-Based Day Habilitation services may not be an individual who lives in the member's home.
- Only members 18 years of age and over may access this service.

513.9.1.8.1 Person-Centered Support: Agency: Traditional Option

Definition of Service:
Old Policy:
Person-Centered Support (PCS) services consist of individually tailored training and/or support activities that enable the member to live and inclusively participate in the community in which the member resides, works, receives their education, accesses health care, and engages in social and recreational activities. The activities and environments are designed to increase the acquisition of skills and appropriate behavior that are necessary for the member to have greater independence, personal choice and allow for maximum inclusion into their community.

PCS services may be used to assist with the acquisition, retention and/or improvement of the following areas of functionality:

- Self-care;
- Receptive or expressive language;
- Learning;
- Mobility;
- Self-direction; and
- Capacity for Independent Living

Agency staff administering medications per the AMAP program must meet all requirements for that program which include having a high school diploma or the equivalent General Education Development (GED).

PCS services may include member specific training. Attendance and participation in IDT meetings and the annual functional assessment for eligibility conducted by the ASO is permitted if requested by the member or their legal representative.

Definition of Service:
New Policy:
Person-Centered Support (PCS) provided by awake and alert staff services consist of individually tailored training and/or support activities that enable the member to live and inclusively participate in the community in which the member resides, works, receives their education, accesses health care, and engages in social and recreational activities. The activities and environments are designed to increase the acquisition of skills and appropriate behavior that are necessary for the member to have greater independence, personal choice and allow for maximum inclusion into their community.

PCS services may be used to assist with the acquisition, retention and/or improvement of the following areas of functionality:

- Self-care;
- Receptive or expressive language;
- Learning;
- Mobility;
- Self-direction; and
- Capacity for Independent Living

Agency staff administering medications per the AMAP program must meet all requirements for that program which include having a high school diploma or the equivalent General Education Development (GED).

PCS services may include member specific training. Attendance and participation in IDT meetings and the annual functional assessment for eligibility conducted by the ASO is permitted if requested by the member or their legal representative.

PCS staff may compile data collected in daily documentation during their shift for later review by the member's TC or BSP, as long as safety/health and oversight of member are not compromised.

Limitations/Caps:
Old Policy:

- The amount of service is limited by the member's individualized budget.
- The annual budget allocation may be adjusted (increased or decreased) only if changes have occurred regarding the member's assessed needs.
- PCS: Agency services cannot replace the routine care, and supervision which is expected to be provided by a parent of a minor child or a Specialized Family Care Provider who provides care for a minor child. The IDT must make every effort to meet the member's assessed needs through natural supports.
- PCS: Agency may not substitute for federally mandated educational services.
- Agency staff providing PCS: Agency services may not be any individual who lives in the member's home.
- Up to 48 units/12hours of PCS: Agency services every 3 months per member may be billed, if necessary, for the purpose of training in member-specific instruction (i.e. behavioral intervention plans, medical plans of care, specific instructional activities, etc.) and/or service objectives. Only TCs, BSPs and RNs may bill for providing training to PCS staff.
- The agency staff to member ratio codes for this service are 1:1, 1:2, 1:3 and 1:4.
- 1:1 and 1:2 are the only codes available in the member's family residence and in Specialized Family Care Homes.
- This service may not be billed concurrently with any other direct care service.

- 11,680 units/2920 hours (based upon average of 8 hours per day) per member's annual IPP year for natural family/Specialized Family Care home settings for members eligible to receive public education services. This is in combination with all direct care services available under the Traditional Option excluding Respite.
- 17,520 units/4380 hours (based upon average of 12 hours per day) per member's annual IPP year for natural family/Specialized Family Care home settings for members not eligible to receive public education services. This is in combination with all direct care services available under the Traditional Option excluding Respite.
- 35,040 units/8760 hours annually (based upon an average of 24 hours per day) per member's annual IPP year for members in ISS and licensed settings. This is in combination with all direct care services available under the Traditional Option.

PCS: Agency is not available while the member is hospitalized in a Medicaid certified hospital except when the behavioral needs of the member arise due to the temporary to change in environment.

PCS: Agency is not available in nursing homes, psychiatric hospitals or rehabilitative facilities located either within or outside of a medical hospital.

Limitations/Caps:
New Policy:

- The amount of service is limited by the member's individualized budget.
- The annual budget allocation may be adjusted (increased or decreased) only if changes have occurred regarding the member's assessed needs.
- PCS: Agency services cannot replace the routine care, and supervision which is expected to be provided by a parent of a minor child or a Specialized Family Care Provider who provides care for a minor child. The IDT must make every effort to meet the member's assessed needs through natural supports.
- PCS: Agency may not substitute for federally mandated educational services.
- Agency staff providing PCS: Agency services may not be any individual who lives in the member's home.
- Up to 48 units/12hours of PCS: Agency services every 3 months per member may be billed, if necessary, for the purpose of training in member-specific instruction (i.e. behavioral intervention plans, medical plans of care, specific instructional activities, etc.) and/or service objectives. Only TCs, BSPs and RNs may bill for providing training to PCS staff.
- The agency staff to member ratio codes for this service are 1:1, 1:2, 1:3 and 1:4.
- 1:1 and 1:2 are the only codes available in the member's family residence and in Specialized Family Care Homes.
- This service may not be billed concurrently with any other direct care service.
- 11,680 units/2920 hours (based upon average of 8 hours per day) per member's annual IPP year for natural family/Specialized Family Care home settings for members eligible

to receive public education services. This is in combination with all direct care services available: PCS: Agency, PCS: Family, Supported Employment, Facility-Based Day Habilitation and LPN (When LPN units exceed 2,920), PCS: Agency with Choice and PCS: Personal Options excluding Traditional Respite, AwC Respite and *Personal Options* Respite.

- 17,520 units/4380 hours (based upon average of 12 hours per day) per member's annual IPP year for natural family/Specialized Family Care home settings for members not eligible to receive public education services. This is in combination with all direct care services available: PCS: Agency, PCS: Family, Supported Employment, Facility-Based Day Habilitation and LPN (When LPN units exceed 2,920), PCS: Agency with Choice and PCS: Personal Options excluding Traditional Respite, AwC Respite and *Personal Options* Respite.
- 35,712 units/8928 hours annually (based upon an average of 24 hours per day) per member's annual IPP year for members in ISS and licensed settings, to include training. This is in combination with all direct care services available: PCS: Agency, PCS: Family, Supported Employment, Facility-Based Day Habilitation and LPN (when LPN units exceed 2,920 units), PCS: Agency with Choice and PCS: Personal Options.
- PCS: Agency is not available while the member is hospitalized in a Medicaid certified hospital except when the behavioral needs of the member arise due to the temporary to change in environment.
- PCS: Agency is not available in nursing homes, psychiatric hospitals or rehabilitative facilities located either within or outside of a medical hospital.

513.9.1.8.2 Person-Centered Support: Family: Traditional Option

Definition of Service
Old Policy:
Person-Centered Support (PCS): Family consists of individually tailored training and/or support activities that enable the member to live and inclusively participate in the community in which the member resides, works, receives their education, accesses health care, and engages in social and recreational activities. The activities and environments are designed to increase the acquisition of skills and appropriate behavior that are necessary for the member to have greater independence, personal choice and allow for maximum inclusion into their community. PCS: Family may be used to assist with the acquisition, retention and/or improvement of the following areas of functionality:

- Self-care;
- Receptive or expressive language;
- Learning;
- Mobility;
- Self-direction; and
- Capacity for Independent Living

PCS: Family services must be assessment based and outlined on the member's IPP. Activities must allow the member to reside and participate in the most integrated setting appropriate to their needs.

PCS: Family services may include member specific training, attendance and participation in IDT meetings and the annual functional assessment for eligibility conducted by the ASO.

Agency Staff providing PCS: Family must be a family member living in the member's home or a certified Specialized Family Care Provider providing this service in a certified Specialized Family Care Home. PCS: Family may not be provided to a member by the member's spouse.

PCS: Family is not available while the member is hospitalized in a Medicaid certified hospital except when the behavioral needs of the member arise due to the temporary to change in environment.

PCS: Family is not available in nursing homes, psychiatric hospitals or rehabilitative facilities located either within or outside of a medical hospital.

513.9.1.10.1 Respite: Agency: Traditional Option

Definition of Service
Old Policy:
Respite: Agency services are specifically designed to provide temporary substitute care normally provided by a family member or a Specialized Family Care Provider. The services are to be used for relief of the primary care-giver(s) to help prevent the breakdown of the primary care-giver(s) due to the physical burden and emotional stress of providing continuous support and care to the dependent member. Respite Services consist of temporary care services for an individual who cannot provide for all of their own needs.

Respite Agency services may be used to:

- Allow the primary care-giver to have planned time from the caretaker role;
- Provide assistance to the primary care-giver in crisis and emergency situations; and

- Ensure the physical and/or emotional well-being of the primary care-giver by temporarily relieving them of the responsibility of providing care.

Agency staff providing Respite: Agency services may attend and participate in IDT meetings and the annual functional assessment for eligibility conducted by ASO if requested by the member or their legal representative.

- Ensure the physical and/or emotional well-being of the primary care-giver by temporarily relieving them of the responsibility of providing care.
- Support the member while the primary care-giver works outside the home.

Agency staff providing Respite: Agency services may attend and participate in IDT meetings and the annual functional assessment for eligibility conducted by ASO if requested by the member or their legal representative.

Respite Agency staff may compile data collected in daily documentation during their shift for later review by the member's TC or BSP, as long as safety/health and oversight of member are not compromised.

Limitations/Caps:
Old Policy:
- The amount of service is limited by the member's individualized budget.
- The annual budget allocation may be adjusted (increased or decreased) only if changes have occurred regarding the member's assessed needs.
- Respite: Agency services are not available to members living in ISS or licensed group home settings.
- Respite: Agency services are not to replace natural supports available to the member to include non-custodial parent;

- Respite: Agency services may not be provided by an individual living in the member's own or family residence in which the member resides or within the Specialized Family Care Home where the member resides.
- Respite: Agency is not available in medical hospitals, nursing homes, psychiatric hospitals or rehabilitative facilities located either within or outside of a medical hospital.
- Up to 48 units/12hours of Respite services every 3 months per member may be billed, if necessary, for the purpose of training in member-specific instruction (i.e. behavioral intervention plans, medical plans of care, specific instructional activities, etc.) and/or service objectives. Only TCs, BSPs or RNs may bill for providing training to staff providing Respite: Agency Services.
- Respite: Agency Services may not be provided in an ICF/MR facility,
- 6,912 units/1,728 hours per year (averages out to 144 hours/month or 4.73 hours/day) per member's annual IPP year.
- This service may not be billed concurrently with any other direct care service.
- Agency staff to member ratios for this service are 1:1, 1:2, and 1:3.
- Only 1:1 or 1:2 ratios are allowed to be utilized in a member's family residence or in a Specialized Family Care Home.

Limitations/Caps:
New Policy:

- The amount of service is limited by the member's individualized budget.
- The annual budget allocation may be adjusted (increased or decreased) only if changes have occurred regarding the member's assessed needs.
- Respite: Agency services are not available to members living in ISS or licensed group home settings.

Only TCs, BSPs or RNs may bill for providing training to staff providing Respite: Agency Services.
- Respite: Agency Services may not be provided in an ICF/IID facility,
- 6,912 units/1,728 hours per year (averages out to 144 hours/month or 4.73 hours/day) per member's annual IPP year. This is in combination with all other respite services:

Traditional Respite, Traditional Crisis Site Respite, AwC Respite and *Personal Options* Respite.

- This service may not be billed concurrently with any other direct care service.
- Agency staff to member ratios for this service are 1:1, 1:2, and 1:3.
- Only 1:1 or 1:2 ratios are allowed to be utilized in a member's family residence or in a Specialized Family Care Home.

513.9.1.10.2 Respite: Crisis Site: Traditional Option

Definition of Service:
Old Policy:
Respite: Crisis Site Services are specifically designed to provide temporary substitute care for an individual who is in need of an alternative residential setting due to behavioral needs or lack of supports. Training programs on the member's IPP may be provided by respite direct care staff.

The services are to be utilized only in licensed crisis sites and used on a short-term basis not to exceed a maximum stay of 30 days per admission without prior authorization from the ASO.

Respite: Crisis Site services usually occur after a critical juncture in treatment and must be approved by the IDT. If Respite: Crisis Site services are utilized due to a member's emergent need there must be a plan to transition the member back into the community developed at the time of admission by the service coordinator and the length of stay in the Crisis Respite site may not exceed 30 days per admission,

Service Coordinators must review the Crisis Respite Directory on the BHHF website and call the contact person listed in the directory or follow after-hours procedures available at on the Bureau for Behavioral Health and Health facilities website: www.wvdhhr.org/bhhf.

The referral packet to the Respite: Crisis Site must include the IPP that identifies the services to be provided and assessments as appropriate.

513.9.1.11 Service Coordination: Traditional Option, Definition of Service

Old Policy:
Service Coordination services establish, along with the member, a life-long, person-centered, goal-oriented process for coordinating the supports (both natural and paid), range of services, instruction and assistance needed by persons with developmental disabilities. It is designed to ensure accessibility, accountability and continuity of support and services. This service also ensures that the maximum potential and productivity of a member is utilized in making meaningful choices with regard to their life and their inclusion in the community.

Once the member/legal representative has chosen a Service Coordination provider from the available I/DD Waiver providers, the agency assigns a Service Coordinator to the member. The member/legal representative may request the assignment of a specific Service Coordinator (SC) and when possible the agency honors the request. The member/legal representative may choose to transfer to a different SC provider at any time and for any reason.

The Service Coordinator must, at a minimum, perform the following activities listed below.

- Assist the member and/or legal representative with re-determination of financial eligibility as required at the DHHR office in the county where the member lives.
- Verify financial eligibility during monthly home visits.
- Begin the discharge process and provide linkage to services appropriate to the level of need when a member is found to be ineligible for I/DD Waiver Services during annual eligibility or financial redetermination.
- Provide oral and written information about the I/DD Waiver provider agency's rights and grievance procedures for members served by the agency.
- Assist with procurement of all services that are appropriate and necessary for each member within and beyond the scope of the I/DD Waiver Program.
- Inform families or custodians of children less than 3 years of age about the availability of Birth to Three Services.
- Act as an advocate for the member. The I/DD Waiver Program must not be substituted for entitlement programs funded under other Federal public laws such as Special Education under P.L.99-457 or 101-476 and rehabilitation services as stipulated under Section 110 of the Rehabilitation Act of 1973. (Public schools can currently bill for

specific medical services under their own Medicaid provider numbers). Therefore, it is necessary for the Service Coordinator to advocate with these systems to obtain the required and appropriate services.

- Provide education, linkage and referral to community resources,
- Promote a valuable and meaningful social role for the member in the community while recognizing the member's unique cultural and personal value system.
- Interface with the ASO on behalf of the member in regard to the assessment process, purchase of services and budget process. Activities may include linkage, negotiation of services, submission of information, coordination of choice of appropriate assessment respondents on behalf of the member, education and coordination of the most appropriate assessment setting that best meets the member's needs.
- Communicate with other service providers on the IDT to allow for continuity of services and payment of services.
- Coordinate necessary evaluations to be utilized as a basis of need and recommendation for services in the development of the IPP.
- Notify IDT members 30 days in advance of meeting.
- Support the member as necessary to convene and conduct IDT meetings.
- Coordinate the development of IPPs at least annually. The IPP must be reviewed and approved by the IDT at least every 90 days unless otherwise specified in the plan, but shall not exceed 180 days.
- Access the necessary resources detailed in the IPP, make referrals to qualified service providers and resources, and monitor that service providers implement the instructional, behavioral and service objectives of the IPP.
- Disseminate copies of the IPP to the IDT members and Participant-Directed service Option providers (if applicable) within 14 days of the IDT meeting.
- Monitor to ensure that the member's health and safety needs are addressed.
- Comply with reporting requirements of the WV IMS for members on their caseload.
- Personally meet monthly with the member and their paid or natural supports who are present with the member the time of the visit at the member's residence to verify that services are being delivered in a safe environment, in accordance with the IPP and appropriately documented and that the member continues to be financially eligible. The purpose of these visits is to determine progress toward obtaining services and resources, assess achievement of training objectives, and identification of unmet needs. The visit is documented on the Service Coordinator Home/Day Visit Form (WV-BMS-I/DD-03).
- Personally meet at least every other month with the member and their support staff at the member's facility-based day program (if applicable). The purpose of these visits is to determine progress toward obtaining services and resources, assess achievement of training objectives, and identification of unmet needs. The visit is documented on the Service Coordinator Home/Day Visit Form (WV-BMS-I/DD-03).
- Provide planning and coordination before, during and after crises, including notifying the ASO if a member is admitted to a crisis site or state institution.

- Process Freedom of Choice forms (WV-BMS-I/DD-2) in the CareConnection® within 2 business days any time a member requests a change of service delivery options.
- Coordinate Transfer/Discharge meetings to ensure the linkage to a new service provider or service delivery option and access to services when transferring services from 1 provider agency to another or to another type of service delivery option. Coordination efforts must continue until the transfer of services is finalized.
- Travel as necessary to complete Service Coordination activities related to the IPP.
- Provide information and assistance regarding participant-directed services options during annual IPP meetings and upon request by the member or legal representative.
- Inform the member of their rights at least annually.
- Attend and participate in the annual functional assessment for eligibility conducted by ASO.
- Present member's proposed restrictive measures to the I/DD Waiver provider agency's Human Rights Committee (HRC) if no other professional is presenting the same information.
- Monitor any restrictive measures approved by the HRC to ensure the measures are implemented properly and reviewed at least annually by the HRC and by the IDT at every IDT meeting.

New Policy:
Service Coordination services establish, along with the member, a life-long, person-centered, goal-oriented process for coordinating the supports (both natural and paid), range of services, instruction and assistance needed by persons with developmental disabilities. It is designed to ensure accessibility, accountability and continuity of support and services. This service also ensures that the maximum potential and productivity of a member is utilized in making meaningful choices with regard to their life and their inclusion in the community.

- Access the necessary resources detailed in the IPP, make referrals to qualified service providers and resources, and monitor that service providers implement the instructional, behavioral and service objectives of the IPP.
- Disseminate copies of all IPPs to the IDT members and Participant-Directed service Option providers (if applicable) within 14 days of the IDT meeting.
- Upload the ISP, the Demographic/cover sheet and signature page into the CareConnection® within 14 days of the IDT meeting.
- Upload into the CareConnection® any additional documentation requested by BMS or the ASO.
- Disseminate copies of the budget sheet from the I/DD Waiver CareConnection® website, once finalized.
- Monitor to ensure that the member's health and safety needs are addressed.
- Comply with reporting requirements of the WV IMS for members on their caseload.

- Personally meet monthly with the member and their paid or natural supports who are present with the member the time of the visit at the member's residence to verify that services are being delivered in a safe environment, in accordance with the IPP and appropriately documented and that the member continues to be financially eligible. The purpose of these visits is to determine progress toward obtaining services and resources, assess achievement of training objectives, and identification of unmet needs. The visit is documented on the Service Coordinator Home/Day Visit Form (WV-BMS-I/DD-03).
- Personally meet at least every other month with the member and their support staff at the member's facility-based day program (if applicable). The purpose of these visits is to determine progress toward obtaining services and resources, assess achievement of training objectives, and identification of unmet needs. The visit is documented on the Service Coordinator Home/Day Visit Form (WV-BMS-I/DD-03).
- Provide planning and coordination before, during and after crises, including notifying the ASO if a member is admitted to a crisis site or state institution.
- Process Freedom of Choice forms (WV-BMS-I/DD-2) in the CareConnection® within 2 business days any time a member requests a change of service delivery options.
- Coordinate Transfer/Discharge meetings to ensure the linkage to a new service provider or service delivery option and access to services when transferring services from 1provider agency to another or to another type of service delivery option. Coordination efforts must continue until the transfer of services is finalized.
- Travel as necessary to complete Service Coordination activities related to the IPP.
- Provide information and assistance regarding participant-directed services options during annual IPP meetings and upon request by the member or legal representative.
- Inform the member of their rights at least annually.
- Attend and participate in the annual functional assessment for eligibility conducted by ASO.
- Present member's proposed restrictive measures to the I/DD Waiver provider agency's Human Rights Committee (HRC) if no other professional is presenting the same information.
- Monitor any restrictive measures approved by the HRC to ensure the measures are implemented properly and reviewed at least annually by the HRC and by the IDT at every IDT meeting.
- May bill for attendance of and contribution to Futures Planning sessions, including PATHs and MAPs.

513.9.1.12.1 Skilled Nursing: Licensed Practical Nurse: Traditional Option

Definition of Service:
Old Policy:
Nursing services listed in the service plan are within the scope of West Virginia's Nurse Practice Act, ordered by a physician and are provided by a LPN under the supervision and monitoring of a RN actively licensed to practice in the State. Nursing services that must be provided by a LPN

include but are not limited to: (Note: If these services are provided by an RN then the LPN code must be billed for reimbursement)

- Routine monitoring (data collection) of specific medical symptoms such as seizures, bowel habits, blood pressure, diet and exercise;
- Verifying and documenting physician orders if only RNs or LPNs are administering medication (no AMAPS are administering medications);
- Reviewing and verifying physician orders are current, properly documented and communicated to direct care staff and others per I/DD Waiver provider policy;
- Direct nursing care including medication/treatment administration;
- Review of Medication Administration Records (MARs), medication storage and documentation (when no AMAPs are administering medication);
- Review scheduled medical appointments before occurrence and communicate this information to others per I/DD Waiver provider policy;
- Facilitate procurement of and monitoring of medical equipment;
- Keep emergency contact information updated and accurate;
- Bill for travel time between ISS, licensed group home and licensed day program settings for the purpose of passing medications.

If a member requires more than 2 hours per day of LPN service, the Request for Nursing Service (WV-BMS-I/DD-09) must be submitted to the ASO for prior authorization.

If the member receives 2 or more hours of skilled nursing services per day, then the LPN is responsible for providing direct care supports and training.

In ISS or licensed group homes, the total number of service units may exceed 24 hours per day when the LPN also passes medication.

The LPN may attend and participate in IDT meetings and the annual assessment of functioning for eligibility conducted by ASO at the request of the member or their legal representative.

Definition of Service:
New Policy:
Nursing services listed in the service plan are within the scope of West Virginia's Nurse Practice Act, ordered by a physician and are provided by a LPN under the supervision and monitoring of a RN actively licensed to practice in the State. Nursing services that must be provided by an awake and alert LPN include but are not limited to: (Note: If these services are provided by an RN then the LPN code must be billed for reimbursement)

- Routine monitoring (data collection) of specific medical symptoms such as seizures, bowel habits, blood pressure, diet and exercise;
- Verifying and documenting physician orders if only RNs or LPNs are administering medication (no AMAPS are administering medications);

- Reviewing and verifying physician orders are current, properly documented and communicated to direct care staff and others per I/DD Waiver provider policy;
- Direct nursing care including medication/treatment administration;
- Review of Medication Administration Records (MARs), medication storage and documentation (when no AMAPs are administering medication);
- Review scheduled medical appointments before occurrence and communicate this information to others per I/DD Waiver provider policy;
- Facilitate procurement of and monitoring of medical equipment;
- Keep emergency contact information updated and accurate;
- Bill for travel time between ISS, licensed group home and licensed day program settings for the purpose of passing medications.
- Train members on individualized medical and health needs, such as wound-care, medically necessary diets, etc.

If a member requires more than 2 hours per day of LPN service, the Request for Nursing Service (WV-BMS-I/DD-09) must be submitted to the ASO for prior authorization.

If the member receives 2 or more hours of skilled nursing services per day, then the LPN is responsible for providing direct care supports and training.

In ISS or licensed group homes, the total number of service units may exceed 24 hours per day when the LPN also passes medication.

The LPN may attend and participate in IDT meetings and the annual assessment of functioning for eligibility conducted by ASO at the request of the member or their legal representative.

In a 3-person home which requires a nurse 24 hours/day, staff may bill LPN 1:3, with no other staff 24 hours/day –or- bill LPN 1:1 plus an additional staff person billing direct supports 1:2. With this option, each member in the home could be considered for authorization for up to 8 hours of LPN 1:1 per day. If the LPN is working with a particular member (such as medication administration) he/she would bill LPN 1:1.

If an LPN is traveling to pass medications at an ISS, licensed group home or licensed facility-based day program, the LPN should bill 1:1 for 1 member during travel time. The time should be disseminated equally among all members receiving medication administration (i.e. bill for member A on day 1, bill for member B on day 2, etc.) so that the travel billing is fairly distributed across member purchase requests and will not disproportionately use 1 member's individualized budget over another's.

Limitations/Caps:
Old Policy:

- The amount of service is limited by the member's individualized budget.

- The annual budget allocation may be adjusted (increased or decreased) only if changes have occurred regarding the member's assessed needs.
- The maximum annual units of LPN services cannot exceed 11,680 units/2920 hours (Average 8 hours/day) per member's annual IPP year. When the member accesses other direct care services, these units are counted toward the cap listed in the Person-Centered Supports sections in the Traditional Option, excluding Respite
- This service may not be billed concurrently with any other direct care services.
- Agency staff to member ratio codes are 1:1, 1:2 and 1:3.
- Agency staff providing Skilled Nursing LPN services may not be an individual who lives in the member's home.
- LPN services may not be billed for completing administrative activities including these listed below.
    - Attempting phone calls when the line is busy or leaving a message.
    - Nursing assessments required by the I/DD Waiver provider but not the I/DD Waiver manual.
    - Waiting at a physician's office.
    - Conducting group training on general medical topics.
    - Orientation training that is not member-specific.
    - Reviewing incident reports.

Limitations/Caps:
New Policy:

- The amount of service is limited by the member's individualized budget.
- The annual budget allocation may be adjusted (increased or decreased) only if changes have occurred regarding the member's assessed needs.
- The maximum annual units of LPN services cannot exceed 11,680 units/2920 hours (Average 8 hours/day) per member's annual IPP year or the monetary equivalent of 8 hours of 1:1 LPN service when alternate LPN service ratios are used.
- When the member accesses other direct care services, any LPN units in excess of 2920 are counted toward the cap listed in the Person-Centered Supports sections in the Traditional Option, excluding Respite
- This service may not be billed concurrently with any other direct care services.
- Agency staff to member ratio codes are 1:1, 1:2 and 1:3.
- Agency staff providing Skilled Nursing LPN services may not be an individual who lives in the member's home.
- LPN services may not be billed for completing administrative activities including these listed below.
    - Attempting phone calls when the line is busy or leaving a message.
    - Nursing assessments required by the I/DD Waiver provider but not the I/DD Waiver manual.
    - Waiting at a physician's office.
    - Conducting group training on general medical topics.

- Orientation training that is not member-specific.
- Reviewing incident reports.

513.9.1.12.1.2 Skilled Nursing: Licensed Registered Nurse: Traditional Option, Definition of Service

Old Policy:
RN Skilled Nursing services listed in the service plan are within the scope of the West Virginia Nurse Practice Act, ordered by a physician and are provided by a licensed RN licensed to practice in the State. RN Skilled Nursing services are services which only a licensed RN can perform. The service must be provided by a RN under the direction of a physician. The RN may perform clinical supervision of LPN and AMAP staff.

RN Skilled Nursing Services are restricted to those nursing services that are outside the scope and practice of a LPN. If the RN provides a Skilled Nursing service that is within the scope of practice for a LPN, the RN must utilize the LPN code.

The RN may also bill for training of staff in the member's home, ISS, licensed group and licensed day program settings on the member's specific medical needs and related interventions as recommended by the member's treatment team.

The RN may travel between ISS, licensed group home and licensed facility day program settings in order to pass medications.

The RN may attend and participate in the IPP and the annual assessment of functioning for eligibility conducted by ASO based upon the member or their legal representative's request.

Direct care services provided by the RN must be billed utilizing the appropriate direct care service code.

The RN may attend and participate in the IPP and the annual assessment of functioning for eligibility conducted by ASO based upon the member or their legal representative's request.

Direct care services provided by the RN must be billed utilizing the appropriate direct care service code.

The RN may bill to complete assessments if a member's medical needs warrant an individualized assessment.

The RN must complete a summary of services provided if necessitated by a change in the member's medical needs, such as Emergency Room visits, medication changes, diagnostic changes, new treatments recommended by physician, etc.

The RN may bill to consult with LPNs who are providing direct care when an urgent, member-specific medical need arises.

513.9.1.12.2.1 Skilled Nursing: Licensed Registered Nurse: Individual Program Planning: Traditional Option, Definition of Service

Old Policy:
This is a service that allows the RN to attend a member's IDT meeting to present assessments or evaluations completed for the purpose of integrating recommendations, training goals and intervention strategies into the member's IPP.

Individual Program Planning is the process by which the member and their IDT develop a plan based on a person-centered philosophy. The RN participates in the IDT meeting for the purpose of review of assessments or evaluations, discussion of recommendations or individualized needs, identification of resources or methods of support, outlines of service options and training goals, and preparation of interventions or strategies necessary to implement a person-centered plan.

New Policy:
This is a service that allows the RN to attend a member's IDT meeting in person or by video-conferencing to present assessments or evaluations completed for the purpose of integrating recommendations, training goals and intervention strategies into the member's IPP.

Individual Program Planning is the process by which the member and their IDT develop a plan based on a person-centered philosophy. The RN participates in the IDT meeting for the purpose of review of assessments or evaluations, discussion of recommendations or individualized needs, identification of resources or methods of support, outlines of service options and training goals, and preparation of interventions or strategies necessary to implement a person-centered plan.

513.9.1.14 Supported Employment: Traditional Option, Definition of Service:

Old Policy:
Supported Employment Services are services that enable individuals to engage in paid, competitive employment, in integrated community settings. The services are for individuals who have barriers to obtaining employment due to the nature and complexity of their disabilities. The services are designed to assist individuals for whom competitive employment at or above the minimum wage is unlikely without such support and services and need ongoing support based upon the member's level of need.

Supported Employment services include, but are not limited to:

- Vocational counseling (Example: Discussion of the member's on-the-job work activities);
- Job development and placement for a specific waiver member with the member present;
- On-the-job training in work and work-related skills;
- Accommodation of work performance task;
- Supervision and monitoring by a job coach;
- Intervention to replace inappropriate work behaviors with adaptive work skills and behaviors;
- Retraining as jobs change or job tasks change;
- Training in skills essential to obtain and retain employment, such as the effective use of community resources;
- Transportation to and from job sites when other forms of transportation are unavailable or inaccessible.

Natural work setting supports are to be considered prior to the utilization of Supported Employment.

Supported Employment Services must be supervised by a Therapeutic Consultant. In addition to the standard training requirements, paraprofessionals providing supported employment must have documented training or experience in implementation of Supported Employment plans of instruction.

Persons providing supported employment services may attend and participate in IDT meetings and the annual assessment of functioning for eligibility conducted by ASO if requested by the member or their legal representative.

Documentation is maintained in the file of each member receiving this service that a referral was made to a program funded under section 110 of the Rehabilitation Act of 1973 or the Individuals with Disabilities Education Act (20 U.S.C. 1401 et seq.) before this service was provided.

New Policy:

Individuals with Disabilities Education Act (20 U.S.C. 1401 et seq.) before this service was provided.

513.9.1.15 Therapeutic Consultant: Traditional Option

Definition of Service:
Old Policy:
Therapeutic Consultant develops training plans and provides training in the person-specific aspects and method of a plan of intervention or instruction to the primary care providers (i.e., person-centered support workers, facility day habilitation providers and supportive employment providers). Also, the Therapeutic consultant provides training for respite workers (if applicable for "respite-relevant" training objectives or health or safety training objectives only). This service is provided to members with the assessed need for adaptive skills training. The Therapeutic Consultant also provides evaluation/monitoring of the effectiveness of the plan of intervention or instruction. This monitoring is performed and documented at minimum on a monthly basis. The Therapeutic Consultant observes the individual prior to developing a training plan. The Therapeutic Consultant follows up once the plan has been implemented to observe progress and revise the plan, as needed.

The Therapeutic Consultant may perform the following functions:

- Develops task analysis and person specific strategy or methodology for implementation of intervention or instruction plans for an individual;
- Evaluates environment(s) for implementation of the plan which creates the optimal environment for learning;
- Assists members in selecting the most suitable environment for their learning needs;
- Trains primary direct workers (i.e., person- centered support workers, facility-based day habilitation workers, supported employment and respite workers) in person-specific aspects and methods of intervention or instruction plans (habilitation plans or guidelines);
- Assesses, evaluates and monitors the effectiveness of intervention or instruction plans (habilitation plans or behavioral guidelines) for habilitation training;
- Collects and evaluates data and completes a functional assessment around targeted behaviors to generate a recommendation for a Positive Behavior Support plan;
- Provides direct care services when needed and bills the appropriate direct care service code;
- Attends and participates in IDT meetings and the annual assessment of functioning for eligibility conducted by ASO when requested by the member or their legal representative; and
- Presents proposed member's restrictive measures to the I/DD Waiver provider's Human Rights Committee if no other professional is presenting the same information.

Definition of Service:
New Policy:
Therapeutic Consultant develops training plans and provides training in the person-specific aspects and method of a plan of intervention or instruction to the primary care providers (i.e., person-centered support workers, facility day habilitation providers and supportive employment providers). Also, the Therapeutic consultant provides training for respite workers (if applicable for —respite-relevant training objectives or health or safety training objectives only). This service is provided to members with the assessed need for adaptive skills training. The Therapeutic Consultant also provides evaluation/monitoring of the effectiveness of the plan of intervention or instruction. This monitoring is performed and documented at minimum on a monthly basis. The Therapeutic Consultant observes the individual prior to developing a training plan. The Therapeutic Consultant follows up once the plan has been implemented to observe progress and revise the plan, as needed.

The Therapeutic Consultant may perform the following functions:

- Develops task analysis portion of the IHP/ISP and person specific strategy or methodology for development of habilitation plans.
- May develop Interactive Guidelines or Behavior Protocols for individuals who do not meet the criteria for having a Behavior Support Plan developed by a Behavior Support Professional.
- Evaluates environment(s) for implementation of the ISP which creates the optimal environment for habilitation plans.
- Assists members in selecting the most suitable environment for their habilitation needs.
- Trains primary direct workers (i.e., person- centered support workers, facility-based day habilitation workers, supported employment and respite workers) in person-specific aspects habilitation plans or guidelines.
- Provides direct care services when needed and bills the appropriate direct care service code.
- Attends and participates in IDT meetings and the annual assessment of functioning for eligibility conducted by ASO when requested by the member or their legal representative.
- Presents proposed member's restrictive measures to the I/DD Waiver provider's Human Rights Committee if no other professional is presenting the same information.
- May bill for developing/updating the behavioral crisis section of the member's crisis plan if a Behavior Support Professional is not performing this function.
- May verify data compiled by all Person-Centered Support staff for accuracy.
- May bill for attendance of and contribution to Futures Planning sessions, including PATHs and MAPs.

The Therapeutic Consultant may also perform the following functions if they have met the training requirements as a BSP as identified in section 513.9.1.1:

- Train direct care workers in all aspects of PBSPs implementation(i.e., person- centered support workers, facility-based day habilitation workers, supported employment and respite workers).
- Assess, evaluate and monitor the effectiveness of PBSPs.
- Collect and evaluate data and complete a functional assessment around targeted behaviors to generate a recommendation for a Positive Behavior Support plan or to generate a Positive Behavior Support plan.
- Collaborate with Therapeutic Consultant(s) from other agency(s) to ensure that positive behavior support strategies are consistently applied across all environments.
- Facilitate person-centered planning as a component of the Positive Behavior Support plan.
- Present proposed restrictive measures to the I/DD Waiver provider's Human Rights Committee if no other professional is presenting the same information regarding the member.
- Attend and participate in IDT meetings and the annual assessment of functioning for eligibility conducted by ASO if requested by the member or their legal representative.
- May provide on-site training to the support staff in behavior/crisis situations.
- May bill for phone consultation during behavioral crisis situations.

A Positive Behavior Support Plan can only be written by an individual who has met the Agency Staff Qualifications as a Behavior Support Professional.

Limitations/Caps:
Old Policy:

- The amount of service is limited by the member's individualized budget.
- The annual budget allocation may be adjusted (increased or decreased) only if changes have occurred regarding the member's assessed needs.
- 960 units/240 hours per member's annual IPP year in combination with BSP.
- Job Placement activities are limited to 20 units/5 hours per quarter.
- Agency staff providing Therapeutic Consultant services may not be an individual who lives in the member's home.
- Direct care services provided by the TC must be billed utilizing the appropriate direct care service code.
- TC services may only be billed 30 days prior to discharge for a member or applicant being discharged from a state institution, a medical hospital, rehabilitation hospital, a psychiatric facility, nursing home, ICF/MR or another WV waiver program for planning purposes.
- TC services cannot be billed for completing administrative activities to include these listed below.
    - Human Resources activities such as staff supervision, monitoring and scheduling.
    - Routine review of a member's file for quality assurance purposes.
    - Staff meetings for groups or individuals.
    - Monitoring of group home (fire drills, hot water heater temperature checks, etc.).

- Filing, collating, writing notes to staff.
- Phone calls to staff.
- Observing staff while training individuals without a clinical reason.
- Administering assessments not warranted or requested by the member.
- Making plans for a parent for a weekend visit.
- Working in the home with providing direct care staff coverage.
- Sitting in the waiting room for a doctor or medical appointment.
- Conducting a home visit routinely and without justification–only service coordinators are required to make monthly home visits.

Limitations/Caps:

    - TC services cannot be billed for traveling to complete TC services.

Agency Staff Qualifications:
Old Policy:
All the general requirements in Section 513.2.2.1, 513.2.2.1.1, 513.2.2.1.2 and 513.2.2.1.3 must be met in addition to 1 of the following requirements:

- Four year degree in a human service field and 1 or more years of professional experience in the I/DD field; or
- Four year degree in a human service field and less than 1 year of professional experience in the I/DD field. (Restrictions - must be under the supervision of a Therapeutic Consultant or BSP Supervisor. Clinical supervision involves review of clinical activities, review of case notes and review of habilitation programming for 6 months. This must be verified by supervisory documentation once per month; or
- Four year degree in a non-human service field and 1 year professional experience in the I/DD field. (Restrictions - must be under the supervision of a Therapeutic Consultant or BSP Supervisor. Clinical supervision involves review of clinical activities, review of case notes, and review of habilitation programming for 6 months. This must be verified by supervisory documentation once per month).

Agency Staff Qualifications:
New Policy:
All the general requirements in Section 513.2.2.1, 513.2.2.1.1, 513.2.2.1.2 and 513.2.2.1.3 must be met in addition to 1 of the following requirements:

- Four year degree in a human service field and 1 or more years of professional experience in the I/DD field and completion of the facilitated 3 hour overview of Positive Behavior Support created by the West Virginia – Association for Positive Behavior Support (WV-APBS) Network; or
- Four year degree in a human service field and less than 1 year of professional experience in the I/DD field and completion of the facilitated 3-hour overview of Positive Behavior Support created by the West Virginia – Association for Positive Behavior Support (WV-APBS) Network. (Restrictions - must be under the supervision of a Therapeutic Consultant or BSP Supervisor. Clinical supervision involves review of clinical activities, review of case notes and review of habilitation programming for six months. This must be verified by supervisory documentation once per month; or
- Four year degree in a non-human service field and 1 year professional experience in the I/DD field completion of the facilitated 3-hour overview of Positive Behavior Support created by the West Virginia – Association for Positive Behavior Support (WV-APBS) Network. (Restrictions - must be under the supervision of a Therapeutic Consultant or BSP Supervisor. Clinical supervision involves review of clinical activities, review of case notes, and review of habilitation programming for 6 months. This must be verified by supervisory documentation once per month).

A Positive Behavior Support Plan can only be written by an individual who has met the Agency Staff Qualifications as a Behavior Support Professional.

513.9.1.16.1 Transportation: Miles: Traditional Option, Limitations/Caps

Old Policy:

- The amount of service is limited by the member's individualized budget.
- The annual budget allocation may be adjusted (increased or decreased) only if changes have occurred regarding the member's assessed needs.
- 9,600 miles per member's annual IPP year (based on average of 800 miles per month).
- Member must be present in vehicle if mileage is billed.
- Must be related to a specific activity or service based on an assessed need and identified in the IPP.
- May utilized up to 30 miles beyond the West Virginia border by members living in a WV county bordering another state.

New Policy:

- The amount of service is limited by the member's individualized budget.
- The annual budget allocation may be adjusted (increased or decreased) only if changes have occurred regarding the member's assessed needs.
- 9,600 miles per member's annual IPP year (based on average of 800 miles per month).
- Member must be present in vehicle if mileage is billed. If more than 1 member is present in the vehicle, then the total mileage will be divided between the number of members present in vehicle.
- Must be related to a specific activity or service based on an assessed need and identified in the IPP.
- May utilized up to 30 miles beyond the West Virginia border by members living in a WV county bordering another state.

513.9.1.16.2 Transportation: Trips: Traditional Option, Definition of Service:

Old Policy:

Transportation services are provided to the I/DD Waiver member in the I/DD Waiver provider's mini-van or mini-bus for trips to and from the member's home, licensed Facility-based Day Habilitation Program or Supported Employment site or to the site of a planned activity or service which is addressed on the IPP and based on assessed need.

The agency mini-bus or mini-van must have proof of current vehicle insurance and registration inside the vehicle in addition to abiding by local, state and federal laws regarding vehicle licensing, registration and inspections.

Agency passenger mini-bus or mini-van must have had the original capacity to transport more than 7 passengers but less than 16 passengers.

New Policy:
Transportation services are provided to the I/DD Waiver member in the I/DD Waiver provider's mini-van or mini-bus for trips to and from the member's home, licensed Facility-based Day Habilitation Program or Supported Employment site or to the site of a planned activity or service which is addressed on the IPP and based on assessed need.

The agency mini-bus or mini-van must have proof of current vehicle insurance and registration inside the vehicle in addition to abiding by local, state and federal laws regarding vehicle licensing, registration and inspections.

Agency passenger mini-bus or mini-van must have had the original capacity to transport more than 6 passengers but less than 16 passengers.

513.9.1 Participant-Directed Services

Old Policy:
This option provides each eligible member with the opportunity to exercise choice and control over the participant-directed services they receive. The participant-directed services which members may self-direct are:

- Person-Centered Support Services
- Respite
- Transportation
- Participant-directed Goods and Services

Two Financial Management Service (FMS) models are available to members to support their use of participant-directed services. These are the Agency with Choice (AwC) FMS Model and the *Personal Options* FMS Model.

Under the AwC FMS model, the member's chosen I/DD Waiver provider is the Common Law Employer of the Agency Staff employed to provide services to the member. The AwC I/DD Waiver provider is responsible for all payroll functions, including determining wages and benefits to the Agency Staff. The member is a Managing Employer who shares in the responsibility of hiring, training, scheduling, supervising and dismissing the member's Agency Staff. The member may appoint a representative to assist with these functions. The relationship between the AwC I/DD Waiver provider and the member or their representative (when applicable) is that of a Co-Employer.

Under the AwC FMS model, no Agency Staff's hourly wage may exceed the Medicaid rate minus all mandatory deductions.

Under the AwC FMS Model, a member's appointed representative may also be employed by the member and paid for providing I/DD Waiver services under certain circumstances and if certain safeguards are observed. These are:

- The representative/employee is a single parent residing in the home with the member and no other person is available to act as the representative or employee.
- The representative may not be paid for more than 40 hours per week for working for the member.

If a member's representative is not paid as an employee providing I/DD Waiver services to the member, then these safeguards do not apply.

Under the *Personal Options* FMS Model, the member is the Common Law Employer of the Qualified Support Workers hired by the member. The *Personal Options* FMS acts as the fiscal/employer agent to the member and is responsible for managing the receipt and distribution of the member's participant-directed budget funds, processing and paying Qualified Support Workers' payroll and transportation reimbursement as well as payment of vendors' invoices for approved participant-directed goods and services. The *Personal Options* FMS also provides information and assistance to members, their representatives and employees as appropriate. The members and their representatives, if applicable, control the work being performed on the member's behalf by hiring, training, scheduling, supervising and dismissing the member's direct care workers. A member may appoint a representative to assist with these functions, but the member remains the Common Law Employer.

Under the *Personal Options* FMS Model, a member's appointed representative may also be employed by the member and paid for providing I/DD Waiver services under certain circumstances and if certain safeguards are observed. These are:

- The representative/employee is a single parent residing in the home with the member, no other person is available to act as the representative or employee.
- The representative may not be paid for more than 40 hours per week for working for the member.

If a member's representative is not paid as an employee providing I/DD Waiver services to the member, then these safeguards do not apply.

The Traditional Service Option, which includes the full array of services, is still available to members who choose AwC or *Personal Options*, however the 4 services mentioned above may be participant-directed. The member who chooses to direct part or all of these services is required to purchase Service Coordination through the Traditional Service Option. Other services chosen by the member that are not part of the 4 participant-directed services also need to be purchased through the Traditional Service Option before any or all of the 4 participant-directed services may be purchased.

The Participant-Directed Service Option is available to every eligible I/DD Waiver member with the following exception: Members living in OHFLAC licensed residential settings are not eligible for Participant-Directed Services.

A member may choose to direct their own services at any time through either of the Participant-Directed Service Options (AwC or *Personal Options)* by completing a Freedom of Choice Form (WV-BMS-I/DD-2). The Service Coordinator will enter the information into the CareConnection® within 2 days of receipt and schedule a Transfer/Discharge IDT meeting. At this meeting, services that can be self-directed will be referred to the chosen Participant-Directed Service agency and a participant-direct budget will be developed while all Traditional Services will remain with the I/DD Waiver provider(s).

A member may choose to stop directing their own services at any time by completing a Freedom of Choice Form (WV-BMS-I/DD-2). The Service Coordinator will enter the information into the CareConnection® within 2 days of receipt and schedule a Transfer/Discharge IDT meeting. At this meeting, services that were self-directed will be referred to the chosen Traditional Service agency and a Traditional service budget will be developed.

The Agency with Choice participant-directed service option is described more fully in section 513.9.2.1. The *Personal Options* participant-directed service option is described more fully in Section 513.9.2.2.

New Policy:
This option provides each eligible member with the opportunity to exercise choice and control over the participant-directed services they receive. The participant-directed services which members may self-direct are:

- Person-Centered Support Services
- Respite
- Transportation
- Participant-directed Goods and Services

Two Financial Management Service (FMS) models are available to members to support their use of participant-directed services. These are the Agency with Choice (AwC) FMS Model and the *Personal Options* FMS Model.

Under the AwC FMS model, the member's chosen I/DD Waiver provider is the Common Law Employer of the Agency Staff employed to provide services to the member. The AwC I/DD Waiver provider is responsible for all payroll functions, including determining wages and benefits to the Agency Staff. The member is a Managing Employer who shares in the responsibility of hiring, training, scheduling, supervising and dismissing the member's Agency Staff. The member may appoint a representative to assist with these functions. The relationship between the AwC I/DD Waiver provider and the member or their representative (when applicable) is that of a Co-Employer.

A member's representative may not be a paid employee providing AwC I/DD Waiver services to the member.

Under the AwC FMS model, no Agency Staff's hourly wage may exceed the Medicaid rate minus all mandatory deductions.

Under the *Personal Options* FMS Model, the member is the Common Law Employer of the Qualified Support Workers hired by the member. The *Personal Options* FMS acts as the fiscal/employer agent to the member and is responsible for managing the receipt and distribution of the member's participant-directed budget funds, processing and paying Qualified Support Workers' payroll and transportation reimbursement as well as payment of vendors' invoices for approved participant-directed goods and services. The *Personal Options* FMS also provides information and assistance to members, their representatives and employees as appropriate. The members and their representatives, if applicable, control the work being performed on the member's behalf by hiring, training, scheduling, supervising and dismissing the member's direct care workers. A member may appoint a representative to assist with these functions, but the member remains the Common Law Employer.

A member's representative may not be a paid employee providing *Personal Options* I/DD Waiver services to the member.

The Traditional Service Option, which includes the full array of services, is still available to members who choose AwC or *Personal Options*, however the 4 services mentioned above may be participant-directed. The member who chooses to direct part or all of these services is required to purchase Service Coordination through the Traditional Service Option. Other services chosen by the member that are not part of the 4 participant-directed services also need to be purchased through the Traditional Service Option before any or all of the 4 participant-directed services may be purchased.

The maximum amount of a member's participant-directed budget is the equivalent monetary value of direct care services units, transportation and Participant-Directed Goods and Services units available, based on the age, residential setting, needs of the member and units available. When a member is accessing direct care services, whether in the Traditional or Self Directed Option, the total amount of direct care services in both Options must be added together and may not exceed the caps in both Options combined. Direct care services are defined as PCS: Agency, PCS: Family, Supported Employment, Facility-Based Day Habilitation, LPN, Agency with Choice PCS and *Personal Options* PCS. For example, an adult living at home with his/her parents and his/her IDT has determined the member needs 12 hours of direct care services, his/her budget supports this amount and the team has chosen to utilize 6 hours of Supported Employment and 2 hours of Person-Centered Support: Agency for a total of 8 hours of Traditional direct care services daily. This leaves the monetary equivalent of 4 hours of *Personal Options* PCS that is transferred into the member's self-directed budget. If this adult member has been determined to need 9600 units of transportation by his/her IDT, his/her budget supports this amount and the team chooses to utilize 6000 units of Traditional mileage for the member to be transported to and from their Supported Employment job site then this leaves the monetary equivalent of 3600 units of *Personal Options* Transportation that is transferred into the

member's self-directed budget. This member may also have been determined to need 2 hours of respite daily, his team and his budget supports this need and chooses to self-direct this entire service. The monetary equivalent of 2 hours of *Personal Options* Respite Services is transferred to the member's self-directed budget. If the member has been determined to need 1000 units of either EAA/Home or Vehicle and Participant-Directed Goods and Services combined, his team and his budget supports this need and he/she chooses to use 600 units of EAA/Home, then this leaves the monetary equivalent of 400 units of Participant-Directed Goods and Services that is transferred into the member's self-directed budget.

Once all of the equivalent monies are transferred into the member's self-directed budget, the member and/or their legal/non-legal representative, along with their Personal Options Resource Consultant, create a spending plan. At this time, the member and/or their legal/non-legal representative choose the types of services, the amount of services and the wages of the member's employees within the parameters of the entire self-directed budget.

The Participant-Directed Service Option is available to every eligible I/DD Waiver member with the following exception: Members living in OHFLAC licensed residential settings are not eligible for Participant-Directed Services.

A member may choose to direct their own services at any time through either of the Participant-Directed Service Options (AwC or *Personal Options)* by completing a Freedom of Choice Form (WV-BMS-I/DD-2). The Service Coordinator will enter the information into the CareConnection® within 2 days of receipt and schedule a Transfer/Discharge IDT meeting. At this meeting, services that can be self-directed will be referred to the chosen Participant-Directed Service agency and a participant-direct budget will be developed while all Traditional Services will remain with the I/DD Waiver provider(s). The Service Coordinator must enter a request into the CareConnection® for these services.

A member may choose to stop directing their own services at any time by completing a Freedom of Choice Form (WV-BMS-I/DD-2). The Service Coordinator will enter the information into the CareConnection® within 2 days of receipt and schedule a Transfer/Discharge IDT meeting. At this meeting, services that were self-directed will be referred to the chosen Traditional Service agency and a Traditional service budget will be developed.

The Agency with Choice participant-directed service option is described more fully in section 513.9.2.1. The *Personal Options* participant-directed service option is described more fully in Section 513.9.2.2.

513.9.2.1.1.2 Goods and Services: Participant-Directed Option: Agency with Choice Model

Definition of Service:
Old Policy:

Goods and Services are services, equipment or supplies not otherwise provided through this Waiver program or through the Medicaid State Plan that address an identified need in the IPP and meet the following requirements:

- An item or service that would decrease the need for other Medicaid services and/or promote full membership in the community and/or increase member's safety in the home environment;
- The member does not have the funds to purchase the item or service or the item or service is not available through another source; and
- Goods and Services are purchased from the member's participant-directed budget.

Definition of Service:
New Policy:
Participant-Directed Goods and Services (PDGS) are services, equipment or supplies not otherwise provided through this Waiver program or through the Medicaid State Plan that address an identified need in the IPP and meet the following requirements:

Goods and Services are services, equipment or supplies not otherwise provided through this Waiver program or through the Medicaid State Plan that address an identified need in the IPP and meet the following requirements:

- An item or service that would decrease the need for other Medicaid services and/or promote full membership in the community and/or increase member's safety in the home environment.
- The member does not have the funds to purchase the item or service or the item or service is not available through another source.
- This service cannot be accessed as a means of reimbursement for items or services that have already been obtained and not been pre-approved by the Agency with Choice I/DD Waiver agency.
- Participant-directed Goods and Services are purchased from the participant-directed budget.
- The need for PDGS supported by an assessed need documented in the IPP.
- PDGS must be pre-approved by the Agency with Choice I/DD Waiver provider and purchase must be documented by receipts or other documentation of the goods or services from the established business or otherwise qualified entity or individual.
- The need must be documented on the Annual IPP unless it is a new need which must be documented on a Critical Juncture IPP.
    - NOTE: All services must be based on assessed need and within a member's individualized budget. If the need was documented on the Annual IPP, but not incorporated into the budget at that time and the member is over budget, then modifications of the services already purchased must occur before this authorization will be approved. If this is a new need, then it should be presented as a need to increase the budget based on a new need.

Limitations/Caps:
Old Policy:

- The amount of service is limited by the member's individualized participant-directed budget.
- The annual budget allocation may be adjusted (increased or decreased) only if changes have occurred regarding the member's assessed needs.
- To access Participant-directed Goods and Services the member must also access at least 1 other type of participant-directed service during the budget year—i.e. PCS, Respite and/or transportation.
- 1000 units ($1,000) per member's IPP year in combination with Traditional Environmental Accessibility Adaptations- Vehicle and Home and Participant-Directed Goods and Services – *Personal Options* Option.
- The following represents a non-inclusive list of non-permissible Goods and Services:
    - Goods, services or supports covered by the State Plan, Medicare, other third-parties, including education, home-based schooling and vocational services;
    - Goods, services and supports available through another source;
    - Goods, services or supports provided to or benefiting persons other than the individual member;
    - Room and board;
    - Personal items and services not related to the qualifying disability;
    - Gifts for workers/family/friends, payments to someone to serve as a representative,
    - Clothing, food and beverages;
    - Electronic entertainment equipment;
    - Utility payments;
    - Swimming pools and spas;
    - Costs associated with travel;
    - Household furnishings such as comforters, linens, drapes and furniture
    - Vehicle expenses including routine maintenance and repairs, insurance and gas money;
    - Medications, vitamins and herbal supplements;
    - Illegal drugs or alcohol;
    - Experimental or investigational treatments
    - Printers;
    - Monthly internet service;
    - Yard work;
    - Household cleaning supplies;
    - Home maintenance;
    - Pet care;
    - Respite services;
    - Spa services;
    - Education;

- Personal hygiene items;
- Day care; and
- Discretionary cash.

New Policy:
Limitations/Caps:

- The amount of service is limited by the member's individualized participant-directed budget.
- The annual budget allocation may be adjusted (increased or decreased) only if changes have occurred regarding the member's assessed needs.
- To access Participant-directed Goods and Services the member must also access at least 1 other type of participant-directed service during the budget year—i.e. PCS, Respite and/or transportation.
- 1000 units ($1,000) per member's IPP year in combination with Traditional Environmental Accessibility Adaptations- Vehicle and Home and Participant-Directed Goods and Services – *Personal Options* Option.
- The AwC provider must not pay PDGS funds to the member, staff, or family/legal representative. Payment for cost of services must be issued to the vendor of the PDGS service.
- The following represents a non-inclusive list of non-permissible Goods and Services:
  - Goods, services or supports covered by the State Plan, Medicare, other third-parties, including education, home-based schooling and vocational services;
  - Goods, services and supports available through another source;
  - Goods, services or supports provided to or benefiting persons other than the individual member;
  - Room and board;
  - Personal items and services not related to the qualifying disability;
  - Gifts for workers/family/friends, payments to someone to serve as a representative,
  - Clothing, food and beverages;
  - Electronic entertainment equipment;
  - Utility payments;
  - Swimming pools, hot tubs and spas;
  - Costs associated with travel;
  - Household furnishings such as comforters, linens, drapes and furniture
  - Vehicle expenses including routine maintenance and repairs, insurance and gas money;
  - Medications, vitamins and herbal supplements;
  - Illegal drugs or alcohol;
  - Experimental or investigational treatments
  - Printers;
  - Monthly internet service;

- Yard work;
- Household cleaning supplies;
- Home maintenance;
- Pet care;
- Respite services;
- Spa services;
- Education;
- Personal hygiene items;
- Day care; and
- Discretionary cash.

513.9.2.1.1.3 Person-Centered Support: Participant-Directed Option: Agency with Choice Model, Definition of Service:

Old Policy:
Person-Centered Support (PCS) consists of individually tailored training and/or support activities that enable the member to live and inclusively participate in the community in which the member resides, works, receives their education, accesses health care, and engages in social and recreational activities. The activities and environments are designed to increase the acquisition of skills and appropriate behavior that are necessary for the member to have greater independence, personal choice and allow for maximum inclusion into their community.

PCS may be used to assist with the acquisition, retention and/or improvement of the following areas of functionality:

- Self-care;
- Receptive or expressive language;
- Learning;
- Mobility;
- Self-direction; and
- Capacity for Independent Living

PCS services must be assessment-based, outlined on the member's IPP and may not exceed the annual individualized participant-directed budget allocation.

Agency staff passing medications per the AMAP program must meet all requirements for that program which include having a high school diploma or the equivalent General Education Development (GED).

Agency Staff who provide Person-Centered Support may not be the member's spouse.

Agency staff providing PCS services may attend and participate in IDT meetings and the annual functional assessment for eligibility conducted by the ASO.

New Policy:
AwC Person-Centered Support (PCS) provided by awake and alert staff consists of individually tailored training and/or support activities that enable the member to live and inclusively participate in the community in which the member resides, works, receives their education, accesses health care, and engages in social and recreational activities. The activities and environments are designed to increase the acquisition of skills and appropriate behavior that are necessary for the member to have greater independence, personal choice and allow for maximum inclusion into their community.

PCS may be used to assist with the acquisition, retention and/or improvement of the following areas of functionality:

- Self-care;
- Receptive or expressive language;
- Learning;
- Mobility;
- Self-direction; and
- Capacity for Independent Living

PCS services must be assessment-based, outlined on the member's IPP and may not exceed the annual individualized participant-directed budget allocation.

Agency staff passing medications per the AMAP program must meet all requirements for that program which include having a high school diploma or the equivalent General Education Development (GED).

Agency Staff who provide Person-Centered Support may not be the member's spouse.

Agency staff providing PCS services may attend and participate in IDT meetings and the annual functional assessment for eligibility conducted by the ASO.

PSC staff may compile data collected in daily documentation during their shift for later review by the member's TC or BSP, as long as safety/health and oversight of the member are not compromised.

Limitations/Caps:
Old Policy:

- The amount of service is limited by the member's individualized participant-directed budget. The annual budget allocation may be adjusted (increased or decreased) only if changes have occurred regarding the member's assessed needs.
- The Agency Staff to member ratio for this service is 1:1, 1:2 and 1:3.

- Only 1:1 or 1:2 ratios are allowed to be utilized in a member's family residence or in a Specialized Family Care Home.
- This service may not be billed concurrently with any other direct care service.
- PCS cannot replace the routine care, and supervision which is expected to be provided by the parent of a minor member or by a Specialized Family Care Provider providing care to a minor child. The IDT makes every effort to meet the member's assessed needs through natural supports.
- The member's appointed representative may also be employed by the member paid for providing I/DD Waiver services under certain circumstances and if certain safeguards are observed as stated below:
    - The representative/employee is a single parent residing in the home with the member and no other person is available to act as the representative or employee.
    - The representative may not be paid for more than 40 hours per week for working for the member.
- PCS may not substitute for federally mandated educational services.
- PCS must be based upon assessed needs, address identified health and safety issues and be outlined in the member's IPP.
- PCS is not available while the member is hospitalized in a Medicaid certified hospital except when the behavioral needs of the member arise due to the temporary change in environment.
- PCS is not available in nursing homes, psychiatric hospitals or rehabilitative facilities located either within or outside of a medical hospital.
- Up to 48 units/12hours of Person-Centered Support services every 3 months per member may be billed, if necessary, for the purpose of training in member-specific instruction (i.e. behavioral intervention plans, medical plans of care, specific instructional activities, etc.) and/or service objectives. Only TCs, BSPs or RNs may bill for providing training to Person-Centered Support staff.

New Policy:

- The amount of service is limited by the member's individualized participant-directed budget. The annual budget allocation may be adjusted (increased or decreased) only if changes have occurred regarding the member's assessed needs.
- The Agency Staff to member ratio for this service is 1:1, 1:2 and 1:3.
- Only 1:1 or 1:2 ratios are allowed to be utilized in a member's family residence or in a Specialized Family Care Home.
- AwC: Personal Options services are limited to the equivalent monetary value of 11,680 units/2920 hours (based upon average of 8 hours per day) of PCS: Traditional Family per member's annual IPP year for natural family/Specialized Family Care home settings for members eligible to receive public education services. This is in combination with all direct care services available: PCS: Agency, PCS: Family, Supported Employment, Facility Based Day Habilitation, LPN (When LPN units exceed 2,920), AwC: PCS and

Personal Options: PCS excluding Traditional Respite, AwC Respite and *Personal Options* Respite.

- AwC: Personal Options services are limited to the equivalent monetary value of 17,520 units/4380 hours (based upon average of 12 hours per day) of PCS: Traditional Family per member's annual IPP year for natural family/Specialized Family Care home settings for members not eligible to receive public education services. This is in combination with all direct care services available: PCS: Agency, PCS: Family, Supported Employment, Facility Based Day Habilitation, LPN (When LPN units exceed 2,920 units), AwC : PCS and *Personal Options: PCS* excluding Traditional Respite, AwC Respite and *Personal Options* Respite.
- AwC: Personal Options services are limited to the monetary equivalent value of 35,712 units/8928 hours annually (based upon an average of 24 hours per day) per member's annual IPP year for members in ISS and licensed settings, to include training. This is in combination with all direct care services available: PCS: Agency, PCS: Family, Supported Employment, Facility-Based Day Habilitation and LPN (when LPN units exceed 2,920 units) and PCS: Agency with Choice.
- This service may not be billed concurrently with any other direct care service.
- AwC: PCS cannot replace the routine care, and supervision which is expected to be provided by the parent of a minor member or by a Specialized Family Care Provider providing care to a minor child. The IDT makes every effort to meet the member's assessed needs through natural supports.
- The member's appointed representative may not be employed by the member for providing AwC I/DD Waiver services.
- AwC: PCS may not substitute for federally mandated educational services.
- AwC: PCS must be based upon assessed needs, address identified health and safety issues and be outlined in the member's IPP.
- AwC: PCS is not available while the member is hospitalized in a Medicaid certified hospital except when the behavioral needs of the member arise due to the temporary change in environment.
- AwC: PCS is not available in nursing homes, psychiatric hospitals or rehabilitative facilities located either within or outside of a medical hospital.
- Up to 48 units/12hours of AwC: Person-Centered Support services every 3 months per member may be billed, if necessary, for the purpose of training in member-specific instruction (i.e. behavioral intervention plans, medical plans of care, specific instructional activities, etc.) and/or service objectives. Only TCs, BSPs or RNs may bill for providing training to Person-Centered Support staff.

513.9.2.1.1.4 Respite: Participant-Directed Option: Agency with Choice Model

Definition of Service:
Old Policy:
Respite Services are specifically designed to provide temporary substitute care for an individual whose primary care is normally provided by the family or other primary care-giver of a member.

The services are to be used on a short-term basis due to the absence of or need for relief of the primary care-giver. Respite is designed to focus on the needs of the primary care-giver for temporary relief and to help prevent the breakdown of the primary care-giver due to the physical burden and emotional stress of providing continuous support and care to the member. Respite Care services consist of temporary care services for an individual who cannot provide for all of their own needs. Persons providing respite services may participate in person-centered planning.

Respite Care may be used to:

- Allow the primary care-giver to have planned time from the caretaker role for him/herself and/or other family members
- Provide assistance to the primary care-giver or member in crisis and emergency situations
- Ensure the physical and/or emotional well-being of the primary care-giver or the member by temporarily relieving the primary care provider of the responsibility of providing care.
- Up to 48 units/12hours of Respite services every 3 months per member may be billed, if necessary, for the purpose of training in member-specific instruction (i.e. behavioral intervention plans, medical plans of care, specific instructional activities, etc.) and/or service objectives. Only TCs, BSPs or RNs may bill for providing training to Respite staff.
- May attend and participate in IDT meetings and the annual assessment of functioning for eligibility conducted by ASO.

Definition of Service:
New Policy:
Respite Services provided by awake and alert staff are specifically designed to provide temporary substitute care for an individual whose primary care is normally provided by the family or other primary care-giver of a member. The services are to be used on a short-term basis due to the absence of or need for relief of the primary care-giver. Respite is designed to focus on the needs of the primary care-giver for temporary relief and to help prevent the breakdown of the primary care-giver due to the physical burden and emotional stress of providing continuous support and care to the member. Respite Care services consist of temporary care services for an individual who cannot provide for all of their own needs. Persons providing respite services may participate in person-centered planning.

Respite Care may be used to:

- Allow the primary care-giver to have planned time from the caretaker role for him/herself and/or other family members
- Provide assistance to the primary care-giver or member in crisis and emergency situations

- Ensure the physical and/or emotional well-being of the primary care-giver or the member by temporarily relieving the primary care provider of the responsibility of providing care.
- Support the member while the primary care-giver works outside the home.
- Up to 48 units/12hours of Respite services every 3 months per member may be billed, if necessary, for the purpose of training in member-specific instruction (i.e. behavioral intervention plans, medical plans of care, specific instructional activities, etc.) and/or service objectives. Only TCs, BSPs or RNs may bill for providing training to Respite staff.

Limitations/Caps:
Old Policy:

- The amount of service is limited by the member's individualized participant-directed budget.
- The annual budget allocation may be adjusted (increased or decreased) only if changes have occurred regarding the member's assessed needs.
- The Agency Staff to member ratio for this service is 1:1, 1:2 and 1:3.
- Only 1:1 or 1:2 ratios are allowed to be utilized in a member's family residence or in a Specialized Family Care Home.
- This service may not be billed concurrently with any other direct care service.
- Respite services are not available to members living in ISS or licensed group home settings.
- Respite services may not be provided by a member's spouse or any other individual living in the member's home.
- Respite is not available in medical hospitals, nursing homes, psychiatric hospitals or rehabilitative facilities located either within or outside of a medical hospital.

Limitations/Caps:
New Policy:

- The amount of service is limited by the member's individualized participant-directed budget.
- The annual budget allocation may be adjusted (increased or decreased) only if changes have occurred regarding the member's assessed needs.
- The Agency Staff to member ratio for this service is 1:1, 1:2 and 1:3.
- AwC: Respite services are limited to the equivalent monetary value of 6,912 units/1728 hours (Average of 144 hours a month or 4.73 hours a day) AwC Respite per member's annual IPP year. This is in combination with all other respite services: Traditional Respite, Traditional Crisis Site Respite, AwC Respite and *Personal Options* Respite.

- Only 1:1 or 1:2 ratios are allowed to be utilized in a member's family residence or in a Specialized Family Care Home.
- AwC: Respite services may not be provided by an individual living in the member's own or family residence in which the member resides or within the Specialized Family Care Home where the member resides.
- This service may not be billed concurrently with any other direct care service.
- Respite services are not available to members living in ISS or licensed group home settings.
- Respite services may not be provided by a member's spouse or any other individual living in the member's home.
- Respite services may not be used to replace natural supports (which includes non-custodial parents) available to the member.
- Respite is not available in medical hospitals, nursing homes, psychiatric hospitals or rehabilitative facilities located either within or outside of a medical hospital.

513.9.2.1.5 Transportation: Miles – Participant-Directed Option: Agency with Choice Model, Limitations/Caps

Old Policy:

- The amount of service is limited by the member's individualized participant-directed budget.
- The annual budget allocation may be adjusted (increased or decreased) only if changes have occurred regarding the member's assessed needs.
- Must be related to a specific activity or service based on an assessed need and identified in the IPP.
- May be within 30 miles of the West Virginia border when the member is a resident of a county bordering the state of West Virginia.
- The member's legal guardian may function as the representative and also be paid for providing transportation services to the member if certain safeguards are observed. These are:
    - The legal guardian is a single parent residing in the home with the member.
    - The legal guardian may not be paid for more than 40 hours per week for working for the member.

New Policy:

- The amount of service is limited by the member's individualized participant-directed budget.
- The annual budget allocation may be adjusted (increased or decreased) only if changes have occurred regarding the member's assessed needs.
- Member must be present in vehicle if mileage is billed. If more than 1 member is present in the vehicle, then the total mileage will be divided between the number of members present in vehicle.

- Must be related to a specific activity or service based on an assessed need and identified in the IPP.
- May be within 30 miles of the West Virginia border when the member is a resident of a county bordering the state of West Virginia.
- The member's legal guardian may function as the representative and also be paid for providing transportation services to the member if certain safeguards are observed. These are:
    - The legal guardian is a single parent residing in the home with the member.
    - The legal guardian may not be paid for more than 40 hours per week for working for the member.

513.9.2.2 Participant-Directed Services: *Personal Options* Financial Management Service Option

Old Policy:
Another Financial Management Service (FMS) model available to members to support their use of participant-directed services is *Personal Options*. Under *Personal Options*, the member is the Common Law Employer of the Qualified Support Workers they hire directly. The member may appoint a representative to assist with these functions, but the member remains the Common Law Employer.

No Qualified Support Worker's hourly wage may exceed the Medicaid rate minus all mandatory deductions. All Qualified Support Worker's hired by the member must meet the requirements in Sections 513.9.2.1, 513.9.2.1.1 and 513.9.2.1.2.

Under the *Personal Options* FMS Model, a member's appointed representative may also be employed by the member and paid for providing I/DD Waiver services under certain circumstances and if certain safeguards are observed. These are:

- The representative/employee is a single parent residing in the home with the member and no other person is available to act as the representative or employee.
- The representative may not be paid for more than 40 hours per week for working for the member.

If a member's representative is not paid as an employee providing I/DD Waiver services to the member, then these safeguards do not apply.

The *Personal Options* Fiscal/Employer Agent is responsible for managing the receipt and distribution of individuals' participant-directed budget funds, processing and paying Qualified Support Workers' payroll and reimbursements for transportation as well as vendors' invoices for approved participant-directed goods and services. The Personal Options Fiscal/Employer Agent is also required to provide information and assistance to members and their representatives as appropriate.

Under *Personal Options* FMS option, the member is the Common Law Employer of the Qualified Support Workers they hire directly.

New Policy:
Another Financial Management Service (FMS) model available to members to support their use of participant-directed services is *Personal Options*. Under *Personal Options*, the member is the Common Law Employer of the Qualified Support Workers they hire directly. The member may appoint a representative to assist with these functions, but the member remains the Common Law Employer.

A member's representative may not be a member's employee providing *Personal Options* I/DD Waiver services to the member.

No Qualified Support Worker's hourly wage may exceed the Medicaid rate minus all mandatory deductions. All Qualified Support Worker's hired by the member must meet the requirements in Sections 513.9.2.1, 513.9.2.1.1 and 513.9.2.1.2.

The *Personal Options* Fiscal/Employer Agent is responsible for managing the receipt and distribution of individuals' participant-directed budget funds, processing and paying Qualified Support Workers' payroll and reimbursements for transportation as well as vendors' invoices for approved participant-directed goods and services. The Personal Options Fiscal/Employer Agent is also required to provide information and assistance to members and their representatives as appropriate.

Under *Personal Options* FMS option, the member is the Common Law Employer of the Qualified Support Workers they hire directly.

513.9.2.2.1 Qualifications for Qualified Support Workers: Participant-Directed Option, *Personal Options,*

Old Policy:
All Qualified Support Workers must meet the qualifications listed below.

- Must be 18 years of age or over;
- Have the ability to perform the participant-specific required tasks;
- Have documentation of initial and renewal of training requirements:
    - Documented training on Emergency Procedures, such as Crisis Intervention and restraints upon hire and annually thereafter;
    - Documented training on Emergency Care such as a Crisis Plan, Emergency Worker Back-up Plan and Emergency Disaster Plan upon hire and on an as needed basis thereafter;
    - Documented training on Infectious Disease Control upon hire and annually thereafter;

- Documented training on First Aid by a certified trainer from the American Heart Association (AHA) or the American Red Cross (ARC) to include always having current First Aid certification upon hire and as indicated per expiration date on the AHA or ARC card;
- Documented training in Cardiopulmonary resuscitation (CPR) by a certified trainer from the American Heart Association (AHA) or the American Red Cross (ARC) to include always having current CPR certification upon hire and as indicated per expiration date on the AHA or ARC card (This training, including refresher trainings, must include manual demonstration and be specific to the ages of the members supported by the QSW);
- Documented training on Member-specific needs (including special needs, health and behavioral health needs) upon hire and on an as needed basis thereafter; and
- Documented training in Recognition of, Documentation of and Reporting of suspected Abuse/Neglect and Exploitation upon hire and annually thereafter.

- Qualifications must be verified initially upon hire as current and updated as necessary.
- The QSW may be responsible for the certain costs, i.e. CPR and First Aid certifications, CIB/NCIC background checks.

New Policy:

All Qualified Support Workers must meet the qualifications listed below. For all trainings but CPR/First Aid (which expire as indicated by the date on the card), annually is defined as within the month the training expires. These trainings include:

- Must be 18 years of age or over;
- Have the ability to perform the participant-specific required tasks;
- Have documentation of initial and renewal of training requirements:
  - Documented training on Emergency Procedures, such as Crisis Intervention and restraints upon hire and annually thereafter;
  - Documented training on Emergency Care such as a Crisis Plan, Emergency Worker Back-up Plan and Emergency Disaster Plan upon hire and on an as needed basis thereafter;
  - Documented training on Infectious Disease Control upon hire and annually thereafter;
  - Documented training on First Aid by a certified trainer from an approved agency listed on the BMS I/DD Waiver website (http://www.dhhr.wv.gov/bms/hcbs/IDD/Pages/Training.aspx) to include always having current First Aid Certification upon hire and as indicated per expiration date on the card;
  - Documented training in Cardiopulmonary resuscitation (CPR) by an approved agency listed on the BMS I/DD Waiver website (http://www.dhhr.wv.gov/bms/hcbs/IDD/Pages/Training.aspx) to include always having current CPR certification upon hire and as indicated per expiration date

on the card (This training, including refresher trainings, must include manual demonstration and be specific to the ages of the members supported by the QSW);
    - Documented training on Member-specific needs (including special needs, health and behavioral health needs) upon hire and on an as needed basis thereafter; and
    - Documented training in Recognition of, Documentation of and Reporting of suspected Abuse/Neglect and Exploitation upon hire and annually thereafter.
- Qualifications must be verified initially upon hire as current and updated as necessary.
- The QSW may be responsible for the certain costs, i.e. CPR and First Aid certifications, CIB/NCIC background checks.

513.9.2.2.1.2 Criminal Investigation Background (CIB) Check Requirements for Qualified Support Workers, Participant-Directed Option, *Personal Options,*

Old Policy:
All Qualified Support Workers having direct contact with members must, at a minimum, have a state level CIB check initiated upon hire which includes fingerprints. This check must be conducted initially and again every 3 years. If the current or prospective employee has lived out of state within the last 5 years, the Qualified Support Worker must have an additional federal background check utilizing fingerprints through the National Crime Information Database (NCID) also initiated upon hire and every 3 years of employment. An individual cannot be employed by a member/Employer who is directing their own services if ever convicted of:

- Abduction;
- Any violent felony crime including but not limited to rape, sexual assault, homicide, or felonious battery;
- Child/adult abuse or neglect;
- Crimes which involve the exploitation of a child or an incapacitated adult;
- Any type of felony battery;
- Felony arson;
- Felony or misdemeanor crime against a child or incapacitated adult which causes harm;
- Felony drug related offenses within the last 10 years;
- Felony DUI within the last 10 years;
- Hate crimes;
- Kidnapping;
- Murder/ homicide;
- Neglect or abuse by a caregiver;
- Pornography crimes involving children or incapacitated adults including but not limited to, use of minors in filming sexual explicit conduct, distribution and exhibition of material depicting minors in sexually explicit conduct or sending, distributing, exhibiting, possessing, displaying or transporting material by a parent, legal representative or custodian, depicting a child engaged in sexually explicit conduct;

- Purchase or sale of a child;
- Sexual offenses including but not limited to incest, sexual abuse, or indecent exposure;
- Healthcare fraud; and
- Felony forgery.

CIB check results, other than those listed above, which may place a member at risk of personal health and safety or have evidence of a history of Medicaid fraud or abuse must be made available to the member before continuing the employment of the Qualified Support Worker.

New Policy:
All Qualified Support Workers having direct contact with members must, at a minimum, have a state level CIB check initiated upon hire which includes fingerprints. This check must be conducted initially and again every 3 years. If the current or prospective employee, within the past 5 years, has lived or worked out of state or currently lives or works out of state, the employer of record must require an additional federal background check utilizing fingerprints through the National Crime Information Database (NCID) also upon hire and every 3 years of employment. The employer of record or Personal Options may choose to do an on-line preliminary check and use these results for a period of 3 months while waiting for state and/or federal fingerprint results to be received, however, only on-line companies that check counties in which the applicant has lived and worked within the last 5 years may be utilized. An individual cannot be employed or continue to be employed by a member/Employer who is directing their own services if ever convicted of:

- Abduction;
- Any violent felony crime including but not limited to rape, sexual assault, homicide, or felonious battery;
- Child/adult abuse or neglect;
- Crimes which involve the exploitation of a child or an incapacitated adult;
- Any type of felony battery;
- Felony arson;
- Felony or misdemeanor crime against a child or incapacitated adult which causes harm;
- Felony drug related offenses within the last 10 years;
- Felony DUI within the last 10 years;
- Hate crimes;
- Kidnapping;
- Murder/ homicide;
- Neglect or abuse by a caregiver;
- Pornography crimes involving children or incapacitated adults including but not limited to, use of minors in filming sexual explicit conduct, distribution and exhibition of material depicting minors in sexually explicit conduct or sending, distributing, exhibiting, possessing, displaying or transporting material by a parent, legal representative or custodian, depicting a child engaged in sexually explicit conduct;
- Purchase or sale of a child;
- Sexual offenses including but not limited to incest, sexual abuse, or indecent exposure;

- Healthcare fraud; and
- Felony forgery.

CIB check results, other than those listed above, which may place a member at risk of personal health and safety or have evidence of a history of Medicaid fraud or abuse must be made available to the member before continuing the employment of the Qualified Support Worker.

513.9.2.2.1.3 Federal Office of the Inspector General (OIG) Medicaid Exclusion List Requirements for Qualified Support Workers, Participant-Directed Option, *Personal Options*

Old Policy:
The Office of the Inspector General (OIG) Medicaid Exclusion List must be checked by the *Personal Options* F/EA agent for every Qualified Support Worker who provides Medicaid services prior to employment and monthly thereafter. Persons on the OIG Exclusion List cannot provide Medicaid services. The list can be checked at http://exclusions.oig.hhs.gov/.

New Policy:
The Federal Office of the Inspector General (OIG) List of Excluded Individuals and Entities must be checked by the Fiscal/Employer agent (Personal Options) for every employee who provides Medicaid services prior to employment and monthly. Persons on the OIG Exclusion List cannot provide Medicaid services. The list can be checked at http://exclusions.oig.hhs.gov/. A form may be printed from this website to verify that the check occurred. Any document that has multiple staff names may be kept in a separate file and made available to staff as needed and during agency audits.

513.9.2.2.1.4 Protective Services Record Check for Qualified Support Workers, Participant-Directed Option, *Personal Options*

Old Policy: NEW SECTION

New Policy:
All Qualified Support Workers hired after July 1, 2012 having direct contact with members must have a WVDHHR Protective Services Record Checks. These must be initiated on each individual upon hire. The results must be considered by the Fiscal/Employer Agent (Personal Options) before continuing employment. The Authorization and Release for Protective Services Record Check (BCF-PSRC 6/2005) is the official form available through the DHHR Bureau for Children and Families, Division of Children and Adult Services or at www.wvdhhr.org/bcf. An individual who has direct contact with a member cannot continue to be employed if the check discloses previous substantiated child or adult maltreatment by the individual. Documentation of the date the form is submitted to BCF for processing must be in the Qualified Support Worker's personnel file.

513.9.2.3.1 Goods and Services: *Personal Options* Participant-Directed Option

Definition of Service:
Old Policy:
Participant-Directed Goods and Services (PDGS) are services, equipment or supplies not otherwise provided through this Waiver program or through the Medicaid State Plan that address an identified need in the IPP and meet the following requirements:

- An item or service that would decrease the need for other Medicaid services and/or promote full membership in the community and/or increase member's safety in the home environment.
- The member does not have the funds to purchase the item or service or the item or service is not available through another source.
- This service cannot be accessed as a means of reimbursement for items or services that have already been obtained and not been pre-approved by the *Personal Options* F/EA
- Participant-directed Goods and Services are purchased from the participant-directed budget.
- The need for PDGS supported by an assessed need documented in the IPP.
- PDGS must be pre-approved by the *Personal Options* F/EA and purchase must be documented by receipts or other documentation of the goods or services from the established business or otherwise qualified entity or individual.

Definition of Service:
New Policy:
Participant-Directed Goods and Services (PDGS) are services, equipment or supplies not otherwise provided through this Waiver program or through the Medicaid State Plan that address an identified need in the IPP and meet the following requirements:

- An item or service that would decrease the need for other Medicaid services and/or promote full membership in the community and/or increase member's safety in the home environment.
- The member does not have the funds to purchase the item or service or the item or service is not available through another source.
- This service cannot be accessed as a means of reimbursement for items or services that have already been obtained and not been pre-approved by the *Personal Options* F/EA
- Participant-directed Goods and Services are purchased from the participant-directed budget.
- The need for PDGS supported by an assessed need documented in the IPP.
- PDGS must be pre-approved by the *Personal Options* F/EA and purchase must be documented by receipts or other documentation of the goods or services from the established business or otherwise qualified entity or individual.
- The need must be documented on the Annual IPP unless it is a new need which must be documented on a Critical Juncture IPP.

- NOTE: All services must be based on assessed need and within a member's individualized budget. If the need was documented on the Annual IPP, but not incorporated into the budget at that time and the member is over budget, then modifications of the services already purchased must occur before this authorization will be approved. If this is a new need, then it should be presented as a need to increase the budget based on a new need.

Limitations/Caps:
Old Policy:

- The amount of service is limited by the member's individualized participant-directed budget and spending plan.
- The annual budget allocation may be adjusted (increased or decreased) only if changes have occurred regarding the member's assessed needs.
- 1000 units ($1,000) per member's IPP year in combination with Traditional Environmental Accessibility Adaptations- Vehicle and Home and Participant-Directed Goods and Services – Agency with Choice.
- To access Participant-directed Goods and Services the member must also access at least 1 other type of participant-directed service during the budget year—i.e. PCS, Respite and/or transportation.
- The following represents non-permissible Goods and Services:
  - Goods, services or supports covered by the State Plan, Medicare, other third-parties, including education, home-based schooling and vocational services;
  - Goods, services and supports available through another source;
  - Goods, services or supports provided to or benefiting persons other than the individual member;
  - Room and board;
  - Personal items and services not related to the qualifying disability;
  - Gifts for workers/family/friends, payments to someone to serve as a representative,
  - Clothing, food and beverages;
  - Electronic entertainment equipment;
  - Utility payments;
  - Swimming pools and spas;
  - Costs associated with travel;
  - Household furnishings such as comforters, linens, drapes and furniture
  - Vehicle expenses including routine maintenance and repairs, insurance and gas money;
  - Medications, vitamins and herbal supplements;
  - Illegal drugs or alcohol;
  - Experimental or investigational treatments
  - Printers;
  - Monthly internet service;
  - Yard work;

- Household cleaning supplies;
- Home maintenance;
- Pet care;
- Respite services;
- Spa services;
- Education;
- Personal hygiene items;
- Day care; and
- Discretionary cash.

Limitations/Caps:
New Policy:

- The amount of service is limited by the member's individualized participant-directed budget and spending plan.
- The annual budget allocation may be adjusted (increased or decreased) only if changes have occurred regarding the member's assessed needs.
- 1000 units ($1,000) per member's IPP year in combination with Traditional Environmental Accessibility Adaptations- Vehicle and Home and Participant-Directed Goods and Services – Agency with Choice.
- The *Personal Options* provider must not pay PDGS funds to the member, staff, or family/legal representative. Payment for cost of services must be issued to the vendor of the PDGS service.
- To access Participant-directed Goods and Services the member must also access at least 1 other type of participant-directed service during the budget year—i.e. PCS, Respite and/or transportation.
- The following represents non-permissible Goods and Services:
  - Goods, services or supports covered by the State Plan, Medicare, other third-parties, including education, home-based schooling and vocational services;
  - Goods, services and supports available through another source;
  - Goods, services or supports provided to or benefiting persons other than the individual member;
  - Room and board;
  - Personal items and services not related to the qualifying disability;
  - Gifts for workers/family/friends, payments to someone to serve as a representative,
  - Clothing, food and beverages;
  - Electronic entertainment equipment;
  - Utility payments;
  - Swimming pools, hot tubs and spas;
  - Costs associated with travel;
  - Household furnishings such as comforters, linens, drapes and furniture
  - Vehicle expenses including routine maintenance and repairs, insurance and gas money;

- Medications, vitamins and herbal supplements;
- Illegal drugs or alcohol;
- Experimental or investigational treatments
- Printers;
- Monthly internet service;
- Yard work;
- Household cleaning supplies;
- Home maintenance;
- Pet care;
- Respite services;
- Spa services;
- Education;
- Personal hygiene items;
- Day care; and
- Discretionary cash.

513.9.2.3.2 Person-Centered Support: *Personal Options,* Participant-Directed Option

Definition of Service:
Old Policy:
Person-Centered Support (PCS) consists of individually tailored training and/or support activities that enable the member to live and inclusively participate in the community in which the member resides, works, receives their education, accesses health care, and engages in social and recreational activities. The activities and environments are designed to increase the acquisition of skills and appropriate behavior that are necessary for the member to have greater independence, personal choice and allow for maximum inclusion into their community.

PCS may be used to assist with the acquisition, retention and/or improvement of the following areas of functionality:

- Self-care
- Receptive or expressive language
- Learning
- Mobility
- Self-direction
- Capacity for Independent Living

PCS services must be assessment based and outlined on the member's spending plan. PCS activities may be completed in the member's residence or in public community settings. Activities must allow the member to reside and participate in the most integrated setting appropriate to their needs. Qualified Support Workers (QSW) Staff providing PCS services may participate in person-centered planning, IDT meetings and the annual assessment of functioning for eligibility conducted by ASO.

Definition of Service:
New Policy:
Person-Centered Support (PCS) provided by awake and alert staff consists of individually tailored training and/or support activities that enable the member to live and inclusively participate in the community in which the member resides, works, receives their education, accesses health care, and engages in social and recreational activities. The activities and environments are designed to increase the acquisition of skills and appropriate behavior that are necessary for the member to have greater independence, personal choice and allow for maximum inclusion into their community.

PCS may be used to assist with the acquisition, retention and/or improvement of the following areas of functionality:

- Self-care
- Receptive or expressive language
- Learning
- Mobility
- Self-direction
- Capacity for Independent Living

PCS services must be assessment based and outlined on the member's spending plan. PCS activities may be completed in the member's residence or in public community settings. Activities must allow the member to reside and participate in the most integrated setting appropriate to their needs. Qualified Support Workers (QSW) Staff providing PCS services may participate in person-centered planning, IDT meetings and the annual assessment of functioning for eligibility conducted by ASO.

The QSW may compile data collected in daily documentation during their shift for later review by the member's TC or BSP, as long as safety/health and oversight of the member are not compromised.

Limitations/Caps:
Old Policy:

- The amount of service is limited by the member's individualized participant-directed budget and spending plan.
- The annual budget allocation may be adjusted (increased or decreased) only if changes have occurred regarding the member's assessed needs.
- PCS services are available to members living in the following types of residential settings: the member's family residence, Specialized Family Care Homes and unlicensed ISS.
- This service may not be billed concurrently with any other direct care service.

- PCS cannot replace the routine care, and supervision which is expected to be provided by a parent of a minor member or a Specialized Family Care Provider caring for a minor child. The IDT makes every effort to meet the member's assessed needs through natural supports.
- The member's appointed representative may also be employed by the member paid for providing I/DD Waiver services under certain circumstances and if certain safeguards are observed as stated below:
    - The representative/employee is a single parent residing in the home with the member and no other person is available to act as the representative or employee.
    - The representative may not be paid for more than 40 hours per week for working for the member.
- PCS may not substitute for federally mandated educational services.
- PCS is not available while the member is hospitalized in a Medicaid certified hospital except when the behavioral needs of the member arise due to the temporary to change in environment.
- PCS is not available in nursing homes, psychiatric hospitals or rehabilitative facilities located either within or outside of a medical hospital.
- PCS may not be provided by the member's spouse.
- Up to 48 units/12hours of Person-Centered Support services every 3 months per member may be billed, if necessary, for the purpose of training in member-specific instruction (i.e. behavioral intervention plans, medical plans of care, specific instructional activities, etc.) and/or service objectives. Only TCs, BSPs or RNs may bill for providing training to Person-Centered Support staff.

Limitations/Caps:
New Policy:

- The amount of service is limited by the member's individualized participant-directed budget and spending plan.
- The annual budget allocation may be adjusted (increased or decreased) only if changes have occurred regarding the member's assessed needs.
- PCS: Personal Options services are available to members living in the following types of residential settings: the member's family residence, Specialized Family Care Homes and unlicensed ISS.
- PCS: Personal Options services are limited to the equivalent monetary value of 11,680 units/2920 hours (based upon average of 8 hours per day) of PCS: Traditional Family per member's annual IPP year for natural family/Specialized Family Care home settings for members eligible to receive public education services. This is in combination with all direct care services available: PCS: Agency, PCS: Family, Supported Employment, Facility Based Day Habilitation, LPN (When LPN units exceed 2,920 units), AwC: PCS and *Personal Options:* PCS excluding Traditional Respite, AwC Respite and *Personal Options* Respite.

- PCS: Personal Options services are limited to the equivalent monetary value of 17,520 units/4380 hours (based upon average of 12 hours per day) of PCS: Traditional Family per member's annual IPP year for natural family/Specialized Family Care home settings for members not eligible to receive public education services. This is in combination with all direct care services: PCS: Agency, PCS: Family, Supported Employment, Facility Based Day Habilitation, LPN (When LPN units exceed 2,920 units), AwC: PCS, *Personal Options:* PCS excluding Traditional Respite, AwC Respite and *Personal Options* Respite.
- PCS: Personal Options services are limited to the equivalent monetary value of 35,712 units/8928 hours annually (based upon an average of 24 hours per day) per member's annual IPP year for members in ISS and licensed settings, to include training. This is in combination with all direct care services available: PCS: Agency, Supported Employment, Facility-Based Day Habilitation and LPN (when LPN units exceed 2,920 units) and PCS: Agency with Choice.
- This service may not be billed concurrently with any other direct care service.
- PCS: Personal Options cannot replace the routine care, and supervision which is expected to be provided by a parent of a minor member or a Specialized Family Care Provider caring for a minor child. The IDT makes every effort to meet the member's assessed needs through natural supports.
- A member's representative may not be a paid employee providing *Personal Options* I/DD Waiver services to the member.
- PCS: Personal Options may not substitute for federally mandated educational services.
- PCS: Personal Options is not available while the member is hospitalized in a Medicaid certified hospital except when the behavioral needs of the member arise due to the temporary to change in environment.
- PCS: Personal Options is not available in nursing homes, psychiatric hospitals or rehabilitative facilities located either within or outside of a medical hospital.
- PCS: Personal Options may not be provided by the member's spouse.
- Up to 48 units/12hours of *Personal Options: PCS* services every 3 months per member may be billed, if necessary, for the purpose of training in member-specific instruction (i.e. behavioral intervention plans, medical plans of care, specific instructional activities, etc.) and/or service objectives. Only TCs, BSPs or RNs may bill for providing training to Person-Centered Support staff.

Qualified Support Worker Qualifications:
Old Policy:
All of the requirements in section 513.9.2.2.1, 513.9.2.2.2 and 513.9.2.2.3 must be met.

Qualified Support Worker Qualifications:
New Policy:
All of the requirements in sections 513.9.2.2.1.1, 513.9.2.2.1.2, 513.9.2.2.1.3 and 513.9.2.2.1.4 must be met.

513.9.2.3.3 Respite: Participant-Directed Option: *Personal Options* Model

Definition of Service:
Old Policy:
Respite Services are specifically designed to provide temporary substitute care for an individual whose primary care is normally provided by the family or other primary care-giver of a member. The services are to be used on a short-term basis due to the absence of or need for relief of the primary care-giver. Respite is designed to focus on the needs of the care-giver for temporary relief and to help prevent the breakdown of the care-giver due to the physical burden and emotional stress of providing continuous support and care to the dependent member. Respite Care services consist of temporary care services for an individual who cannot provide for all of their own needs. Persons providing respite services may participate in person-centered planning.

Respite may be used to:

- Allow the primary care-giver to have planned time from the caretaker role for him/herself and/or other family members
- Provide assistance to the primary care-giver or member in crisis and emergency situations
- Ensure the physical and/or emotional well-being of the primary care-giver or the member by temporarily relieving the primary care provider of the responsibility of providing care.
- This service may not be billed concurrently with any other direct care service.
- Up to 48 units/12hours of Respite services every 3 months per member may be billed, if necessary, for the purpose of training in member-specific instruction (i.e. behavioral intervention plans, medical plans of care, specific instructional activities, etc.) and/or service objectives. Only TCs, BSPs or RNs may provide training to Respite staff.
- Allow the QSW to attend and participate in IDT meetings and the annual assessment of functioning for eligibility conducted by ASO.

Limitations/Caps:
Old Policy:

- The amount of service is limited by the member's individualized participant-directed budget.
- The annual budget allocation may be adjusted (increased or decreased) only if changes have occurred regarding the member's assessed needs.
- The Agency Staff to member ratio for this service is 1:1, 1:2 and 1:3.
- Only 1:1 or 1:2 ratios are allowed to be utilized in a member's family residence or in a Specialized Family Care Home.
- This service may not be billed concurrently with any other direct care service.
- Respite services are not available to members living in ISS or licensed group home settings.
- Respite services may not be provided by a member's spouse or any other individual living in the member's home.
- Respite is not available in medical hospitals, nursing homes, psychiatric hospitals or rehabilitative facilities located either within or outside of a medical hospital.

New Policy:

- The amount of service is limited by the member's individualized participant-directed budget.
- The annual budget allocation may be adjusted (increased or decreased) only if changes have occurred regarding the member's assessed needs.

- *Personal Options*: Respite services are limited to the equivalent monetary value of 6,912 units/1728 (Average of 144 hours a month or 4.73 hours a day) AwC Respite per member's annual IPP year. This is in combination with all other respite services: Traditional Respite, Traditional Crisis Site Respite, AwC Respite and *Personal Options* Respite. The amount of service is limited by the member's individualized participant-directed budget.
- The annual budget allocation may be adjusted (increased or decreased) only if changes have occurred regarding the member's assessed needs.
- The Agency Staff to member ratio for this service is 1:1, 1:2 and 1:3.
- *Personal Options:* Respite services may not be provided by an individual living in the member's own or family residence in which the member resides or within the Specialized Family Care Home where the member resides.
- This service may not be billed concurrently with any other direct care service.
- Respite services are not available to members living in ISS or licensed group home settings.
- Respite services may not be provided by a member's spouse or any other individual living in the member's home.
- Respite services may not be used to replace natural supports (which includes non-custodial parents) available to the member..
- Respite is not available in medical hospitals, nursing homes, psychiatric hospitals or rehabilitative facilities located either within or outside of a medical hospital.
- *Personal Options*: Respite services may not be provided by an individual living in the member's own or family residence in which the member resides or within the Specialized Family Care Home where the member resides.

Qualified Support Worker Qualifications:
Old Policy:
All of the requirements in section 513.9.2.2.1, 513.9.2.2.2 and 513.9.2.2.3 must be met.

Qualified Support Worker Qualifications:
New Policy:
All of the requirements in sections 513.9.2.2.1.1, 513.9.2.2.1.2, 513.9.2.2.1.3 and 513.9.2.2.1.4 must be met.

513.9.2.3.4 Transportation: Miles: *Personal Options* Participant-Directed Option,

Definition of Service:
Old Policy:

- Transportation: Miles services are provided to the I/DD Waiver member for trips to and from the member's home, licensed I/DD Facility-based Day Habilitation Program or Supported Employment activities, or to a community-based planned activity or service which is based on assessed need.

- This service may be billed concurrently with Person-Centered Support Services: *Personal Options* option or Respite: *Personal Options* option.

New Policy:

- Transportation: Miles services are provided to the I/DD Waiver member for trips to and from the member's home, licensed I/DD Facility-based Day Habilitation Program or Supported Employment activities, or to a community-based planned activity or service which is based on assessed need.
- This service may be billed concurrently with Person-Centered Support Services: *Personal Options* option or Respite: *Personal Options* option.
- The number of miles per service must be included on the member's IPP.

Limitations/Caps:
Old Policy:

- The amount of service is limited by the member's individualized participant-directed budget and spending plan.
- The annual budget allocation may be adjusted (increased or decreased) only if changes have occurred regarding the member's assessed needs.
- Member must be present in vehicle if mileage is billed.
- Must be related to an assessed need in the IPP.
- May be within 30 miles of the West Virginia border when the member is a resident of a county bordering the state of Wes Virginia.
- The amount of transportation provided to a member directing their services must be identified on their spending plan and may not exceed the annual participant-directed budget allocation.
- The member's legal guardian may function as the representative and also be paid for providing transportation services to the member if certain safeguards are observed. These are:
    - The legal guardian is a single parent residing in the home with the member.
    - The legal guardian may not be paid for more than 40 hours per week for working for the member.

Limitations/Caps:
New Policy:

- The amount of service is limited by the member's individualized participant-directed budget and spending plan.
- The annual budget allocation may be adjusted (increased or decreased) only if changes have occurred regarding the member's assessed needs.
- Member must be present in vehicle if mileage is billed. If more than one member is present in the vehicle, then the total mileage will be divided between the number of members present in vehicle.

- Must be related to an assessed need in the IPP.
- May be within 30 miles of the West Virginia border when the member is a resident of a county bordering the state of Wes Virginia.
- The amount of transportation provided to a member directing their services must be identified on their spending plan and may not exceed the annual participant-directed budget allocation.
- The member's legal guardian may function as the representative and also be paid for providing transportation services to the member if certain safeguards are observed. These are:
    - The legal guardian is a single parent residing in the home with the member.
    - The legal guardian may not be paid for more than 40 hours per week for working for the member.

Qualified Support Worker Qualifications:
Old Policy:
All of the requirements in section 513.9.2.2.1, 513.9.2.2.2 and 513.9.2.2.3 must be met in addition to the following requirement:

- The Qualified Support Worker must have a valid driver's license, proof of current vehicle insurance and registration in addition to abiding by local, state and federal laws regarding vehicle licensing, registration and inspections upon hire and checked annually thereafter.

Qualified Support Worker Qualifications:
New Policy:
All of the requirements in sections 513.9.2.2.1.1, 513.9.2.2.1.2, 513.9.2.2.1.3 and 513.9.2.2.1.4 must be met in addition to the following requirement:

- The Qualified Support Worker must have a valid driver's license, proof of current vehicle insurance and registration in addition to abiding by local, state and federal laws regarding vehicle licensing, registration and inspections upon hire and checked annually thereafter.

513.10 DOCUMENTATION AND RECORD RETENTION REQUIREMENTS, SPECIFIC REQUIREMENTS

Old Policy:
I/DD Waiver Program provider agencies must maintain a specific record for all services received for each I/DD Waiver Program member including, but not limited to:

- Each I/DD Waiver provider who provides Service Coordination services is required to maintain all required I/DD Waiver documentation on behalf of the State of West Virginia and for state and federal monitors.

- All I/DD Waiver Program forms as applicable to the policy requirement or service code requirement.
- Agencies that wish to computerize any of the forms, may do so, however once the automated IPP becomes available through the CareConnection®, it must be used by all agencies. All basic components must be included and the name/number indicated on the form (refer to *Chapter 300, Provider Participation Requirements,* for a description of general requirements for Medicaid record retention and documentation). This can be found on the BMS web site (www.dhhr.wv.gov/bms).
- All providers of Waiver services must maintain service progress notes, behavioral data collection, and/or attendance records to substantiate that services billed by the I/DD Waiver Program provider agency were provided on the dates listed and were for the actual amount of time and number of units claimed. Specific documentation requirements are detailed in Section 513.9, including all subsections of 513.9, Description of Covered Services.
- Day to day documentation for services by a provider agency is to be maintained by the provider agency that provides and bills for said service. Monitoring and review of services as related to the IPP or monthly summary (visit) are to be maintained in the Service Coordination provider record. In the course of monitoring of the IPP and services, the Service Coordinator may review or request specific day to day documentation. All documentation provided must meet the criteria for documentation as indicated in the policy manual such as date, actual time of service and number of units claimed.

New Policy:
I/DD Waiver Program provider agencies must maintain a specific record for all services received for each I/DD Waiver Program member including, but not limited to:

- Each I/DD Waiver provider who provides Service Coordination services is required to maintain all required I/DD Waiver documentation on behalf of the State of West Virginia and for state and federal monitors.
- All I/DD Waiver Program forms as applicable to the policy requirement or service code requirement.
- Agencies that wish to computerize any of the forms, may do so, however once the automated IPP becomes available through the CareConnection®, it must be used by all agencies. All basic components must be included and the name/number indicated on the form (refer to *Chapter 300, Provider Participation Requirements,* for a description of general requirements for Medicaid record retention and documentation). This can be found on the BMS web site (www.dhhr.wv.gov/bms).
- All providers of Waiver services must maintain service progress notes, behavioral data collection, and/or attendance records to substantiate that services billed by the I/DD Waiver Program provider agency were provided on the dates listed and were for the actual amount of time and number of units claimed. Specific documentation

requirements are detailed in Section 513.9, including all subsections of 513.9, Description of Covered Services.

- Day to day documentation for services by a provider agency is to be maintained by the provider agency that provides and bills for said service. Monitoring and review of services as related to the IPP or monthly summary (visit) are to be maintained in the Service Coordination provider record. In the course of monitoring of the IPP and services, the Service Coordinator may review or request specific day to day documentation. All documentation provided must meet the criteria for documentation as indicated in the policy manual such as date, actual time of service and number of units claimed.
- Required on-site documentation may be maintained in an electronic format as long as the documentation is accessible to individuals who may need to access it. In addition to all documentation required by other state agencies (OHFLAC), the I/DD Waiver provider must disseminate this information to the member when the member resides in their natural family home. The I/DD Waiver provide must ensure that the following is maintained in the member's home when the member resides in an ISS or group home setting:
    - Personal demographic/emergency contact information. If community activities are planned, a copy will be taken in a sealed envelope for emergency use only.
    - Current complete IPP including current psychological, social and physical evaluations (if applicable), current behavior support plan, activity schedule, Crisis Plan, IHP and IEP.
    - (ISS/GH) Current doctor's orders for every medication administered at that site, even if the client self-administers
    - Current daily direct support documentation, task analysis and/or staff notes
    - (ISS/GH) Current MARs
    - Copies of other pertinent medical or evaluative information relevant to treatment

CHAPTER 513—COVERED SERVICES, LIMITATIONS, AND EXCLUSIONS FOR I/DD WAIVER SERVICES
TABLE OF CONTENTS

CHAPTER 513—COVERED SERVICES, LIMITATIONS, AND EXCLUSIONS FOR I/DD WAIVER SERVICES

INTRODUCTION

The West Virginia Medicaid Program is administered pursuant to Title XIX of the Social Security Act and Chapter 9 of West Virginia Code. The Bureau for Medical Services (BMS) in the West Virginia Department of Health and Human Resources (DHHR) is the single State agency responsible for administering the Program. This program, therefore, must also function within federally defined parameters. Any service, procedure, item, or situation not discussed in the manual must be presumed non-covered.

Medicaid offers a comprehensive scope of medically necessary medical and mental health services. All covered and authorized services must be provided by enrolled providers practicing within the scope of their license, utilizing professionally accepted standards of care, and in accordance with all State and Federal requirements. Enrolled providers are subject to review of services provided to Medicaid members by BMS whether or not the services require prior authorization. All providers of services must maintain current, accurate, legible and completed documentation to justify medical necessity of services provided to each Medicaid member and made available to BMS or its designee upon request.

This chapter sets forth the BMS requirements for payment of services provided to eligible West Virginia Medicaid members under the Waiver Program for persons with Mental Retardation and/or Developmental Disabilities. These members may or may not be eligible for other Medicaid services.

The policies and procedures set forth herein are regulations governing the provision of services under the Mental Retardation and/or Developmental Disabilities Waiver of the Medicaid Program Administered by the DHHR under the provisions of Title XIX of the Social Security Act and Chapter 9 of the West Virginia Code. This program is hereafter referred to as the Intellectual Disabilities and Developmental Disabilities (I/DD) Waiver Program.

All services, except Participant-Directed Goods and Services are available through the Traditional Service Option offered by I/DD Waiver providers state-wide. Each member must purchase service coordinator services through the Traditional Option. For more detailed information on the Traditional Service Option, see section 513.9.1.

Four services are available through the Participant-Directed Option to members who are eligible and who choose to direct part or all of the 4 services available through this option. These 4 services (Person-Centered Supports, Respite, Transportation and Goods and Services) are described more fully in section 513.9.2. There are 2 Participant-Directed Financial Management Services available to assist members with self-directing these services: Agency with Choice

Model and *Personal Options* Model. Members may choose all of their services through the Traditional Option or the member may choose to mix Traditional Option services and Participant-Directed Option Services. Members who choose to do this must first purchase those Traditional services that may not be self-directed, including service coordination, before cashing out their remaining budget to purchase one or all of the 4 Participant-Directed services available.

All required documentation forms are available on the Bureau for Medical Services website: http://www.dhhr.wv.gov/bms/hcbs/IDD/Pages/default.aspx

513.1 DEFINITIONS

Definitions governing the provision of all West Virginia Medicaid services will apply pursuant to *Common Chapter 200, Acronyms and Definitions,* of the Provider Manual. In addition, the following definitions also apply to the requirements for payment of the services in the I/DD Waiver Program described in this chapter.

Activities of Daily Living (ADLs): activities usually performed in the course of a normal day in an individual's life, such as eating, dressing, bathing and personal hygiene, mobility, and toileting.

Administrative Service Organization (ASO): the contracted agent of BMS responsible for processing initial applications, investigating complaints, assessing waiver members' needs, functionality and supports and determining an individualized budget. The ASO also provides education for members, their families, their workers and I/DD Waiver providers. The ASO interfaces with the claims management system to ensure that purchased services are properly reimbursed.

Agency with Choice (AwC) Service Financial Management Service Agency: an agency who meets all the qualifications of an I/DD Waiver provider and is approved as an Agency with Choice by BMS to assist members and/or their legal/non-legal representatives with directing participant-directed services.

Agency Staff: staff employed or contracted by an I/DD Waiver provider to provide services to members in the I/DD Waiver program through both the Traditional Option and the Agency with Choice Option.

Aging and Disability Resource Centers (ADRCs): the state agency sponsored by the West Virginia Bureau of Senior Services who have a wide-ranging list of resources available for informational purposes. These services and supports can help the member remain at home and active in the community by providing a comprehensive assessment of the member's needs and empower the member to make informed choices and decisions regarding long-term care.

Annual "Anchor" Date: the annual date by which the member's medical eligibility must be recertified and is determined by the anniversary date that is the first day of the month following

the date when initial medical eligibility was established by the Medical Eligibility Contracted Agent (MECA). This date will also serve as the annual IPP date.

Approved Medication Assistive Personnel (AMAP): an **unlicensed** staff member who meets the eligibility requirements to become an AMAP, has successfully completed the required training and competency testing and has been deemed competent by the RN to administer medications to residents in the covered facilities in accordance to WV State Code 16-5O and Legislative Rule 64CSR60.

Board of Review: the agency under the West Virginia DHHR and the Office of Inspector General that provides impartial hearings to members who are aggrieved by an adverse action including denial of eligibility, eligibility terminations or denial of a covered benefit or service.

CareConnection®: a HIPAA compliant software system that couples technology with clinical practice to offer an effective, efficient platform for ASO services.

Circle of Support: a group of people with an interest in the member who offer either evaluation, planning, advocacy, or support to the member on an ongoing basis.

Common Law Employer: the entity that is viewed by the IRS, United States Customs and Immigration Service, state tax and labor departments as the employer. In the AwC FMS Model, the I/DD Waiver provider is the Common Law Employer and in the *Personal Options* FMS Model, the member is the Common Law Employer.

Co-Employer: the relationship between a member and an I/DD Waiver provider who is a certified Agency with Choice (AwC) provider in which the member and the AwC provider share in the responsibility of hiring, training, scheduling, supervising and dismissing the member's agency staff while the AwC provider is fully responsible for all payroll functions, including determining wages and benefits of agency staff.

Critical Juncture: any time that there is a significant event or change in the member's life that requires a meeting of the Interdisciplinary Team (IDT). The occurrence may require that a service needs to be decreased, increased or changed. A critical juncture constitutes a change in the member's needs such as behavioral, mental health or physical health, service/service units, support, setting, or a crisis.

Days: calendar days unless otherwise specified.

Developmental Disability: persons with related conditions who have a severe, chronic disability that meets all of the following conditions: It is attributable to cerebral palsy or epilepsy; or any other condition, other than mental illness, found to be closely related to mental retardation because this condition results in impairment of general intellectual functioning or adaptive behavior similar to that of mentally retarded persons, and requires treatment or services similar to those required for these persons. It is manifested before the person reaches

age 22; it is likely to continue indefinitely; it results in substantial functional limitations in 3 or more of the following areas of major life activity:

(1) Self-care,
(2) Understanding and use of language,
(3) Learning,
(4) Mobility,
(5) Self-direction, and,
(6) Capacity for independent living. (Refer to Code of Federal Regulations 42 CFR 435.1010).

Direct Care Services: Person-Centered Support, Respite, Facility-based Day Habilitation, Crisis, Supported Employment and LPN (when LPN services are provided for more than 2 hours per day) services available through the I/DD Waiver program.

Extended Professional Staff: WV Licensed Dietitians, Occupational Therapists, Physical Therapists and Speech Therapists who are enrolled Medicaid providers who contract with an I/DD Waiver provider to provide services in their specialty.

Financial Management Service (FMS): a general term applied to a service/function that assists a member to:

a) manage and direct the distribution of funds contained in the participant-directed budget;
b) facilitate the employment of staff by the member by performing as the member's agent such employer responsibilities as verifying worker qualifications, processing payroll, withholding and filing federal, state, and local taxes, and making tax payments to appropriate tax authorities; and,
c) performing fiscal accounting and making expenditure reports to the participant and/or their legal representative. In the I/DD Waiver, both Agency with Choice (AwC) and *Personal Options* are models of Financial Management Services.

Human Services Field Degree: Four year degree from accredited college or university in one of the following fields: Psychology; Criminal Justice; Board of Regents; Recreational Therapy; Political Science; Nursing; Sociology; Social Work; Counseling; Teacher Education; Behavioral Health; Liberal Arts or other degree approved by the West Virginia Board of Social Work Examiners**.**

Incident: any unusual event occurring to a member that needs to be recorded and investigated for risk management or Quality Improvement purposes.

Independent Psychologist (IP): a West Virginia licensed psychologist who is a WV Medicaid Provider who performs comprehensive psychological evaluations independent of I/DD Waiver providers and who is a member of the Independent Psychologist Network trained by the Medical Eligibility Contracted Agent (MECA).

Independent Psychological Evaluation (IPE): an evaluation completed by a psychologist of the Independent Psychologist Network which includes background information, behavioral observations, documentation that addresses the 6 major life areas, developmental history, mental status examination, diagnosis and prognosis.

Independent Psychologist Network (IPN): West Virginia licensed psychologists who are enrolled West Virginia Medicaid Providers and have completed the required IPN Training provided by the Medical Eligibility Contracted Agent (MECA) training and agreed to complete the IPE as defined.

Individual Education Plan (IEP): the legal document that defines an individual's special education program and includes the disability under which the individual qualifies for Special Education Services, the services the school will provide, the individual's yearly goals and objectives and any accommodations that must be made to assist in the individual's learning.

Individual Program Plan (IPP): the required document outlining activities that primarily focus on the establishment of a potentially life-long, person-centered, goal-oriented process for coordinating the range of services, instruction and assistance needed by members of the I/DD Waiver Program. It is designed to ensure accessibility, accountability, and continuity of support and services. The content of the IPP must be guided by the member's needs, wishes, desires and goals but based on the member's assessed needs.

Individual Program Planning: the process by which the member is assisted by a team consisting of their legal representative (when applicable), their advocate (when applicable) other natural supports the member chooses to invite as well as attendees required by the I/DD Waiver program policy manual who meet to decide what needs to be done, by whom, when and how and to document the decisions made by this planning team. The purpose of IPP planning is to identify and address a member's assessed needs.

Intellectual Disabilities and Developmental Disabilities (I/DD) Waiver Program: the program formerly referred to as the MR/DD Waiver Program funded by the Center for Medicare and Medicaid and administered by the Bureau for Medical Services. This program offers a comprehensive scope of services and supports to eligible I/DD Waiver program members. Authorized services, if applicable, must be rendered by enrolled I/DD Waiver providers within the scope of their licenses and in accordance with all state and federal requirements. BMS also contracts with an ASO to perform waiver operations including annual functional assessment for eligibility and budget determinations for active program members, prior authorization of services, and quality assurance/improvement functions. BMS contracts with a MECA to assess and determine initial medical eligibility for program applicants as well as review and approve annual re-determination of eligibility for waiver services. BMS contracts with a Claims Agent to process Medicaid claims. BMS also contracts with any qualified Agency with Choice (AwC) and with one Fiscal Employer Agent (F/EA) known as *Personal Options* to provide Financial Management Services to waiver members who choose to direct their own services through the participant-directed service options. *Personal Options* also provides Information and Referral services to members choosing that Participant-Directed Option. The Office of Health Facility

Licensure and Certification (OHFLAC) provides monitoring and supervision of members' health and welfare through oversight of I/DD Waiver providers.

Intellectual Disabilities and Developmental Disabilities (I/DD) Waiver Provider: an agency that has been granted a Certificate of Need (CON) from the West Virginia Health Care Authority or an exemption from the CON Summary Review Committee and is licensed by OHFLAC to provide behavioral health services and is an enrolled West Virginia Medicaid provider.

Intensively Supported Setting (ISS): a residential home setting that is not licensed by the Office of Health Facility and Licensure with one to 3 adults living in the home. The member's name is either on the lease or the member pays rent. No biological, adoptive or other family members reside in the home setting with the member. An exception would be when siblings who are also I/DD Waiver members reside in a setting without any other family members.

Interdisciplinary Team (IDT): the member, service coordinator and when applicable, the legal representative and/or professionals, paraprofessionals, and others who possess the knowledge, skill, and expertise necessary to accurately identify the comprehensive array of services required to meet the individual's needs and design appropriate services and specialized programs responsive to those needs. The IDT meetings are guided by the member's needs, wishes, desires, and goals.

Intermediate Care Facility for Individuals with Intellectual Disabilities (ICF/IID): an institution for persons with mental retardation that provides, in a protected residential setting, ongoing evaluation, planning, 24 hour supervision, coordination, and integration of health or rehabilitative services to help each individual function at his greatest ability as defined in 42 CFR 435.1010.

Legal Representative: the parent of a minor child or a court appointed legal guardian for an adult or child or anyone with the legal standing to make decisions for the member.

Licensed Home: a residential setting that is owned, leased and/or operated by an I/DD Waiver provider and licensed by Office of Health Facility and Licensure.

Managing Employer: the member or their legal representative who use the AwC FMS model to direct some of their services by controlling the work being performed by sharing in the responsibility of hiring, training, scheduling, supervising and dismissing the member's agency staff, but not determining wages or benefits.

Medicaid Fair Hearing: the formal process by which a member or applicant may appeal a decision if the individual feels aggrieved by an adverse action that is consistent with state and federal law, including eligibility denials, eligibility terminations or when denied a covered benefit or service. This process is conducted by an impartial Board of Review Hearing Officer.

Medical Eligibility Contracted Agency (MECA): means the contracted agent of BMS responsible for the determination of medical eligibility for I/DD Waiver applicants, annual

redeterminations of continued eligibility for members and recruiting and training licensed psychologists for participation in the IPN.

Medication Administration Record (MAR): is the report that serves as a legal record of the drugs administered to a member by a nurse or other healthcare professional, such as an Approved Medication Assistive Personnel (AMAP).

Medley Advocate: Employees of the designated Medley Advocacy Agency who advocate for the inclusion of services appropriate to the individual and for services consistent with the principles of least restrictive alternative and the member's choice.

Medley Class Member: Individuals with a diagnosis of mental retardation who were institutionalized prior to the age of 23 in a West Virginia state institution i.e. Weston State Hospital, William Sharpe Hospital, Huntington State Hospital, Mildred Bateman Hospital, Colin-Anderson Center, Greenbrier Center, Spencer State Hospital, Lakin State Hospital or Hopemont State Hospital for at least 30 days and whose birth date is on or after April 1, 1956.

Member's Family Residence: a residence where the member has a 911 address and lives with at least one biological, adoptive, natural or other family member.

Mental Retardation (Intellectual Disability): is defined as a condition which is usually permanent and originates prior to the age of 18. This condition results in significantly below average intellectual functioning as measured on standardized tests of intelligence (IQ of 70 or below) along with concurrent impairments in age appropriate adaptive functioning. Causes of mental retardation (intellectual disability) may vary and degree of intellectual impairment can range from mild to profound. (See DSM-IV for further explanation.)

Personal Options **Financial Management Services Model:** the Fiscal/Employer Agent (F/EA) Financial Management Service that is a contracted subagent of BMS that assists the member and/or their legal/non-legal representative with exercising employer and budget authority by assisting with the hiring of member's Qualified Support Workers and completing payroll functions. The F/EA also provides Information and Assistance (I&A) to members choosing to direct the available services.

Natural Supports: Family, friends, neighbors or anyone who provides a service to a member but is not reimbursed.

Non-legal Representative: a person freely appointed by the member or their legal representative to assist the member or their legal representative with the responsibilities of participant direction, including exercising budget authority and employer authority.

Office of Health Facility Licensure and Certification (OHFLAC): the state agency that inspects and licenses I/DD Waiver providers to assure the health and safety of I/DD Waiver members. Licensed entities include but are not limited to behavioral health providers, I/DD

Waiver providers, facility-based day programs, group homes, supported employment facilities and service coordination agencies.

Participant-Directed Services: Four services (Person-Centered Supports, Respite, Transportation and Goods & Services) that an I/DD Waiver member not living in a licensed setting may choose to self-direct. The member may determine what mix of personal assistance supports and services work best for them.

Pre-hearing Conference: a meeting requested by the applicant or member and/or legal representative to review the information submitted for the medical eligibility determination and the basis for the denial/termination. A Medicaid Fair Hearing pre-hearing conference may be requested any time prior to a Medicaid Fair Hearing.

Professional Experience: a position that requires a minimum of a Bachelor's degree or a professional license, such as an LPN.

Public Community Location: any community setting open to the general public such as libraries, banks, stores, post offices, etc.

Public Education Services: school services for students through the end of the school year when the student turns 21 years of age or the student has met graduation requirements for a standard high school diploma as defined by the Individuals with Disabilities Education Act (IDEA) and WV policy 2419.

Qualified Support Worker: direct care workers employed by the self-directing member who provide person-centered support services, respite services or transportation services to the member through one of the Participant-Directed Options.

Resource Consultant: a representative from the Fiscal/Employer Agent's Financial Management Service who assists the member and/or their legal/non-legal representative who choose this Participant-Directed Option with the responsibilities of self-direction; developing a plan and budget to meet their needs; providing information and resources to help hire, train and manage employees; provides resources to assist the member with locating staff,; providing information and resources to help purchase goods and services; helping to complete required paperwork for this service option; and helping the member select a representative to assist them, as needed.

Safe Environment: a place where people feel secure; where they are not at risk of being subject to harm, abuse, neglect or exploitation; and where they have the freedom to make choices without fear of recourse.

Specialized Family Care Provider (SFCP): an individual who operates a foster-care home which has received certification through the WVDHHR Specialized Family Care Program. Both the home and the individual providing services are certified by a Specialized Family Care Family Based Care Specialist.

Stand-by Staff: Agency staff that are on stand-by status to replace Electronic Monitoring and On-Site Surveillance within 20 minutes or less of notification by base monitoring staff.

Traditional Services: home and community-based services that help members of the I/DD Waiver program maintain their independence and determine for themselves what mix of personal assistance supports and services work best for them.

West Virginia Incident Management System (WV IMS): a web-based program used by I/DD Waiver providers, AwC providers and *Personal Options* staff to report simple, critical and abuse, neglect and exploitation incidents to the ASO and BMS.

513.2 PROGRAM DESCRIPTION

The I/DD Waiver Program is West Virginia's home and community-based services program for individuals with intellectual and/or developmental disabilities. It is administered by BMS pursuant to a Medicaid waiver option approved by the Centers for Medicare and Medicaid (CMS), the federal agency responsible for the I/DD Waiver Program. The I/DD Waiver Program is a program that reimburses for services to instruct, train, support, supervise, and assist individuals who have intellectual and/or developmental disabilities in achieving the highest level of independence and self-sufficiency possible. The I/DD Waiver Program provides services in natural settings, homes and communities where the member resides, works and shops.

513.2.1 Bureau for Medical Services Contractual Relationships

The Bureau for Medical Services (BMS) contracts with an Administrative Services Organization (ASO). The ASO acts as an agent of BMS and administers the operation of the I/DD Waiver Program. The ASO processes initial eligibility determination packets and conducts the annual functional assessment to establish re-determination of medical eligibility. The ASO conducts education for I/DD Waiver providers, members, advocacy groups, and DHHR. The ASO provides a framework and a process for the purchase of waiver services. At times, the ASO, in collaboration with BMS will provide answers to policy questions which will serve as policy clarifications. These policy clarifications will be posted on the BMS I/DD Waiver website located at: http://www.dhhr.wv.gov/bms/hcbs/IDD/Pages/default.aspx under POLICY CLARIFICATIONS.

The ASO provides authorization for services that are based on the member's assessed needs and provides service registration information to the claims payer. BMS contracts with I/DD Waiver providers for the provision of services for members.

BMS contracts with a Medical Eligibility Contracted Agent (MECA) to determine initial and re-determination eligibility of prospective and active members and to recruit and train licensed psychologists to participate in the Independent Psychologist Network. The ASO and the MECA work together to process initial applications and re-determination packets.

BMS contracts with a Fiscal/ Employer Agent (F/EA) to administer the *Personal Options* Financial Management Services (FMS) program. The F/EA is as a subagent of BMS for the purpose of performing employer and payroll functions for members wishing to self direct some of their services through the *Personal Options* FMS..

BMS also contracts with licensed I/DD Waiver providers who wish to participate in the West Virginia Medicaid Program. This includes an additional certification with I/DD Waiver providers who wish to provide the Participant-Directed Agency with Choice Financial Management Service Option.

A contact list for the ASO, MECA and *Personal Options* is located in Section 513.14.

513.2.2 Traditional and Agency with Choice Provider Enrollment and Responsibilities

In addition to provider enrollment requirements in *Chapter 300, Provider Participation Requirements*, I/DD Waiver Program providers must meet all the requirements listed below.

- Receive a Certificate of Need (CON) approval from the West Virginia Health Care Authority through the full length CON process or through the Summary Review process.
- Obtain and maintain a behavioral health license through OHFLAC.
- Meet and maintain all BMS enrollment requirements including a valid provider agreement on file that is signed by the I/DD Waiver provider and BMS as well as a valid Medicaid enrollment agreement.
- Ensure that a member or agency staff are not discharged, discriminated or retaliated against in any way if they have been a complainant, on whose behalf a complaint has been submitted or who has participated in an investigation process that involves the I/DD Waiver provider.
- Ensure that a member is not discharged unless a viable discharge/transfer plan is in place that effectively transfers all services the member needs to another provider(s) and is agreed upon by the member and/or their legal representative and the receiving provider(s).
- Meet and maintain the standards established by the Secretary of the U. S. Department of Health and Human Services (DHHS), and all applicable state and federal laws governing the provision of these services.
- Ensure that services are delivered and documentation meets regulatory and professional standards before the claim is submitted.
- Ensure that all required documentation is maintained at the agency on behalf of the State of West Virginia and accessible for state and federal audits.
- Begin the mandatory I/DD Waiver Program training for all agency staff on the first day of employment and document all mandatory training on the Certificate of Training Form (WV-BMS-I/DD-06).
- Ensure that all agency staff providing direct care services are fully trained in the proper care of the member to whom they will be providing services prior to billing for services. Health and Safety training may be conducted by personnel deemed qualified by IDT

- members and documented on the IPP. Fully trained agency staff must be available until newly hired Agency Staff or Qualified Support Workers are fully trained.
- Hires and retains a qualified workforce.
- Subcontracts with licensed individuals or group practices of the behavioral health profession as defined by the Office of Health Facility and Licensure, if contracting occurs.
- Maintain evidence of implementing a utilization review and quality improvement process which includes verification that services have been provided and the quality of those services meets the standards of the I/DD Waiver Program and all other applicable licensing and certification bodies.
- Provide an assigned agency I/DD Waiver Contact Person whose duties include:
    - Review of Home and Day Program visits to assure compliance with Waiver policy (service coordination provider agencies only);
    - Oversight of agency staff implementing the IPPs of all members in the I/DD Waiver Program; and
    - Communicating with BMS and the ASO.
- Implement the I/DD Waiver Quality Improvement System as further defined in Section 513.2.4.
- Provide each member with maximum choice of I/DD Waiver services within their individualized budgets available in each of the service delivery options.
- Employ or contract with agency staff who meet all the training and credentialing requirements listed under Sections 513.2.2.1, 513.2.2.1.1, 513.2.2.1.2 and 513.2.2.1.3 as well as the individual service definitions of this chapter
- Maintain a record of the training verification or recertification on each agency staff.
- Participate in quarterly training sessions and routine conference calls provided by the ASO.
- Ensure that all residential sites (leased or rented by the I/DD Waiver provider) provide a safe environment for the members and agency staff.
- Provide appropriate auxiliary aids and services when necessary to ensure effective communication with members and/or legal representatives when natural or other supports are not available. This includes the use of qualified sign language interpreters, documents in Braille or large print, audio recordings, etc.
- Complies with all American with Disabilities Act (ADA) requirements if applicable.

513.2.2.1 Additional Qualifications for Traditional Option Agency Staff and Participant-Directed Option Agency with Choice Model Staff

All agency staff, except contracted extended professional staff, having direct contact with members must meet the qualifications listed below.

- Approved Criminal Investigation Background (CIB) checks as defined in Section 513.2.2.1.1.
- Approved Protective Services Record Check as defined in Section 513.2.2.1.2
- Are not on the list of excluded individuals maintained by the Office of the Inspector General as defined in Section 513.2.2.1.3.

- Be over the age of 18.
- Have the ability to perform the tasks.
- Documentation of training initially and annually as mandated by OHFLAC and the I/DD Waiver manual. For all trainings but CPR/First Aid (which expire as indicated by the date on the card), annually is defined as within the month the training expires. These trainings include:

    - Training on treatment policies and procedures, including confidentiality training;
    - Training on Consumer Rights;
    - Training on Emergency Procedures, such as Crisis Intervention and restraints must be provided if the IDT deems necessary based on member assessed needs;
    - Training on Emergency Care to include member-specific Crisis Plans and Emergency Disaster Plans;
    - Training on Infectious Disease Control;
    - Documented training on First Aid by a certified trainer from an approved agency listed on the BMS I/DD Waiver website (http://www.dhhr.wv.gov/bms/hcbs/IDD/Pages/Training.aspx) to include always having current First Aid certification upon hire and as indicated per expiration date on the card;
    - Documented training in Cardiopulmonary resuscitation (CPR) by an approved agency listed on the BMS I/DD Waiver website (http://www.dhhr.wv.gov/bms/hcbs/IDD/Pages/Training.aspx) to include always having current CPR certification upon hire and as indicated per expiration date on the card (This training, including refresher trainings, must include manual demonstration and be specific to the ages of the members supported by the Agency Staff);
    - Training on Member-specific needs (including special needs, health and behavioral health needs); and
    - Training on Recognition of, Documentation of and Reporting of suspected Abuse/Neglect and Exploitation, including injuries of unknown origin.
- Qualifications must be verified initially as current and updated as necessary.
- Agency staff who function as Approved Medication Assistive Personnel (AMAP) must have high school diplomas or the equivalent and be certified AMAPs.

513.2.2.1.1 Criminal Investigation Background Check for Traditional Option Agency Staff and Participant-Directed Option Agency with Choice Model Staff

All I/DD Waiver provider agency staff, except contracted extended professional staff, having direct contact with members must, at a minimum, have results from a state level CIB check which includes fingerprints. This check must be conducted initially and again every 3 years. If the current or prospective employee, within the past 5 years, has lived or worked out of state or currently lives or works out of state, the agency must conduct an additional federal background

check utilizing fingerprints through the National Crime Information Database (NCID) also upon hire and every 3 years of employment. I/DD Waiver providers may do an on-line preliminary check and use these results for a period of 3 months while waiting for state and/or federal fingerprint results to be received. Providers may only use on-line companies that check counties in which the applicant has lived and worked within the last 5 years. An individual who is providing services or is employed by an I/DD Waiver provider cannot be considered to provide services nor can be employed or continue to be employed if ever convicted of:

- Abduction;
- Any violent felony crime including but not limited to rape, sexual assault, homicide, or felonious battery;
- Child/adult abuse or neglect;
- Crimes which involve the exploitation, including financial exploitation, of a child or an incapacitated adult;
- Any type of felony battery;
- Felony arson;
- Felony or misdemeanor crime against a child or incapacitated adult which causes harm;
- Felony drug related offenses within the last 10 years;
- Felony DUI within the last 10 years;
- Hate crimes;
- Kidnapping;
- Murder/ homicide;
- Neglect or abuse by a caregiver;
- Pornography crimes involving children or incapacitated adults including but not limited to, use of minors in filming sexual explicit conduct, distribution and exhibition of material depicting minors in sexually explicit conduct or sending, distributing, exhibiting, possessing, displaying or transporting material by a parent, legal representative or custodian, depicting a child engaged in sexually explicit conduct;
- Purchase or sale of a child;
- Sexual offenses including but not limited to incest, sexual abuse, or indecent exposure;
- Healthcare fraud; and
- Felony forgery.

CIB check results, other than those listed above, which may place a member at risk of personal health and safety or have evidence of a history of Medicaid fraud or abuse must be considered by the licensed I/DD Waiver provider before placing an individual in a position to provide services to the member.

If aware of recent convictions or change in status of an agency staff member providing I/DD Waiver services, the I/DD Waiver provider must take appropriate action, including notification to the BMS I/DD Program Manager.

513.2.2.1.2 Protective Services Record Check for Traditional Option Agency Staff and Participant-Directed Option Agency with Choice Model Staff

All I/DD Waiver provider agency staff hired after January 1, 2009, except for contracted Extended Professional Staff, having direct contact with members must have a WVDHHR Protective Services Record Checks. These must be initiated on each individual upon hire. The results must be considered by the I/DD Waiver provider before continuing employment. The Authorization and Release for Protective Services Record Check (BCF-PSRC 6/2005) is the official form available through the DHHR Bureau for Children and Families, Division of Children and Adult Services or at www.wvdhhr.org/bcf. An individual who has direct contact with a member cannot continue to be employed if the check discloses previous substantiated child or adult maltreatment by the individual. Documentation of the date the form is submitted to BCF for processing must be in the Agency Staff's personnel file.

513.2.2.1.3 Federal Office of the Inspector General (OIG) Medicaid Exclusion List Check for Traditional Option Agency Staff and Participant-Directed Option Agency with Choice Model Staff

The Federal Office of the Inspector General (OIG) List of Excluded Individuals and Entities must be checked by the I/DD Waiver provider for every agency staff who provides Medicaid services prior to employment and monthly. Persons on the OIG Exclusion List cannot provide Medicaid services. The list can be checked at http://exclusions.oig.hhs.gov/. A form may be printed from this website to verify that the check occurred. Any document that has multiple staff names may be kept in a separate file and made available to staff as needed and during agency audits.

513.2.3 Reporting Requirements

Anyone providing services to an I/DD Waiver member who suspects an incidence of abuse or neglect is mandated by Behavioral Health Centers Licensure Legislative Rules (Title 64 Series 11), West Virginia State Code§ 9-6-1, § 9-6-9, and § 49-6A-2 to report the incident to the local DHHR office in the county where the person who is allegedly abused lives. Reports of abuse and/or neglect may be made anonymously to the county DHHR office or by calling 1-800-352-6513, 7 days a week, 24 hours day. A Child Protective Services (CPS) or an Adult Protective Services (APS) Worker may be assigned to investigate the suspected or alleged abuse.

The I/DD Waiver provider must also report suspected incidence of abuse and neglect to OHFLAC. OHFLAC may be contacted at telephone at (304) 558-0050 or reports may be faxed to (304) 558-2515. OHFLAC may assist with referring the report to the proper authorities.

I/DD providers must utilize the West Virginia Incident Management System to track the types of incidents listed below.

- **Simple Incidents**--any unusual event occurring to a member that needs to be recorded and investigated for risk management or quality improvement purposes. Examples would be a minor assault by another member with injury resulting; seizures in an individual not prone to seizures; injuries of unknown origin; high rates of uncharacteristic self-injurious behavior with no significant negative outcome;

- suicidal threats or gestures without significant injury; medication error with minimal or no negative outcome; etc.
- **Critical Incidents**--those incidents with a high likelihood of producing real or potential harm to the health and well-being of the person or persons served but not involving abuse or neglect.
- **Abuse, Neglect and Exploitation Incidents--**those incidents which meet the following definitions of abuse, neglect or exploitation.
    - Abuse means any physical motion or action (hitting, slapping, punching, kicking, pinching, etc.) by which bodily harm or trauma occurs. It includes use of corporal punishment as well as the use of any restrictive intrusive procedure to control inappropriate behavior for purposes of punishment.
    - Abuse also includes psychological abuse which means humiliation, harassment, and threats of punishment or deprivation, sexual coercion, intimidation, whereby individuals suffer psychological harm or trauma.
    - Abuse also includes verbal abuse which means use of oral, written or gestured language by which abuse occurs. This includes demeaning and derogatory terms to describe persons with disabilities. Verbal abuse includes, but is not limited to yelling or using demeaning, derogatory, vulgar, profane or threatening language; threatening tones in speaking; teasing, pestering, molesting, deriding, harassing, mimicking or humiliating a person in any way; and making sexual innuendo.
    - Neglect means a negligent act or pattern of actions or events that caused or may have caused injury or death to person, or may have placed a person at risk of injury or death that was committed by an individual responsible for providing services. Neglect includes, but is not limited to a pattern of failure to establish or carry out a member's individualized program plan or treatment plan that placed or may have placed a person at risk of injury or death; a pattern of failure to provide adequate nutrition, clothing or health care; failure to provide a safe environment; and failure to maintain sufficient, appropriately trained staff.
    - Exploitation means the unlawful expenditure or willful dissipation of the funds or assets owned or paid to or for the benefit of an incapacitated individual.

The I/DD Waiver provider is responsible for tracking incidents and taking appropriate action on an individual and systemic basis in order to prevent harm to the health and safety of the members. All incidents must be entered into the WV IMS within 48 hours of the occurrence of the incident or of when the I/DD Waiver provider becomes aware of the incident. The I/DD Waiver provider must also comply with any other reporting required for mandatory reporters or as part of their behavioral health license.

Incidents pertaining to members who direct services through the *Personal Options* FMS model are also required to be reported through the WV IMS and the appropriate Protective Services

entity. Details regarding the reporting requirements for these self-directing members are available in Section

The Service Coordination provider must submit a Mortality Notification (WV-BMS-I/DD-11) to the ASO within 7 days from the date of death and to OHFLAC within 24 hours of the death of the member or when the I/DD Waiver provider becomes aware of the member's death.

The Service Coordination provider must notify the ASO in writing, if they are forced to exceed the maximum case load cap due to staff vacancy. The Service Coordination provider must address the following in writing within 48 hours of exceeding their caseload cap:

- The number of members per each Service Coordinator whose case load exceeds 20 members (e.g. Service Coordinator Name, # of members).
- The agency plan, including time lines for hiring and training new Service Coordinators.
- The agency's back-up plan to cover emergencies that occur due to exceeding the maximum case load cap.

The Service Coordinator is responsible for submitting and maintaining accurate and current member data in the ASO's CareConnection® including name, address, telephone numbers, Service Coordination provider, status of financial eligibility, legal representative name and contact information, etc.

The Service Coordinator is required to notify the ASO of a member's transfer to another Service Coordination provider or if the member chooses another service delivery system within 2 working days. The Service Coordinator must transfer the member in the CareConnection® by the effective date of the transfer.

- The transferring agency is responsible for the notification by submitting the Member Transfer/Discharge Form (WV-BMS-I/DD-10). This form must include the last date of service provided.
- Lack of notification of the transfer will affect the prior authorization for service or registration of services to the correct service provider(s) and subsequent payment of claims for services.

513.2.4 Quality Improvement System

BMS is responsible for building and maintaining the I/DD Waiver's Quality Improvement System (QIS). The I/DD Waiver provider is responsible for participating in all activities related to the QIS. The I/DD Waiver's QIS is used by BMS and the ASO as a continuous system that measures system performance, tracks remediation activities and identifies opportunities for system improvement. Achieving and maintaining program quality is an ongoing process that includes collecting and examining information about program operations and member outcomes, and then using the information to identify strengths and weaknesses in program performance. This information is used to form the basis of remediation and improvement strategies.

The Quality Improvement System (QIS) is designed to:

1) Collect the data necessary to provide evidence that the 6 CMS Quality Assurances are being met; and,
2) Ensure the active involvement of interested parties in the quality improvement process.

513.2.4.1 Centers for Medicare and Medicaid (CMS) Quality Assurances

The CMS mandates the I/DD Waiver program guarantee the following 6 Quality Assurances:

1) **I/DD Waiver Administration and Oversight:** The State Medicaid agency is actively involved in the oversight of the I/DD Waiver, and is ultimately responsible for all facets of the I/DD Waiver program;
2) **Level of Care:** Persons enrolled in the I/DD Waiver have needs consistent with an institutional level of care;
3) **Provider qualifications:** I/DD Waiver providers are qualified to deliver services/supports;
4) **Service Plan:** Members have a service plan that is appropriate to their needs and preference and receive the services/supports specified in the service plan;
5) **Health and Welfare:** Members' health and welfare are safeguarded; and
6) **Financial Accountability:** Claims for I/DD Waiver services are paid according to state payment methodologies specified in the approved waiver.

Data is collected and analyzed for all 6 Quality Assurances and sub-assurances based on West Virginia's Quality Performance Indicators, as approved by CMS. The primary sources of discovery include I/DD Waiver provider reviews, incident management reports, member complaints/grievances, OHFLAC reviews, abuse and neglect reports, administrative reports, oversight of delegated administrative functions and interested party input.

513.2.4.2 I/DD Waiver Provider Reviews

The primary means of monitoring the quality of the I/DD Waiver services is through provider reviews conducted by the OHFLAC and the ASO as determined by BMS by a defined cycle.

The ASO performs on-site and desk documentation provider reviews, face-to-face member/legal representative and staff interviews, home visits and day program visits to validate certification documentation and address CMS quality assurance standards. Targeted on-site I/DD Waiver provider reviews and/or desk reviews may by conducted by OHFLAC and/or the ASO in follow up to Incident Management Reports, complaint data, Plan of Corrections, etc.

Upon completion of each provider review, the ASO conducts a face-to-face exit summation with staff as chosen by the provider to attend. Following the exit summation, the ASO will make available to the provider a draft exit report and a Plan of Correction to be completed by the I/DD Waiver provider. If potential disallowances are identified, the I/DD Waiver provider will have 30

days from receipt of the draft exit report to send comments back to the ASO. After the 30 day comment period has ended, BMS will review the draft exit report and any comments submitted by the I/DD Waiver provider and issue a final report to the I/DD Waiver provider's Executive Director. The final report reflects the provider's overall performance, details of each area reviewed and any disallowance, if applicable, for any inappropriate or undocumented billing of I/DD Waiver Services. A cover letter to the I/DD Waiver provider's Executive Director will outline the following options to effectuate repayment:

(1) Payment to BMS within 60 days after BMS notifies the provider of the overpayment; or
(2) Placement of a lien by BMS against further payments for Medicaid reimbursements so that recovery is effectuated within 60 days after notification of the overpayment; or
(3) A recovery schedule of up to a 12 month period, through monthly payments or the placement of a lien against future payments.

If the I/DD Waiver provider disagrees with the final report, the I/DD Waiver provider may request a document/desk review within 30 days of receipt of the final report pursuant to the procedures in *Common Chapter 800, General Administration* of the West Virginia Medicaid Provider Manual. The I/DD Waiver provider must still complete the written repayment arrangement within 30 days of receipt of the Final Report, but scheduled repayments will not begin until after the document/desk review decision. The request for a document/desk review must be in writing, signed and set forth in detail the items in contention. **The letter must be addressed to:**

Commissioner
Bureau for Medical Services
350 Capitol Street, Room 251
Charleston, WV 25301-3706

If no potential disallowances are identified during the ASO review, then the I/DD Waiver provider will receive a final letter and a final report from BMS.

Reviews of participant-directed services are included in Section 513.9.2.1 for AwC and Section 513.9.2.2 for *Personal Options.*

513.2.4.3 Plan of Correction

In addition to the draft exit report sent to the I/DD Waiver providers, the ASO will also send a draft Plan of Correction (POC) electronically. I/DD Waiver providers are required to complete the POC and electronically submit a POC to the ASO for approval within 30 calendar days of receipt of the draft POC from the ASO. BMS may place a hold on claims if an approved POC is not received by the ASO within the specified time frame. The POC must include:

1. How the deficient practice for the members cited in the deficiency will be corrected; What system will be put into place to prevent recurrence of the deficient practice;
2. How the provider will monitor to assure future compliance and who will be responsible for the monitoring;
3. The date the Plan of Correction will be completed; and
4. Any provider-specific training requests related to the deficiencies.

513.2.4.4 Self-Reviews

The ASO prepares and disseminates electronically an I/DD Waiver Self-Review Tool which primarily measures the CMS Quality Assurances. This self review tool allows providers to incorporate into their Quality Assurance and Improvement processes a method to ensure quality services occur and CMS quality assurances are met. I/DD Waiver providers must use the approved format for submitting self reviews so that data related to the CMS quality assurance standards can be tracked and analyzed. Failure to submit the self reviews may jeopardize the future status of the I/DD Waiver provider as a West Virginia Medicaid provider.

I/DD providers are required to conduct self reviews, complete an affidavit attesting to the accuracy of the self-review, and submit to the ASO via electronic format every-other-year. The reporting periods will be based on the quarter during which the provider's on-site review take place on alternate years and will be communicated to providers via email.

513.2.4.5 Training and Technical Assistance

The ASO develops and conducts training for I/DD Waiver providers and other interested parties as necessary to improve systemic and provider-specific quality of care and regulatory compliance. Training is available through both face-to-face and web-based venues.

513.2.4.6 Quality Improvement Advisory (QIA) Council

The QIA Council is the focal point of stakeholder input for the I/DD Waiver Program and plays an integral role in data analysis, trend identification, and the development and implementation of remediation strategies. The role of the QIA Council is to advise and assist BMS and the ASO staff in program planning, development and evaluation consistent with its stated purpose. In this role, the QIA Council uses the I/DD Waiver Performance Indicators as a guide to:

- Recommend policy changes;
- Recommend Program priorities and quality initiatives;
- Monitor and evaluate policy changes;
- Monitor and evaluate the implementation of Waiver priorities and quality initiatives; and
- Serve as a liaison between the Waiver and interested parties; and
- Establish committees and work groups consistent with its purpose and guidelines.

The Council membership is comprised of: former and/or current members (or their legal representatives) of the I/DD Waiver Program, service providers, advocates and other allies of people with intellectual and/or developmental disabilities.

513.2.4.7 Utilization Guidelines for I/DD Waiver Providers

Each agency must put into place a set of Utilization Guidelines (UG) to ensure that each I/DD Waiver member receives the appropriate services and supports at the right time, in the right amount, and for as long as the member needs the services. Utilization guidelines are a person-centered process that starts with person-centered planning. The purpose of UG is to monitor claims submission and ensure that services provided are in compliance with the I/DD Waiver Manual and existing authorizations.

Agencies providing services must have UG in place that track units of services utilized/billed. It is the expectation that each agency be able to report units used and units still available at the IDT meetings (if not earlier). This is not only necessary for transfer/authorization purposes, but is also necessary for IDTs to make good decisions about purchasing services. Each agency is to have and adhere to a UG policy. With the exception of Crisis Services, agencies must receive prior-authorization for each service provided, as outlined in section 513.11 and specified in each service definition under “Prior Authorization.”

The internal policy of each agency must minimally address the following:

- Staff training
- Provider education on how will be delivered throughout the member’s service year. This education should minimally include the following:
    - Schedule of the member
    - Units of service authorized
    - Averages of usage (daily/monthly)
    - Individualized Training (as needed)
    - Requirements and limitations of the particular service provided
- Empowering and educating members and families so that they are able to make informed choices about their services and supports;
- Assessing member’s needs:
    - Purchase requests are based on identified need for the coming service year, therefore additional units may not be requested for contingency purposes;
- Choosing services based on member’s assessed needs;
- Monitoring service utilization throughout the member’s service year;
- Monitoring member’s needs and updating services as needed;
- All services delivered must be delivered based on:
    - Assessed need
    - Agreement by the IDT
    - I/DD Waiver service caps and limitations
    - Documentation on the member’s IPP

513.2.5 Service Limitations and Service Exclusions

Services governing the provision of all West Virginia Medicaid services apply pursuant to *Chapter 300, Provider Participation Requirements*, of the Provider Manual and Section 513.8 of this chapter. Reimbursement for services is made pursuant to *Chapter 600,* however, the following limitations also apply to the requirements for payment of services that are appropriate and necessary for I/DD Waiver Program Services described in this chapter.

- I/DD Waiver services are made available with the following limitations:
  - All members must live in West Virginia;
  - All I/DD Waiver regulations and policies must be followed in the provision of the services. This includes the requirement that all I/DD Waiver providers be licensed in the State of West Virginia and enrolled in the West Virginia Medicaid Program;
  - The services provided must conform with the stated goals and objectives on the member's IPP; and
  - Individual Member budgets and limitations described in this manual must be followed.
- I/DD Waiver services may be provided within 30 miles of the West Virginia border to members residing in a county bordering another state.
- In addition to the non-covered services listed in *Chapter 100, General Information*, of the West Virginia Medicaid Provider Manual, BMS will not pay for the following services:
  - The I/DD Waiver Program must not substitute for entitled programs funded under other Federal public laws such as Special Education under P.L. 99-457 or 101-476 and rehabilitation services as stipulated under Section 110 of the Rehabilitation Act of 1973;
  - Public school services;
  - Person-Centered Support Services payments may not be made for room and board or the cost of facility maintenance and upkeep;
  - Birth-to-Three services paid for by Title C of Individuals with Disabilities Education Act (IDEA) for children enrolled in the I/DD Waiver program; and
  - I/DD Waiver services may not be provided concurrently unless otherwise indicated in the service definition. For example Person-Centered Support services may not be provided concurrently with the individual's Facility-Based Day Habilitation Program, School-based services, Crisis services, Supported Employment services, LPN Services in excess of 2 hours per day or Respite Care services.
- Reimbursement for I/DD Waiver services cannot be made for:
  - Service provided outside a valid IPP;
    - To be considered valid, the IPP must be current (dated within the past year and reviewed with last 6 months by IDT), signed by all required IDT members and include all provided services.
  - Services provided when eligibility has not been established;
  - Services provided when there is no IPP;
  - Services provided without supporting documentation;
  - Services provided by unqualified staff; and
  - Services provided outside the scope of a defined service.

513.3 APPLICANT ELIGIBILITY AND ENROLLMENT PROCESS

In order for an applicant to be found eligible for the I/DD Waiver Program, they must:

- Meet medical eligibility
- Meet financial eligibility
- Be a resident of West Virginia
- Have chosen Home and Community-Based Services over services in an institutional setting (ICF/IID facility)

Enrollment in the I/DD Waiver Program is dependent upon the availability of a funded I/DD Waiver slot.

The applicant must have a written determination that they meet medical eligibility criteria. Initial medical eligibility is determined by the MECA through review of an Independent Psychological Evaluation (IPE) report completed by a member of the Independent Psychologist Network (IPN); which may include: background information, mental status examination, a measure of intelligence, adaptive behavior, achievement and any other documentation deemed appropriate.

If an I/DD Waiver slot is available, then the applicant must establish financial eligibility before being enrolled in the I/DD Waiver program. If a slot is not available, the applicant is placed on a wait list. When a slot becomes available, then the applicant in informed and must establish financial eligibility before being enrolled on the I/DD Waiver program.

513.3.1 Application Process

Each new applicant must follow the eligibility process listed below for both medical eligibility and financial eligibility. An applicant first has medical eligibility determined and then has financial eligibility determined when a funded slot is available.

513.3.1.1 Initial Eligibility Determination Process

An applicant may obtain an application form (WV-BMS-I/DD-1) from local Behavioral Health Centers, I/DD Waiver providers, local/county DHHR Offices, Aging and Disability Resource Centers (ADRC), the ASO or the BMS website.

Completed applications must be submitted to the ASO at:

IRG d/b/a APS Healthcare
100 Capitol Street
Suite 600
Charleston, WV 25301

Or the completed application may be faxed via the secure EFax:

1-866-521-6882
Or emailed to secure email to:
wviddwaiver@apshealthcare.com

Upon receipt of the WV-BMS-I/DD-1, the ASO time dates and stamps the application.

The ASO contacts the applicant within 3 business days upon receipt of the WV-BMS-I/DD-1 and provides a list of psychologists in the IPN trained by the MECA who are available within the applicant's geographical area. The applicant chooses a psychologist in the IPN and works with the ASO to schedule the appointment within 14 days.

Psychologists in the IPN are identified and placed on a list following documented training by the MECA. The IP is responsible for completing an IPE and submitting it to the ASO. The ASO will verify the IPE is complete, signed and dated and will forward to the MECA. The IPE includes clinical verification that mental retardation with concurrent substantial deficits in 3 or more of the 6 major life areas (as defined in Section 513.3.2.2) was manifested prior to age 22 **or** a related condition which constitutes a severe and chronic disability with concurrent substantial deficits in 3 or more of the 6 major life areas was manifested prior to age 22. The evaluation includes assessments which support the diagnostic considerations offered and relevant measures of adaptive behavior.

The IPE evaluation is utilized by the MECA to make a medical eligibility determination.

The IP completes the IPE and submits it to the ASO within 60 days of the initial application.

The MECA makes a written final medical eligibility determination within 30 days of receipt of the completed IPE report and application from the ASO and a written decision is mailed to the applicant and/or their legal representative.

If an applicant is determined to be medically eligible, a funded I/DD Waiver slot is available and financial eligibility is established, then the applicant is enrolled into the Waiver program. If a slot is not available, then the applicant will be placed on a wait list until a funded slot allocation is available and financial eligibility is established.

If an applicant is determined not to be medically eligible by the MECA, a written Notice of Decision, a Request for a Medicaid Fair Hearing form and a copy of the IPE is mailed by certified mail by the ASO to the applicant or their legal representative. This denial of medical eligibility may be appealed by the applicant or their legal representative through the Medicaid Fair hearing process by submitting the Request for Medicaid Fair Hearing form to the Board of Review within 90 days of receipt of the Notice of Decision. The Notice of Decision letter also allows the applicant or their legal representative to request a second medical evaluation.

The second medical evaluation is completed within 60 days by a different member of the IPN at the expense of BMS. If an applicant is determined to be medically eligible, a slot is available and

financial eligibility is established, then the applicant is enrolled into the Waiver program. If a slot is not available, then the applicant will be placed on a wait list until a funded slot allocation is available and financial eligibility is established.

If the applicant is again determined not to be medically eligible based on the second medical evaluation, then the applicant or their legal guardian will receive a written Notice of Decision, a Request for a Medicaid Fair Hearing form and a copy of the second IPE by certified mail by the ASO. This second denial of medical eligibility may be appealed through the Medicaid Fair Hearing process by submitting the Request for Medicaid Fair Hearing form to the Board of Review within 90 days of receipt of the Notice of Decision and a Medicaid Fair Hearing will be scheduled.

The applicant or legal representative may request a pre-hearing conference at any time prior to the Medicaid Fair Hearing. At the pre-hearing conference, the applicant and/or their legal representative, the ASO and a representative from the MECA will review the information submitted for the medical eligibility determination and the basis for the denial.

The applicant shall have the right to access their IPE used by the MECA in making the eligibility decision and copies shall be provided free of charge by BMS.

If the denial of initial medical eligibility is reversed by the Hearing Officer, the applicant will be placed on the wait list based on the date of the Hearing Officer's decision. When a slot is available, the applicant will be enrolled on the program once financial eligibility is established,

The applicant who is determined not to be medically eligible may re-apply to the I/DD Waiver program at any time.

The applicant's right to a medical eligibility determination within 90 days may be forfeited if the applicant does not submit follow up information needed to complete the IPE to the IP within a reasonable timeframe specified by the IP. Examples of follow up documentation requested by the IP may include, but may not be limited to:

- IEP for school aged children;
- Birth to Three assessments;
- Medical records to support the presence of a severe related condition; and
- Any other additional documentation deemed necessary by the IP to complete the IPE.

513.3.2 Initial Medical Eligibility

To be medically eligible, the applicant must require the level of care and services provided in an ICF/IID as evidenced by required evaluations and other information requested by the IP or the MECA and corroborated by narrative descriptions of functioning and reported history. An ICF/IID provides services in an institutional setting for persons with intellectual disability or a related condition. An ICF/IID provides monitoring, supervision, training, and supports.

Evaluations of the applicant must demonstrate:

- A need for intensive instruction, services, assistance, and supervision in order to learn new skills, maintain current level of skills, and/or increase independence in activities of daily living and
- A need for the same level of care and services that is provided in an ICF/IID.

The MECA determines the qualification for an ICF/IID level of care (medical eligibility) based on the IPE that verifies that the applicant has mental retardation with concurrent substantial deficits manifested prior to age 22 **or** a related condition which constitutes a severe and chronic disability with concurrent substantial deficits manifested prior to age 22. For the I/DD Waiver program, individuals must meet criteria for medical eligibility not only by test scores, but also narrative descriptions contained in the documentation.

In order to be eligible to receive I/DD Waiver Program Services, an applicant must meet the medical eligibility criteria in each of the following categories:

a. Diagnosis;
b. Functionality; and
c. Need for active treatment

513.3.2.1 Diagnosis

The applicant must have a diagnosis of mental retardation with concurrent substantial deficits manifested prior to age 22 **or** a related condition which constitutes a severe and chronic disability with concurrent substantial deficits manifested prior to age 22.

Examples of related conditions which may, if severe and chronic in nature, may make an individual eligible for the I/DD Waiver Program include but are not limited to, the following:

- Autism;
- Traumatic brain injury;
- Cerebral Palsy;
- Spina Bifida; and
- Any condition, other than mental illness, found to be closely related to mental retardation because this condition results in impairment of general intellectual functioning or adaptive behavior similar to that of mentally retarded persons, and requires services similar to those required for persons with mental retardation.

Additionally, the applicant who has a diagnosis of mental retardation or a severe related condition with associated concurrent adaptive deficits must meet the following requirements:

- Likely to continue indefinitely; and,

- Must have the presence of at least 3 substantial deficits out of the 6 identified major life areas listed in Section 513.3.2.2.

513.3.2.2 Functionality

The applicant must have substantial deficits in at least 3 of the 6 identified major life areas listed below:

- Self-care;
- Receptive or expressive language (communication);
- Learning (functional academics);
- Mobility;
- Self-direction; and,
- Capacity for independent living which includes the following 6 sub-domains: home living, social skills, employment, health and safety, community and leisure activities. At a minimum, 3 of these sub-domains must be substantially limited to meet the criteria in this major life area.

Substantial deficits are defined as standardized scores of 3 standard deviations below the mean or less than one percentile when derived from a normative sample that represents the general population of the United States, or the average range or equal to or below the 75 percentile when derived from MR normative populations when mental retardation has been diagnosed and the scores are derived from a standardized measure of adaptive behavior. The scores submitted must be obtained from using an appropriate standardized test for measuring adaptive behavior that is administered and scored by an individual properly trained and credentialed to administer the test. The presence of substantial deficits must be supported not only by the relevant test scores, but also the narrative descriptions contained in the documentation submitted for review, i.e., psychological report, the IEP, Occupational Therapy evaluation, etc. if requested by the IP for review.

513.3.2.3 Active Treatment

Documentation must support that the applicant would benefit from continuous active treatment. Active treatment includes aggressive consistent implementation of a program of specialized and generic training, treatment, health services and related services. Active treatment does not include services to maintain generally independent individuals who are able to function with little supervision or in the absence of a continuous active treatment program.

513.3.3. Initial Financial Eligibility

Upon notification that an I/DD Waiver slot is available, the applicant or legal representative must make an application for financial eligibility at a local/county DHHR office.

An applicant for I/DD Waiver services who is not currently a member in a full-coverage Medicaid group and receives a medical card completes the application form, DFA-1, with an Economic

Services Worker (ESW) who processes the application, makes a financial eligibility decision and notifies the applicant through written form (Economic Services Notification Letter – ESNL-A). **The member's Notice of Decision letter for medical eligibility for the I/DD Waiver Program must be presented to the ESW before financial eligibility can be determined.**

An applicant for I/DD Waiver services, who is a member in a full-coverage Medicaid group such as an SSI or Deemed SSI, completes an abbreviated application form, the DFA-LTC-5 which evaluates annuities, trusts, and/or potential transfers of resources in relation to financial eligibility for the additional I/DD Waiver services. The ESW also provides written verification (ESNL-A) of financial application to the member and/or their legal representative.

When approved financially by the ESW, the ESW will process the assistance group in the data system, Recipient Automated Payment and Information Data System (RAPIDS), which will facilitate triggers to BMS in order for payment for eligible medical services to occur to eligible Medicaid providers.

513.3.3.1 Determination of Initial Financial Eligibility

The applicant must meet the following financial eligibility criteria:

Income

The applicant's monthly income may not exceed 300% of the current maximum monthly Supplemental Security Income (SSI) payment for a single individual. Applicants who are found to be financial eligible will receive a letter (ESNL-A) from DHHR. The maximum monthly SSI payment may be found by contacting the local county DHHR office or local Social Security Administration office.

- Only the applicant's personal income is considered for determination.
- The parent's or spouse's income is not considered for determining financial eligibility.
- An applicant does not have to be SSI eligible to become eligible for the I/DD Waiver Program.

Assets

- An individual's assets, excluding residence, furnishings and personal vehicle (owned and registered in member's name) may not exceed $2,000.
- The parent's assets are not considered for determining financial eligibility.

513.3.4 Slot Allocation Referral and Selection Process

Provided a funded I/DD Waiver slot is available, the allocation process is based on:

- The chronological order by date of the ASO's receipt of the fully completed initial application (WV-BMS I/DD-1) which includes approval of eligibility from the MECA **or**

- The date of a fair hearing decision if medical eligibility is established as a result of a Medicaid fair hearing.

Once an I/DD Waiver slot is available, the enrollee will receive an informational packet up to 90 days prior to the slot being awarded. A Freedom of Choice form (WV-BMS-I/DD-2) on which the enrollee must indicate the wish to receive home and community based services as opposed to services in an ICF/IID, his/her chosen service option (Traditional or Traditional and Participant-Directed) as well as the chosen Service Coordination provider will be included and must be returned to the ASO within 30 days of receipt of the informational packet.

The enrollee must access I/DD Waiver services within 180 days when the funded slot becomes available or the enrollee will be discharged from the program.

If the enrollee chooses to self-direct some of their services through a Participant-Directed Option then they must choose their FMS Option (Agency with Choice or *Personal Options*). Upon receipt of the complete and signed Freedom of Choice form, the ASO will refer the member to his/her chosen Service Coordination provider and if indicated, AwC or *Personal Options* agency. The SC provider may reject the referral only if:

1) it appears to have been received in error;
2) the SC provider is at maximum service capacity and unable to accept referrals until additional Service Coordinators are hired or
3) the SC provider is unable to meet the referred member's medical and/or behavioral needs.

Service Coordination providers that reject referrals due to service capacity or inability to meet medical or behavioral needs may not receive future referrals until the capacity/service issues are resolved.

Before an allocated slot can be accessed by the applicant and their chosen I/DD Waiver provider, proof of financial eligibility (ESNL-A) obtained from the WV DHHR during the financial eligibility determination must be presented to the I/DD Waiver provider.

513.3.5 Eligibility Effective Date

The initial effective date of a Medical Card for an applicant who has not previously acquired one is the **latest** of the following 2 dates (provided the member has a slot allocation):

- The date of initial medical eligibility which is established by the MECA **or**
- The date on which the applicant was approved for financial eligibility at a local/county DHHR office. The applicant will receive a letter from DHHR (ESNL-A) stating the date the applicant is financially eligible for the program.

513.4 MEMBER ANNUAL RE-DETERMINATION OF ELIGIBILITY PROCESS

In order for a member to be re-determined eligible, the member must:

- Meet medical eligibility;
- Meet financial eligibility;
- Be a resident of West Virginia; and
- Have chosen Home and Community-Based Services over services in an institutional setting (ICF/IID).

The member must also have substantial deficits in at least 3 of the 6 identified major life areas listed below:

- Self-care;
- Receptive or expressive language (communication);
- Learning (functional academics);
- Mobility;
- Self-direction; and
- Capacity for independent living which includes the following 6 sub-domains: home living, social skills, employment, health and safety, community and leisure activities. At a minimum, 3 of these sub-domains must be substantially limited to meet the criteria in this major life area.

513.4.1 Annual Re-determination of Medical Eligibility

In accordance with federal law, re-determination of medical eligibility must be completed at least annually. The anchor date of the member's medical re-determination is the anniversary date of the first month after the initial medical eligibility was established by the MECA.

At a minimum, annual redetermination of eligibility will include 1 annual functional assessment which includes standardized measures of adaptive behavior in the 6 major life areas completed by the ASO and the results provided to the MECA. The MECA will determine medical eligibility annually based on this assessment of functioning as defined in Section 513.3.

Substantial deficits are defined as standardized scores of 3 standard deviations below the mean or less than 1 percentile when derived from a normative sample that represents the general population of the United States, or the average range or equal to or below the 75 percentile when derived from MR normative populations when mental retardation has been diagnosed and the scores are derived from a standardized measure of adaptive behavior. The scores submitted must be obtained from using an appropriate standardized test for measuring adaptive behavior that is administered and scored by an individual properly trained and credentialed to administer the test.

The ASO will conduct the functional assessment up to 90 days prior to each member's anchor date. At the time of the annual functional assessment by the ASO, each member or legal representative must complete the Freedom of Choice Form (WV-BMS-I/DD-2) indicating their

choice of level of care settings, service coordination agency and service delivery options. If the member has a legal representative that did not attend the Annual Functional Assessment and complete the Freedom of Choice Form (WV-BMS-I/DD-2), then it is the responsibility of the Service Coordinator to obtain the signature of the Legal Representative prior to or at the Annual IPP. If determined medically eligible, the member and Service Coordination provider will also receive the individual budget allocation that was calculated by the ASO based upon the member's assessed needs.

If a member is determined not to be medically eligibility a written Notice of Decision, a Request for Hearing form and the results of the functional assessment are sent by certified mail by the ASO to the member or their legal representative. The member's service coordinator is also notified by the ASO. The denial of medical eligibility may be appealed through the Medicaid Fair hearing process if the Request for Hearing form is submitted by the member or their legal representative to the Board of Review within 90 days of receipt of the Notice of Decision. The Notice of Decision letter also allows the member or their legal representative to request a second medical evaluation.

The second medical evaluation is completed within 60 days by a member of the IPN at the expense of BMS.

If the member's medical eligibility is terminated and the member or legal representative wishes to continue existing services throughout the appeal process, the Request for Hearing form must be submitted within 13 days of the member or their legal representative's receipt of the Notice of Decision.

If the member is determined to be medically eligible as a result of a Medicaid Fair Hearing, then services will continue if the member or their legal representative requested this within 13 days of the receipt of the Notice of Decision Letter. If services were terminated due to the member or their legal representative not requesting their continuance within 13 days of the receipt of the Notice of Decision letter, then services will begin again on the date of the Hearing Officer's decision.

At any time prior to the Medicaid Fair hearing, the member or legal representative may request a pre-hearing conference. At the pre-hearing conference, the member and/or their legal representative, the ASO and a representative from the MECA will review the information submitted for the medical eligibility determination and the basis for the termination.

More information on appealing medical eligibility can be found in Section 513.5.4 Member Appeals.

513.4.2 Annual Re-determination of Financial Eligibility

All I/DD Waiver members, except for Supplemental Security Income (SSI) recipients, must have financial eligibility re-determined annually by their local or county DHHR. Members who are found financially eligible will receive documentation from the DHHR (ESNL-A) which the

member needs to present to their service coordination provider. The member must provide their Notice of Decision letter re-establishing their medical eligibility to the DHHR before financial eligibility can be established. Members must meet the following financial eligibility criteria:

Income

The member's monthly income may not exceed 300% of the current maximum monthly SSI payment for a single individual. The maximum monthly SSI payment may be found by contacting the local county DHHR office or local Social Security Administration office.

- Only the applicant's personal income is considered for determination.
- The parent's or spouse's income is not considered for determination.

Assets

- An individual's assets, excluding residence, furnishings and personal vehicle (owned and registered in member's name) may not exceed $2,000.
- The parent's assets are not considered for determining financial eligibility.

A member's income and assets are evaluated using the same criteria used during the initial financial eligibility determination.

513.5 RIGHTS AND RESPONSIBILITIES OF MEMBERS/LEGAL REPRESENTATIVES

513.5.1 Member/Legal Representative Rights

The member retains all rights afforded to them under the law and the list below is intended to be limited to their rights as a member participating in the I/DD Waiver Program.

- Members and/or their legal representatives have the right to choose between home and community-based services as an alternative to institutional care and a choice of service delivery options by the ASO through the completion of a Freedom of Choice form (WV-BMS-I/DD-2) upon enrollment in the program and at least annually thereafter.
- Members and/or their legal representatives have a choice of I/DD Waiver providers.
- Members and/or their legal representatives have the right to address dissatisfaction with services through the I/DD Waiver provider's grievance procedure.
- Members directing their services through AwC or *Personal Options* will also have the right to address dissatisfaction regarding Financial Management Services. Each AwC provider and *Personal Options* must have a procedure for responding to and tracking member complaints.
- Members or their legal representatives have the right to access the Medicaid Fair Hearing process consistent with state and federal law.
- Members have the right to be free from abuse, neglect and financial exploitation.

- Members and/or their legal representatives have the right to be notified and attend any and all of their IDT meetings, including critical juncture meetings.
- Members and/or their legal representatives have the right to choose who they wish to attend their IDT meetings, in addition to those attendees required by regulations.
- Members and/or their legal representatives have the right to obtain advocacy if they choose to do so.
- Members and/or their legal representatives have the right to file a complaint with the ASO regarding the results of their functional assessment.
- Members and/or their legal representatives have the right to have all assessments, evaluations, medical treatments, budgets and IPPs explained to them in a format they can understand, even if they have a legal representative making the final decisions in regard to their health care.
- Members and/or their legal representative have the right to make decisions regarding their services.
- Members have the right to receive reasonable accommodations afforded to them under the ADA.

Each member is informed of these rights by their I/DD Waiver provider service coordination agency upon enrollment and at least annually thereafter.

513.5.2 Member/Legal Representative's Responsibilities

The member and/or their legal representative (if applicable) have the following responsibilities:

- To be present during IDT meetings. It is strongly recommended that the member, if medically and behaviorally able, be present and actively involved in their person-centered plan and IDT meetings. In extremely extenuating circumstances, the legal representative or other team members may participate by teleconferencing if they do not bill for the time spent in the IDT. The member **must** be present if they do not have a legal representative;
- To participate in the annual assessments for determination of medical eligibility and individualized budget;
- To participate in re-determination of financial eligibility at their local DHHR as required;
- To comply with all I/DD Waiver policies including monthly home visits by the service coordinator;
- To implement the portions of the IPP for which they have accepted responsibility; and
- To maintain a safe home environment for all service providers; and
- To provide their service coordinator with income information so financial eligibility can be monitored; and
- To notify their service coordinator immediately if the member's living arrangements change, the member's needs change, the member is hospitalized or if the member needs to have a critical juncture meeting.

Failure to comply with these responsibilities may jeopardize the member's continuation of I/DD Waiver services.

513.5.3 Member Grievances/Complaints

Members have a right to obtain oral and written information on the agency's rights and grievance policies. If a member or their legal representative is dissatisfied with the quantity of services or the provider of service, it is recommended that they follow the I/DD Waiver provider agency's grievance process. If the issue is not resolved at this level, the member or legal representative may file a formal complaint with the ASO. If the issue cannot be satisfactorily resolved through the ASO's intervention, the member or legal representative may choose another provider of service or request a Medicaid Fair Hearing consistent with state and federal law.

If a member or their legal representative is dissatisfied with the content of the annual functional assessment, they must notify the ASO within 60 days of assessment date. The Assessment Data Modification Request (WV-BMS-I/DD-13) form must be fully completed and must cite the items in question. The ASO reviews the items in question and gives a written response which may include adjustments or revisions to the assessment findings and/or budget amount.

The IDT must make every effort to purchase services within the budget allocated by the ASO. If the IDT cannot purchase all needed services within the budget, the Service Coordinator must contact the ASO to request additional services. If negotiation is unsuccessful, the Service Coordinator may request a Second Level Negotiation with the ASO for the additional services. The member and/or their legal representative may by-pass the First and Second Level Negotiations with the ASO and request a Medicaid Fair Hearing on the denial of the additional amount of services.

513.5.4 Member Appeals

If a member is determined not to be medically eligible, a written Notice of Decision, a Request for Hearing form and the results of the functional assessment are sent by certified mail by the ASO to the member or their legal representative. A notice is also sent to the member's service coordinator. The termination may be appealed through the Medicaid Fair hearing process if the Request for Hearing form is submitted to the Board of Review within 90 days of receipt of the Notice of Decision. The member or their legal representative may also request a second medical evaluation.

The second medical evaluation must be completed within 60 days by a member of the IPN. If the member or legal representative wishes to continue existing services throughout the appeal process, the Request for Hearing form must be submitted within 13 days of the member or their legal representative's receipt of the Notice of Decision. If the Request for Hearing form is not submitted within 13 days of the member or legal representative's receipt of the Notice of Decision, reimbursement for all I/DD Waiver services will cease.

The service coordinator, upon notification of the eligibility decision, must begin the discharge process by arranging for a Transfer/Discharge IDT meeting to develop a "back-up" plan for transition because reimbursement for I/DD Waiver services will cease on the 13th day after receipt of the written Notice of Decision letter if the member or their legal guardian does not submit a Request for Hearing form or a request for a second psychological evaluation in the required time frame.

If the member is again denied medical eligibility based on the second medical evaluation,, the member or the legal representative will receive a written Notice of Decision, a Request for a Fair Hearing Form and a copy of the second functional assessment/evaluation by certified mail from the ASO. The member's service coordinator will also receive a notice. The member or their legal representative may appeal this decision through the Medicaid Fair hearing process if the Request for Hearing form is submitted to the Board of Review within 90 days of receipt of the Notice of Decision

A pre-hearing conference may be requested by the member or their legal representative any time prior to the Medicaid Fair Hearing and the ASO will schedule. At the pre-hearing conference, the member and/or their legal representative, the ASO and a representative from the MECA will review the information submitted for the medical eligibility determination and the basis for the termination.

If the denial of medical eligibility is upheld by the hearing officer, services that were continued during the appeal process must cease on the date of the hearing decision. If the member is eligible financially for Medicaid services without the I/DD Waiver program, other services may be available for the individual. If the termination based on medical eligibility is reversed by the Hearing Officer, the individual's services will continue with no interruption.

The member and/or their legal representative shall have the right to access their IPE used by the MECA in making the eligibility decision and copies shall be provided free of charge.

513.6 MEMBER DISCHARGE

A member may be discharged from the I/DD Waiver Program for a reason outlined below. The Service Coordinator must complete and submit to the ASO a copy of the Member Transfer/Discharge Form (WV-BMS-I/DD-10) within 7 days to the ASO .

- A member's income or assets exceed the limits specified in Sections 513.3.3.1 and 513.4.2 of this chapter. The county DHHR office must be contacted, in addition to the ASO, any time an individual's income or assets exceed the limits.
    - The county DHHR office closes the Medicaid file upon notification of the increase in income or assets and notifies the individual and the ASO of termination of the medical card. The Service Coordinator is responsible for monitoring the member's assets and is also the responsible party for reporting when the member's income or assets exceed the limits specified in Section 513.3.3.1 and

- 514.4.2. The Service Coordinator may request information from the member or the member's payee or member's legal representative to ensure that financial eligibility is not "lost" throughout the year due to excessive assets or other reasons.

- The annual functional assessment which is used by the MECA to determine a member's medical eligibility demonstrates that they are no longer medically eligible for the I/DD Waiver Program. The ASO notifies the member or their legal representative and the member's service coordinator of termination of services and of their right to appeal as outlined in Section 513.5.4 of this chapter
- A member or their legal representative voluntarily terminates Waiver services by signing the Transfer/Discharge form (WV-BMS-I/DD-10). The Service Coordinator must convene the IDT in the development of the IPP to transition the member to the new services when applicable.
- A member becomes deceased. The Service Coordinator must complete and submit the Notification of Member Death (WV-BMS-I/DD-11) and notify OHFLAC within 24 hours and submit the completed form to the ASO within 7 days.
- A member or their legal representative fails to comply with all I/DD Waiver policies including monthly home visits by Service Coordinator, participation in required assessments, IDT meetings and IPP development, then the member may be discharged from the I/DD Waiver Program following consultation and approval from the ASO.
- A member does not access or utilize at least one direct care I/DD Waiver Service for a period of 180 consecutive days. If the member or their legal representative signed a Transfer/Discharge Form (WV-BMS-I/DD-10), then it is effective on the date of signature and this rule does not apply.

The Service Coordinator must transfer/discharge the member in the CareConnection® by the effective date of the valid transfer/discharge.

I/DD Waiver providers are prohibited from discharging, discriminating or retaliating in any way against a member and/or their legal representative who has been a complainant, on whose behalf a complaint has been submitted or who has participated in an investigation process involving the I/DD Waiver provider.

I/DD Waiver service coordination providers may not discharge a member if the member chooses to self-direct part of their services through either of the Participant-Directed service options.

513.7 MEMBER TRANSFER

The member has the right to transfer Service Coordination and other services from the existing provider to another chosen provider at any time for any reason. Transfers must be addressed on the IPP and approved by the member or their legal representative and a representative from the receiving provider as evidenced by their signature on the IPP signature sheet. During the transition from one provider to another, the IPP must be developed and must specifically address the responsibilities and associated time frames of the "transfer-from" and the "transfer-

to" providers. The Service Coordinator must complete and submit the Member Transfer/Discharge Form (WV-BMS-I/DD-10) within 7 days to the ASO. If a transfer IPP is found not to be valid then, the authorizations for services may be rolled back to the transfer-from provider until a valid IPP is held.

An I/DD Waiver provider may not terminate services unless a viable IPP is in place that effectively transfers needed services from one I/DD Waiver provider to another provider and is agreed upon by the member and/or their legal representative and the receiving provider. Providers are prohibited from discriminating in any way against a member or legal representative wishing to transfer services to another provider agency.

513.8 INDIVIDUAL PROGRAM PLAN (IPP)

Central to the services that a member receives through the I/DD Waiver program is the member's IPP. Developing the IPP is the process by which the member is assisted by their Interdisciplinary Team which consists of their legal representative (when applicable), their advocate (when applicable) other natural supports the member chooses to invite as well as attendees required by the I/DD Waiver program policy manual. This team meets to decide what needs to be done, by whom, when and how and to document the decisions made by this planning team. The content of the IPP must be guided by the member's needs, wishes, desires, and goals but based upon assessed needs. All IPP meetings should be scheduled at a time and location that takes into consideration the schedule and availability of the member and the other members of the team.

If the member is their own legal representative, then the member must attend the IPP. If the member has a legal representative, the legal representative must attend the IPP in person or by teleconferencing in extenuating circumstances and the member must also attend if medically and behaviorally able. If the member does not attend due to medical or behavioral issues, the service coordinator must ensure that the member understands the services outlined in their IPP to the best of their ability and is given an opportunity to sign the IPP within 10 days.

Individual Program Planning includes the Initial IPP which must be developed within 7 days of intake/admission to a new provider agency, the annual IPP and subsequent reviews or revisions of the IPP, Critical Juncture, Transfer and Discharge IPPs. Any activity that occurs prior to the meeting or after the meeting is **not** considered Individual Program Planning. Activities conducted before or after the meeting may meet the criteria for Service Coordination activities.

All IPPs must be disseminated to all team members within 14 days and must minimally include:

- All components in the WV-BMS-I/DD-05
    - Cover/Demographics
    - Meeting Minutes
    - Circle of Support/Goals and Dreams
    - Summary of Assessment and Evaluation Results
    - Medications
    - Individual Service Plan

    - I/DD Waiver Services
    - Non-I/DD Waiver Services and Natural Supports
  - Individual Habilitation Plan and Task Analysis if the member receives formal training
  - Tentative Weekly Schedule
  - Signature Sheet (and rationale for disagreement if necessary)
  - Behavior Support Plan or Protocol, if applicable, with signatures of developer and member/legal representative (must indicate consent by member/legal representative)
    - Dates that plan was approved, initiated and will be reviewed. If the plan includes restrictive measures, then approval by the I/DD Waiver Provider's Human Rights Committee must be attached. HRC must monitor plans with adverse procedures at least annually.
  - Crisis Plan to include Emergency Disaster Plans
  - Individual Spending Plan if member is self-directing any of the Participant-Directed Services available

A Crisis Plan must be completed for each I/DD Waiver member. This shall be considered an attachment and part of the member's IPP. A Crisis Plan must be personalized and discuss any foreseeable issues which might put the member's health, safety or well-being in jeopardy. A Crisis Plan should incorporate the level of supports which would likely be required for unforeseen circumstances. A Crisis Plan should minimally cover the following events:

- No call/no show of support staff
- Primary caregiver becomes unavailable or unable to provide continued support

- Weather-related/environmental issues (transportation, inability to get to scheduled location, etc.)
- Disaster-related issues (flood, fire, etc.)
- Health/medical issues (medication administration, serious allergies, seizure protocol, if applicable, etc.)
- Termination from I/DD Waiver services
- Any other member-specific issues

The IPP serves as documentation of the IDT team meeting. A team member's signature on the IPP constitutes participation in the team meeting; however a progress note is still required to document the team member's participation in the meeting. Team meeting minutes must be maintained with the IPP to expand discussion of the meeting, record critical issues from the meeting and identify the active participation of each IDT member. The IPP must include the signature of all members who attended and should indicate agreement/disagreement with the IPP, date of the meeting and the total time spent in the meeting for each team member. The member or their legal representative must agree with the plan for it to be considered a valid IPP. A copy of the IPP is maintained in all participating provider agency records and distributed to all team members within 14 days of the date of the IDT team meeting by the Service Coordinator.

In extenuating circumstances (i.e. legal representative living out of state or inclement weather), IDT members may participate by teleconferencing, however they may not bill for the time spent in the IDT if participating by teleconference and the Service Coordinator must note on the signature sheet that they attended by phone, If the legal representative attends by telephone, the service coordinator must obtain their signature within 10 days. When a member has been admitted to a crisis respite site, then the Service Coordinator may attend and bill for their services while conducting the IPP over the telephone.

An IPP includes the completed IPP (WV-BMS-I/DD-5) and the following attachments: Crisis Response Plan, Behavior Support Plan/Protocols (if applicable), tentative weekly schedule, budgeted cost of planned services, spending plans if the member self directs eligible services and meeting minutes.

The IPP must be developed on an annual basis. The IPP must be reviewed and approved by the IDT at least every 90 days unless otherwise specified in the plan, but shall not exceed 180 days. The IPP must be updated at critical juncture meetings to include IDT recommendations.

All Medley Class Members must have IDT meetings every quarter, but the Medley Advocate may choose to only attend the 6-month and the annual IDT.

MEDICAID CANNOT REIMBURSE FOR SERVICES RENDERED WHEN THE IPP HAS EXPIRED, HAS NOT BEEN REVIEWED WITHIN REQUIRED TIMELINES AND/OR DOES NOT INCLUDE REQUIRED SIGNATURES OR SERVICES.

513.8.1 The Interdisciplinary Team (IDT)

The Interdisciplinary Team participates in the IDT meeting for the purpose of review of assessments or evaluations, discussion of recommendations or individualized needs, identification of resources or methods of support outline of service options and training goals, and preparation of interventions or strategies necessary to implement a person-centered plan. IDT meetings should be held in a location that is convenient to the member.

At a minimum, the IDT consists of:

- The member;
- Their legal representative as applicable;
- The member's Service Coordinator;
- Representatives of all I/DD Waiver providers that provide services to the individual; and
- A Medley Advocate if the member is a Medley Class Member.

If the member is their own legal guardian and is unable to attend due to behavioral or medical issues then the IPP must be rescheduled.

Other members of the IDT may be included, as necessary, to develop a comprehensive IPP and assist the individual. Such members may include:

- Natural supports the member chooses to invite;
- Professionals, such as a Therapeutic Consultant (TC), Behavior Support Professional (BSP), Registered or Licensed Practical Nurse (LPN), Physical Therapist, Occupational Therapist, Speech Therapist, Registered Dietician, etc.;
- Direct service workers, such as Day Habilitation Program providers, Person-Centered Support Workers, Respite workers, Supported Employment providers, and LPN's responsible for habilitation programs when the member receives 8 hours or more nursing in one day;
- Service providers from other systems such as the local education agency/public schools, Division of Rehabilitation Services (DRS), or Birth to Three (provided that no duplication of service exists);
- Family Based Care Specialist (when member resides in a Specialized Family Care Home); and
- Advocate (when applicable).

All members of the IDT must sign the IPP signature sheet and indicate their participation in the meeting and should sign indicating agreement or disagreement with the IPP,

If the member or their legal representative is in disagreement with the IPP, then the IPP is not valid.

The Service Coordinator assumes the role of facilitator and coordinator for the meeting; however, the team is directed by the member, if medically and behaviorally able, utilizing a person-centered approach to planning.

513.8.2 Frequency of IDT Meetings and IPP Development

513.8.2.1 Seven Day IDT Meeting

This meeting is mandatory when a member receives an I/DD Waiver slot. This is the initial meeting that occurs within the first 7 days of admission/intake by a new provider agency and must include I/DD Waiver services as well as other support services a member needs to live successfully in the community. This IPP document must reflect a full range of planned services: Medicaid, non-Medicaid and natural supports. This meeting must be documented on the Initial IPP (WV-BMS-I/DD-4) by the member's Service Coordinator. If services can be finalized at this meeting and a full range of planned services are documented, then the Thirty Day IDT meeting will not be necessary.

513.8.2.2 Thirty Day IDT Meeting

The Initial IPP must be finalized within 30 days. The resulting IPP (WV-BMS-I/DD-5) completed by the member's service coordinator identifies the comprehensive array of services necessary to fully support the I/DD Waiver program member. This document must be reviewed annually and at least every 180 days.

513.8.2.3 Transfer/Discharge IDT Meeting

This meeting is held when a program member transfers from one I/DD Waiver provider to another, chooses a different service delivery option or when the member no longer meets medical or financial eligibility. The transfer-from agency is responsible for coordinating the meeting and documenting the transfer. The member or their legal representative, as well as the transfer-to agency, must agree to the transfer. The transfer-from agency must send the resulting IPP to the transfer-to agency within 14 days. The transfer-from agency must also send a Member Transfer/Discharge Form (WV-BMS-I/DD-10) to the ASO within 7 days. If the resulting IPP is found to be not valid because necessary team members did not attend or necessary services were not addressed during the transfer, then the authorizations may be rolled back to the transfer-from agency until a valid IPP is held.

When a member transfers from one residential provider to another or from one day setting to another, a 7 day IDT meeting must occur to outline the services and supports the member needs to successfully access the new setting and services. A thirty day IDT must occur to finalize these services. The Service Coordinator must transfer the member in the CareConnection® by the effective date of the transfer.

A member may choose to direct their own services at any time through either of the Participant-Directed Service Options (AwC or *Personal Options)* by completing a Freedom of Choice Form (WV-BMS-I/DD-2). The Service Coordinator will enter the information into the CareConnection® within 2 days of receipt and schedule a Transfer/Discharge IDT meeting. At this meeting, services that can be self-directed will be referred to the chosen Participant-Directed Service agency and a participant-direct budget will be developed while all Traditional Services will remain with the I/DD Waiver provider(s).

A member may choose to stop directing their own services at any time by completing a Freedom of Choice Form (WV-BMS-I/DD-2). The Service Coordinator will enter the information into the CareConnection® within 2 days of receipt and schedule a Transfer/Discharge IDT meeting. At this meeting, services that were self-directed will be referred to the chosen Traditional Service agency and a Traditional service budget will be developed.

See Section 513.6 for valid reasons for discharge of a member from I/DD Waiver Services

513.8.2.4 Critical Juncture IDT Meeting

This meeting is held as soon as possible when there is a significant change in the member's assessed needs and/or planned services. A Critical Juncture may be the result of a change in

the member's medical/physical status, behavioral status or availability of natural supports. The IPP must be updated to include IDT recommendations, minutes and signatures of all IDT members indicating their attendance and agreement or disagreement.

A face-to-face meeting must be held under any of the following circumstances:

- All team members do not agree with services or service mix;
- When a new goal will be implemented for the member;
- The team is discussing implementation of a Positive Behavior Support plan, where one was not previously required;
- The member changes residential setting (example: moves from Natural Family to ISS);
- The member who lives in an ISS, Group Home or Specialized Family Care Home moves to a different location;
- The member goes into crisis placement;
- The member has a change in legal representative status;
- The primary caregiver changes or passes away;
- The member elects to change Service Delivery Model;
- The member receives a new service not previously received.

See Section 513.6 for appropriate reasons for discharge of a member from I/DD Waiver Services.

513.8.2.5 Annual, Quarterly and Six-Month IDT Meetings

The IDT must meet up to 30 days prior to the member's annual anchor date to develop the IPP. The effective date of the annual IPP will remain the annual anchor date even if the IPP was held 30 days earlier. The anchor date sets the clock for scheduling all subsequent IPPs. The IPP must be reviewed and approved by the IDT at least every 90 days unless otherwise specified in the plan, but shall not exceed 180 days. The IPP must be reviewed at critical juncture meetings. Medley Class Members are required to have IDT meetings every quarter, however, the Medley Advocate may choose to only attend the Annual and Six-Month IDT meetings.

513.9 DESCRIPTION OF SERVICE OPTIONS

Two service options are offered in the I/DD Waiver:

1. Traditional Service Option
2. Participant-Directed Service Option (as provided by an Agency with Choice Model or the *Personal Options* Financial Management Service)

The Traditional Service Option is one of the delivery systems offered through the I/DD Waiver. A member has the option to choose all of their services through the Traditional Service Option or a combination of traditional services and the 4 participant-directed services. The 4 services available through the Participant-Directed Option are Person-centered Supports, Respite, Transportation and Goods & Services. All other requested services must be purchased through the Traditional Service Option.

The services available through the Traditional Service Option are fully described in Section 513.9.1.

The Participant-Directed Service Option is the other service delivery system offered through the I/DD Waiver. This system provides each member with the opportunity to exercise choice and control over the participant-directed services they choose and the individuals and organizations who provide them (employer authority); and/or how the portion of their individualized budget associated with participant-directed services (i.e., their participant-directed budget) is spent (budget authority). The participant-directed services over which members have the opportunity to exercise choice and control are:

- Person-Centered Support Services
- Respite
- Transportation
- Participant-directed Goods and Services

The Participant-Directed Service Option is available to every eligible I/DD Waiver member except for members living in OHFLAC licensed residential settings.

There are 2 Financial Management Service (FMS) models available to members and/or their legal/non-legal representatives to support their use of participant-directed services. These are the Agency with Choice (AwC) FMS model and the *Personal Options* FMS model. Under the AwC model, the I/DD Waiver provider serves as the fiscal agent and the member and/or their legal/non-legal representative along with the AwC provider serve as co-employers. Under the *Personal Options* model, *Personal Options,* serves as the fiscal agent and the member and/or their legal/non-legal representative serve as the employer of record.

Under the AwC FMS model, the member and/or their legal/non-legal representative and the I/DD Waiver provider are co-employers of the Qualified Support Workers for the member. The AwC FMS and the member and/or their legal/non-legal representative are responsible for managing the receipt and distribution of individuals' participant-directed budget funds. The AwC has the responsibility for processing and paying Qualified Support Workers' payroll and vendors' invoices for approved participant-directed goods and services. Together the AwC provider and the member and/or their legal/non-legal representative decide who provides orientation and training to the member's Qualified Support Workers. It may be the AwC provider, the member and/or their legal/non-legal representative or a combination of both.

Under the *Personal Options* FMS model, the member or their legal/non-legal representative is the employer of record of the Qualified Support Workers they hire directly. *Personal Options* acts as the employer agent to the employer of record who is either the member or their legal/non-legal representative. *Personal Options* is responsible for managing the receipt and distribution of individuals' participant-directed budget funds, verifying qualifications of workers, processing and paying Qualified Support Workers' payroll and vendors' invoices for approved participant-directed goods and services, providing orientation on enrolling with and using the

Personal Options FMS and employer skills training to members and representatives, as appropriate.

A member may choose to direct their own services at any time through either of the Participant-Directed Service Options (AwC or *Personal Options)* by completing a Freedom of Choice Form (WV-BMS-I/DD-2). The Service Coordinator will enter the information into the CareConnection® within two (2) days of receipt and schedule a Transfer/Discharge IDT meeting. At this meeting, services that can be self-directed will be referred to the chosen Participant-Directed Service agency and a participant-direct budget will be developed while all Traditional Services will remain with the I/DD Waiver provider(s).

A member may choose to stop directing their own services at any time by completing a Freedom of Choice Form (WV-BMS-I/DD-2). The Service Coordinator will enter the information into the CareConnection® within two (2) days of receipt and schedule a Transfer/Discharge IDT meeting. At this meeting, services that were self-directed will be referred to the chosen Traditional Service agency and a Traditional service budget will be developed.

These two options for Financial Management for participant-directed services, Agency with Choice and *Personal Options* are more fully described and defined in Section 513.9.2.

513.9.1 Traditional Service Options

The Traditional Service Option is available to every member enrolled in the I/DD Waiver. These services are available through I/DD Waiver providers after being determined as necessary and appropriate for the I/DD Waiver member. The I/DD Waiver provider has employer authority as well as fiscal responsibility for the services listed on the member's IPP. These services are provided in natural settings where the member resides and participates in community activities.

513.9.1 Behavior Support Professional: Traditional Option

Procedure Code: T2025

Service Units: Unit = 15 minutes

Prior Authorization: All units of service must be prior authorized before being provided. Prior authorizations are based on assessed need. Services must be within the member's individualized budget.

Site of Service: This service may be provided in the member's family residence, a Specialized Family Care Home, a licensed group home, any ISS, a licensed day program facility, crisis sites, public community locations and a member's supported work site.

Definition of Service:

This service is **ONLY** provided to members who exhibit 1 or more of the following:

- Member must exhibit documented maladaptive behaviors on the current Inventory for Client and Agency Planning (ICAP) with severity level of "very serious," or "extremely serious" in at least 1 of the following categories: Hurtful to Self, Hurtful to Others, and/or Destructive to Property; AND/OR

- Member must have current documented severe maladaptive behaviors that are Hurtful to Self, Hurtful to Others, and/or Destructive to Property, that have occurred since last ICAP was administered. These behaviors must be documented through a current Functional Assessment, current behavior data documentation, and/or WV IMS incident reports; AND/OR

- Member must have a documented history of maladaptive behaviors within the past year that have resulted in severe outcomes (i.e.-possible incarceration, life-threatening to member/others, arson/fire-setting, sexual assault). These behaviors must be documented through a current Positive Behavior Support Plan, current Functional Assessment, or other documentation that supports the maladaptive behavior(s) have occurred within the past year.

A Positive Behavior Support Plan can only be written by an individual who has met the Agency Staff Qualifications as a Behavior Support Professional.

In order to qualify to train others using an approved curriculum, an individual must meet 1 of the following 3 criteria:

- Be the developer of an approved training as indicated on the submitted application;
- Be able to provide documentation that certifies completion of an approved training course (though not necessarily the course for which they are the trainer);
- Be a Board Certified Behavior Analyst or Assistant and have documentation certifying completion of the facilitated Overview of Positive Behavior Support.

The Behavior Support Professional must perform the following activities for those members who meet the criteria in section 513.9.1.1 and who are prior-authorized for this service:

- Complete a Functional Assessment to identify targeted maladaptive behaviors;
- Create Positive Behavior Support plans to meet Association for Positive Behavior Support standards of practice;

- Provide training to direct care staff who will implement the plan (i.e. family, person-centered support workers, facility-based day habilitation workers, supported employment providers, crisis workers, and respite workers);
- Evaluate/monitor the effectiveness of the Positive Behavior Support plan through analysis of programming results.

The BSP may perform all of the services listed under the Therapeutic Consultant definition, as well as the following services for those members who meet the criteria in section 513.9.1.1 and who are prior-authorized for this service:

- Train direct care workers in all aspects of PBSPs implementation(i.e., person- centered support workers, facility-based day habilitation workers, supported employment and respite workers);
- Assess, evaluate and monitor the effectiveness of PBSPs;
- Collect and evaluate data and completes a functional assessment around targeted behaviors to generate a recommendation for a Positive Behavior Support plan or to generate a Positive Behavior Support plan;
- Collaborate with Therapeutic Consultant(s) from other agency(s) to ensure that positive behavior support strategies are consistently applied across all environments;
- Facilitate person-centered planning as a component of the Positive Behavior Support plan;
- Present proposed restrictive measures to the I/DD Waiver provider's Human Rights Committee if no other professional is presenting the same information regarding the member;
- Attend and participate in IDT meetings and the annual assessment of functioning for eligibility conducted by ASO if requested by the member or their legal representative.
- May provide on-site training to the support staff in behavior/crisis situations.
- May bill for phone consultation during behavioral crisis situations.
- May bill for developing/updating the behavioral crisis section of the member's crisis plan if a Therapeutic Consultant is not performing this function.
- May verify data compiled by all Person-Centered Support staff for accuracy.
- May bill for attendance of and contribution to Futures Planning sessions, including PATHs and MAPs.

A Positive Behavior Support Plan can only be written by an individual who has met the Agency Staff Qualifications as a Behavior Support Professional.

Documentation:
A detailed progress note or evaluation report for each service is required. Documentation must include all of the items listed below:

- Member's Name
- Service Code

- Date of service
- Start time
- Stop time
- Total time spent
- Analysis of the data collected or problem identified
- Clinical outcome of the service provided
- Plan of intervention as the result of the analysis
- Signature and credentials of the agency staff

Limitations/Caps:

- The amount of service is limited by the member's individualized budget**.**
- The annual budget allocation may be adjusted (increased or decreased) only if changes have occurred regarding the member's assessed needs.
- 960 units/240 hours per member's annual IPP year in combination with Therapeutic Consultant services.
- Member is limited to 1 BSP.
- If the member receives direct care services from more than 1 I/DD Waiver provider, the member/legal representative is responsible for choosing which provider will provide BSP services.
- Agency staff providing BSP services may not be an individual who lives in the member's own residence or family residence.
- If the assigned BSP is unavailable due to an emergency or illness another BSP or TC may provide services in their absence.
- Direct care services provided by the BSP must be billed utilizing the appropriate direct care service code.
- BSP services may only be billed 30 days prior to discharge for a member or applicant being discharged from a state institution, a medical hospital, rehabilitation hospital, a psychiatric facility, nursing home, ICF/IID or another WV waiver program for planning purposes.
- BSP services may not be billed for traveling to complete BSP activities.
- BSP services cannot be billed for completing administrative activities to include these listed below.
    - Human Resources activities such as staff supervision, monitoring, and scheduling.
    - Routine review of a member's file for quality assurance purposes.
    - Staff meetings for groups or individuals.
    - Monitoring of group home (fire drills, hot water heater temperature checks, etc.).
    - Filing, collating, writing notes to staff.
    - Phone calls to staff.
    - Observing staff while training individuals without a clinical reason.
    - Administering assessments not warranted or requested by the member or their legal representative.

- Making plans for a parent for a weekend visit.
- Working in the home with providing direct care staff coverage.
- Sitting in the waiting room for a doctor or medical appointment.
- Conducting a home visit routinely and without justification—only service coordinators are required to make monthly home visits.

Agency Staff Qualifications:
In addition to meeting all requirements in Section 513.2.2.1, 513.2.2.1.1, 513.2.2.1.2 and 513.2.2.1.3, agency staff providing BSP services must meet at least 1 of the standards listed below.

- Be a Board Certified Assistant Behavior Analyst (BCaBA) Certificate-Bachelor's degree, 1 year professional experience working with individuals with I/DD and completion of the facilitated 3-hour overview of Positive Behavior Support created by the West Virginia – Association for Positive Behavior Support (WV-APBS) Network; or
- Be a Board Certified Behavior Analyst (BCBA) Certificate-Master's degree, 1 year professional experience working with individuals with I/DD and completion of the facilitated 3-hour overview of Positive Behavior Support created by the West Virginia – Association for Positive Behavior Support (WV-APBS) Network; or
- Have a Bachelor of Arts (BA) or Bachelor of Science (BS) degree and 2 years professional experience in the I/DD field or a Master of Arts (MA) or Master of Science (MS) in a human services field and 1 year professional experience in the I/DD field and documented evidence of successful completion coursework/training as evidenced by completion of a training curriculum approved by the WV- APBS Network or by an approved state agency.

A Positive Behavior Support Plan can only be written by an individual who has met the Agency Staff Qualifications as a Behavior Support Professional.

513.9.1.1.2 Behavior Support Professional: Individual Program Planning: Traditional Option

Procedure Code: T2025-HT

Service Units: Unit = Event

Prior Authorization: All units of service must be prior authorized before being provided. Prior authorizations are based on assessed need and services must be within the member's individualized budget.

Site of Service: This service may be provided in the member's family residence, a Specialized Family Care Home, a licensed group home, any ISS, a licensed day program facility, crisis sites and public community locations. The meeting cannot begin at one location and then continue at another location.

Definition of Service:

This is a service that allows the BSP to attend a member's IDT meeting to present assessments or evaluations completed for purpose of integrating recommendations, training goals and intervention strategies into the member's IPP.

Individual Program Planning is the process by which the member and their IDT develop a plan based on a person-centered philosophy. The BSP participates in the IDT meeting for the purpose of review of assessments or evaluations, discussion of recommendations or individualized needs, identification of resources or methods of support, outlines of service options and training goals, and preparation of interventions or strategies necessary to implement a person-centered plan.

Documentation:

Documentation must include signature, date of service and the total time spent at the meeting on the member's IPP and a separate progress note must also be completed.

Limitations/Caps:

- The amount of service is limited by the member's individualized budget.
- The annual budget allocation may be adjusted (increased or decreased) only if changes have occurred regarding the member's assessed needs.
- 4 Events per member's annual IPP year.
- BSP may attend all planning meetings, either face-to-face or by teleconference, but in order to bill the IPP code, the professional must be physically present for the duration of IPP meeting. IPP cannot be billed for preparation prior or follow-up performed after the IPP meeting.
- This code is limited to the one BSP assigned to the member.
- Agency staff providing BSP services may not be an individual who lives in the member's own residence or family residence.

Agency Staff Qualifications:

In addition to meeting all the requirements in Section 513.2.2.1, 513.2.2.1.1, 513.2.2.1.2 and 513.2.2.1.3, agency staff must meet the qualifications defined in Section 513.8.1.1.

513.9.1.2 Crisis Services: Traditional Option

Procedure Code: T2034

Service Units: Unit = I hour

Prior Authorization: All units of service must be prior authorized before being provided. Prior authorizations are based on specific assessed needs and services must be within the member's individualized budget.

Under emergent circumstances which place the member's or others' health and safety at risk, Crisis Services may be immediately implemented without prior authorization up to a maximum of 72 hours.

Site of Service: This service may be provided in the member's family residence, a Specialized Family Care Home, a licensed group home, any ISS and public community locations.

Definition of Service:

The goal of this service is to respond to a crisis immediately, assess and stabilize the situation as quickly as possible. Crisis services provided by awake and alert staff are to be used if there is an extraordinary circumstance requiring a short-term, acute service that utilizes positive behavioral support planning, interventions, strategies and direct care. Except in emergent situations, this service requires prior authorization. This service is a 2:1 ratio (agency staff to member ratio). The additional agency staff person is available for assurance of health and safety in the respective setting. Crisis services include formal training, informal training and behavioral support.

Documentation:

A detailed progress note is required. If the Direct Support Service Log (WV-BMS-I/DD-07) is used, the service log and progress note must both be completed by all agency staff providing this service. Documentation must include all the items listed below.

- Member's Name
- Service code
- Date
- Start time
- Stop time
- Summary of the crisis service interventions
- Total time spent
- Signature of agency staff

Limitations/Caps:

- The amount of service is limited by the member's individualized budget.
- The annual budget allocation may be adjusted (increased or decreased) only if changes have occurred regarding the member's assessed needs.

- 336 units/336 hours per member's annual IPP year.
- May be provided concurrently with Service Coordination, Therapeutic Consultant, BSP Transportation and up to 2 hours of LPN nursing or RN nursing services per day.
- Person-Centered Supports, Facility-Based Day Habilitation, LPN when provided more than 2 hours a day, Respite and Supported Employment services may not be provided concurrently with this service.
- This service is not intended for use as emergency response for ongoing behavioral challenges.
- The agency staff to member ratio is 2:1.
- Agency staff providing Crisis services may not be an individual who lives in the member's own or family residence.

Agency Staff Qualifications:

All the requirements in Section 513.2.2.1, 513.2.2.1.1, 513.2.2.1.2 and 513.2.2.1.3 must be met.

513.9.1.3 Dietary Therapy: Traditional Option

Procedure Code: 97802-AE

Service Units: Unit = 15 minutes

Prior Authorization: All units of service must be prior authorized before being provided. Prior authorizations are based on assessed need and services must be within the member's individualized budget.

Site of Service: This service may be provided in the member's family residence, a Specialized Family Care Home, a licensed group home, any ISS, a licensed day program facility, crisis sites and public community locations.

Definition of Service:

Dietary Services are provided directly to the member by an agency staff that is a licensed, registered dietitian and may include:

- Nutritional assessment and therapy for diseases that have a nutrition component;
- Preventive health and diet assessment;
- Weight management therapy;
- Design of menus;
- Screening;
- Assessments;
- Planning and reporting;
- Direct therapeutic intervention;

- Consultation or demonstration of techniques with other service providers and family members; and
- Attending and participating in IDT meetings and the annual assessment of functioning for eligibility conducted by the ASO if requested by the member or legal representative

Direct care services provided by the dietitian must be billed utilizing the appropriate direct care procedure code.

Documentation:

A detailed progress note or evaluation report for each service is required. Documentation must include all the items listed below.

- Member's Name
- Service code
- Date of service
- Start time
- Stop time
- Total time spent
- Description of the service provided
- Assessment of progress or lack of progress
- Signature and credentials of the agency staff

Limitations/Caps:

- The amount of service is limited by the member's individualized budget.
- The annual budget allocation may be adjusted (increased or decreased) only if changes have occurred regarding the member's assessed needs.
- 416 units/104 hours available per member's annual IPP year in combination with Physical Therapy and Occupational Therapy.
- The agency staff to member ratio is 1:1.
- Agency Staff providing Dietary Therapy services may not be an individual who lives in the member's home.

Agency Staff Qualifications:

All the requirements in Section 513.2.2.1, 513.2.2.1.1, 513.2.2.1.2 and 513.2.2.1.3 must be met in addition to the following requirement:

- Agency Staff must be a licensed Dietitian in the State of WV.

If the Dietitian is contracted by the I/DD Waiver provider to provide services in their specialty and is also enrolled as a WV Medicaid provider, either individually or as part of a group, then the Dietitian only needs to be licensed to practice in the State of WV.

513.9.1.4 Electronic Monitoring/Surveillance System and On-Site Response: Traditional Option

Procedure Code: S5161-U1 1:1 ratio
S5161-U2 1:2 ratio
S5161-U3 1:3 ratio
S5161-U4 1:4 ratio

Service Units: Unit = 1 Hour
